## I) Introduction

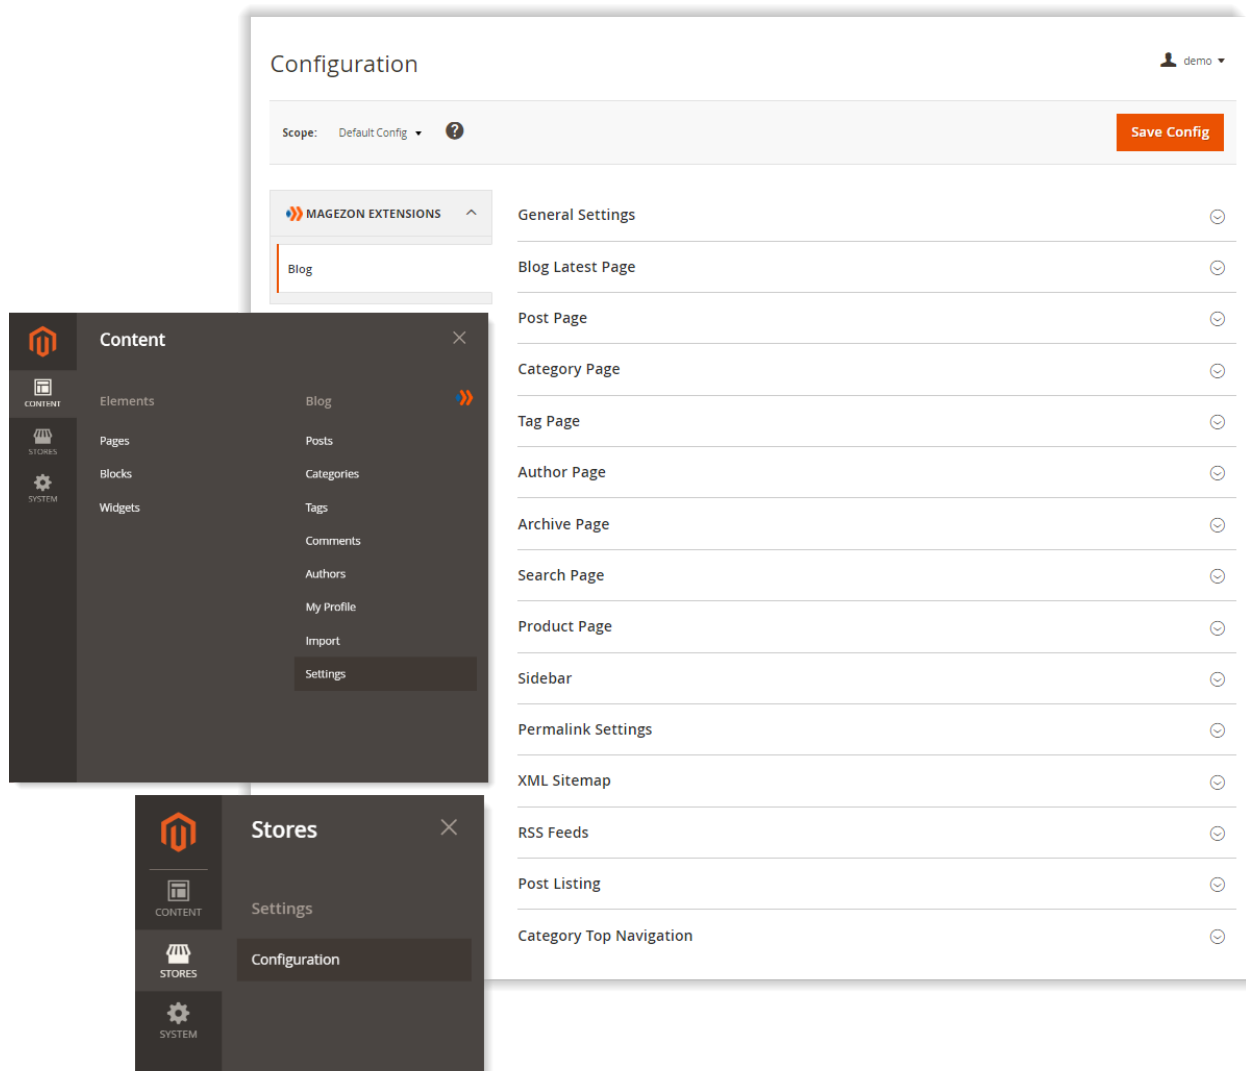

**Blog Extension for Magento 2** appeals to a large number of target audiences with the help of dynamic content solutions. Set up a Magento 2 blog for your online store without third-party platforms like Wordpress. Plus, enhance your site ranking involving best SEO practices.

- Customizable Blog Pages Layout
- Perfect Blog Navigation
- Full Control Over Posts
- Personalize Blog Articles
- Advanced SEO Performance
- Multiple Stores & Languages
- Comments Management
- Socializing Function
- Related Blocks: Related Posts, Related Products
- Responsive Layouts
- Faster Blog Pages On Mobile (AMP)
- Blog Import & Integration
- Compatible with [Magezon Page Builder](#), Ultimo and Porto theme

## II) Configuration

From the backend, navigate **Stores > Settings > Configuration** or **Content > Blog > Settings**. In the left panel, span **MAGEZON EXTENSIONS** and click **Blog**.

In the right section, you will find all the general configurations of the extension.

## 1. General Settings

### General Settings

**Current Version** 1.0.0  
[store view]

**Enable Blog** Yes  
[store view]

- **Title:** enter the title of the related products block.
- **Number of Products:** set how many products are displayed in the related products block.

### 3.7 Comments

⊖ Comments

Type [store view] Native Comment

Send email when there are new comments [store view] No

Need for Approval [store view] No

Allow Guest Comments [store view] Yes

Enable GDPR consent [store view] Yes

GDPR Consent Path [store view]

Eg: "/privacy-policy-cookie-restriction-mode". If field is not filled in, GDPR consent is disabled

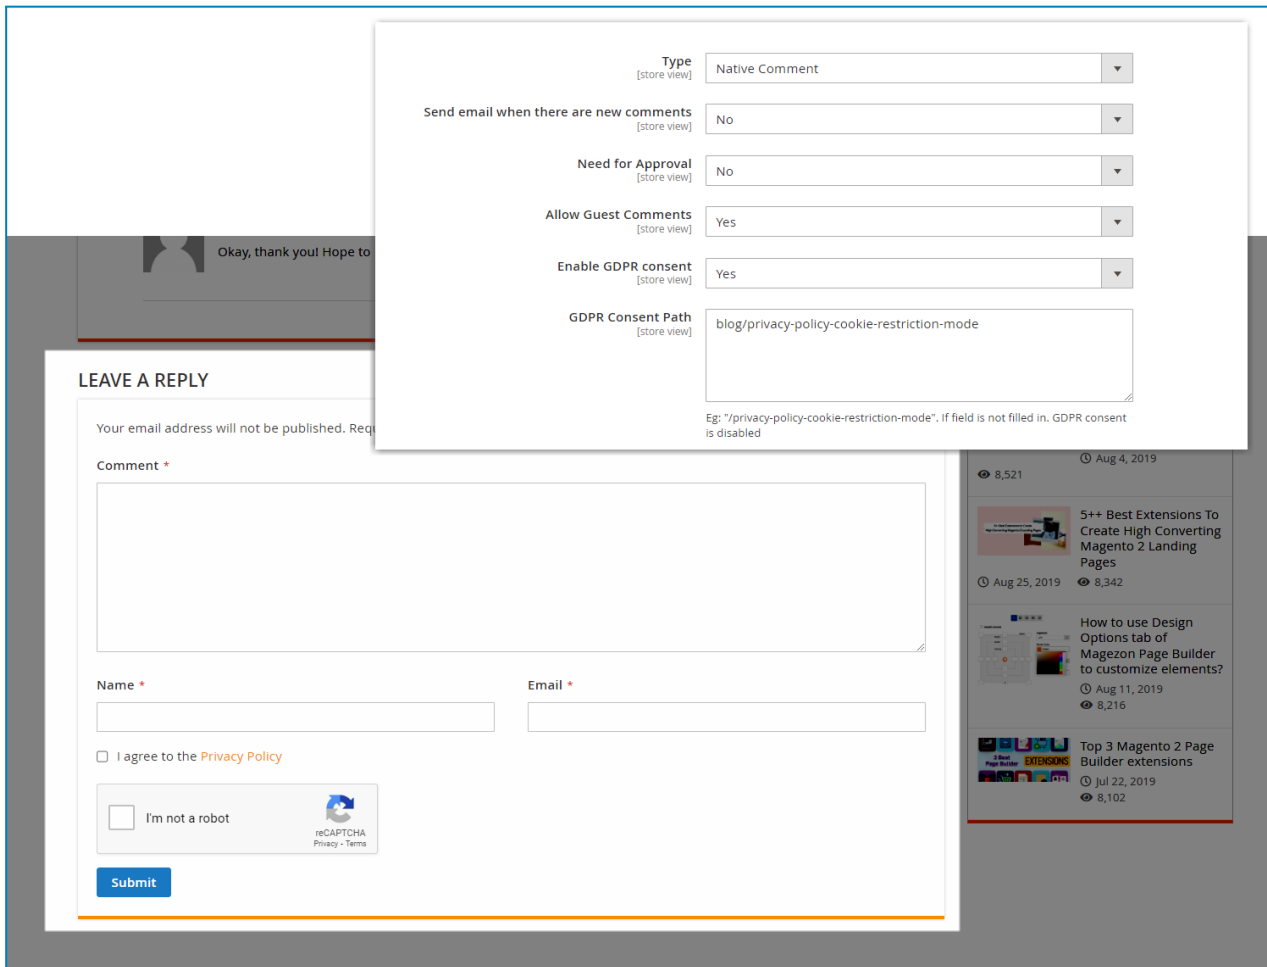

⊖ reCaptcha

reCaptcha Type [website] reCAPTCHA v2 ("I am not a robot")  Use system value

Go to Stores -> Configuration -> Security -> Google reCAPTCHA Storefront to config Google API Website Key and Google API Secret Key

- **Type:** choose the type of comment form displayed on the post page.
  - **Disable Completely:** hide the comment form on the frontend. If you select this type, **Send email when there are new comments**, **Enable GDPR consent**, and **GDPR Consent Path** does not work.
  - **Native Comment:** is the comment system that comes natively with our Blog extension.
    - ❖ **Send email when there are new comments:** send a notification email to the author when there is a new comment on the post.
    - ❖ **Need for Approval:** decide if the comments need to be approved by the admin to be displayed on the post page.
    - ❖ **Allow Guest Comments:** allow guests to comment on the post.

- ❖ **Enable GDPR consent:** choose whether to display the checkbox “I agree to the Privacy Policy” in the comment form.
- ❖ **GDPR Consent Path:** enter the path of the URL that will be attached to the Privacy Policy text.

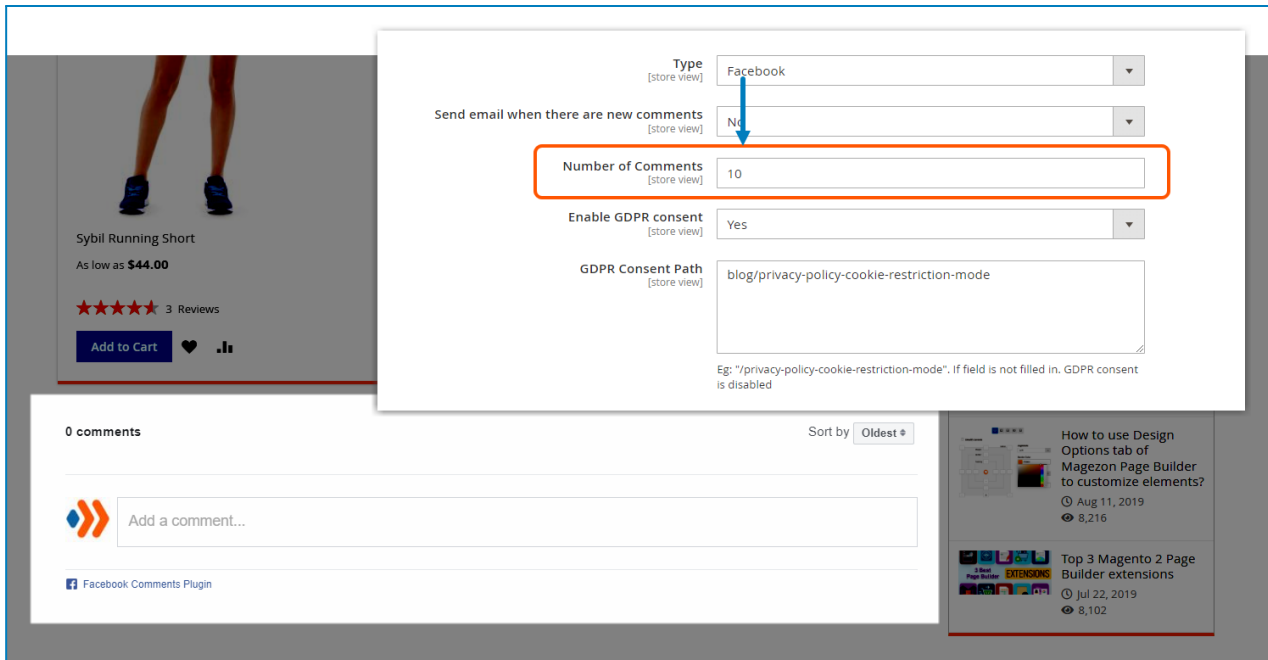

The image shows a configuration window for comment settings overlaid on a comment form. The configuration window includes the following fields:

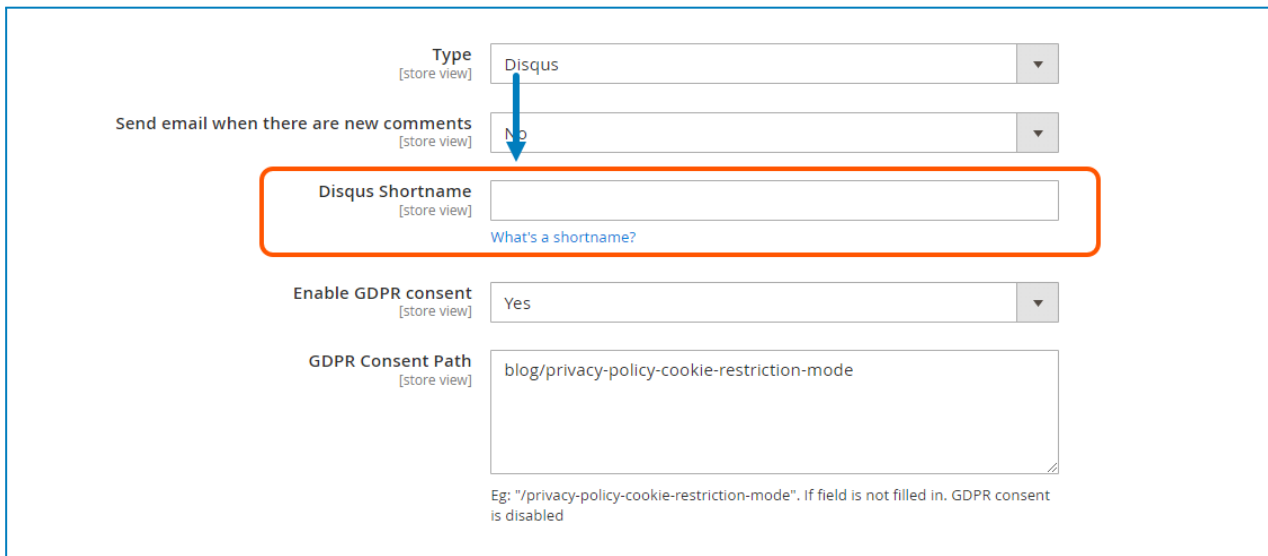

- Type** (Native Comment)
- Send email when there are new comments** (No)
- Need for Approval** (No)
- Allow Guest Comments** (Yes)
- Enable GDPR consent** (Yes)
- GDPR Consent Path** (blog/privacy-policy-cookie-restriction-mode)

Below the configuration window, the comment form is visible. It includes a text area for the comment, fields for Name and Email, a checkbox for "I agree to the Privacy Policy", a reCAPTCHA widget, and a Submit button. A note at the bottom of the configuration window states: "Eg: "/privacy-policy-cookie-restriction-mode". If field is not filled in. GDPR consent is disabled".

- **Facebook:** allow users to comment on the post using their Facebook account.
- ❖ **Number of Comments:** specify the number of comments to display.

- **Disqus:** allow users to comment on the post using Disqus.
  - ❖ **Disqus Shortname:** Enter your [Disqus shortname](#).

- **reCaptcha Type:** choose the type of reCaptcha to display on the comment form. Go to **Stores > Configuration > Security > Google reCAPTCHA Storefront** to configure Google API Website Key and Google API Secret Key.

## 4. Category Page

Category Page

**Posts per page**  
[store view]

**List Layout**  
[store view]  ▼

- **Posts per page:** set the number of posts displayed per page.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nam ac augue turpis. Nam quis magna ligula. In mauris neque, auctor vitae dapibus vel, ornare et nulla. ### How to Create Equal Height Columns?

Trang VT | October 4, 2019 | Magezon Page Builder Tutorial | 0 comments | 2,808 views | 5 Min read

Creating equal height columns is very important in web design but normally requires CSS to achieve. In Magento 2, this is not an exception. However, with Magezon Page Builder, creating layouts with equal height columns has become much easier and faster with no CSS needed. Curious? ...

## How to create mega menu in Magento 2

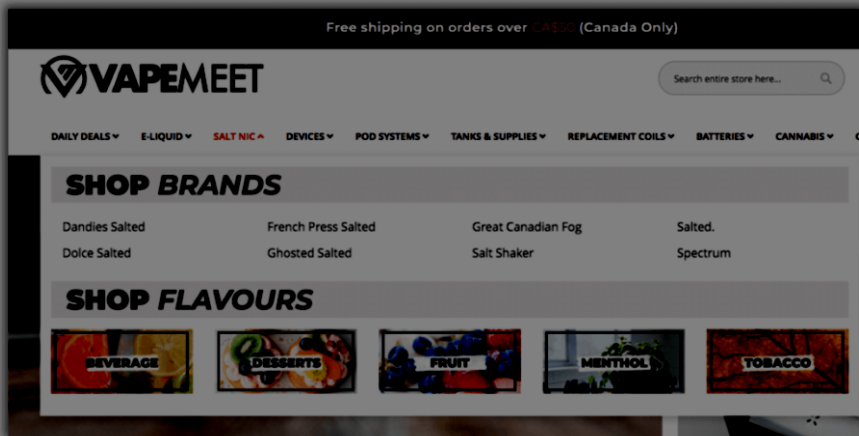

Hong HT | October 8, 2019 | Ninja Menus Tutorial | 1 Comment | 2,770 Views

What is a Magento 2 mega menu?  
 How the mega menu affects E-commerce?  
 How to create mega menu in Magento 2?  
 1. If you have coding skill  
 2. You have no idea about code  
 Final words

### What is a Magento 2 mega menu?

To know how to create mega menu in Magento 2, we must understand its definition.

A **mega menu** is a menu type with a drop down interface that appears while hovering over a link or defined area. This dropdown interface usually contains all options, categories of the website. Not all, when talking about mega menu, we all know it's a "big" one with anchor links, headings, images and be formed in complicated layout.

Mega menu example

- **Include Blog Categories:** choose whether to include the blog categories that will appear in the dropdown menu when users hover over the blog link.
- **Show Post Count:** choose to show post count next to the category name.
- **Maximal Depth:** specify how many layers of subcategories there are.

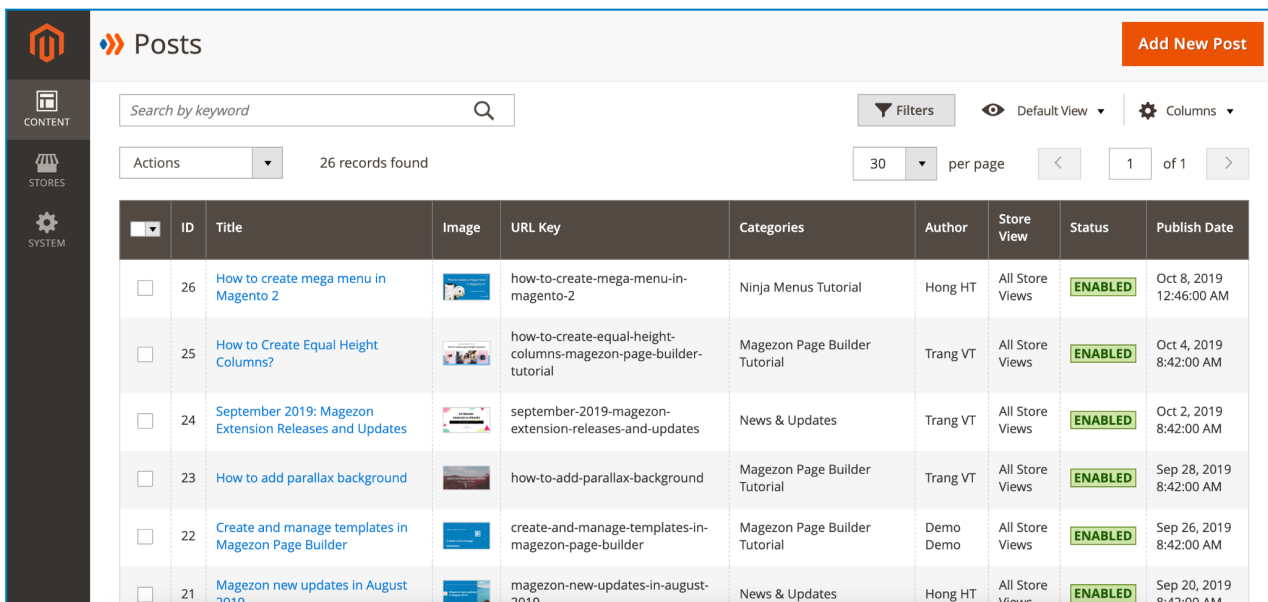

### III) Post

## 1. Post Grid

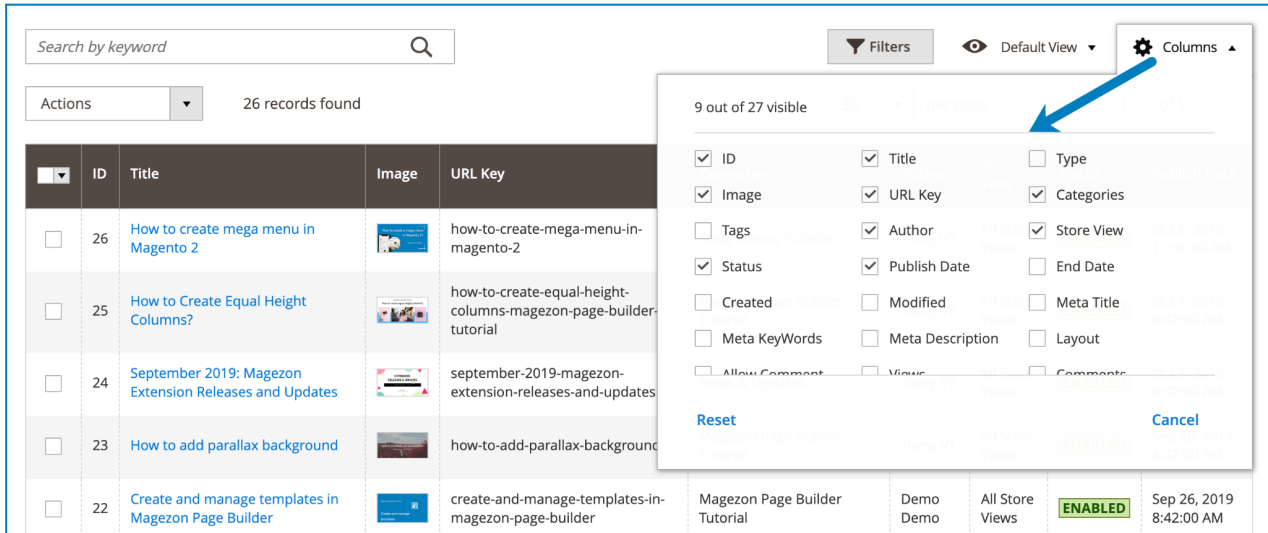

From the admin sidebar, go to **Content > Blog > Posts**:

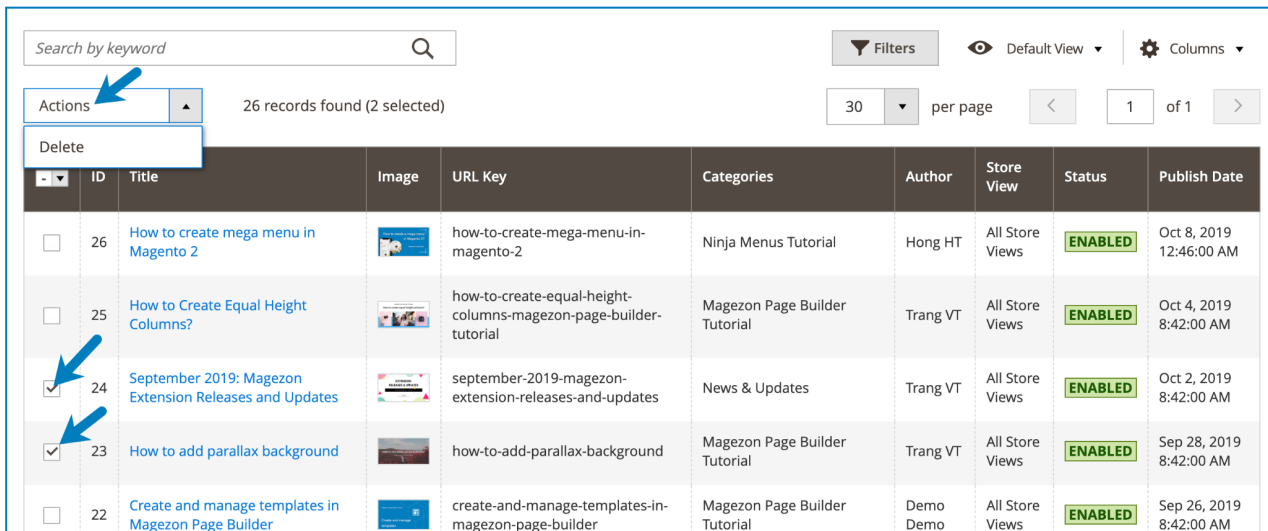

And you will see a grid that contains all the blog posts with related info:

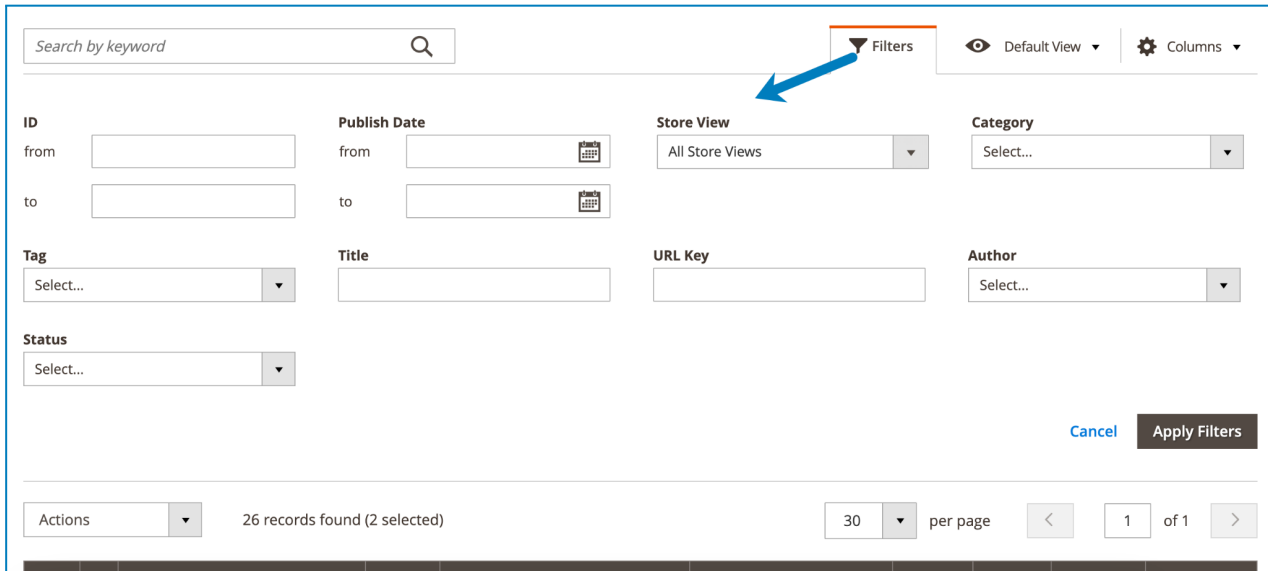

- To view all columns of the grid, click **Columns** drop-down above the grid. Tick the checkboxes of columns that you want to be visible in the grid. Untick the checkboxes of columns that you want to be invisible in the grid:

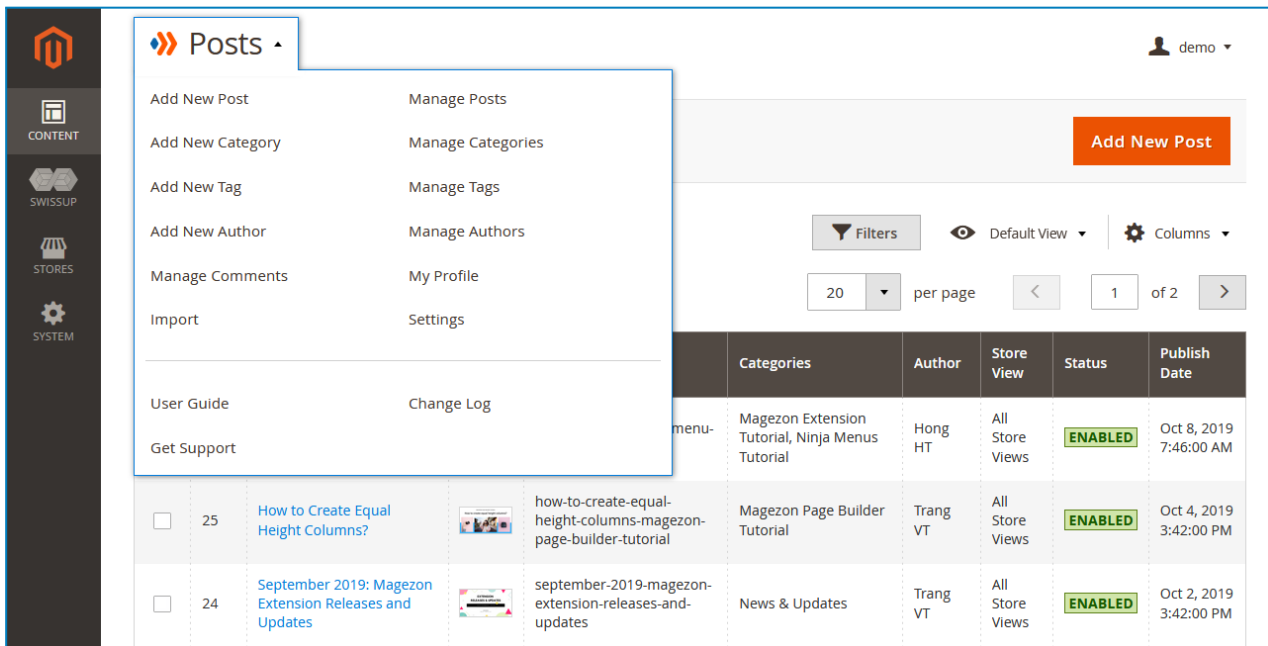

- Tick the checkboxes of corresponding posts in the first column, then click **Actions** drop-down above the grid to Delete these posts:

- You can filter posts by ID, Publish Date, Store View, Category, Tag, Title, URL Key, Author, and Status.

- Click **Posts** drop-down on the top left corner and you'll see the following options:

	Categories	Author	Store View	Status	Publish Date
menu-	Magezon Extension Tutorial, Ninja Menus Tutorial	Hong HT	All Store Views	ENABLED	Oct 8, 2019 7:46:00 AM
	Magezon Page Builder Tutorial	Trang VT	All Store Views	ENABLED	Oct 4, 2019 3:42:00 PM
	News & Updates	Trang VT	All Store Views	ENABLED	Oct 2, 2019 3:42:00 PM

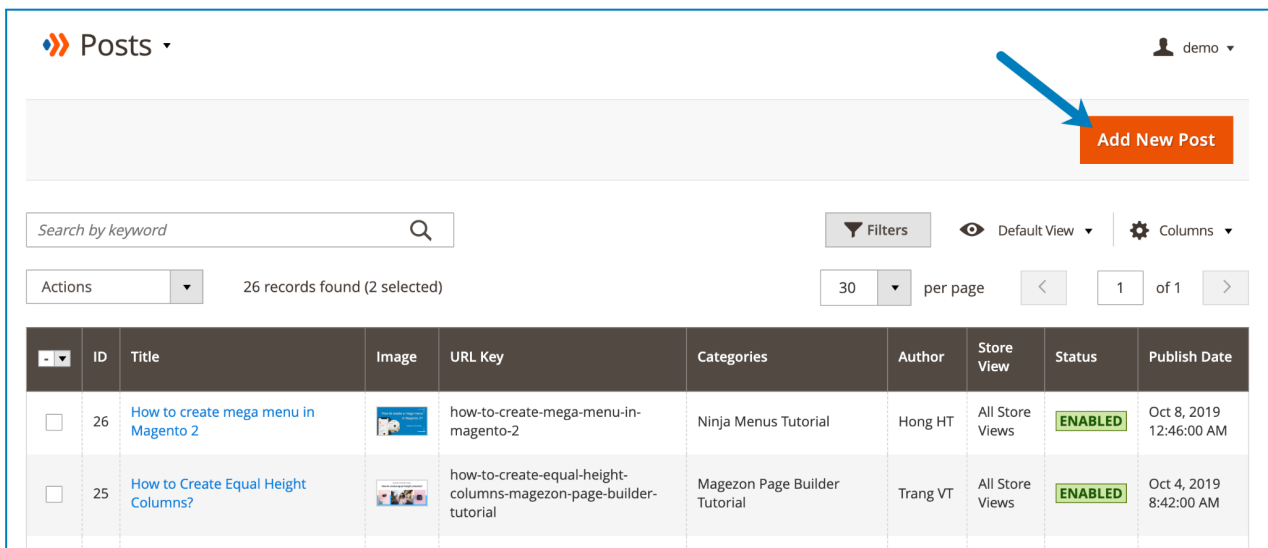

- **Add New Post:** add a new blog post.
- **Add New Category:** add a new category.
- **Add New Tag:** add a new tag.
- **Add New Author:** add a new author.

- **Manage Comments:** go to the comment listing page.
- **Import:** import blog posts from other blog modules.
- **Manage Posts:** go to the post listing page.
- **Manage Categories:** go to the category listing page.
- **Manage Tags:** go to the tag listing page.
- **Manage Authors:** go to the author listing page.
- **My Profile:** access your profile page.
- **Settings:** access the [extension's configuration](#).
- **User Guide:** access user guide of the extension.
- **Change Log:** view the extension's release notes.
- **Get Support:** contact for support via [ticket](#).

Please note that you can find this drop-down list in the [category edit page](#), [tag edit page](#), [comment edit page](#), [author edit page](#), [My Profile](#) page, and [import page](#) as well.

- To edit a post, click on the post title in the grid.

- To add a new post, click the **Add New Post** button on the top-right corner and you will be redirected to the [post's edit page](#).

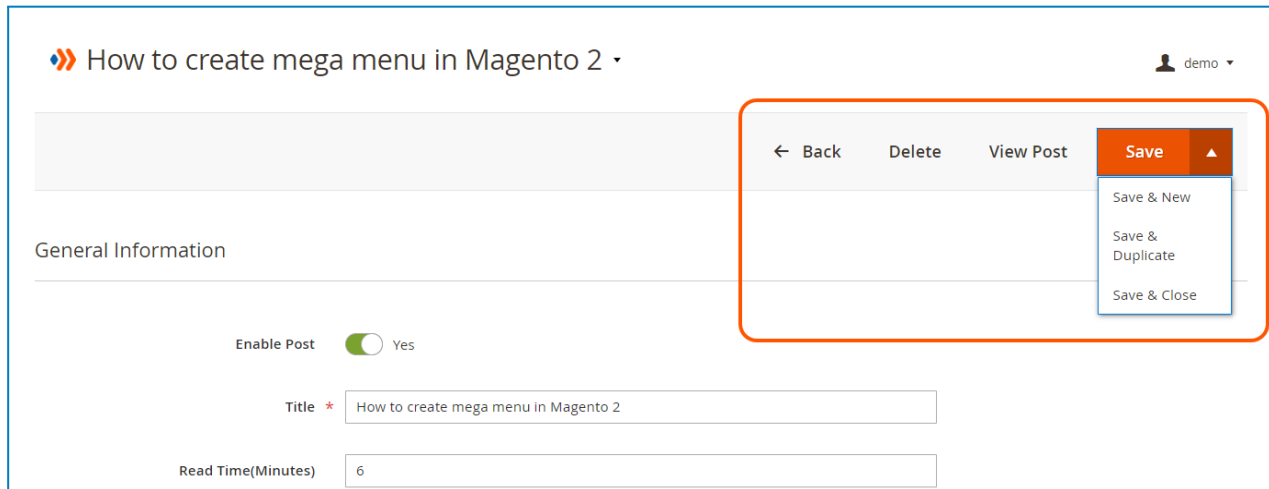

ID	Title	Image	URL Key	Categories	Author	Store View	Status	Publish Date

Posts Sort By

- **List Layout:** select a layout type to display posts on the category page.
- **Position:** enter a number that defines the position of the category in a category list.
- **Page Layout:** set the layout of the category page.
- **Include In Menu:** choose whether to include the category in the menu dropdown.
- **Posts Sort By:** sort the posts on the category page by Publish Date, Position, and Title.
  - ❖ **Publish Date:** sort newest to oldest.
  - ❖ **Position:** sort in ascending position order.
  - ❖ **Title:** sort in ascending (A to Z) alphabetical order.

The screenshot shows the LUMA Magento 2 blog interface. At the top left is the LUMA logo. A search bar on the top right contains the text "Search entire store here...". The main navigation menu includes "What's New", "Women", "Men", "Gear", "Training", "Sale", and "Blog". The "Blog" menu is expanded, showing sub-categories: "Magento Tutorial", "Magezon Extension Tutorial", "E-Commerce Tips", and "News & Updates". A blue arrow points from the "Blog" menu to the "Extension Comparison" sub-category. The breadcrumb trail reads "Home > Blog > Extension Comparison". The article title is "Extension Comparison". Below the title is a short paragraph: "We provide you with posts that compare extensions from different vendor so you can make your best choice." On the left side, there is a "SEARCH THE BLOG" section with a search input field and a "Search" button. Below that is a "CATEGORIES" section showing "Magento Tutorial (7)". The main content area features two featured articles. The first article is titled "5++ Best Extensions to Create High Converting Magento 2 Landing Pages" and includes an image of a woman at a computer. The second article is titled "3 Best Page Builder EXTENSIONS" and includes an image with various icons representing different page builders.

## 2.4 Category in Websites

Decide in which store views to display the category.

**Category in Websites**

Store View \* All Store Views

### How to determine your ecommerce marketing budget?

Hong HT | July 30, 2019 | E-Commerce Tips | 0 | 2,619

Marketing is a vital part of any business, and it is no different for E-commerce. However, you should leverage your expenses with your revenue. In reality, while it's easy to spend too little on marketing, it is also possible to spend too much. But how do you know whether you are in the right way ...

## 2. Author Edit Page

The edit page will open when you create, edit, or duplicate an author.

On the top of the edit page, you'll see the following buttons:

- **Back:** return to the author listing page.
- **Delete:** delete the author.
- **View Author:** view the author on the frontend.
- **Save:**
  - ❖ **Save:** save the author and stay on the page.
  - ❖ **Save & Duplicate:** save the author and duplicate it.
  - ❖ **Save & Close:** save the author and return to the author listing page.

The author edit page consists of 6 sections as follows:

Hong HT demo

- **Content:** enter a description of the author that is displayed on the author page.

The screenshot shows a blog author page for 'Hong HT'. At the top, there is a navigation menu with links for 'What's New', 'Women', 'Men', 'Gear', 'Training', 'Sale', and 'Blog'. Below the navigation, the breadcrumb trail reads 'Home > Blog > Hong HT'. The author's name 'Hong HT' is prominently displayed. To the left of the name is a profile picture of a person in a black hood. Below the name is a social media sharing bar with icons for Facebook, Twitter, LinkedIn, YouTube, Pinterest, Blogger, and Instagram. A bio box contains the text: 'Aliquam vitae dignissim nisi. Ut et feugiat ante. Pellentesque feugiat accumsan justo, vel elementum metus convallis eu. Curabitur porta, metus non sollicitudin finibus, ipsum massa tincidunt lacus, sed gravida mauris quam vitae elit. Duis ligula nisi, iaculis nec massa vitae, maximus tempor nunc. Morbi sed nulla ac ante consectetur maximus. Nunc pellentesque urna ut pellentesque accumsan. In imperdiet neque eu nisl porta, et cursus lorem convallis.' Below the bio, there is a featured article titled 'How to create mega menu in Magento 2' by Hong HT, dated October 8, 2019, with 6 comments, 2,773 views, and a 6-minute read time. The article snippet includes a thumbnail and the text: 'A totally new to Magento? Have no coding experience and be afraid of complex things? Don't know how to create a mega menu in Magento 2? Here we are to help! Use the intuitive drag and drop interface of Ninja Menus, everything will be done so quickly.' On the right side of the page, there is a search bar labeled 'SEARCH THE BLOG' with the placeholder text 'Search posts here...' and a red 'Search' button. Below the search bar, there is a 'CATEGORIES' section.

- **Short Content:** enter a short description of the author that is displayed on a post page.

not a tough question any more.

Then, why are you still hesitating? Get Ninja Menus today to save more time for your business.

## VIII) My Profile

Navigate to **Content > Blog > My Profile** for quick access to your profile page.

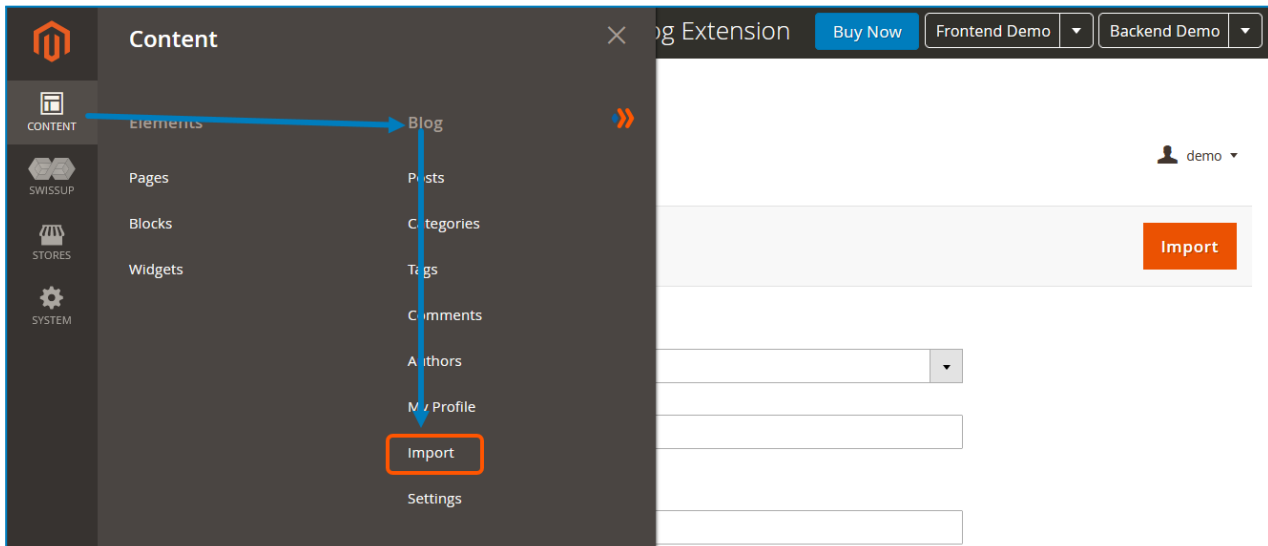

All the information here is the same as on the author edit page.

## IX) Import

Navigate to **Content > Blog > Import** to import blog posts from other vendors:

The import settings include:

» Import ▾
demo ▾

**Type \***

**Database Name \***   
Your SQL database name

**Database User Name \***   
Your SQL database User name

**Database Password \***   
Your SQL database Password

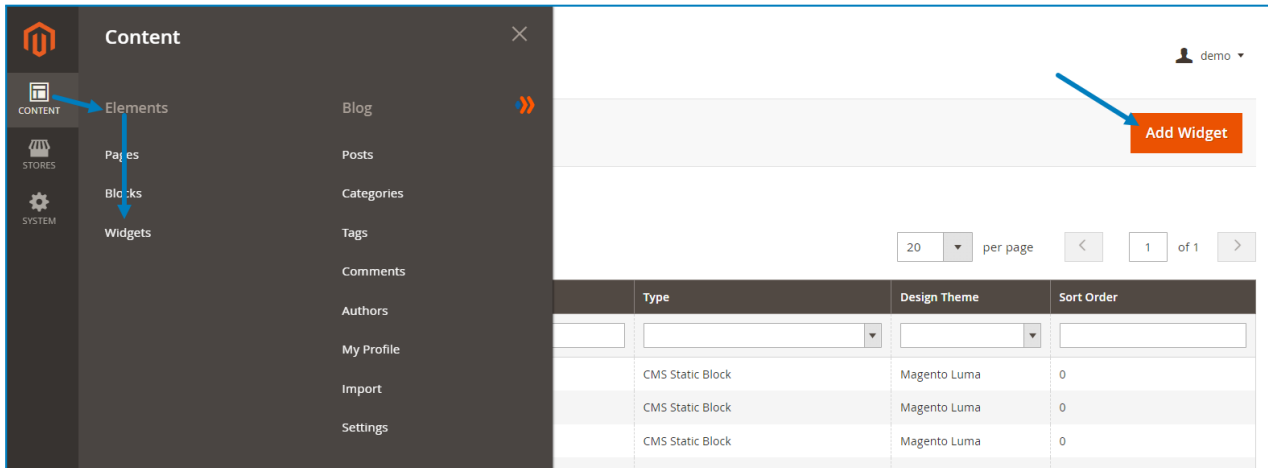

**Database Host \***   
Your SQL database Hostname

**Table Prefix**   
Your table prefix name

Select a vendor from the **Type** dropdown (including Aheadworks, Amasty, MageFan, Mageplaza, and Wordpress), then complete **Database Name**, **Database User Name**, **Database Password**, **Database Host**, and **Table Prefix**. Click the **Import** button on the top to finish the import.

## X) Widget

Go to **Content > Elements > Widget** and click **Add New Widget** button to add a new widget. The widget is used to place a list of posts in your desired position on your website.

	Type	Design Theme	Sort Order
	CMS Static Block	Magento Luma	0
	CMS Static Block	Magento Luma	0
	CMS Static Block	Magento Luma	0

In the widget Settings, select Blog Post List for **Type** field and your current theme for **Design Theme** field. Then click **Continue**.

**Post IDs**

Post ids which you want to show. Example: 1, 5, 8, 10,etc

**Featured Post**

**Number of Posts to Display**

**Box Padding**

**Disable Box Shadow**

**Disable Border**

- **Title:** enter the display title of the widget.
- **List Layout:** select a layout for the post listing (Slider, List - Fixed Thumbnail, List - Full Thumbnail, Grid, Masonry).
- **Grid Columns:** specify the number of columns for Grid and Masonry list layout.
- **Custom Class:** enter a custom class for the widget for further customization.
- **Categories:** select the categories that the posts you want to display belong to.

- **Post IDs:** enter the IDs of the posts you want to show (separated by comma).
- **Featured Post:** choose whether to show featured posts or not.
- Specify the **Number of Posts to Display.**
- **Box Padding:** set the widget box's padding.
- **Disable Box Shadow:** choose whether to hide the widget box shadow or not.
- **Disable Border:** choose whether to show the widget box border or not.

## 2.2 Post Settings

Decide whether or not to show post meta data.

Post Settings

Author Meta	Yes <input type="button" value="v"/>
Date Meta	Yes <input type="button" value="v"/>
Categories Meta	Yes <input type="button" value="v"/>
Comments Meta	Yes <input type="button" value="v"/>
Views Meta	Yes <input type="button" value="v"/>
Read Time Meta	Yes <input type="button" value="v"/>
Excerpt	Yes <input type="button" value="v"/>

## 2.3 OWLCarousel Settings

This section includes carousel settings for the Slider **List Layout**.

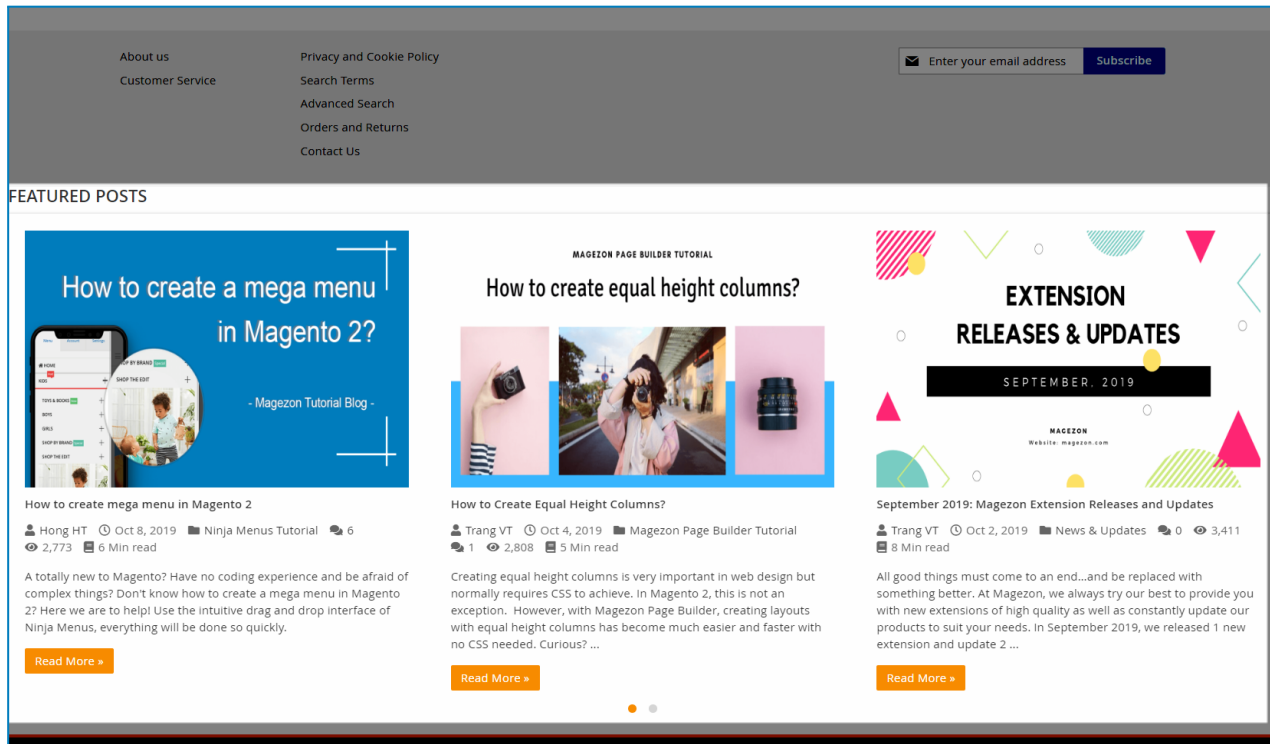

OwlCarousel Settings

Large Devices, Wide Screens(>=1200px)	<input style="width: 90%;" type="text" value="3"/>
Medium Devices, Desktops(<1200px)	<input style="width: 90%;" type="text" value="3"/>
Small Devices, Tablets(<992px)	<input style="width: 90%;" type="text" value="2"/>
Extra Small Devices, Phones(<768px)	<input style="width: 90%;" type="text" value="2"/>
Custom, iPhone Retina(<544px)	<input style="width: 90%;" type="text" value="1"/>
Auto Play	<input type="button" value="No"/> ▼
Next/Prev Buttons	<input type="button" value="No"/> ▼
Dots Navigation	<input type="button" value="Yes"/> ▼
Right To Left	<input type="button" value="No"/> ▼
Loop	<input type="button" value="No"/> ▼
Margin	<input style="width: 90%;" type="text" value="15"/>

- Specify the number of posts per slide for different devices with **Large Devices, Wide Screens(>=1200px), Medium Devices, Desktop(<1200px), Small Devices, Tablets(<992px), Extra Small Devices, Phones(<768px), Custom, iPhone Retina9<544px)**.
- **Auto Play**: decide whether to auto play the slider.
- **Next/Prev Button**: choose to show or hide the next and previous arrows navigation.
- **Dots Navigation**: choose to show or hide the dots navigation.

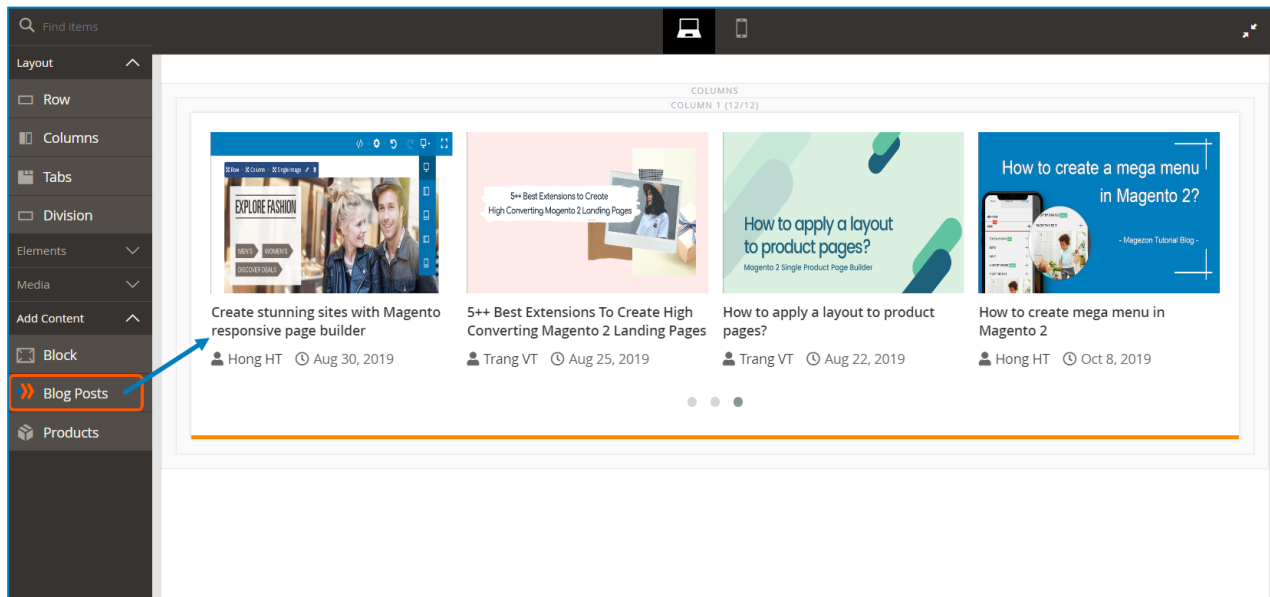

- **Right To Left:** choose whether the slider slides from right to left.
- **Loop:** choose whether the slider will loop.
- **Margin:** set the spacing between posts in a slide.

Let's see how a post widget looks like on the frontend:

## XI) Insert Posts in Magento Page Builder

If you are using Magento Page Builder, you will see a new content type named **Blog Posts** in the list of content types. Add this content type to the builder section to display a list of posts.

The settings for Blog Posts content type is similar to the widget settings:

### Blog Posts Option
