I) Introduction

PDF is a plugin of Magento 2 Blue Form Builder. Please pre-install [Blue Form Builder](#). After that, install **PDF** plugin and it will be integrated with existing Blue Form Builder on your website.

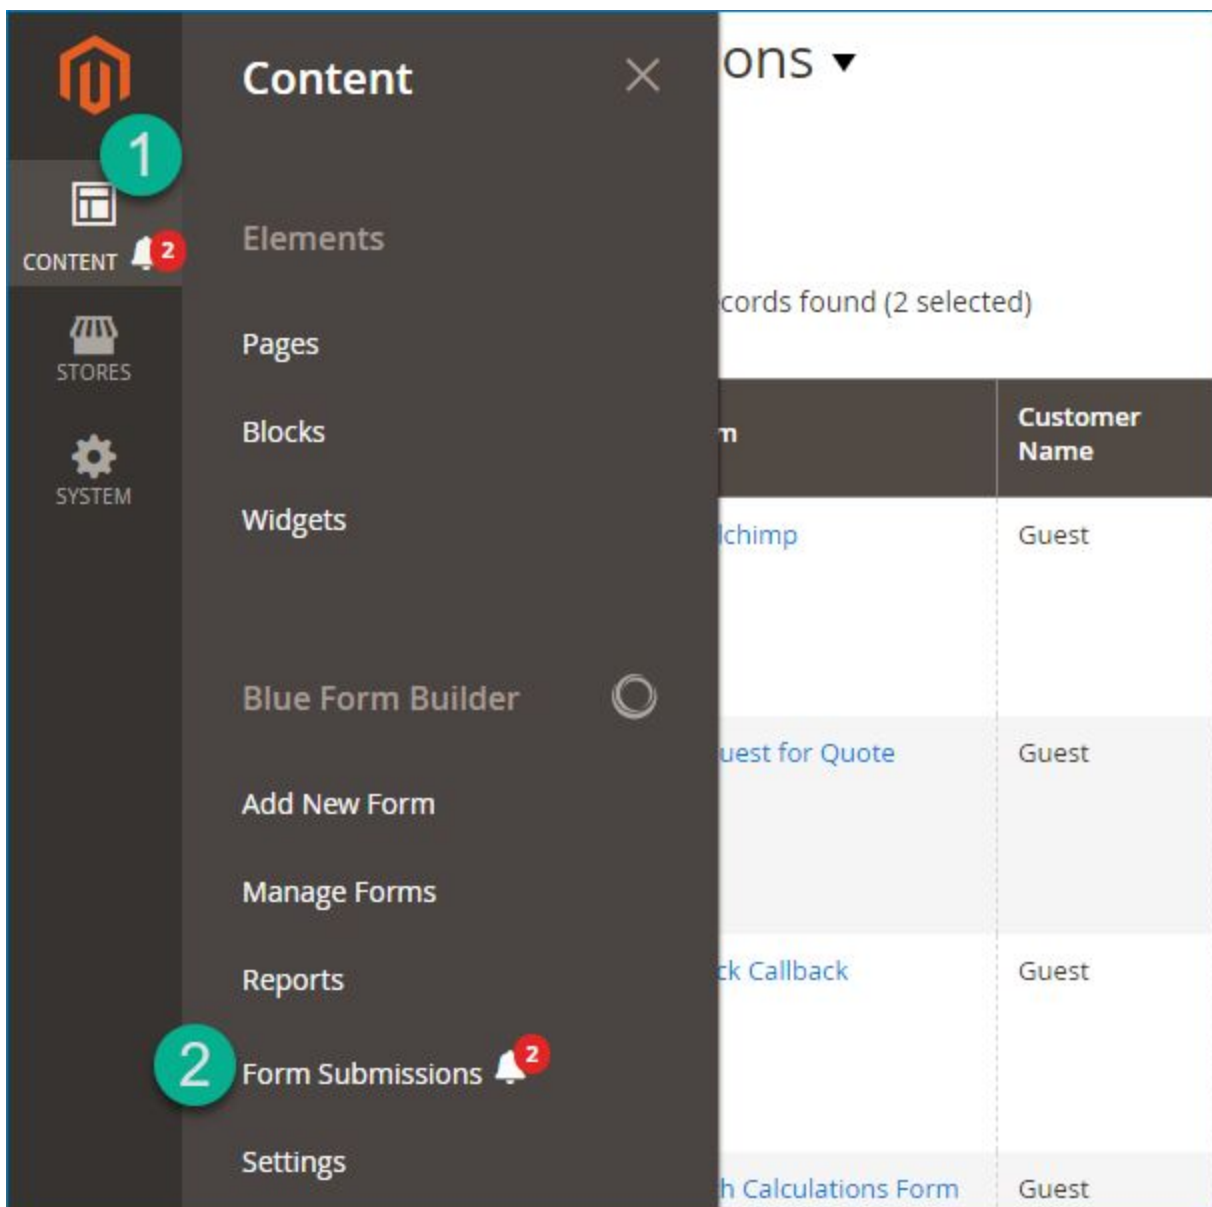

PDF plugin allows you to create PDF copies of form submissions. Also, you can attach these PDF files to email notifications.

- Download form submissions as PDFs
- Attach submission PDFs to email notifications
- Design PDFs

II) How to Use

1. Download form submissions as PDFs

- Go to **Content > Blue Form Builder > Form Submissions**.

The screenshot shows the Magezon dashboard with a dark sidebar menu. The 'Content' menu is open, showing options like Elements, Pages, Blocks, Widgets, Blue Form Builder, Add New Form, Manage Forms, Reports, Form Submissions (highlighted with a green circle and a red notification badge with the number 2), and Settings. The 'Form Submissions' option is selected, and the main content area displays a table of form submissions. The table has two columns: 'Form' and 'Customer Name'. There are two rows of data shown, both with 'Guest' as the customer name. The first row is for a 'Form' titled 'chimp' and the second row is for a 'Form' titled 'uest for Quote'. The table is partially obscured by the sidebar menu.

Form	Customer Name
chimp	Guest
uest for Quote	Guest

- In the first column of the grid, tick the checkboxes of relevant form submissions that you want to save as PDFs.
- After that, in **Action** box above the grid, choose **Print Submissions**. All submissions that you've selected will then be downloaded as a PDF file.

2. Attach submission PDFs to email notifications

- Open a form in the backend. Then go to **Settings > Email Notifications**.

- In **Admin** section, you will find the button **Attach PDF to notification emails**. Turn on this button to apply the function to email notifications for admins.

	Page: [submit_from_page] ID: #[submission_id] Date: [submission_date] Mark as read
