I) Introduction

We believe that you don't need to hire a developer to build Magento 2 forms. That's why we developed **Blue Form Builder**, a drag & drop form builder extension for Magento 2 with all needed features for creating POWERFUL forms EASILY.

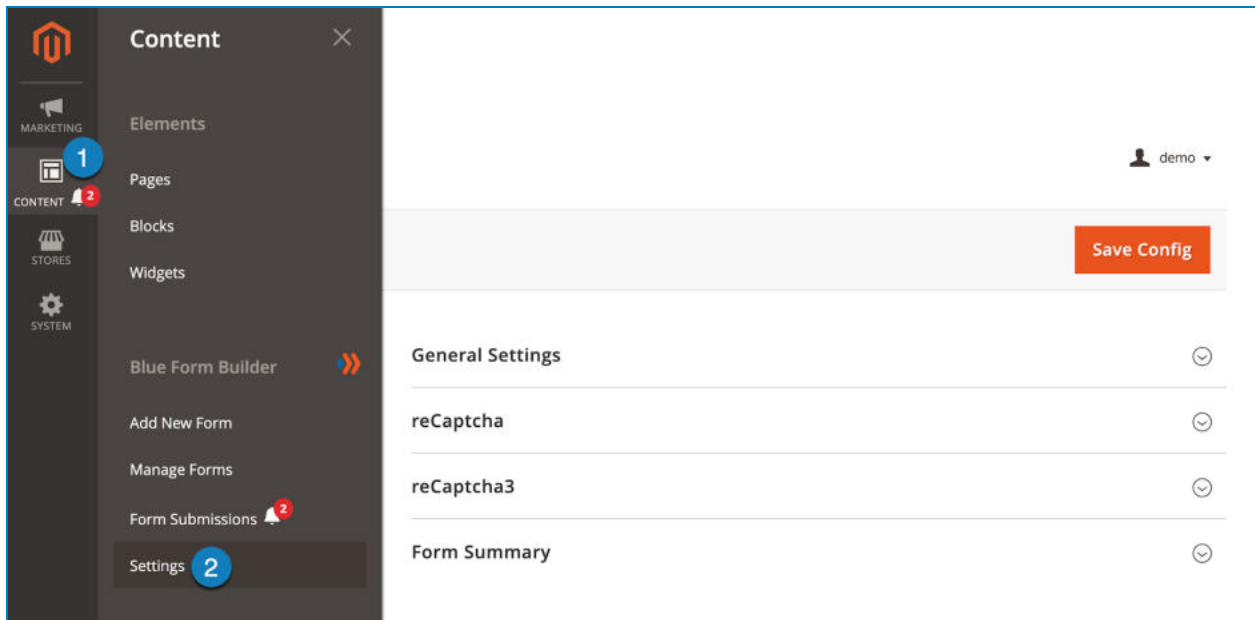

- Create any form type
- Drag & drop
- File uploads
- Easy form embedding
- 10+ form templates
- Auto email notifications
- Spam prevention
- Multi-page forms
- 35+ elements
- Plugin integrations
- Fully compatible with Ultimo Theme, Porto Theme, [Magezon Page Builder](#)

NOTE: Blue Form Builder was developed using a core builder library based on which we've built all of our builder extensions. The core builder library includes elements and settings that all builder extensions have in common. For details, please refer to [Magezon Core Builder user guide](#).

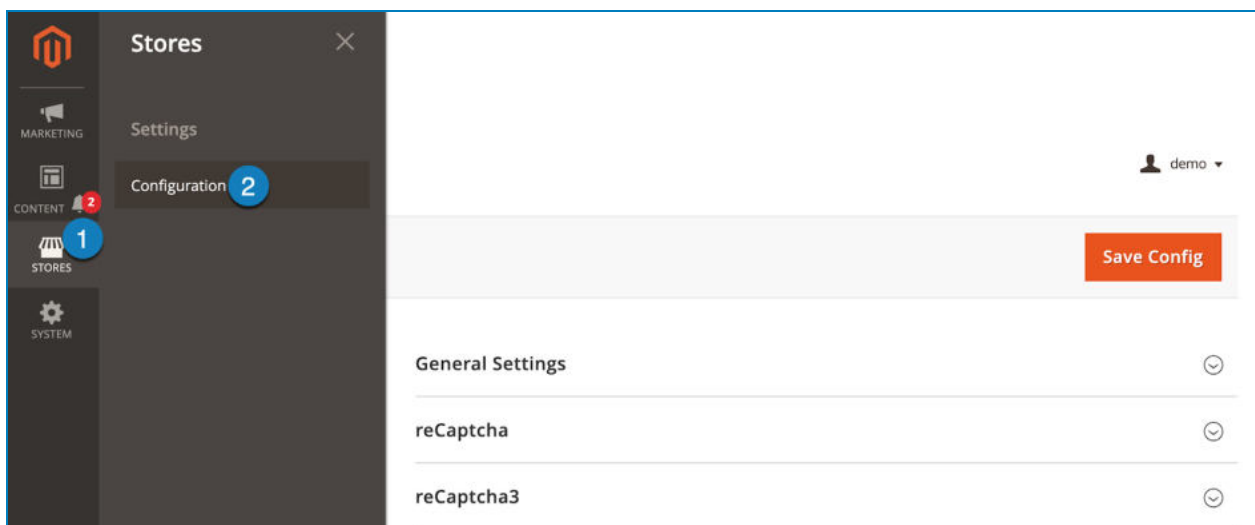

In this guide, we'll focus on elements and settings that are specific to Blue Form Builder.

II) General Configurations

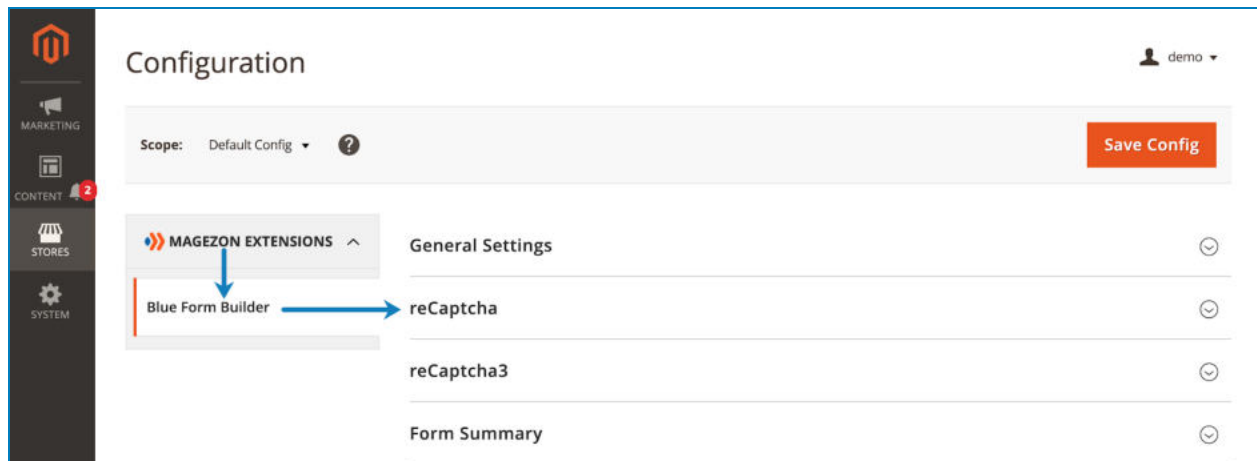

To configure general settings for Blue Form Builder, navigate to **Content > Blue Form Builder > Settings:**

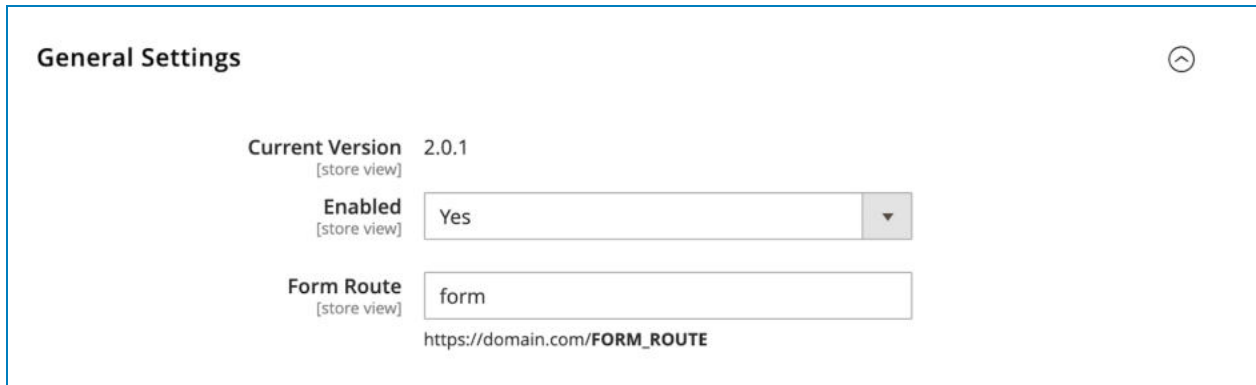

or **Stores > Settings > Configuration:**

Expand **MAGEZON EXTENSIONS** on the left panel and click **Blue Form Builder**. In the right section, you will see 4 tabs:

1) General Settings

General Settings

Current Version 2.0.1
[store view]

Enabled Yes
[store view]

Form Route form
[store view]

https://domain.com/**FORM_ROUTE**

- **Current Version** lets you know the current version of Blue Form Builder.
- **Enabled:** enable/disable Blue Form Builder on your website.
- **Form Route:** URL prefix applied to all form pages. For example, in the above image, we enter “form” in this field. So the URL of a form page, for example, contact form page, will be *https://domain.com/**form**/contact-form*. The URL of a delivery feedback form will be *https://domain.com/**form**/delivery-feedback*. The same for URLs of other form pages.

2) ReCaptcha

reCaptcha ⌵

Site key
[store view]

Secret key
[store view]

This section allows you to enable reCaptcha v2 by entering both site key and secret key. (This key pair can be obtained by signing up [here](#)).

Then you can use the [ReCaptcha element](#) to add reCaptcha v2 to your form.

3) ReCaptcha3

reCaptcha3 ⌵

Site key
[store view]

Secret key
[store view]

This section allows you to enable reCaptcha v3 by entering both site key and secret key. (This key pair can be obtained by signing up [here](#)).

Then you can use the [ReCaptcha element](#) to add reCaptcha v3 to your form.

4) Form Summary

Form Summary ⌵

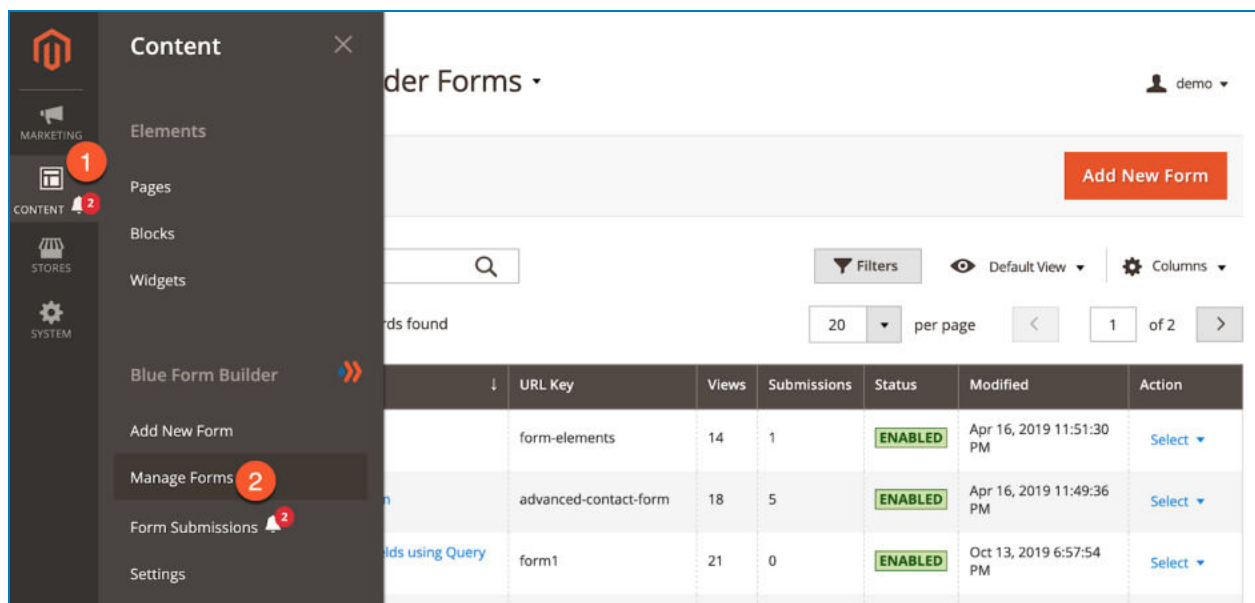

Show IP Address [store view] ▼

- **Show IP Address:** if Yes, the IP Address of customers who submit forms will be displayed in [form submission grid](#) and in submission detail pages.

III) Manage Forms

1) List of Forms

In order to view all of your forms, navigate to **Content > Blue Form Builder > Manage Forms** and you will reach the form listing page:

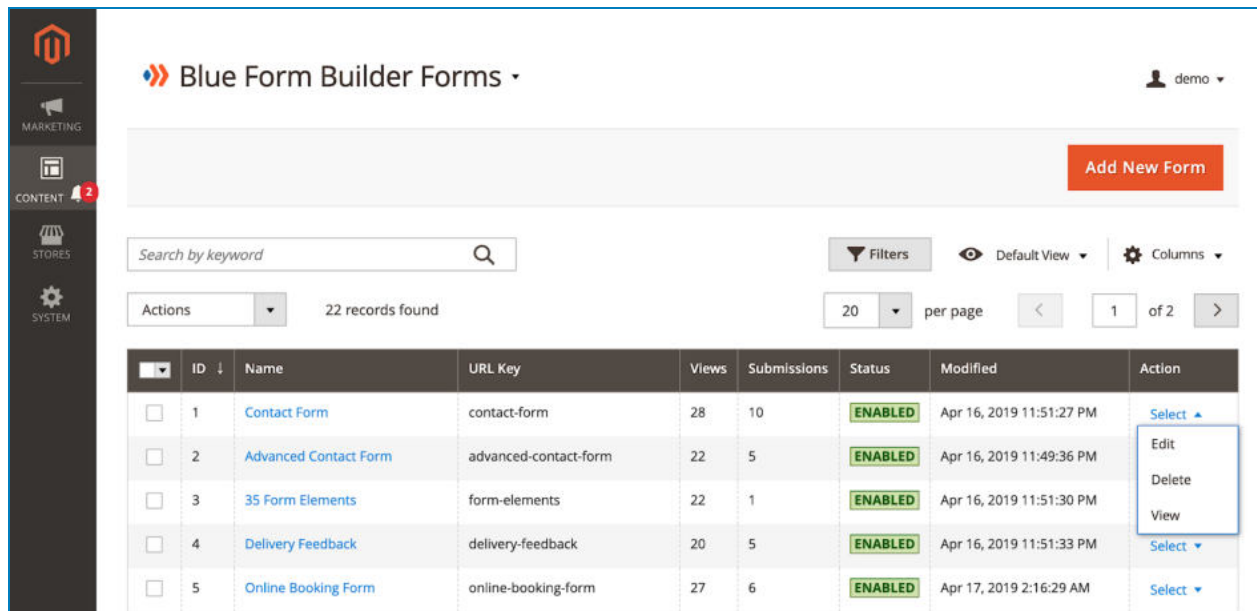

ID	URL Key	Views	Submissions	Status	Modified	Action
	form-elements	14	1	ENABLED	Apr 16, 2019 11:51:30 PM	Select
	advanced-contact-form	18	5	ENABLED	Apr 16, 2019 11:49:36 PM	Select
	form1	21	0	ENABLED	Oct 13, 2019 6:57:54 PM	Select

- There is a grid containing all existing forms:

- **ID:** identifier of the form.
- **Name:** name of the form.
- **URL Key:** path of the form page inside your store view. This is where your form page will be on the site.
- **Views:** number of the form views.
- **Submissions:** number of form submissions.
- **Status:** whether the form is enabled or disabled.
- **Modified time:** when the form is last modified.

- **Action:** list the actions available for the form:
 - + **Edit** the form.
 - + **Delete** the form.
 - + **View** the form on the frontend.

Blue Form Builder Forms

Add New Form

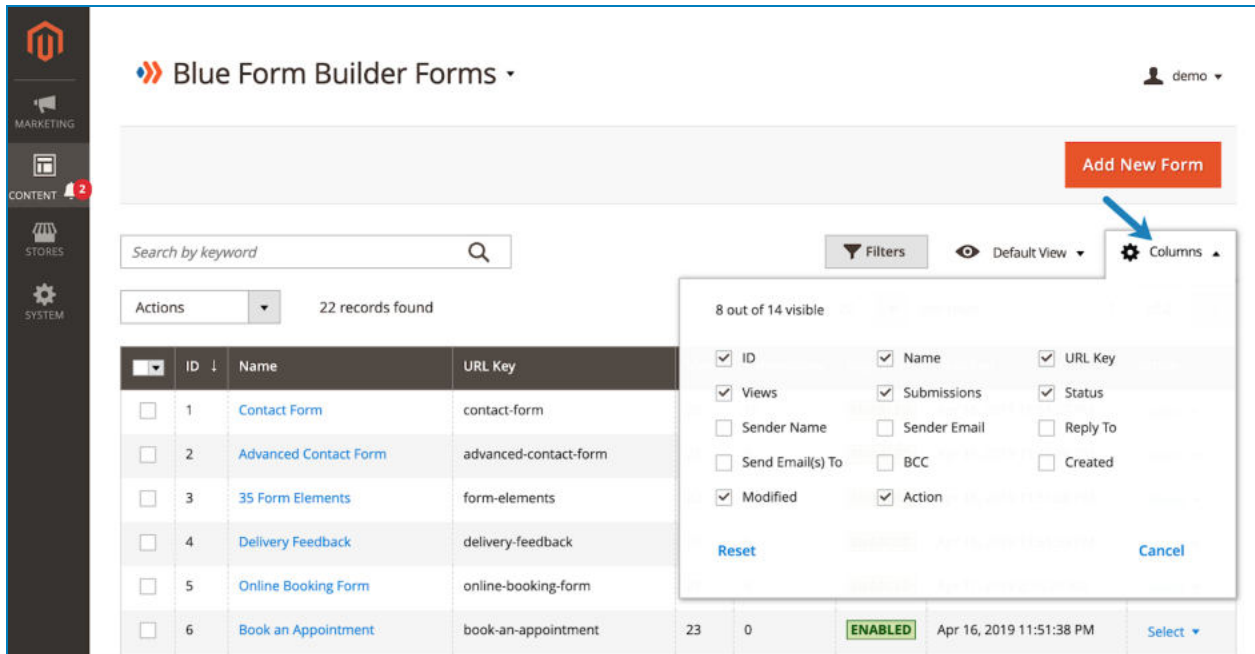

Search by keyword

Filters Default View Columns

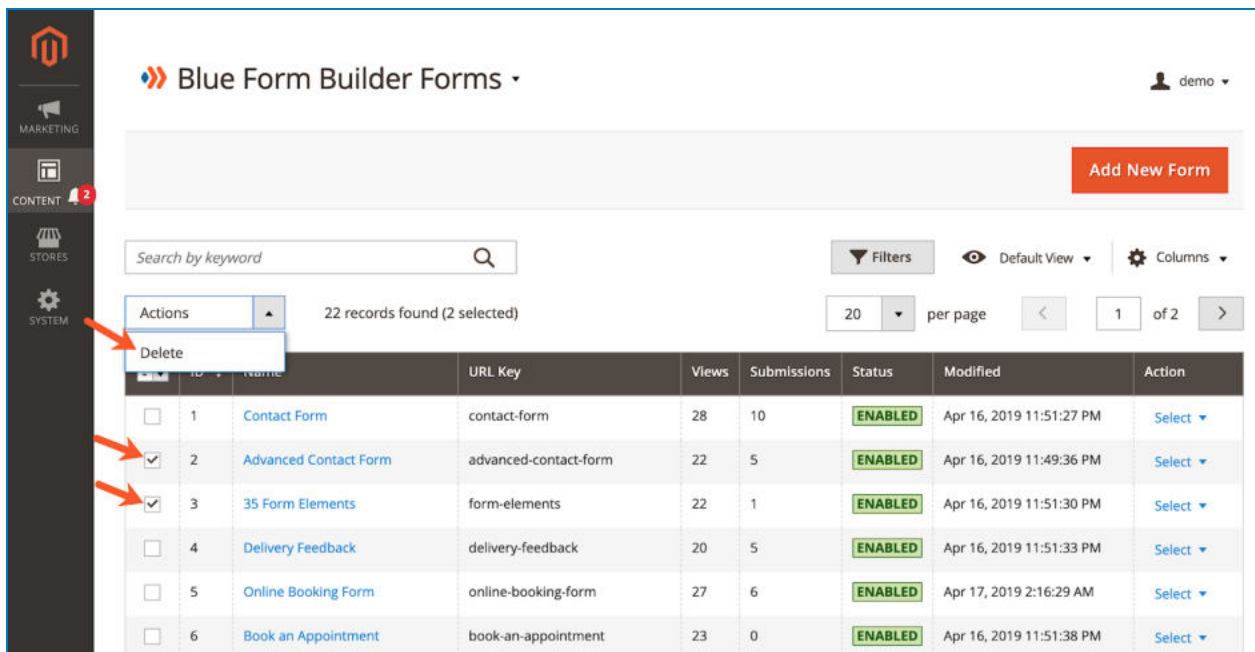

Actions 22 records found 20 per page 1 of 2

ID	Name	URL Key	Views	Submissions	Status	Modified	Action
1	Contact Form	contact-form	28	10	ENABLED	Apr 16, 2019 11:51:27 PM	Select
2	Advanced Contact Form	advanced-contact-form	22	5	ENABLED	Apr 16, 2019 11:49:36 PM	Edit
3	35 Form Elements	form-elements	22	1	ENABLED	Apr 16, 2019 11:51:30 PM	Delete
4	Delivery Feedback	delivery-feedback	20	5	ENABLED	Apr 16, 2019 11:51:33 PM	View
5	Online Booking Form	online-booking-form	27	6	ENABLED	Apr 17, 2019 2:16:29 AM	Select

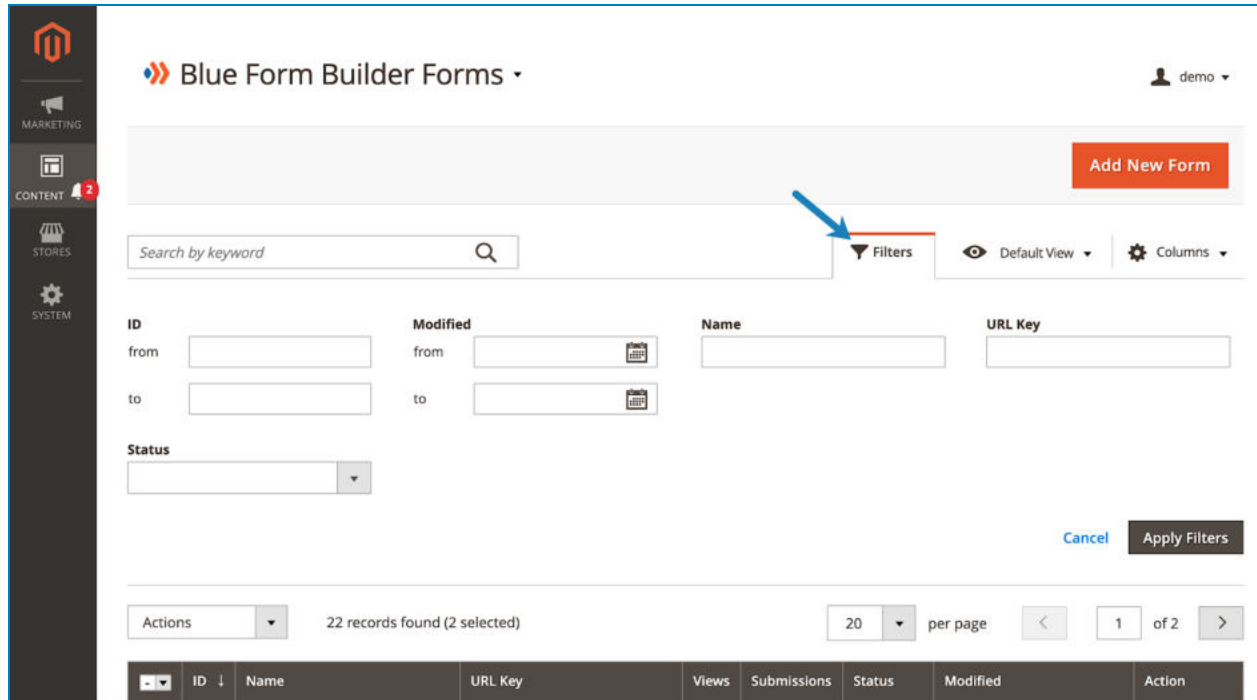

- To view all columns of the grid, click **Columns** drop-down above the grid. Tick the checkboxes of columns that you want to be visible in the grid. Untick the checkboxes of columns that you want to be invisible in the grid:

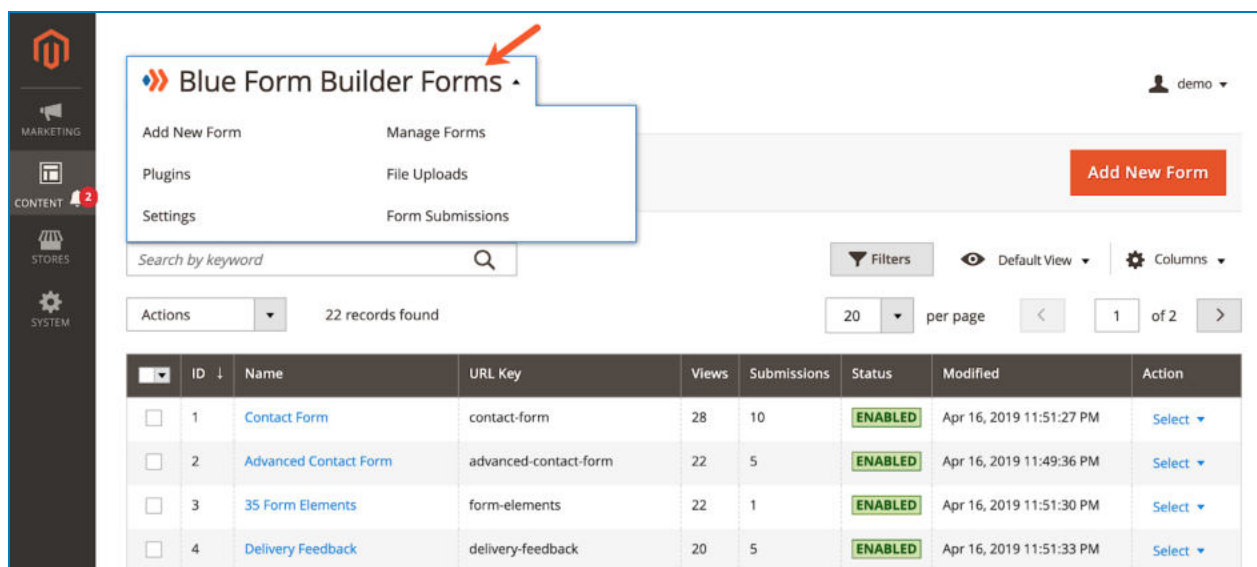

- Tick the checkboxes of corresponding forms in the first column, then click **Actions** drop-down above the grid to Delete these forms:

- You can filter forms by ID, Modified time, Name, URL Key, and Status:

- Click **Blue Form Builder Forms** drop-down on the top left corner and you'll see the following options:

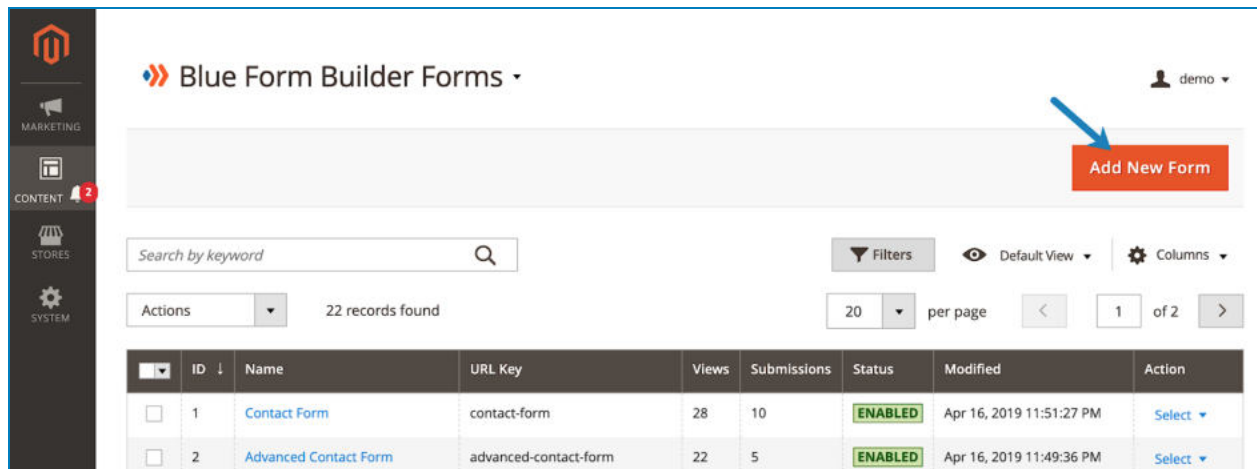

- **Add New Form:** add a new form.
- **Manage Forms:** go to the [form listing page](#).
- **Plugins:** view all plugins of Blue Form Builder.
- **File Uploads:** go to the [file upload listing page](#).
- **Settings:** access the extension's [configuration](#).
- **Form Submissions:** go to the [submission listing page](#).

Please note that you can find this drop-down list in the [form edit page](#), [file upload listing page](#) and [submission listing page](#).

2) Add New Form

To add a new form, you can:

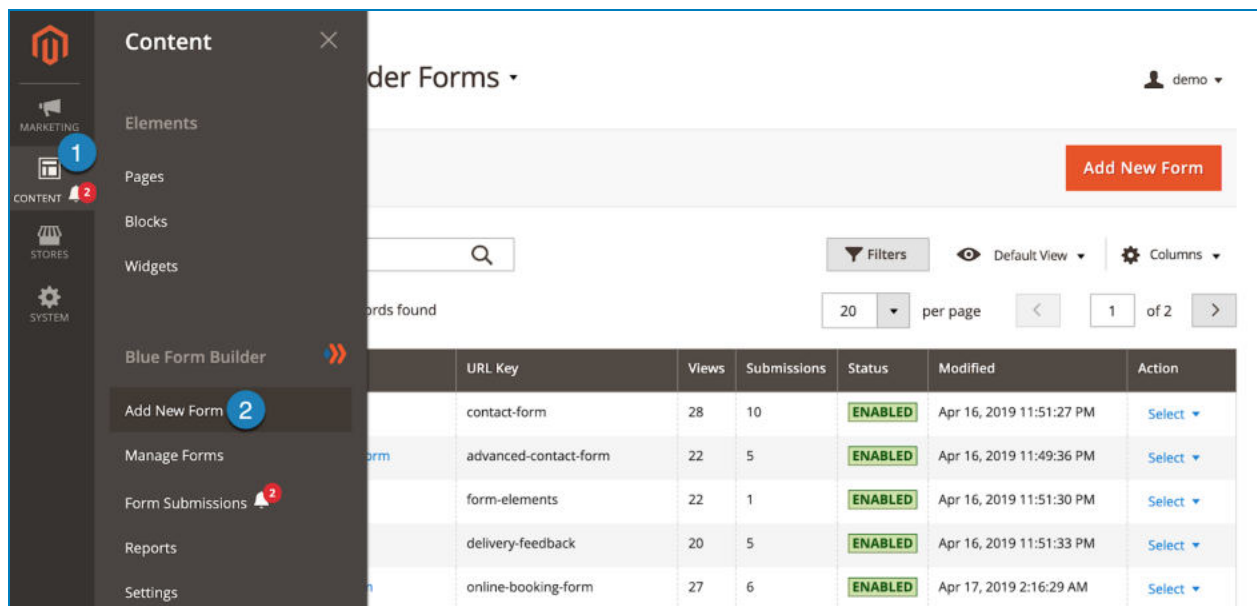

- Click the **Add New Form** button on the top-right corner of the [form listing page](#):

The screenshot shows the 'Blue Form Builder Forms' listing page. In the top right corner, there is a red button labeled 'Add New Form' which is highlighted by a blue arrow. Below the button is a search bar and a table of existing forms.

ID	Name	URL Key	Views	Submissions	Status	Modified	Action
1	Contact Form	contact-form	28	10	ENABLED	Apr 16, 2019 11:51:27 PM	Select
2	Advanced Contact Form	advanced-contact-form	22	5	ENABLED	Apr 16, 2019 11:49:36 PM	Select

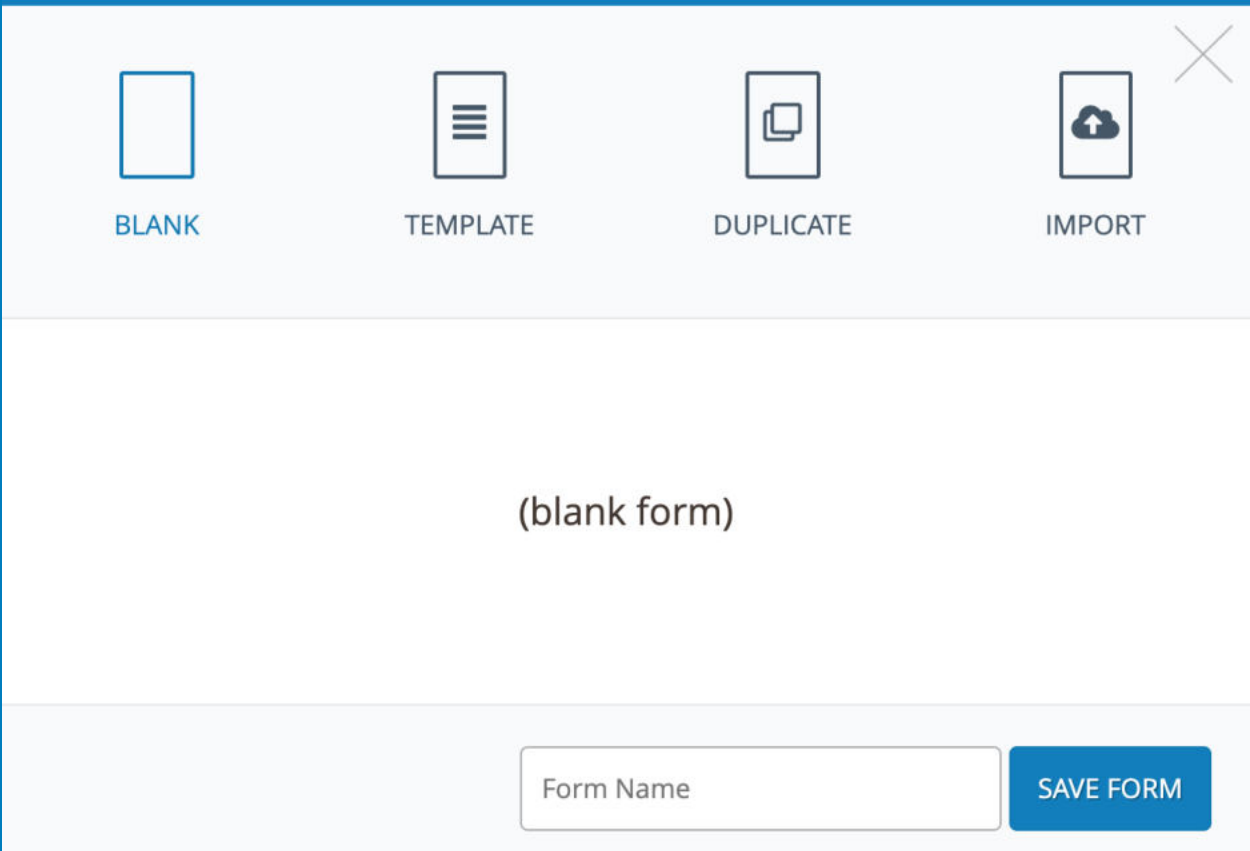

- Or navigate to **Content -> Blue Form Builder -> Add New Form**:

The screenshot shows the 'Content' sidebar menu on the left. The 'Blue Form Builder' option is selected, and its sub-menu is open. The 'Add New Form' option is highlighted with a blue circle and the number '2'. The main content area shows the 'Blue Form Builder Forms' listing page, which is partially visible behind the sidebar.

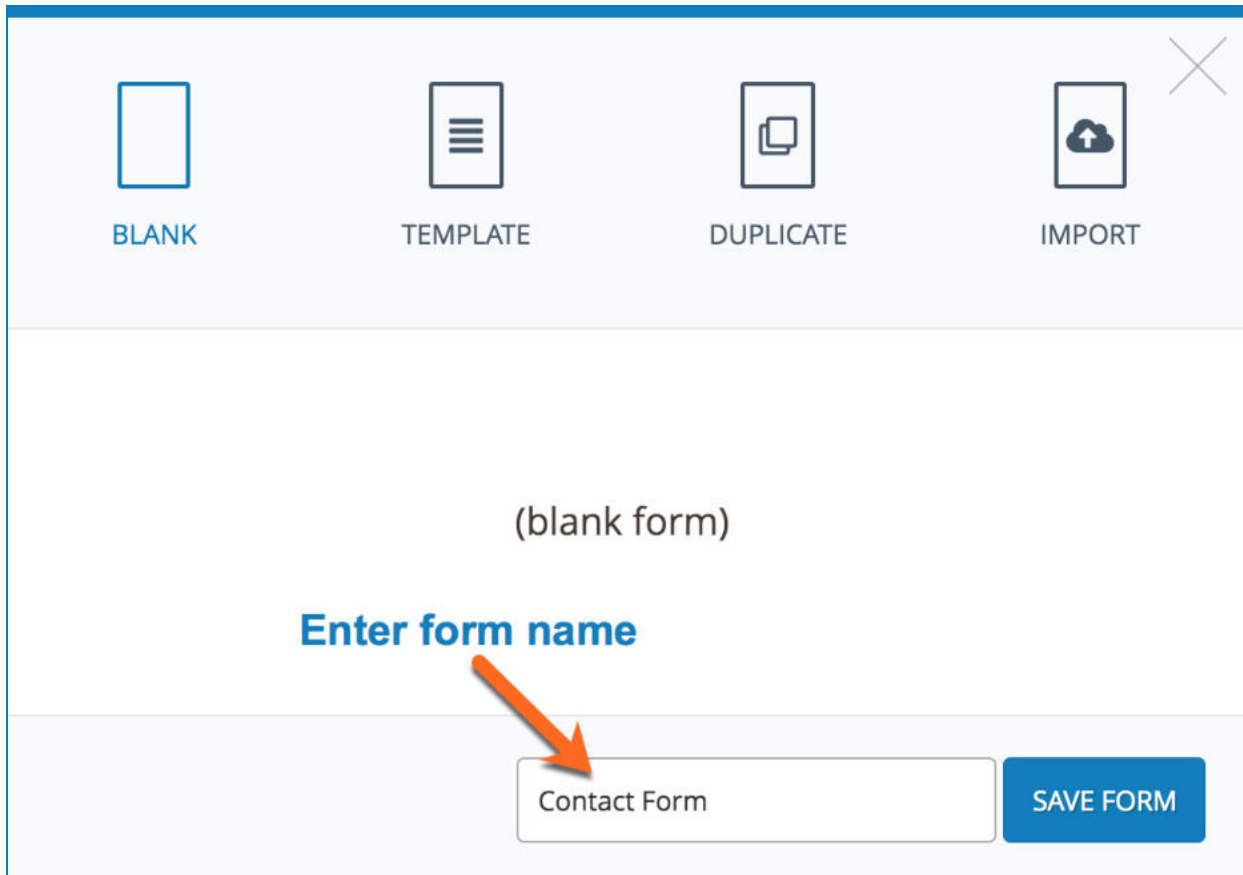

ID	Name	URL Key	Views	Submissions	Status	Modified	Action
1	Contact Form	contact-form	28	10	ENABLED	Apr 16, 2019 11:51:27 PM	Select
2	Advanced Contact Form	advanced-contact-form	22	5	ENABLED	Apr 16, 2019 11:49:36 PM	Select
	Form Elements	form-elements	22	1	ENABLED	Apr 16, 2019 11:51:30 PM	Select
	Delivery Feedback	delivery-feedback	20	5	ENABLED	Apr 16, 2019 11:51:33 PM	Select
	Online Booking Form	online-booking-form	27	6	ENABLED	Apr 17, 2019 2:16:29 AM	Select

A popup will be displayed with 4 options:

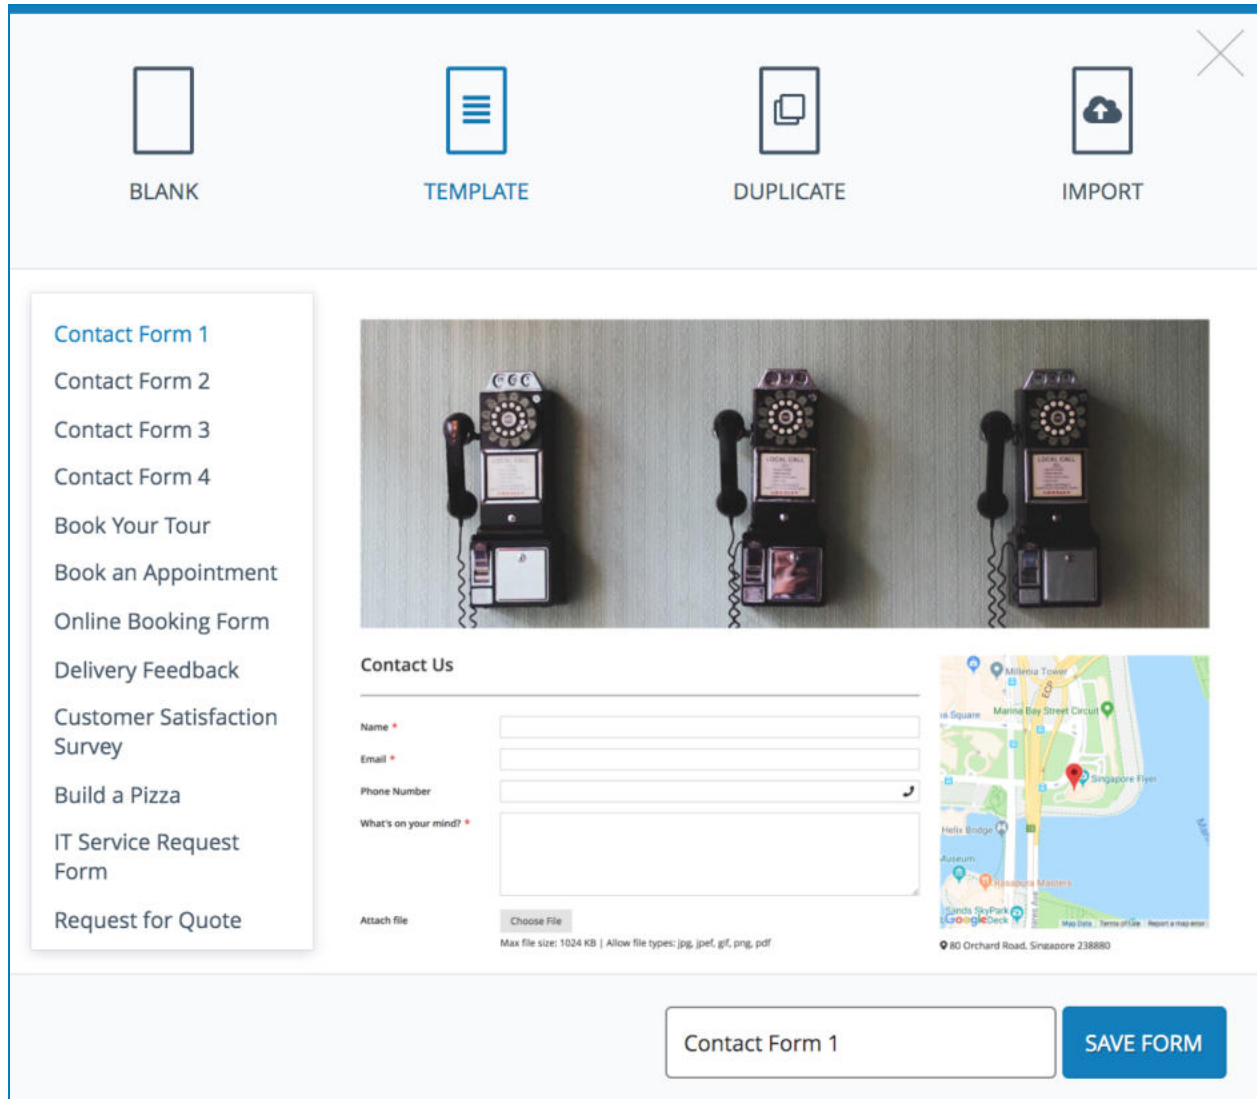

The screenshot shows a popup menu with a close button (X) in the top right corner. The menu contains four options, each with an icon and a label: 'BLANK' (empty form icon), 'TEMPLATE' (form with lines icon), 'DUPLICATE' (two overlapping form icons), and 'IMPORT' (form with cloud and arrow icon). Below the menu is a large white area with the text '(blank form)' centered. At the bottom, there is a text input field labeled 'Form Name' and a blue 'SAVE FORM' button.

- **Blank:** create a new form from scratch. After entering the form name and clicking the **Save Form** button, you will be redirected to the [form edit page](#).

- **Template:** contain pre-built form templates.

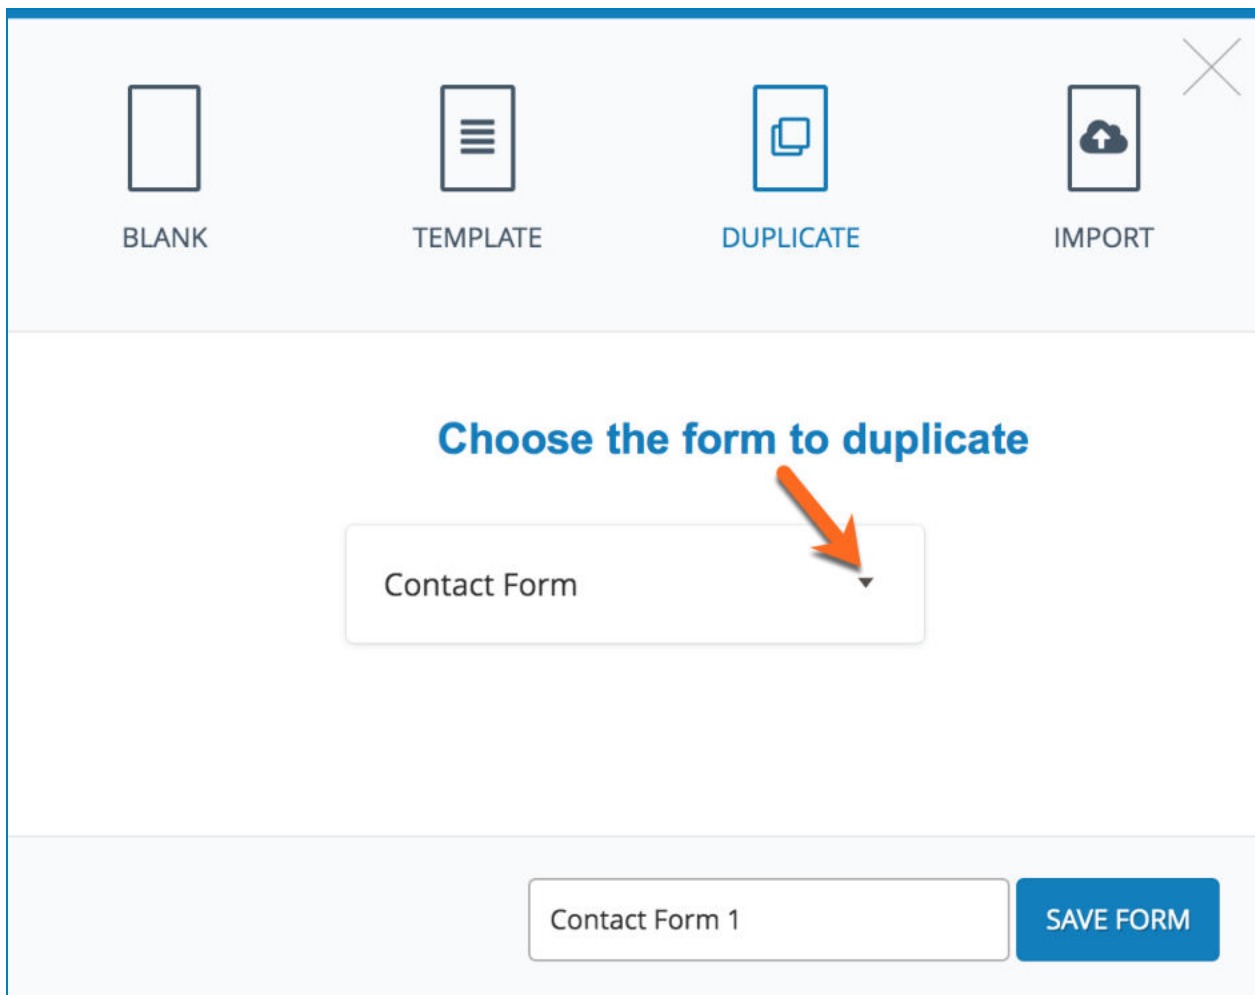

The screenshot displays the Blue Form Builder interface. At the top, there are four main options: BLANK, TEMPLATE, DUPLICATE, and IMPORT. Below these, a list of form templates is shown on the left, including 'Contact Form 1', 'Contact Form 2', 'Contact Form 3', 'Contact Form 4', 'Book Your Tour', 'Book an Appointment', 'Online Booking Form', 'Delivery Feedback', 'Customer Satisfaction Survey', 'Build a Pizza', 'IT Service Request Form', and 'Request for Quote'. The right side shows a preview of the 'Contact Us' form, which includes fields for Name, Email, Phone Number, and a text area for 'What's on your mind?'. There is also an 'Attach file' section with a 'Choose File' button and a file size limit of 1024 KB. A map of Singapore is visible in the bottom right corner of the preview. At the bottom of the interface, there is a text input field containing 'Contact Form 1' and a blue 'SAVE FORM' button.

On the left section, there is a list of form templates. On the right section, you can preview each template. Click on the preview image to zoom it out.

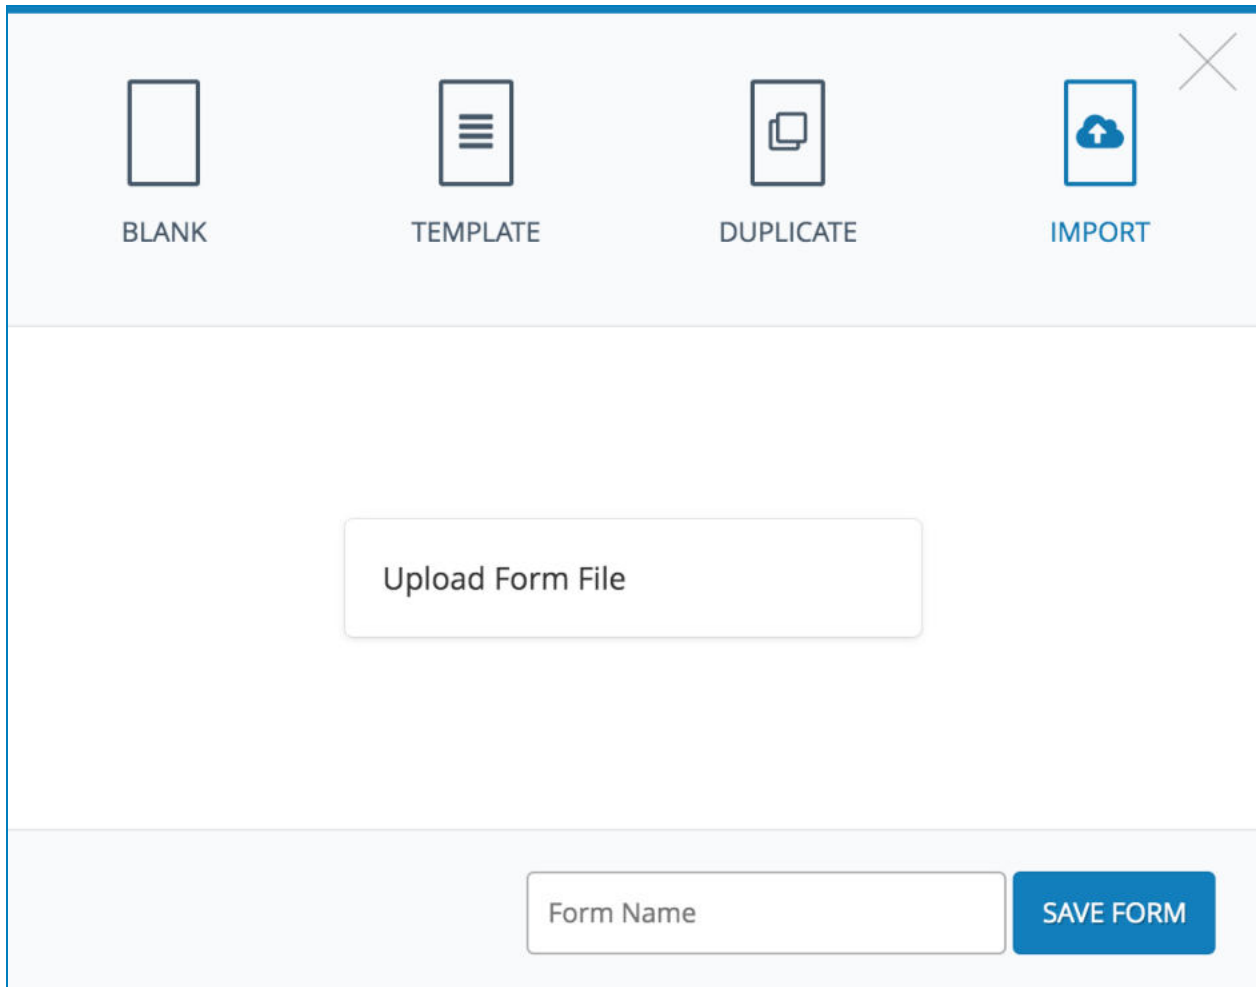

In the box next to the **Save Form** button, you can change the default name of the template. Click the **Save Form** button to save the template and you will go to the [form edit page](#) where you can customize the template.

- **Duplicate:** duplicate any form you have. Click the drop-down icon in the center of the popup and choose the form you want to duplicate.

Change the name of the duplicated form in the box next to the **Save Form** button. Click the **Save Form** button to go to the [form edit page](#).

- **Import:** allow you to import the form files (CSV). This function is useful in case you have multiple websites that all install Blue Form Builder. So you can export forms from one website and import it into another website. Click **Upload Form File** in the center of the popup to upload the csv file of the form.

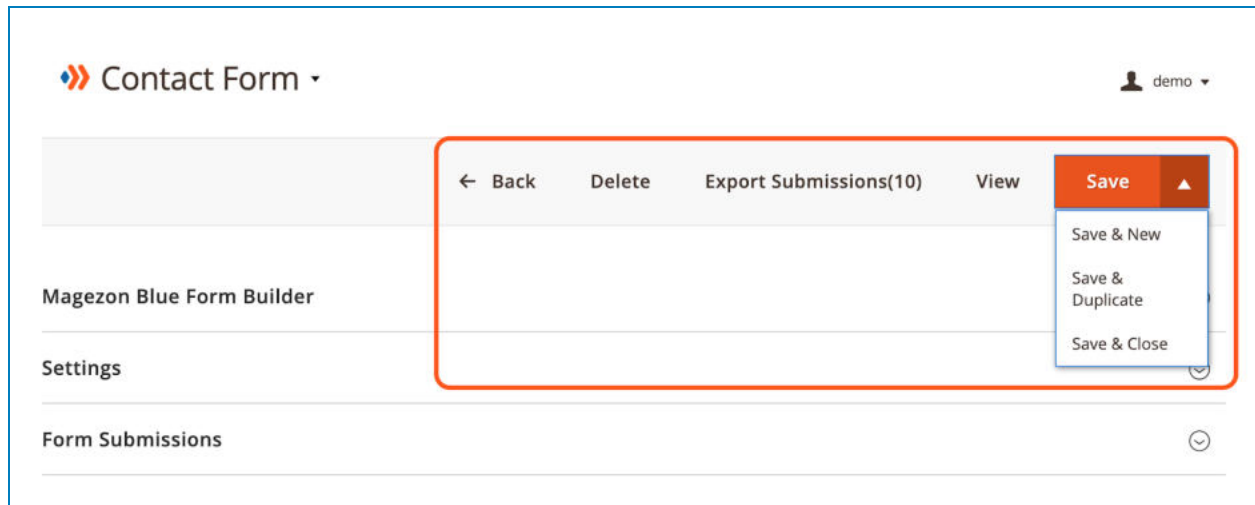

You can change the name of the imported form in the box and click the **Save Form** button to go to the [form edit page](#).

3) Form Edit Page

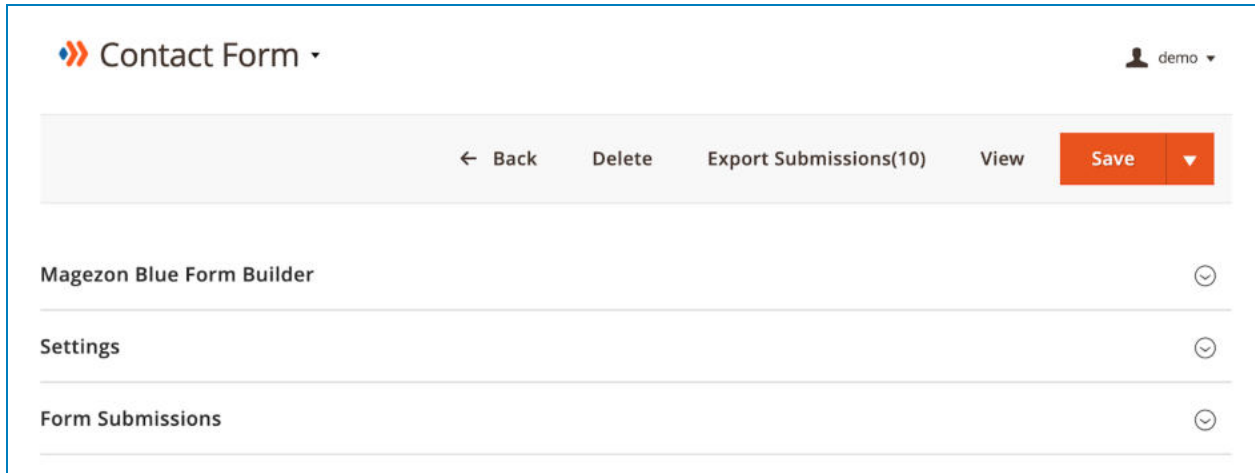

The edit page will open when you create, edit, or duplicate a form.

On the top of the edit page, you'll see the following buttons:

- **Back:** go back to the [form listing page](#).
- **Delete:** delete the form.
- **Export Submissions:** export form submissions to CSV file.
- **View:** view the form on frontend.
- **Save:**
 - + **Save:** save the form and stay on the page.
 - + **Save & New:** save the form and create a new one.
 - + **Save & Duplicate:** save the form and duplicate it.
 - + **Save & Close:** save the form and return to the [form listing page](#).

The form edit page consists of 3 sections as follows:

The screenshot shows the form edit page for a 'Contact Form'. At the top left, there is a breadcrumb 'Contact Form' with a dropdown arrow. At the top right, there is a user profile icon labeled 'demo' with a dropdown arrow. Below this is a toolbar with buttons: 'Back', 'Delete', 'Export Submissions(10)', 'View', 'Save', and a dropdown arrow. The main content area contains three sections: 'Magezon Blue Form Builder', 'Settings', and 'Form Submissions', each with a dropdown arrow on the right side.

The section contains a builder interface that allows you to create your form.

- Click plus icon on the top bar to add elements from a popup:

- Click the icon next to plus icon to choose a template from a popup.

- Click the drop-down icon to preview a template.
- Click plus icon to select the template. The chosen template will be displayed in the form builder section and you can customize it.

For other options, please refer to this [guide](#).

3.2 Settings

In this section, you will see a list of settings for the form.

Settings 

-  **General**

-  **Email Notifications**

-  **Success Message**

-  **Form in Websites**

-  **Customer Groups**

-  **Search Engine Optimization**

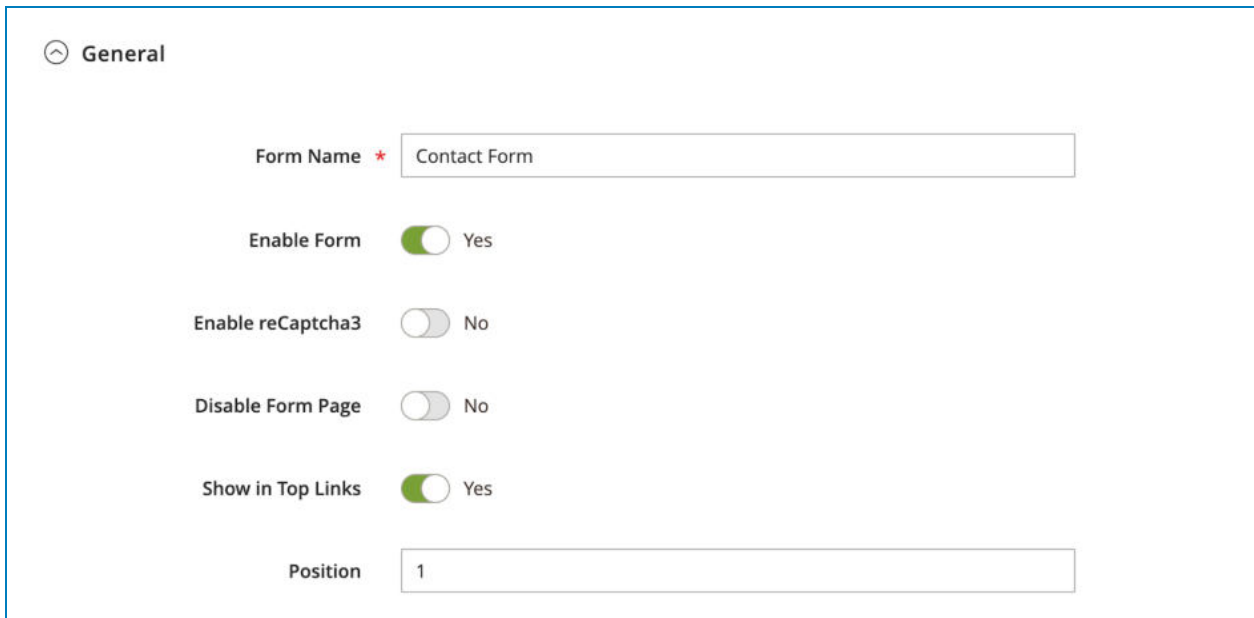

-  **Custom CSS**

-  **Custom Javascript**

-  **Advanced**

-  **Embed**

3.2.1 General

General

Form Name *

Enable Form Yes

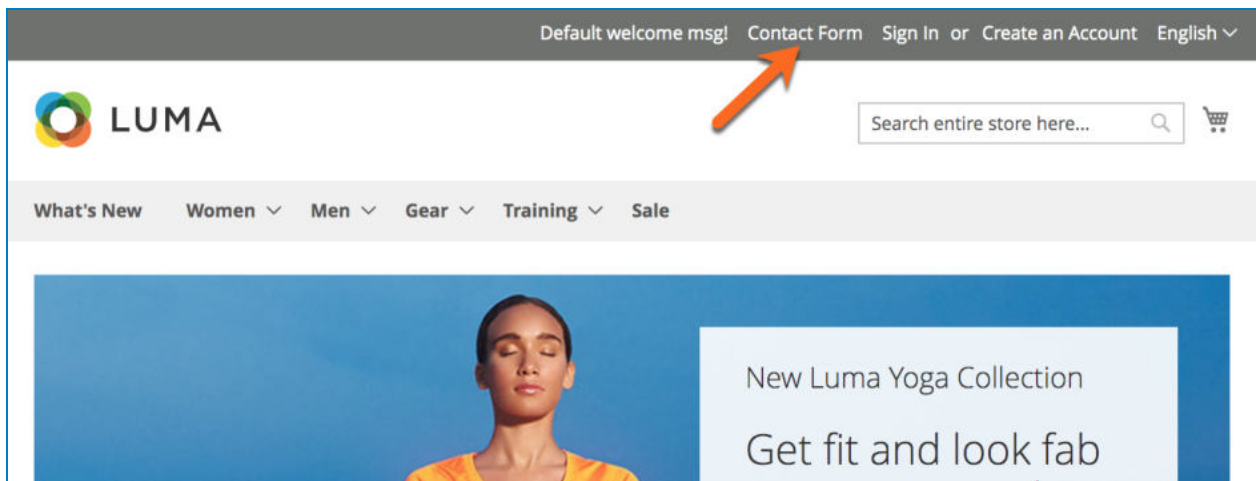

Enable reCaptcha3 No

Disable Form Page No

Show in Top Links Yes

Position

- **Form Name:** enter form name.
- **Enable Form:** if enabled, customers can view the form on the frontend store.
- **Enable reCaptcha3:** if enabled, reCaptcha v3 will be used for the [reCaptcha element](#) (please make sure that you use reCaptcha element in the form and [enter the key pair for reCaptcha v3](#)). If disabled, reCaptcha v2 will be used for the reCaptcha element (with [key pair entered](#)).
- **Disable Form Page:** If the form page is disabled, customers can't access the form page.
- **Show in Top Links:** display the form link on the top link bar of your website, like this:

- **Position:** set priority level for the form. The smaller the number is, the higher the priority is. This can be used, for example, in case you display many forms in one position. So the form with higher priority will be displayed on the top.

3.2.2 Email Notifications

This is where you configure the notification emails that are sent to admins and customers about a form submission.

Email Notifications

Admin

Customer

a. Admin

Admin

Enable Admin Notification Yes

Sender Name * 

Sender Email * 

Reply To 

Send Email(s) To
When the form is submitted, an email will be sent to these addresses. You can add multiple emails, separated by a comma.

BCC
You can add multiple emails, separated by a comma.

Email Subject * 

Email Body * 

Paragraph

(x)

Hello,
You have received new form submission for the form [form_name]. Here are the details:
[submission_content]

Powered by TinyMCE

Attach file uploads to emails Yes

- **Enable Admin Notification:** enable/disable sending email notifications to admin.
- **Sender Name:** name of the sender.
- **Sender Email:** email address of the sender.
- **Reply To:** enter the email address to which the email recipients will reply.
- **Send Email(s) To:** enter email addresses of other members in your company who you want to get notified of form submissions. When a form is submitted, email notifications will be sent to these addresses. You can add multiple emails by separating them with commas.
- **BCC:** send notification emails to BCC recipients. You can add multiple emails by separating them with commas.
- **Email Subject** and **Email Body** allow you to edit the content of email subject and body respectively.
- Create dynamic content for **Sender Name**, **Sender Email**, **Reply to**, **Email Subject** and **Email Body** by inserting variables (click the icons highlighted by orange circles in the above image and you will see a drop-down list containing variables). See details about variables [here](#).
- **Attach file uploaded to emails:** by enabling this function, you can attach uploaded files to notification emails sent to admins (in case your form has the [file upload](#) field).

b. Customer

This section allows you to customize email notifications sent to customers.

 Customer

Make sure to edit the email field in your form and check the option **Advanced > Send Autoresponder** for fields where we should send autoresponder emails.

Enable Customer Notification Yes

Sender Name *

Paragraph - **B** *I* U      

(x)

Hello [name],

We have received your submission. Here are the details you have submitted to us:

[submission_content]

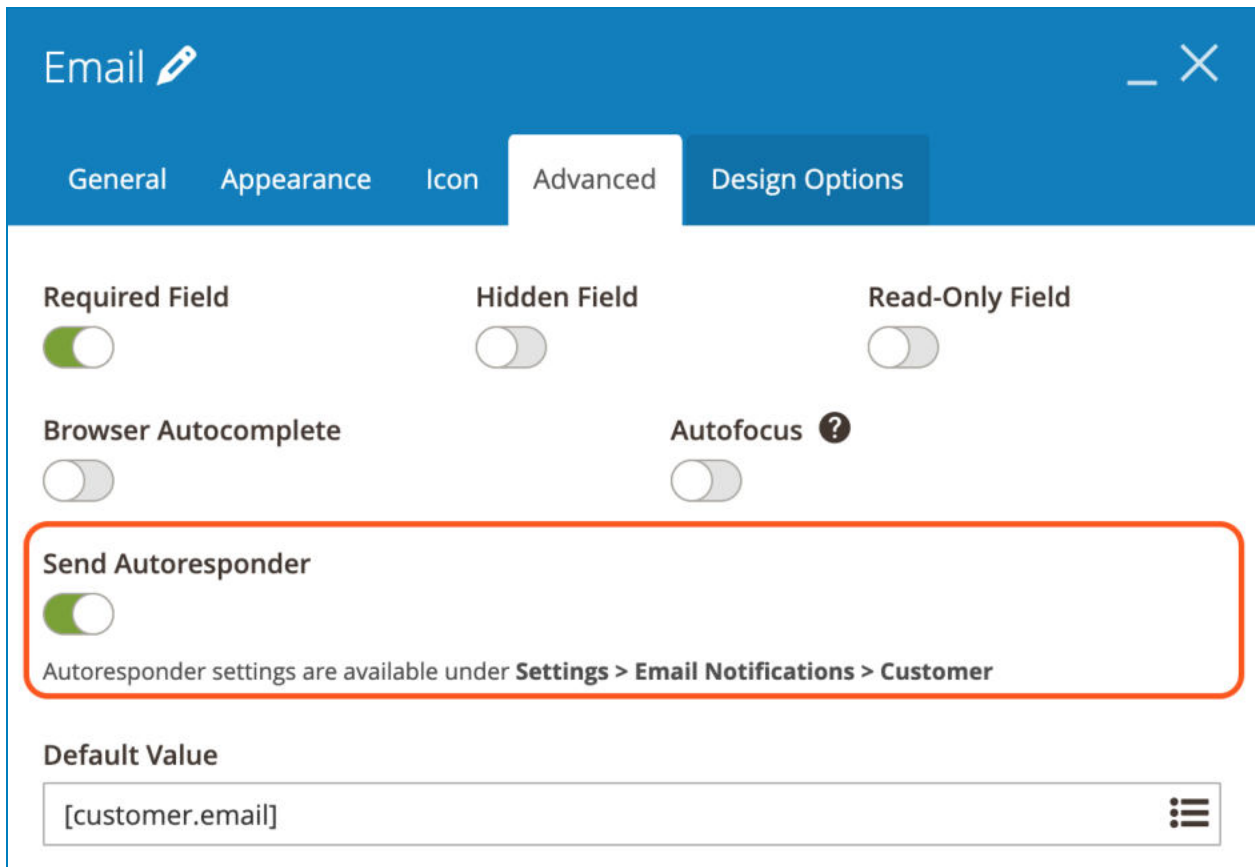

Regards,

Michael

Powered by TinyMCE

Attach file uploads to emails Yes

NOTE: In order to send email notifications to customers, first make sure that your form includes the [Email element](#). Open Email element’s settings, then in the “Advanced” tab, turn on the **Send Autoresponder** button.

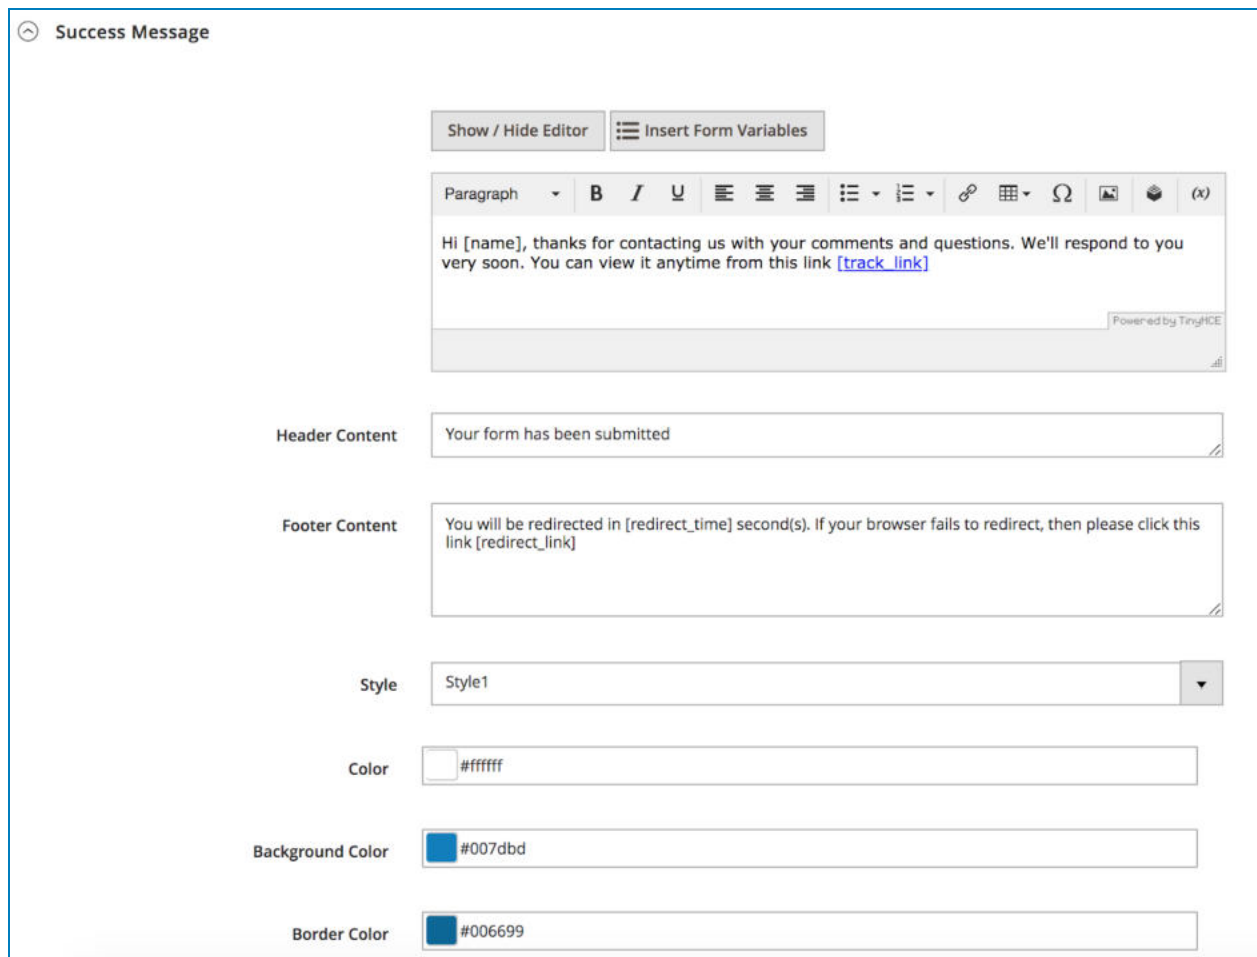

- You can create dynamic content for **Email Subject** and **Email Body** by inserting variables (click the icons highlighted by orange circles in the above image and you will see the drop-down list containing variables). See details [here](#).

- **Attach file upload to emails:** by enabling this function, you can attach uploaded files to the notification emails sent to customers (in case your form has the [file upload](#) field).

3.2.3 Success Message

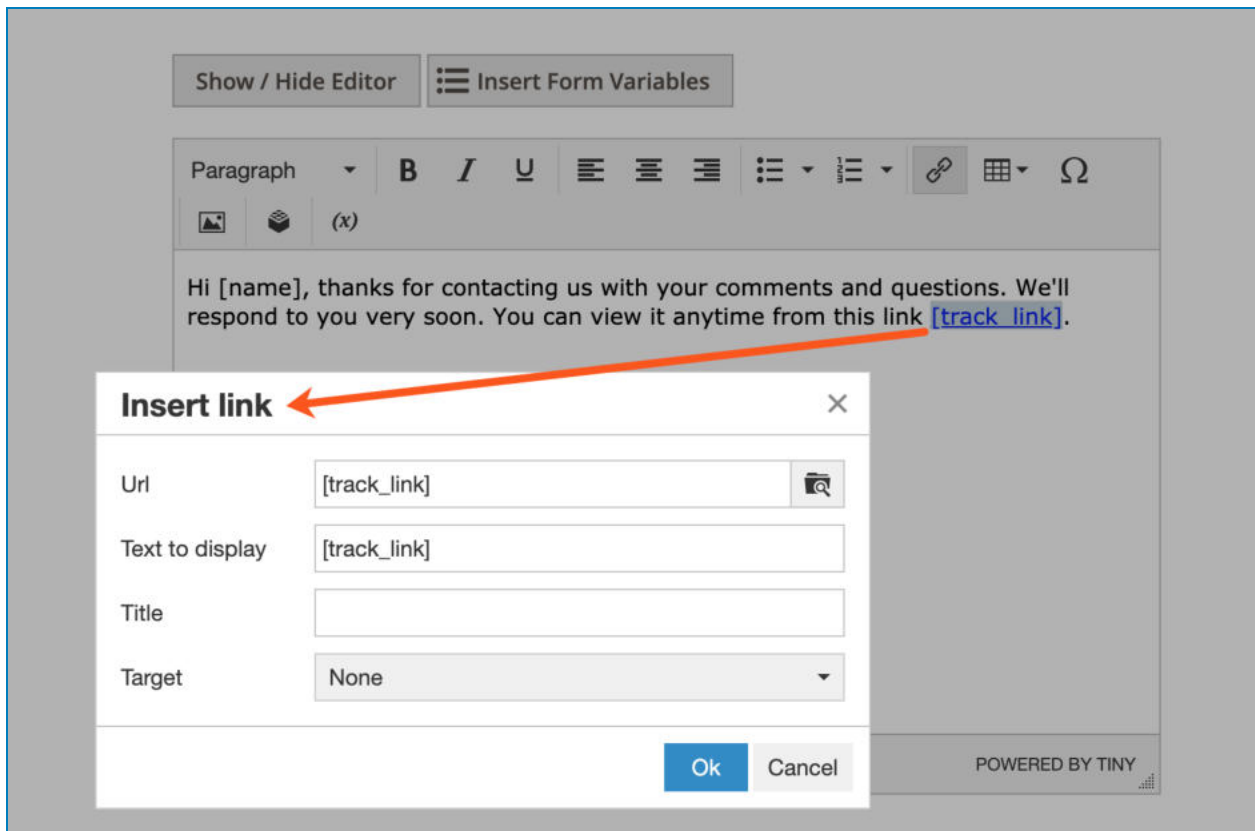

Where you customize the message that will be displayed to customers after they submit a form successfully. You can customize not only the content but also the header and footer of the success message.

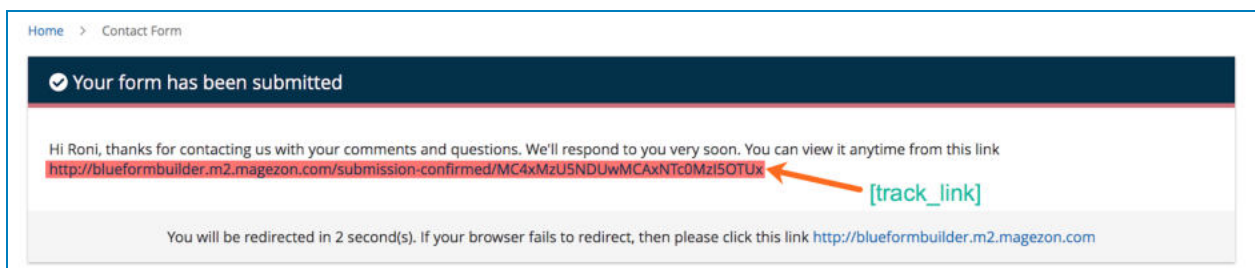

The screenshot shows the 'Success Message' configuration panel. At the top, there are two buttons: 'Show / Hide Editor' and 'Insert Form Variables'. Below these is a rich text editor with a toolbar containing options for Paragraph, Bold (B), Italic (I), Underline (U), Bulleted List, Numbered List, Indent, Outdent, Link, Table, Omega, Image, Video, and a close button (x). The editor contains the text: 'Hi [name], thanks for contacting us with your comments and questions. We'll respond to you very soon. You can view it anytime from this link [track_link]'. Below the editor are three text input fields: 'Header Content' with the value 'Your form has been submitted', 'Footer Content' with the value 'You will be redirected in [redirect_time] second(s). If your browser fails to redirect, then please click this link [redirect_link]', and 'Style' with the value 'Style1'. At the bottom, there are three color pickers: 'Color' with the value '#ffffff', 'Background Color' with the value '#007dbd', and 'Border Color' with the value '#006699'.

- Use WYSIWYG editor to enter success message content. You can make the success message become dynamic by inserting variables. Click **Insert Form Variables** above the editor and choose appropriate variables from the drop-down. Learn more [here](#).

In success message content, you can insert [track_link] variable like this:

On frontend, the [track_link] variable will be replaced with the link by clicking on which, customers can view their submission on frontend:

- You can also enter **Header Content** and **Footer Content**.

- The Footer Content in success message is related to the function of redirecting customers after submission.

If you open **Settings > Advanced**, then fill out **Redirect on Submit** and **Redirect X seconds after form submit** fields, the footer content of the success message will show up on frontend.

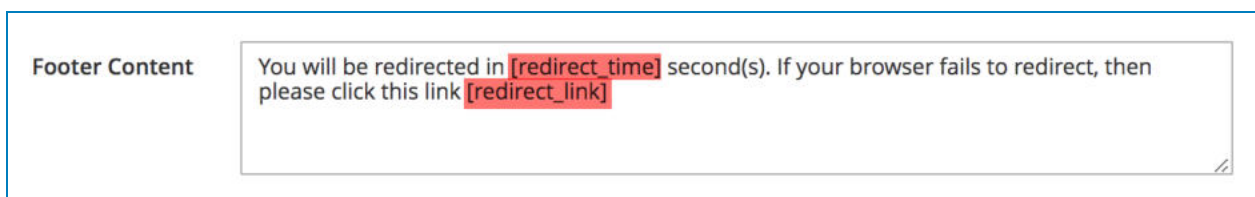

Redirect on Submit
Use "/" to stay on the same page after submitting.

Redirect X seconds after form submit

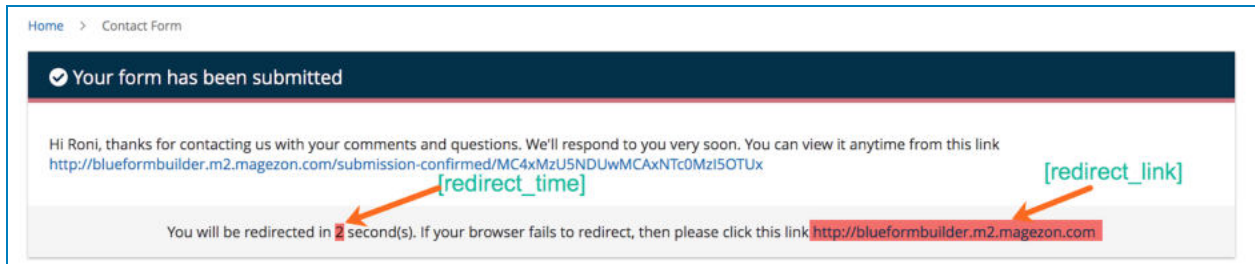

If you enter [redirect_time] variable in the Footer Content field, it will be replaced with the value filled in **Redirect X seconds after form submit** with redirect countdown.

If you enter [redirect_link] variable, it will be replaced with the link filled in **Redirect on Submit**.

Footer Content

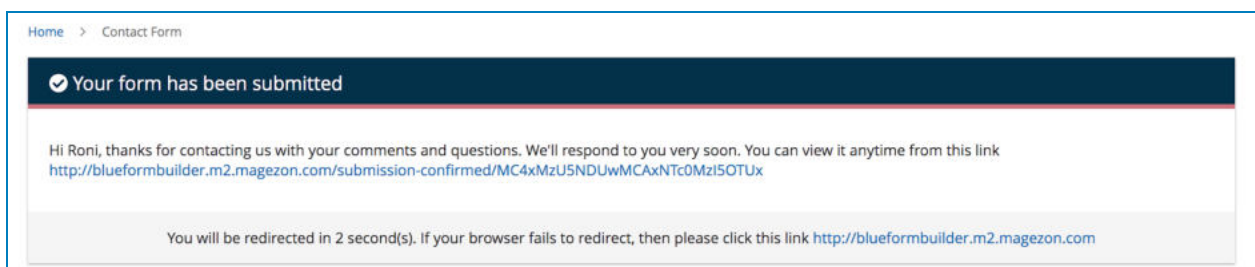

Let's see how it looks on frontend:

- Choose display **Style** for the success message with 2 styles available.
- If you choose Style1, you can customize **Color** for the text in header and **Background Color** for the header. In **Border & Circle Color**, you can choose color for the line that separates the header and the content below.

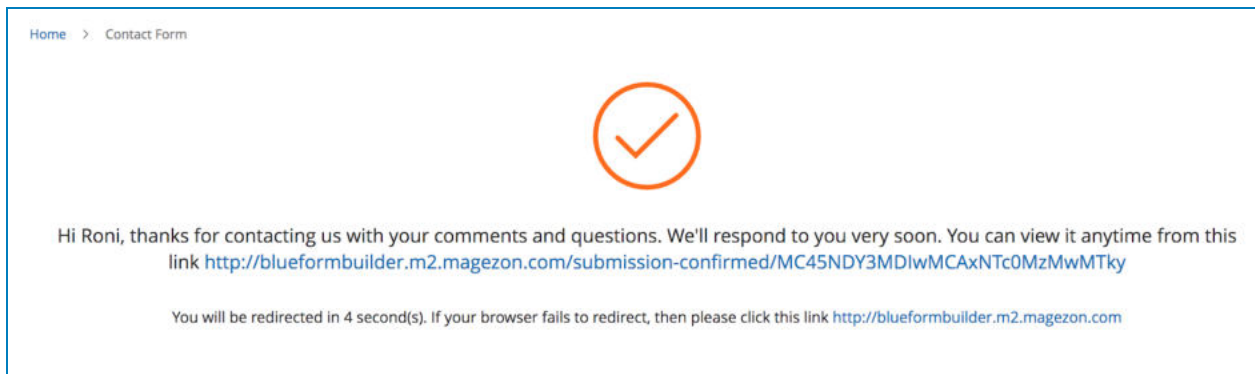

>> Style1 on frontend:

- If you choose Style2, you can customize the color for the icon in **Border & Circle Color**.

Style	<input type="text" value="Style2"/>
Border & Circle Color	<input type="text" value="#ff6a00"/>

>> Style 2 on frontend:

3.2.4 Form in Websites

Choose store views to display the form. View tutorial on how to create multi language forms [here](#).

⊖ **Form in Websites**

1	
---	--

3.2.8 Custom Javascript

This section is designed for developers to add Javascript code for advanced configuration.

Custom Javascript

On Page Load

1

Javascript to be executed on page load.

Before Submit

1

Javascript to be executed before form submission.

After Submit

1

Javascript to be executed after form submission, for example a Google Analytics tracking event.

3.2.9 Advanced

⊖ Advanced

Width

Auto Save Form Process Yes

Disable multiple submissions from same device No

Disable form when it reaches X submissions
Current submission counter: 13

Redirect on Submit
Use "/" to stay on the same page after submitting.

Redirect X seconds after form submit

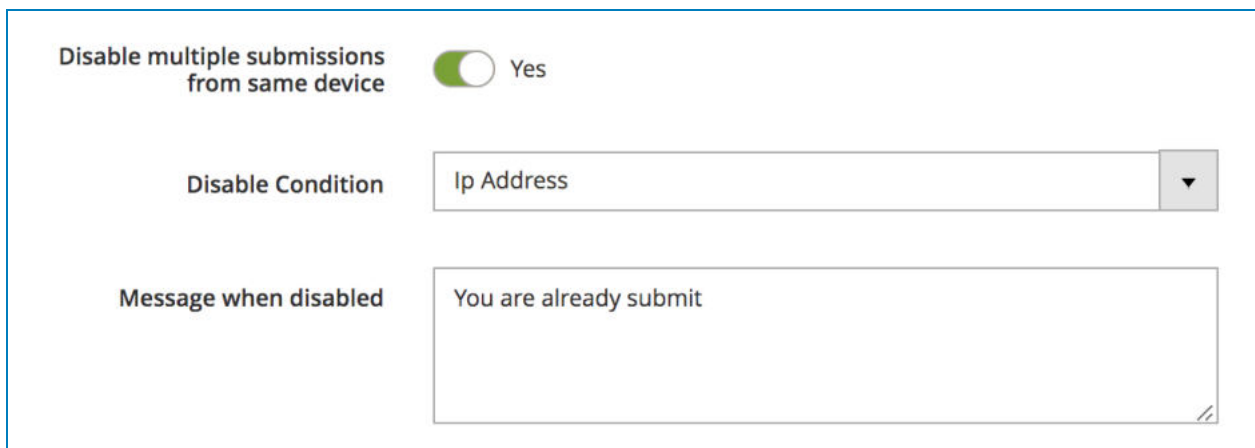

Submission Prefix
Ex: BFB => BFB000000001

Layout ▼

[EXPORT FORM FILE](#)

You can import this form template on any other Magento2 site with the extension installed.

- **Width:** set width (px) for the form.
- **Auto Save Form Process:** with this function, users' form data would be auto-saved as they fill the form. It means the data that users filled in the form would still remain after they refresh the page, and they just need to continue filling the form instead of filling from scratch.
- **Disable multiple submissions from same device:** this function helps you prevent the form from being submitted multiple times by the same user. When the button is turned on, you will see the following options:

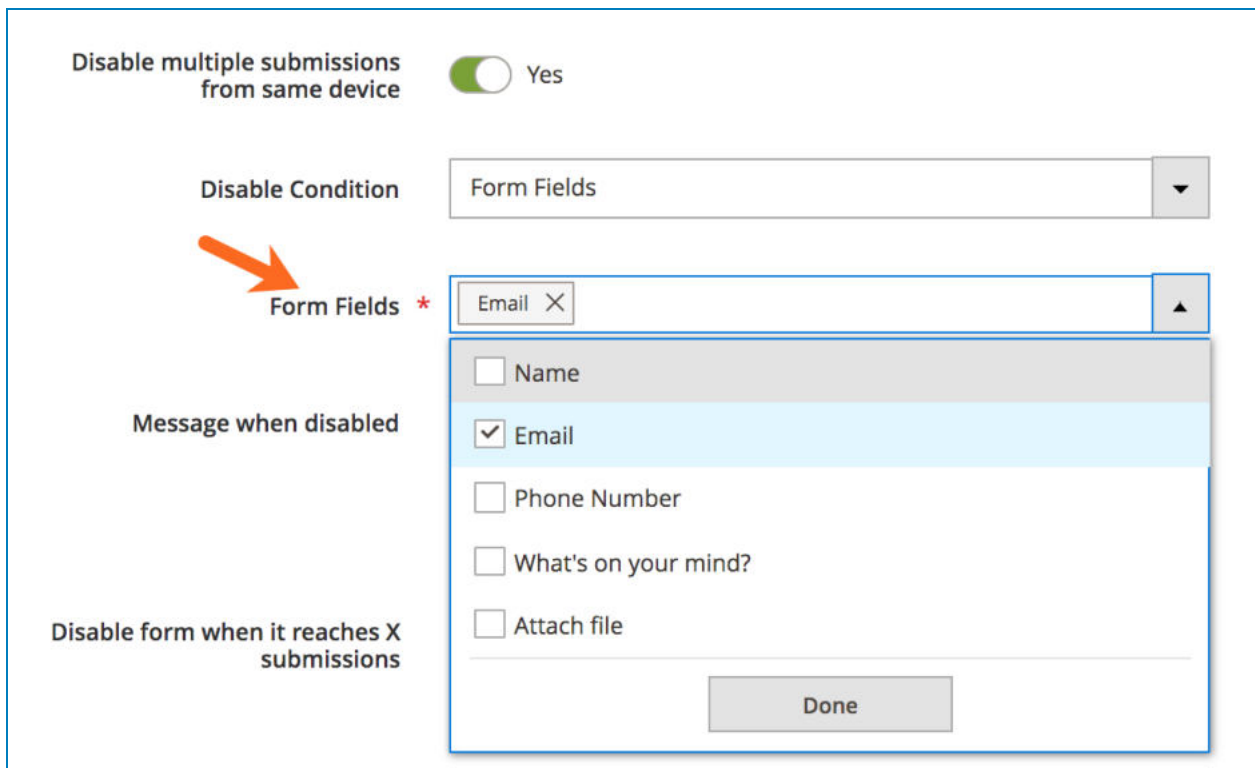

Disable multiple submissions from same device Yes

Disable Condition

Message when disabled

- **Disable Condition:** choose the condition to prevent multiple submissions from the same user including: Customer ID, IP Address and Form Fields. If you choose Form Fields, then **Form Fields** drop-down will appear where you can select your wanted form fields. Remember that you can select multiple form fields.

Disable multiple submissions from same device Yes

Disable Condition Form Fields

Form Fields * Email X

Message when disabled

- Name
- Email
- Phone Number
- What's on your mind?
- Attach file

Done

Disable form when it reaches X submissions

- **Message when disabled:** the message that shows up to notify when a user submits the form more than once.
- **Disable form when it reaches X submissions:** disable the form when its submissions reach a certain number.
- **Redirect on Submit:** enter URL of the page to which you want to redirect your customers after submitting the form.
- **Redirect X seconds after form submit:** redirect customers to the page you enter in the above '**Redirect on Submit**' field after a certain number of seconds after form submission.
- **Submission Prefix:** add prefix to the form submission ID for easy management.

- **Layout:** choose layout for the form page including 6 options:

- Empty
- 1 column
- 2 columns with left bar
- 2 columns with right bar
- 3 columns
- 1 column Full Width (lets you display the form page in full width).

- **Export Form File:** export form file to CSV so that you can import it into any other Magento 2 sites with the extension installed.

3.2.10 Embed

Copy and paste the provided code into the WYSIWYG editor of a page/block, into a template file or a layout file so that you can insert the form anywhere on your website.

Embed

 **Insert the code below into WYSIWYG editor**

```
{{widget type="BlueFormBuilder\Core\Block\Widget\Form" code="contact-form"}}
```

 **Insert the code below into a template file**

```
<?=$this->helper('BlueFormBuilder\Core\Helper\Data')->renderForm("contact-form") ?>
```

 **Insert the code below into a layout file**

```
<block class="BlueFormBuilder\Core\Block\Form" name="bfb-form">  
  <arguments>  
    <argument name="code" xsi:type="string">contact-form</argument>  
  </arguments>  
</block>
```

3.3 Form Submissions

All submissions of the form will be managed in this section. This is similar to the page containing [submissions of all forms](#).

4) Form Elements

4.1 Common Setting Tabs

Blue Form Builder supports 35+ elements to build your forms. Below are common settings that you will see in almost all elements:

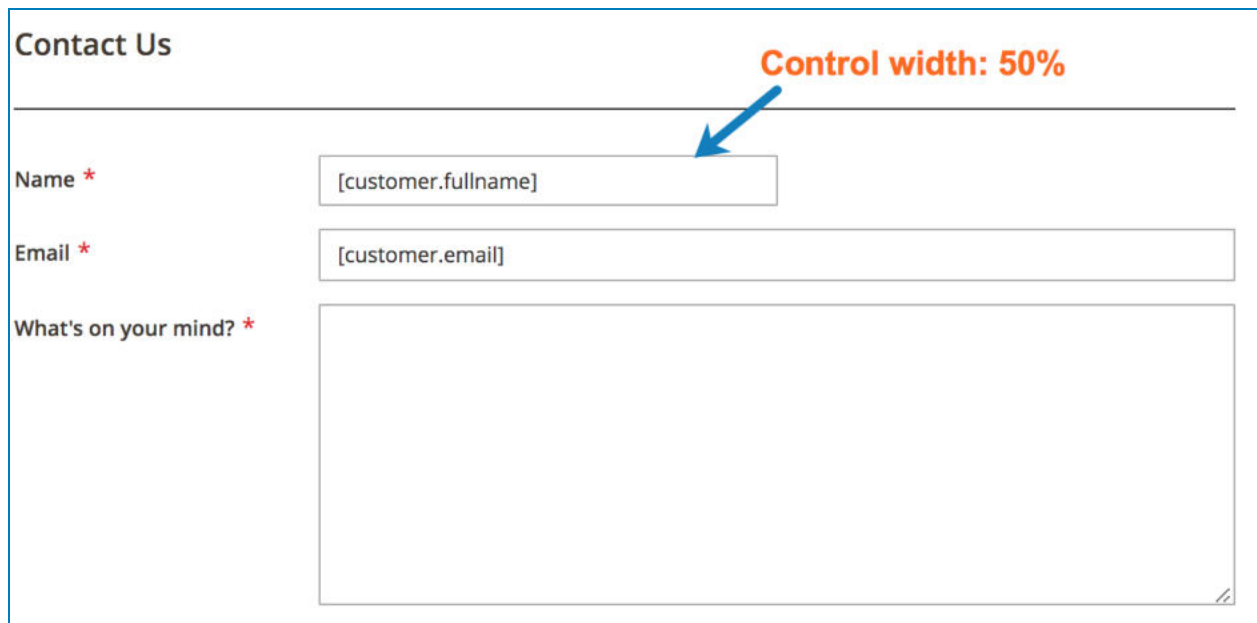

4.1.1 Appearance

The screenshot shows the configuration interface for a 'Single Line Text' form element. The interface has a blue header with the title 'Single Line Text' and a pencil icon. Below the header are several tabs: 'General', 'Appearance' (which is selected), 'Icon', 'Validation', 'Advanced', and 'Design Options'. The 'Appearance' tab contains the following settings:

- Label:** A text input field containing 'Name'.
- Email Label:** An empty text input field.
- Label Position:** A dropdown menu with 'Left of Element' selected.
- Label Alignment:** A dropdown menu with 'Left' selected.
- Label Width(percent):** A text input field containing '25'.
- Control Width:** An empty text input field. Below it is the instruction: 'Enter "auto" to display default control width'.
- Element Name:** A text input field containing 'name'. Below it is the instruction: 'Make sure it is unique.'
- Exclude from Email:** A toggle switch that is currently turned off.

- **Label:** Label of element.
- **Email Label:** Label of element in notification emails. Leave blank if you want to use the element label in the **Label** field in the email.
- **Label Position:** there are 5 options:
 - Above Element
 - Below Element
 - Left of Element
 - Right of Element
 - Hidden
- Choose **Label Alignment** including Left, Center or Right.
- Set **Label Width(percent)** in percentage.
- **Control Width:** set width (px or %) for the box where customers fill in.

Control width: 50%

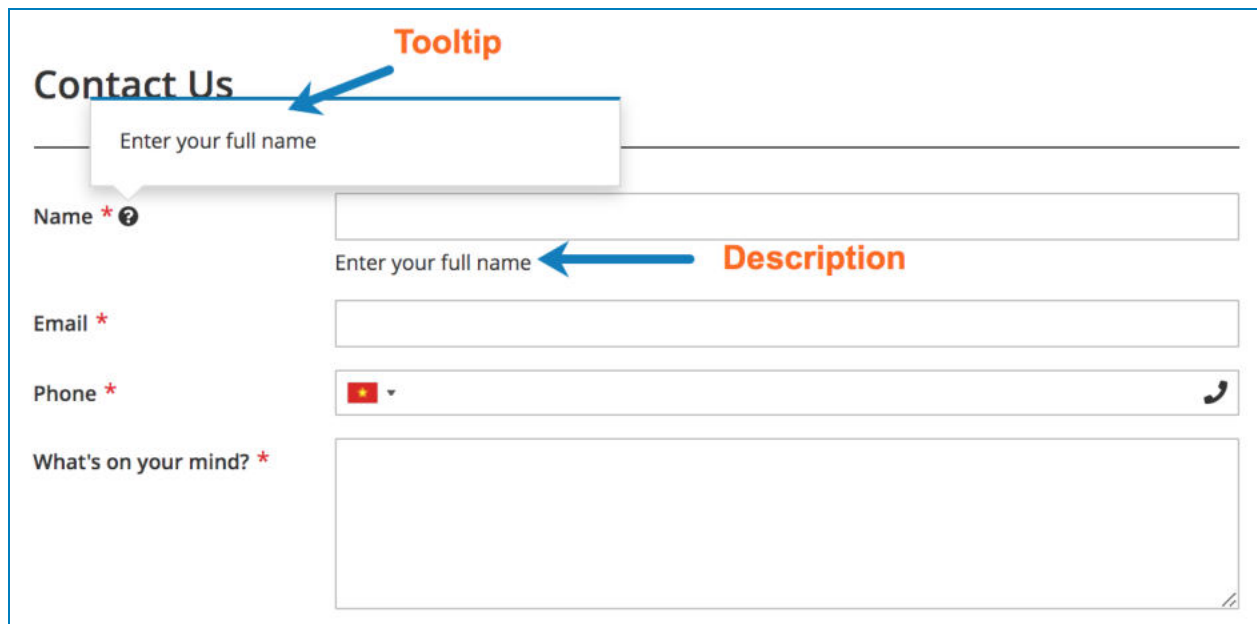

- **Element Name:** used for element [variables](#) and to auto-populate form fields using query strings ([View tutorial](#)).
- **Exclude from Email:** remove the element in the email notifications. When enabling this function, **Email Label** field will disappear.

The screenshot displays the configuration interface for a 'Single Line Text' field. The interface is divided into several tabs: General, Appearance (selected), Icon, Validation, Advanced, and Design Options. The 'Appearance' tab shows a rich text editor toolbar with various formatting options like bold, italic, underline, strikethrough, text color, background color, link, unlink, image, video, and table. Below the toolbar is a text input field with the placeholder text 'Enter your full name'. The field is currently empty, and the text 'P' is visible at the bottom left of the field. The text '4 WORDS POWERED BY TINY' is visible at the bottom right of the field.

- **Description:** you can add description for the element using WYSIWYG editor. This description will be shown under the input field:

- **Tooltip:** you can add additional information for the element here. This information will be displayed in a small box when you hover over the tooltip icon.

The image shows a contact form titled "Contact Us" with several input fields. Annotations highlight two features:

- Tooltip:** A blue arrow points to a tooltip box that appears over the "Name" field. The tooltip contains the text "Enter your full name".
- Description:** A blue arrow points to the text "Enter your full name" located directly below the "Name" input field.

The form includes the following fields:

- Name *** (with a tooltip icon): Input field with a tooltip showing "Enter your full name".
- Email ***: Input field with the description "Enter your full name" below it.
- Phone ***: Input field with a country code dropdown (showing a flag) and a phone icon.
- What's on your mind? ***: A large text area for a message.

Auto Suggest

Peter
Smith
White

Seperate the suggests with new line.

- **Required Field:** make the element required or optional to fill out.
- **Hidden Field:** When this function is enabled, the element is invisible on the frontend but its value is still sent with form submission and shown in email notifications.
- **Read-Only Field:** customers can only see the form field and cannot change or fill it out.
- **Autofocus:** if this function is enabled, the form field will be auto highlighted when you load the form page, like this:

The screenshot shows a 'Contact Us' form with three input fields. The first field is labeled 'Name *' and contains the text 'roni costella'. A blue arrow points to this field. The second field is labeled 'Email *' and contains the text 'roni.cost@gmail.com'. The third field is labeled 'What's on your mind? *' and is empty. The form is enclosed in a blue border.

- **Browser Autocomplete:** enable this function to allow the browser to predict the value. When a user starts to type in a field, the browser should display suggested options to fill in the field, based on earlier typed values.
- **Placeholder:** the text shown inside form fields to show customers what they should fill. When customers start filling, the placeholder text will disappear. The placeholder will look like this on frontend:

Contact Us

Name * **Placeholder**

Email *

What's on your mind? *

Attach file

Max file size: 1024 KB | Allow file types: jpg, jpeg, gif, png, pdf

- **Default Value:** When you set a default value for an input field, this field will be auto filled with relevant pre-collected information without customers having to fill it out. For example, if you set the “Name” field with “[customer.fullname]”, then when a logged in customer fills the form, this field will be auto filled with his/her full name collected from his/her login process. These default values include:

- **Customer:** ID, first name, middle name, last name, email, etc.
- **Page:** URL Key, title.
- **Product:** ID, name, sku, price, special price, etc.

Default Value

[customer.fullname] 

Search for predefined variables

Customer	Customer ID [customer.id]
Page	Customer First Name [customer.firstname]
Product	Customer Middle Name [customer.middlename]
	Customer Last Name [customer.lastname]
	Customer Full Name [customer.fullname]
	Customer Email [customer.email]
	Customer Date of Birth [customer.dob]
	Customer Prefix [customer.prefix]
	Customer Suffix [customer.suffix]
	Customer IP [customer.ip]

- **Auto Suggest:** enter suggested values for a field so that when customers start to type in the field, a list of these suggested values that are relevant will be displayed for customers to choose and fill in the field.

4.2 Common Elements

Common elements are those that you usually find in a form such as email, paragraph, file upload, submit, etc.

4.2.1 Single Line Text

Single Line Text is used for single-line input such as name, address, etc.

The screenshot shows the configuration panel for a 'Single Line Text' field. The panel has a blue header with the title 'Single Line Text' and a pencil icon. Below the header are several tabs: 'General', 'Appearance', 'Icon', 'Validation' (which is selected), 'Advanced', and 'Design Options'. The 'Validation' tab contains the following settings:

- Min:** An empty text input field.
- Max:** A text input field containing the value '1000'.
- Limit By:** A dropdown menu with 'Characters' selected (indicated by a checkmark) and 'Words' as an alternative option.
- Validation:** A text area containing the message 'Please use letters only (a-z or A-Z) in this field.' with a red 'X' icon in the top right corner.
- Text To Appear After Counter:** A text input field containing the text 'Character(s) left'.
- Show Character Count:** A toggle switch that is currently turned on (green).

a. **Validation** tab:

- **Min, Max:** set the min/max number of characters/words that users can fill.
- **Limit By:** limit the input text by characters or words.

- **Validation:** choose type of content validation here. The chosen validation content will appear under the input field to remind customers when they enter incorrect information, like this:

Contact Us

Name * 986 of 1000 Character(s) left

Please use letters only (a-z or A-Z) in this field.

Email *

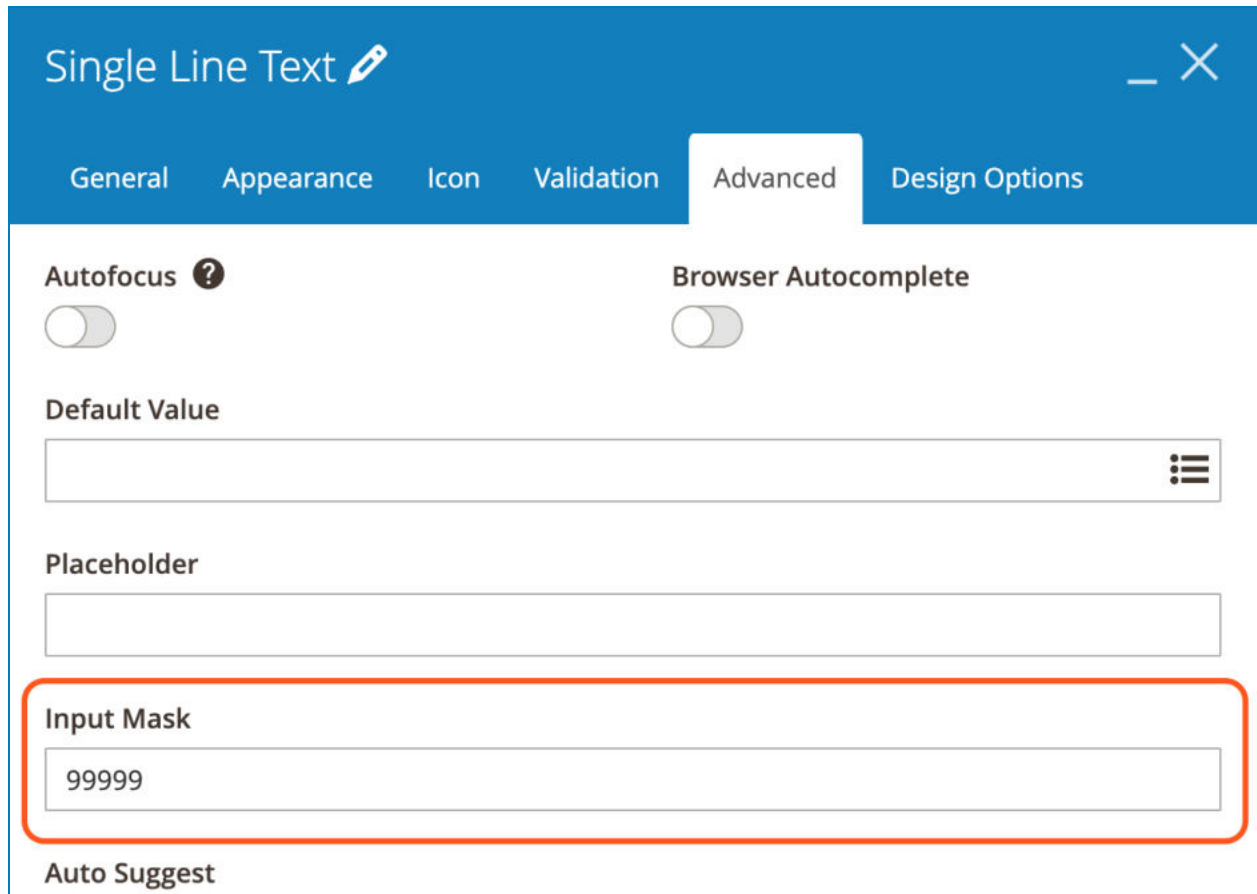

- **Text To Appear After Counter:** when customers are filling the form field, there appears a text under the input field like “986 of 1000 Character(s) left”. “Character(s) left” is the text that you enter in **Text To Appear After Counter**. (Remember that this text only appears on frontend when you set max characters/words in **Max** field).
- **Show Character Count:** enable this function to show how many characters have been typed or how many characters/words are left (in case you set max characters/words in **Max** field), like this:

Contact Us

Name * 987 of 1000 Character(s) left

Email *

b. **Advanced** tab

Single Line Text 

General Appearance Icon Validation **Advanced** Design Options

Autofocus  

Browser Autocomplete 

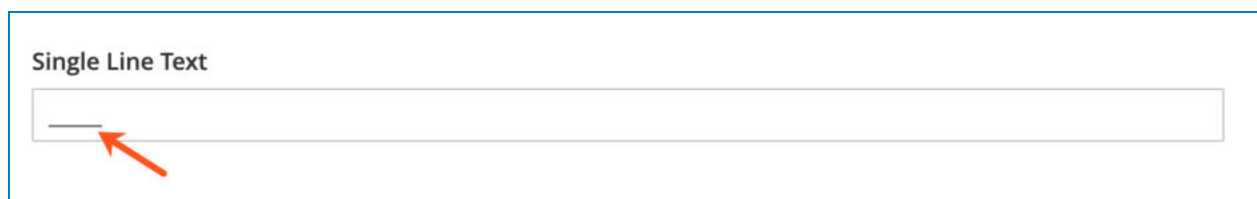

Default Value

Placeholder

Input Mask

Auto Suggest

- **Input Mask:** input masks are a way to control what data can be entered into a form's field. They are governed by a strict set of rules that site visitors can't break while trying to fill out your form. And users can only enter values that fit the saved format. For example, if we enter **99999** in this field, then on the frontend, when you put your cursor into the field, you will see the input mask appear like this:

Single Line Text

And users will only be able to enter up to 5 numeric characters here, like this:

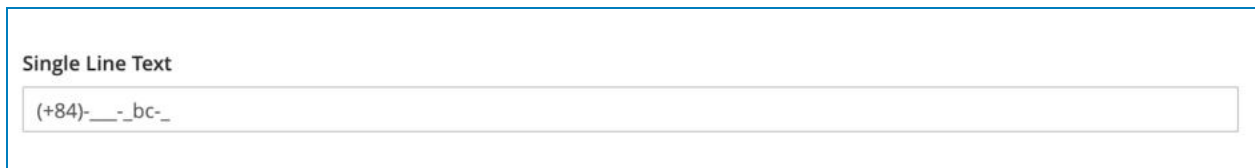

A screenshot of a 'Single Line Text' input field. The field contains the text '89080'. A red arrow points to the end of the text, indicating the cursor position.

The following characters can be used for input mask to format the data entered in the Single Line Text field:

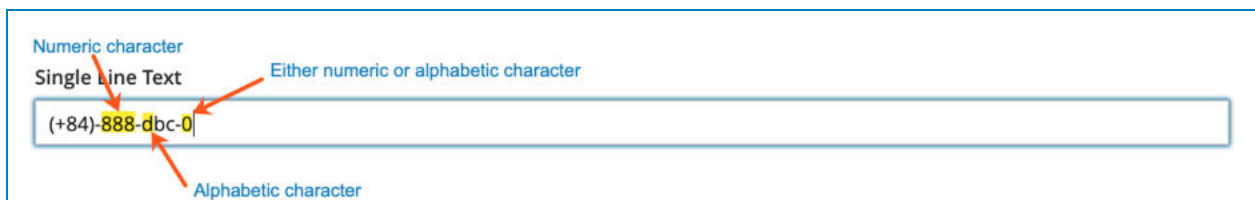

- **9** - requires any numeric character.
- **a** - requires any alphabetic character.
- ***** - allows either numeric or alphabetic character.

Another example is that we enter **(+84)-999-abc-*** in the Input Mask field. On the frontend, when you hover over the field, the input mask will be like this:

A screenshot of a 'Single Line Text' input field. The field contains the text '(+84)-__-bc-'. The underscores represent the input mask.

The data that users enter in this field should follow this format, like this:

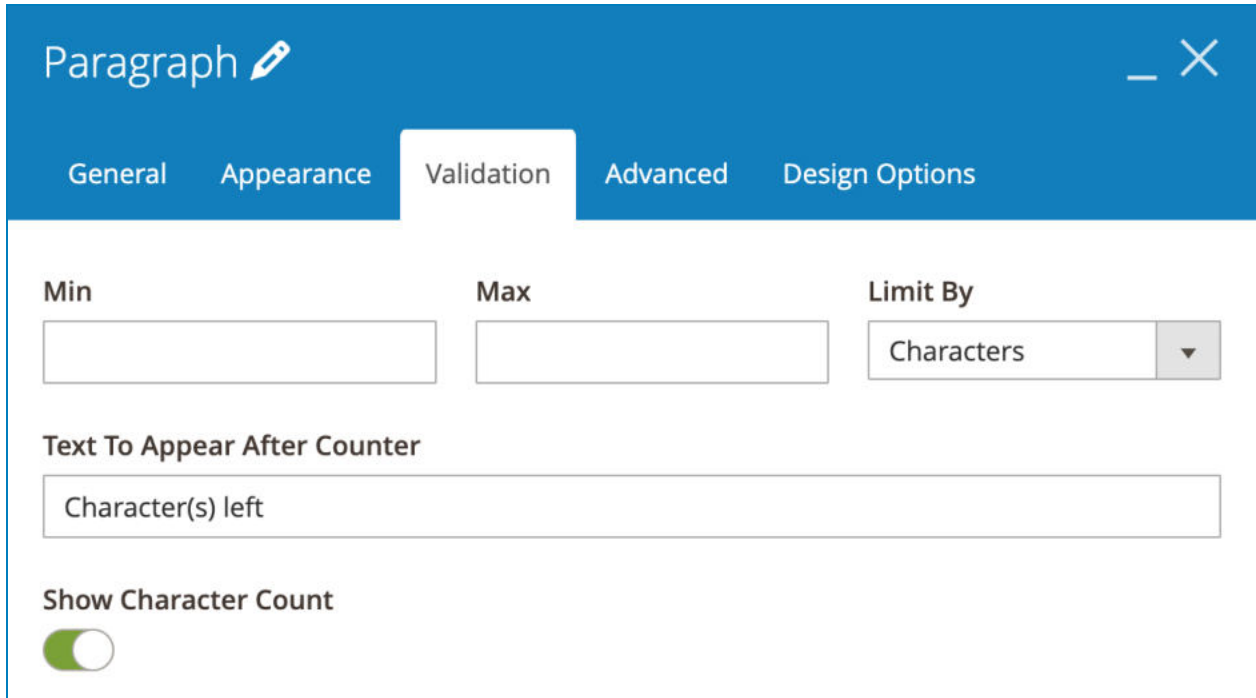

A screenshot of a 'Single Line Text' input field. The field contains the text '(+84)-888-dbc-0'. Three red arrows point to specific parts of the text with labels: 'Numeric character' points to the first '8', 'Either numeric or alphabetic character' points to the 'd', and 'Alphabetic character' points to the 'b'.

4.2.2 Paragraph

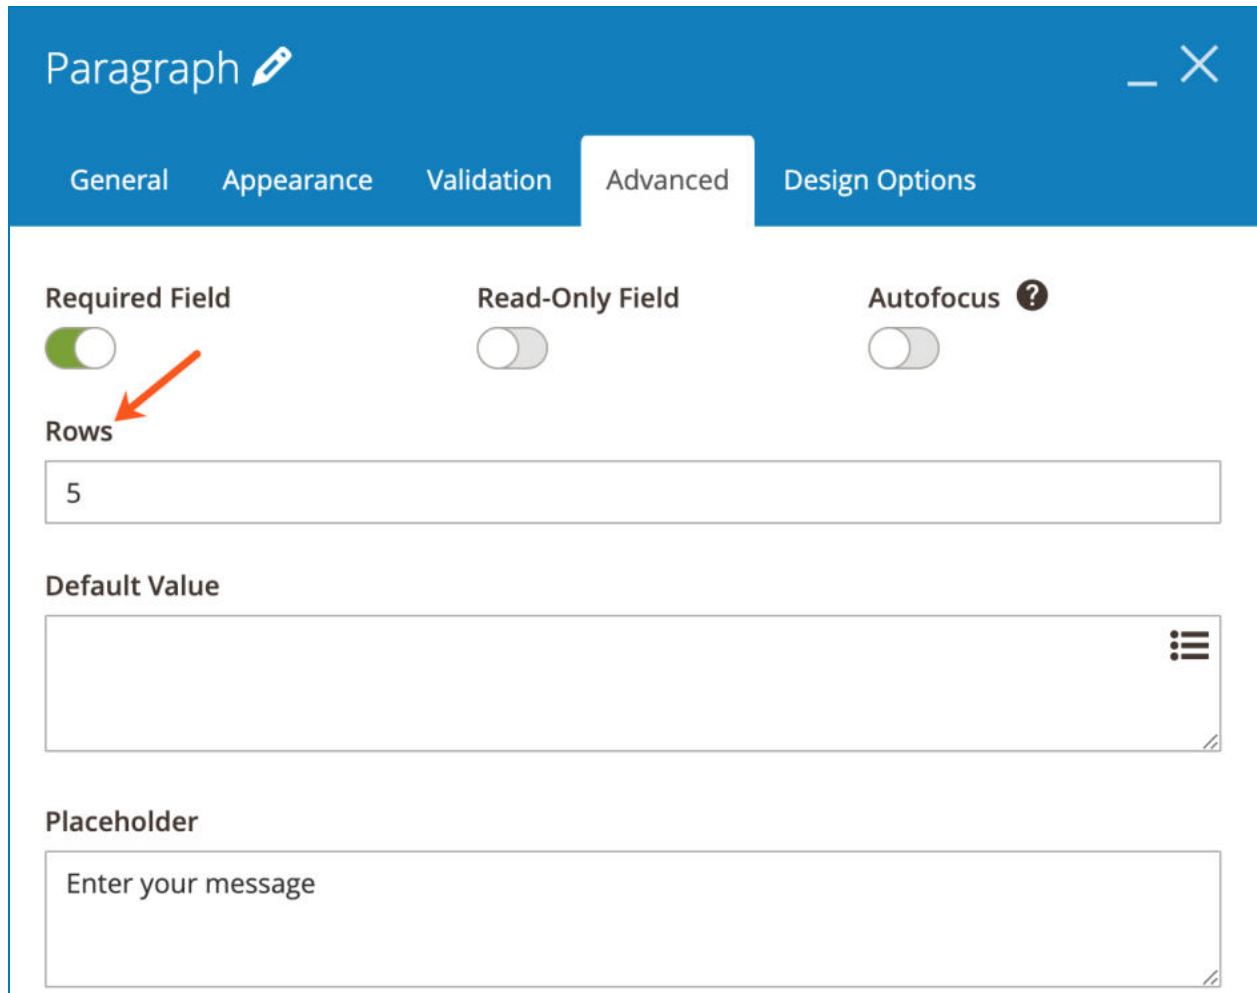

This element is used for multi-line input such as comments, reviews, etc.

a. **Validation** tab: the same as that in the [Single Line Text](#) element.

The image shows a configuration window for a "Paragraph" element. The window has a blue header with the title "Paragraph" and a pencil icon. Below the header are five tabs: "General", "Appearance", "Validation", "Advanced", and "Design Options". The "Validation" tab is currently selected. Inside the "Validation" tab, there are three input fields: "Min", "Max", and "Limit By". The "Limit By" field is a dropdown menu currently set to "Characters". Below these fields is a text input field labeled "Text To Appear After Counter" containing the text "Character(s) left". At the bottom, there is a toggle switch labeled "Show Character Count" which is currently turned on.

b. **Advanced** tab: enter the number of rows for textarea in **Row** field.

4.2.3 Email

Email element is used for email input.

The screenshot shows the configuration interface for an email form element. The 'Advanced' tab is active, displaying several settings:

- Required Field:** Enabled (toggle is green).
- Hidden Field:** Disabled (toggle is grey).
- Read-Only Field:** Disabled (toggle is grey).
- Browser Autocomplete:** Disabled (toggle is grey).
- Autofocus:** Disabled (toggle is grey).
- Send Autoresponder:** Enabled (toggle is green and highlighted with a red box).

Below the 'Send Autoresponder' toggle, a note states: "Autoresponder settings are available under **Settings > Email Notifications > Customer**".

There are also two text input fields:

- Default Value:** Contains the placeholder text "[customer.email]".
- Placeholder:** Contains the email address "roni.cost@gmail.com".

- Send Autoresponder:** By enabling this function, notification emails will be auto sent to customers about their form submissions. You can customize email content for customers by navigating to [Settings > Email Notifications > Customer](#) under **Magezon Blue Form Builder** section.

>> Email element on frontend:

Contact Us

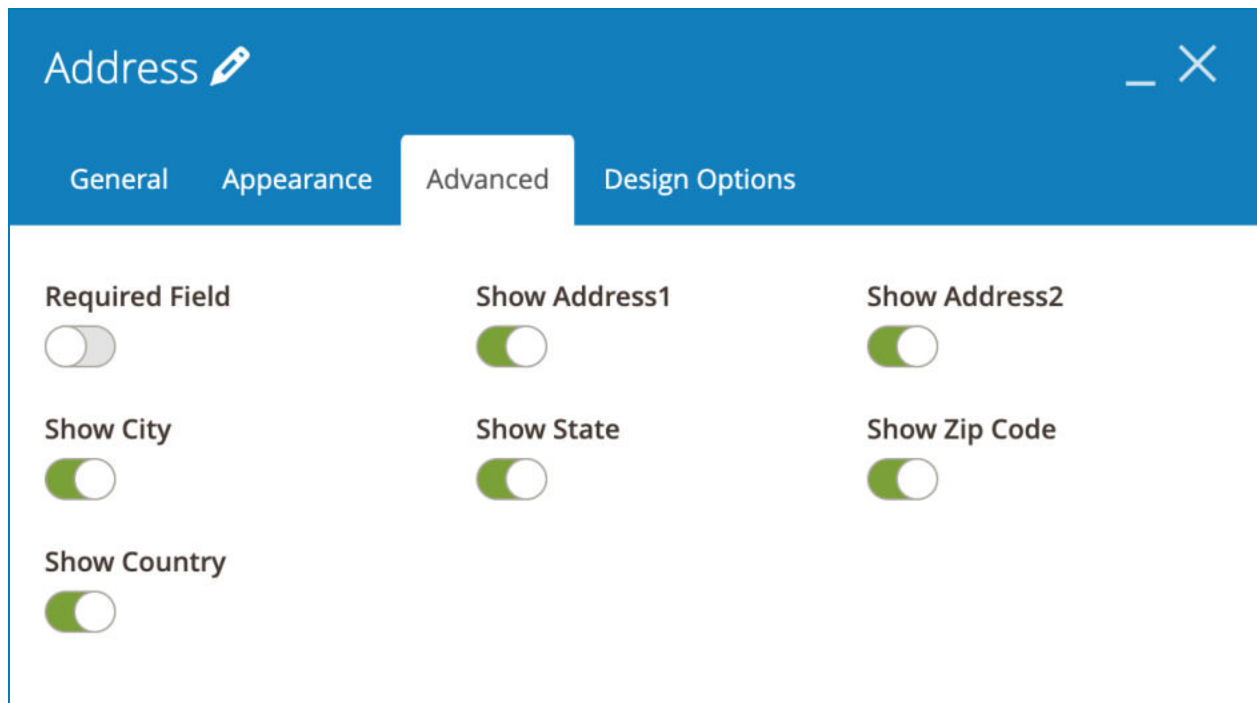

Name *

Email *

What's on your mind? *

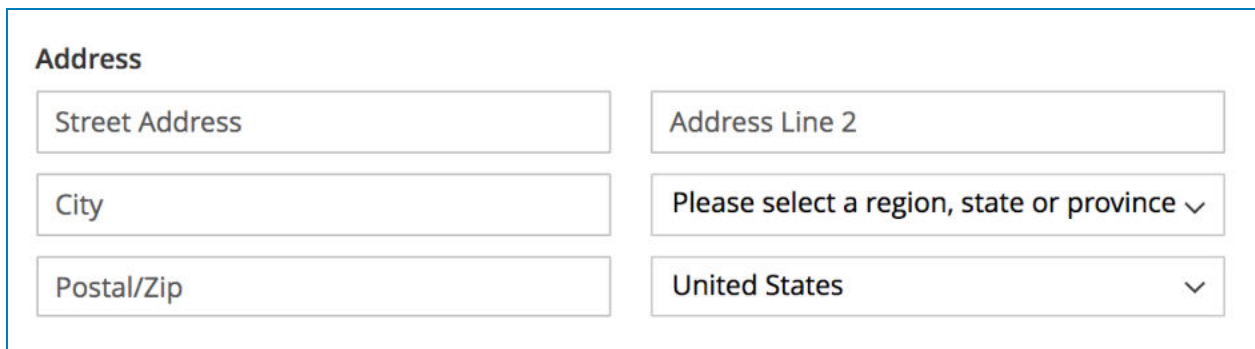

4.2.4 Address

Address element allows users to enter their addresses.

You can show/hide **Address1**, **Address2**, **City**, **State**, **Zip Code** and **Country** using on-off buttons.

>> Address element on frontend:

4.2.5 Date Picker

Date Picker element allows users to choose a date from a calendar.

a. Validation tab

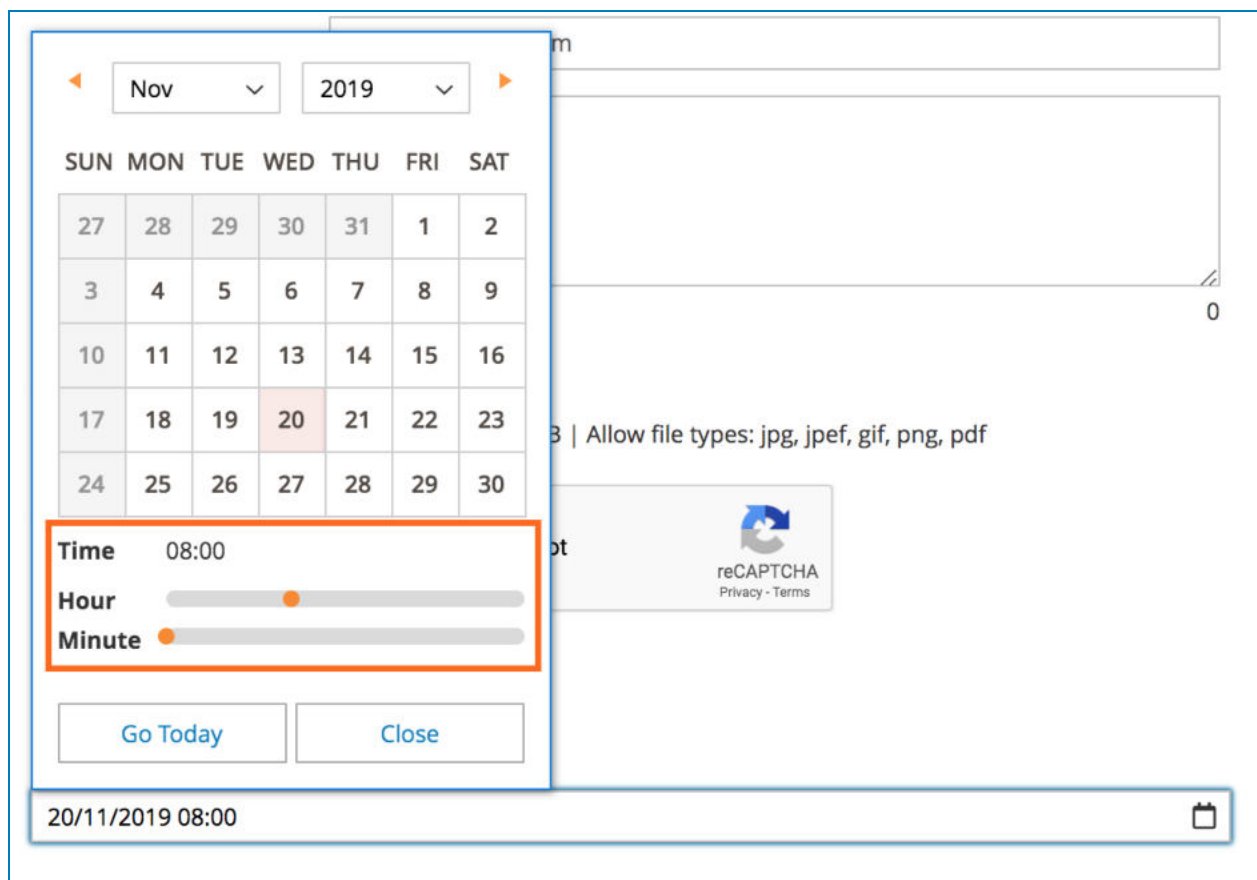

- **Min Date/ Max date:** choose the min and max date for the date picker so that customers can only choose the dates between min and max dates.
- **Language:** choose language for the date picker.
- **Format:** choose date format.
- **Days Allowed:** enable certain days of week by entering them in this field. Users cannot choose the days that are disabled. For example, if you don't allow Sunday, then the date picker will be like this:

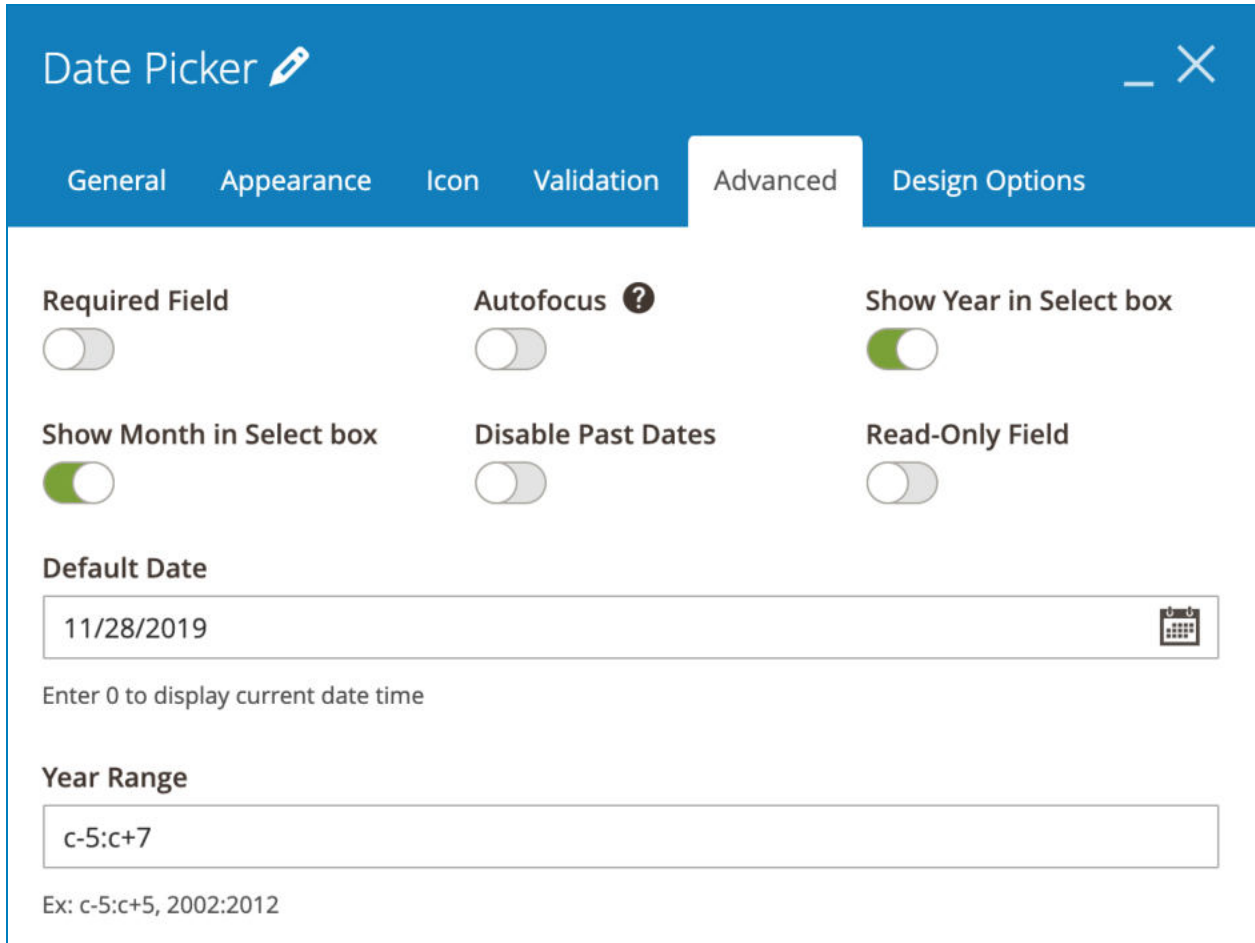

- **Show Time:** allow showing time picker on the date picker. If you turn on this button, you will see these following options:

- **Show Hour:** if enabled, users can specify hour using a slider. You can specify **Min Hour**, **Max Hour** and **Hour Step** (the number of hours added to / subtracted from the current hour each time users slide).
- **Show Minute:** if enabled, users can specify minute using a slider. You can specify **Min Minute**, **Max Minute** and **Minute Step** (the number of minutes added to/subtracted from the current minute each time users slide).

The date picker with time will look like this on frontend:

b. **Advanced** tab

The screenshot shows the 'Date Picker' configuration window with the 'Advanced' tab selected. The window has a blue header with the title 'Date Picker' and a close button. Below the header are six tabs: 'General', 'Appearance', 'Icon', 'Validation', 'Advanced', and 'Design Options'. The 'Advanced' tab is active and contains the following settings:

- Required Field:** (disabled)
- Autofocus ?**: (disabled)
- Show Year in Select box:** (enabled)
- Show Month in Select box:** (enabled)
- Disable Past Dates:** (disabled)
- Read-Only Field:** (disabled)

Default Date: 

Enter 0 to display current date time

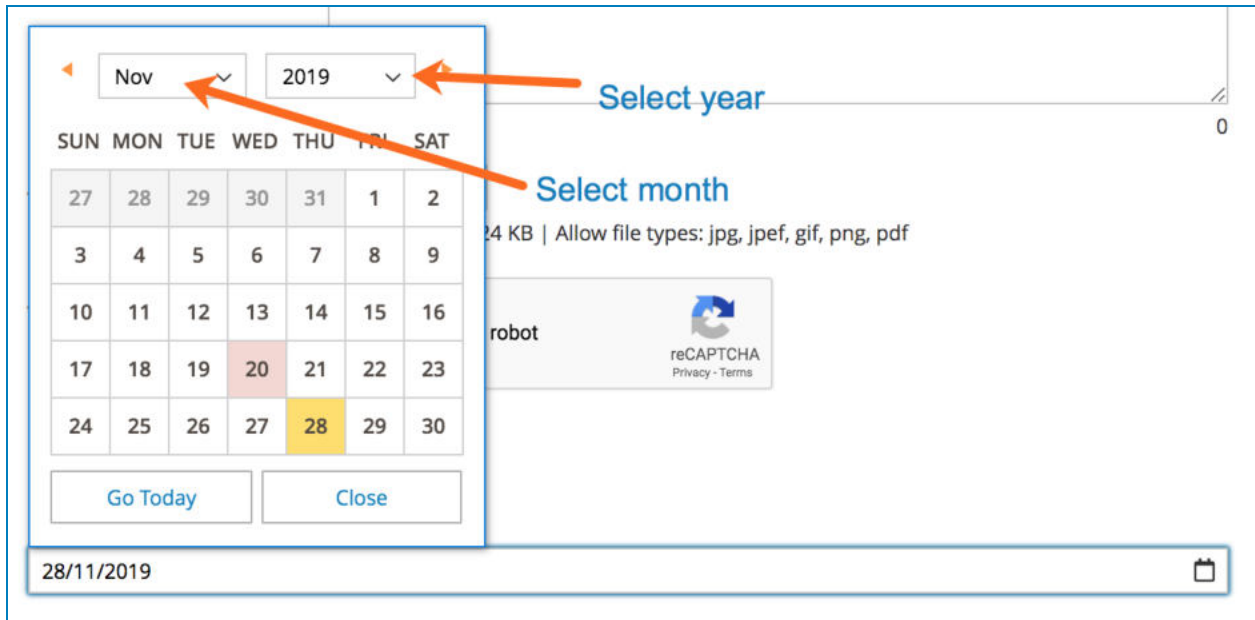

Year Range:

Ex: c-5:c+5, 2002:2012

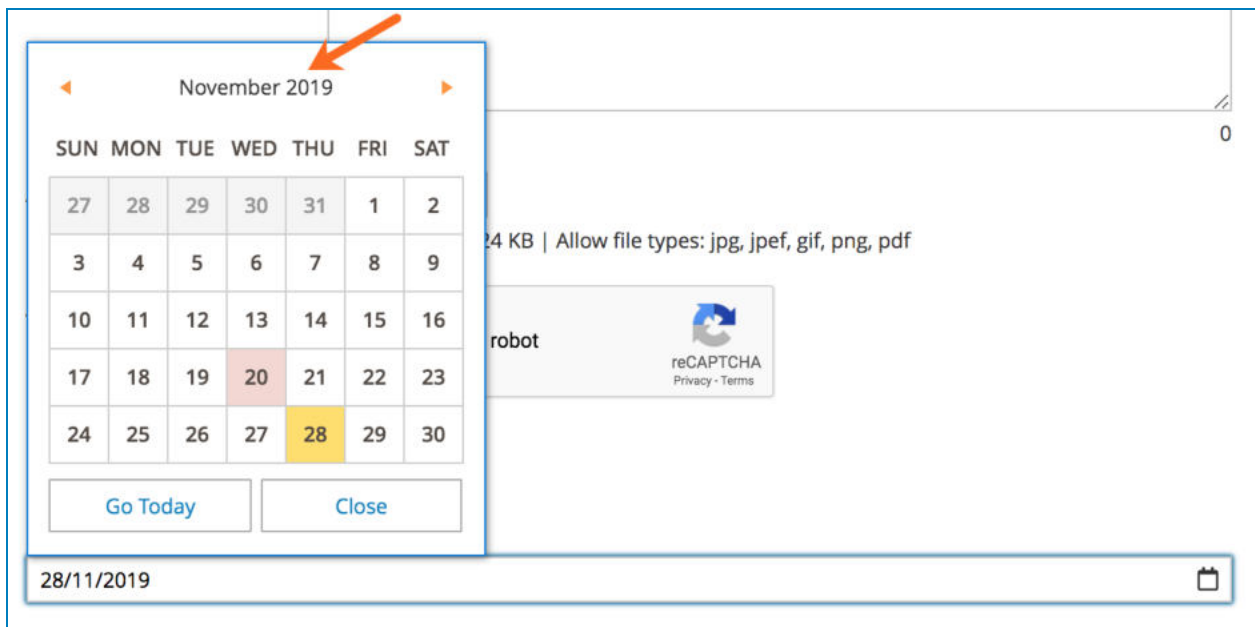

- **Show Year in Select box:** if enabled, users can choose year.

- **Show Month in Select box:** if enabled, users can choose month.

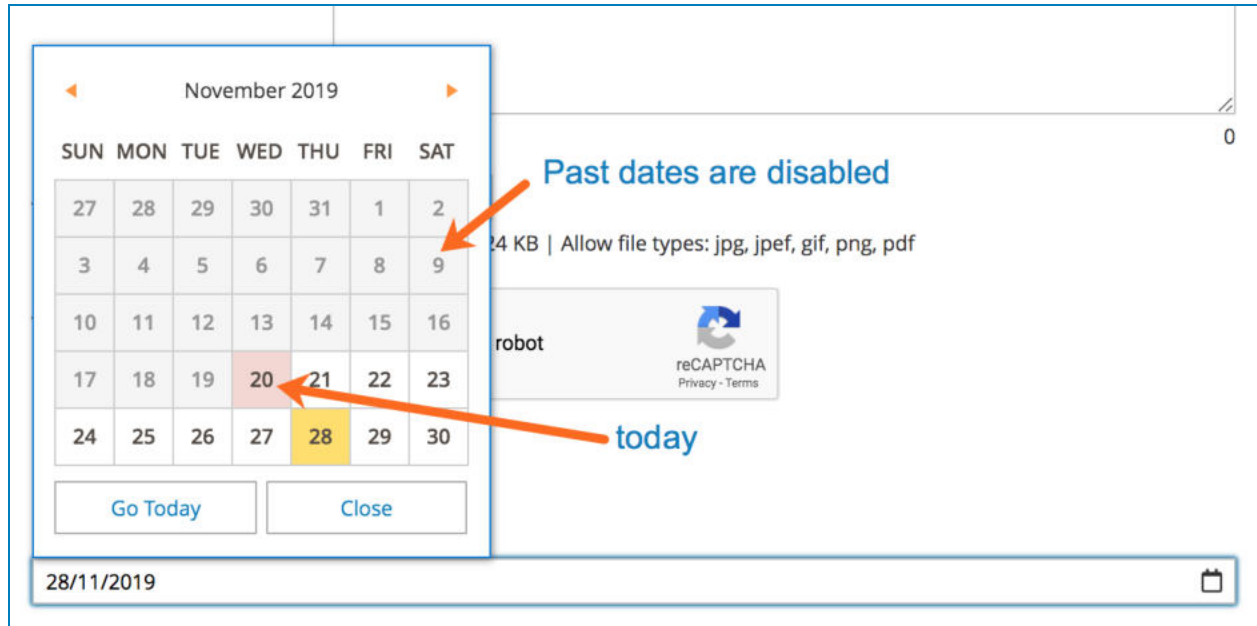

If these 2 buttons are enabled, the date picker will look like this:

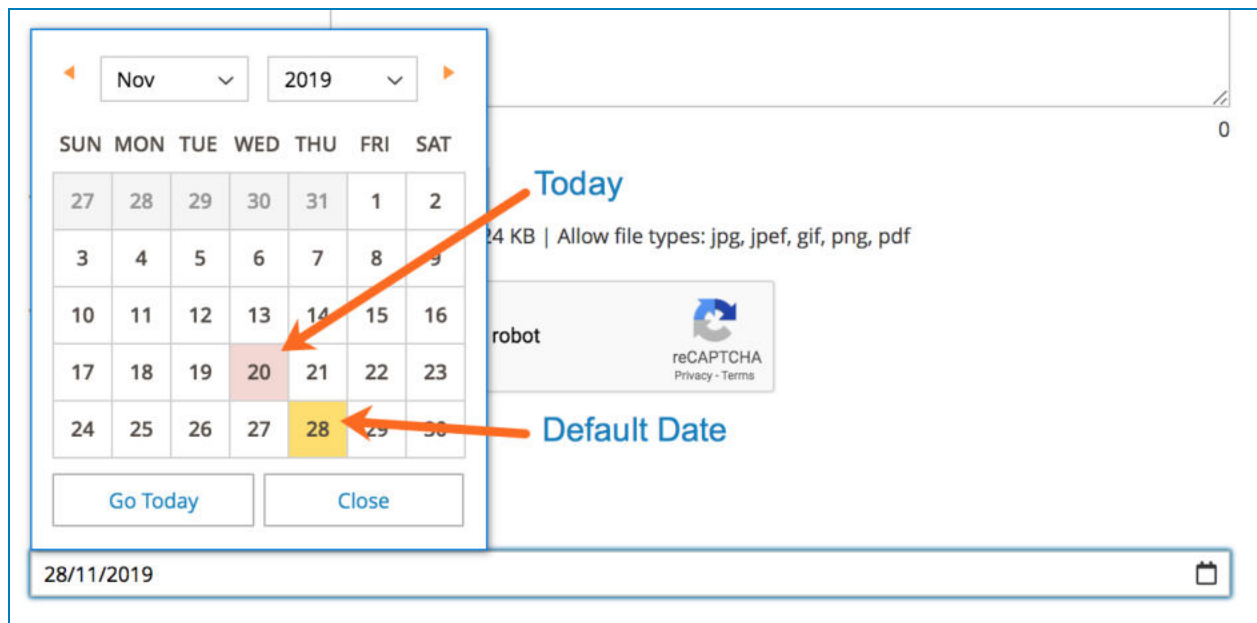

If these 2 buttons are disabled, the date picker will look like this:

- **Disable Past Dates:** disable dates before today so that users can't select, like this:

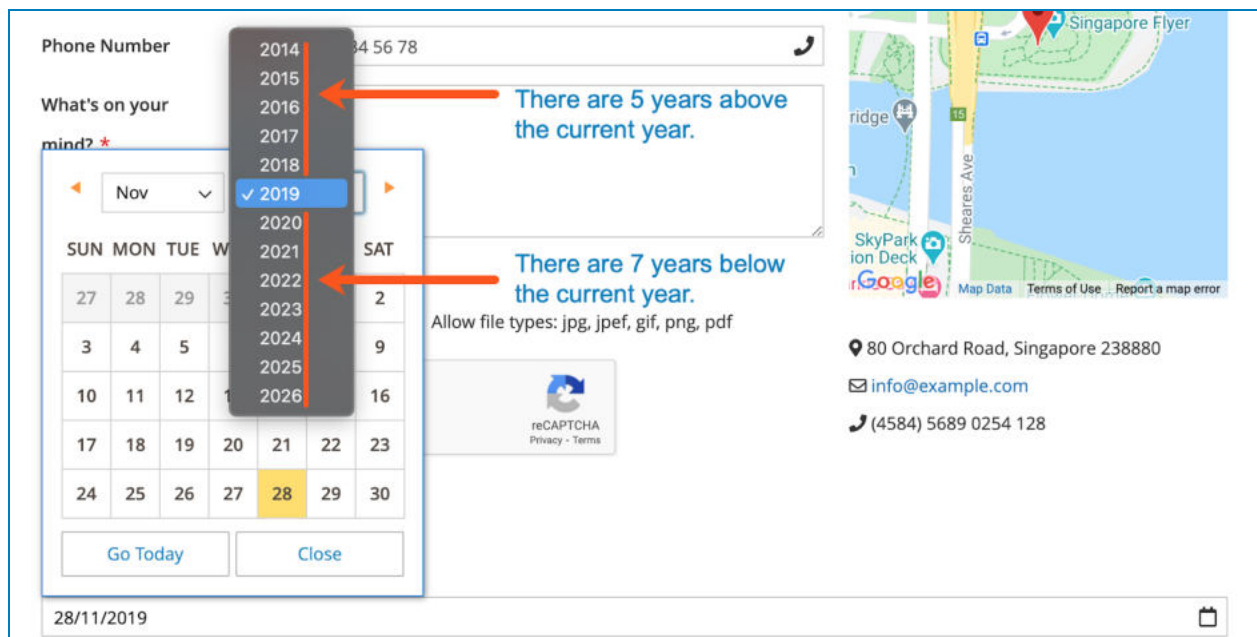

- **Default Date:** the date that is auto filled in date picker on page load.

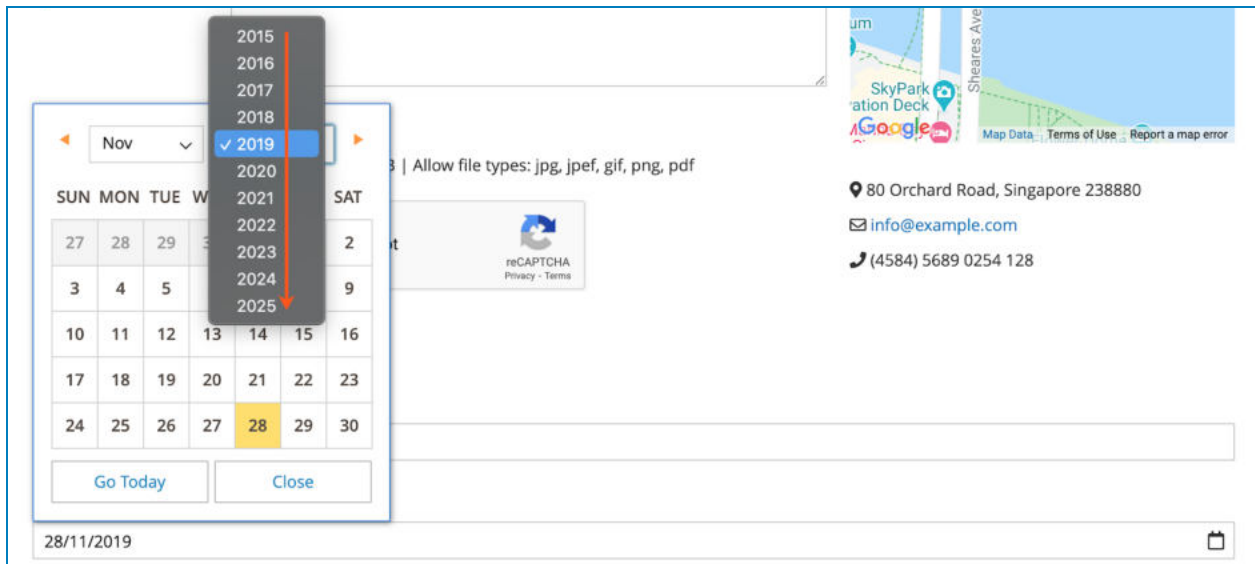

- **Year Range:** specify the year range in the year dropdown. The format you should enter here is either **c-m:c-n** (**m** is the number of years displayed above the current year, **n** is the number of years displayed below the current year) or **year:year** (the start year and end year in the year dropdown).

For example, we enter **c-5:c7** here. Then the frontend will be like:

If we enter **2015:2025**, the frontend will be like this:

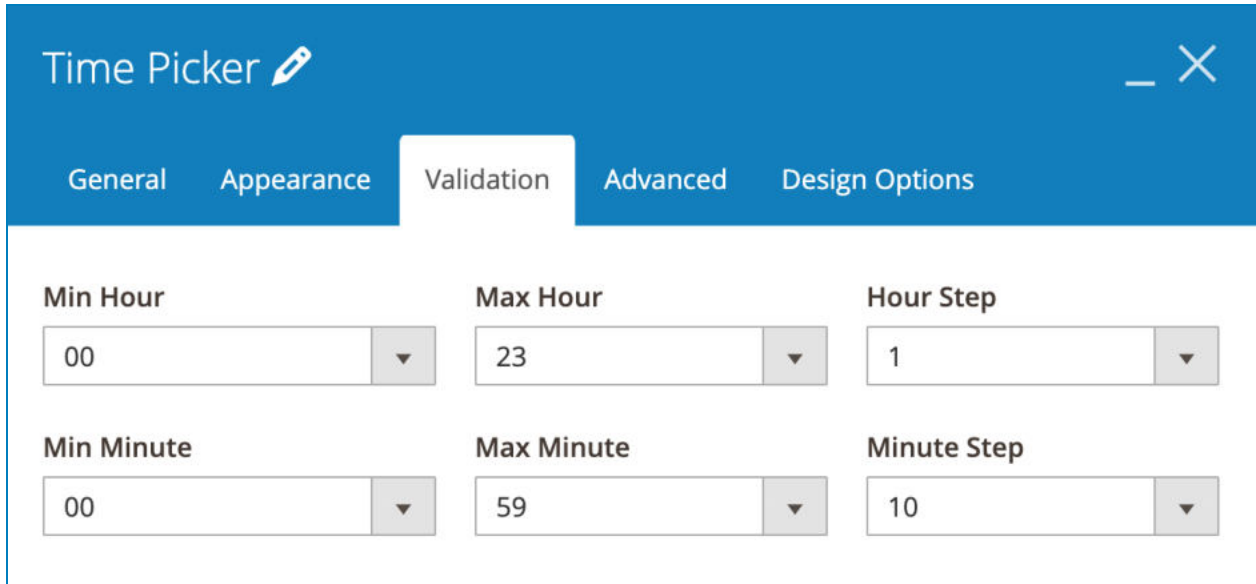

The screenshot displays a form builder interface with several components:

- Date Picker:** A calendar for the month of November. A year dropdown menu is open, showing years from 2015 to 2025. The year 2019 is selected and highlighted with a blue checkmark. The date 28 is highlighted in yellow in the calendar grid. Buttons for "Go Today" and "Close" are at the bottom of the calendar.
- File Upload:** A text field with the placeholder text "Allow file types: jpg, jpeg, gif, png, pdf". Below it is a reCAPTCHA widget with a circular refresh icon and the text "reCAPTCHA Privacy - Terms".
- Contact Information:** A block containing:
 - A Google Map showing a location near "SkyPark Station Deck" and "Sheares Ave".
 - An address: "80 Orchard Road, Singapore 238880".
 - An email address: "info@example.com".
 - A phone number: "(4584) 5689 0254 128".
- Footer:** The date "28/11/2019" is displayed in the bottom left corner, and a calendar icon is in the bottom right corner.

4.2.6 Time Picker

Time Picker element allows users to select time (including hour and minute):

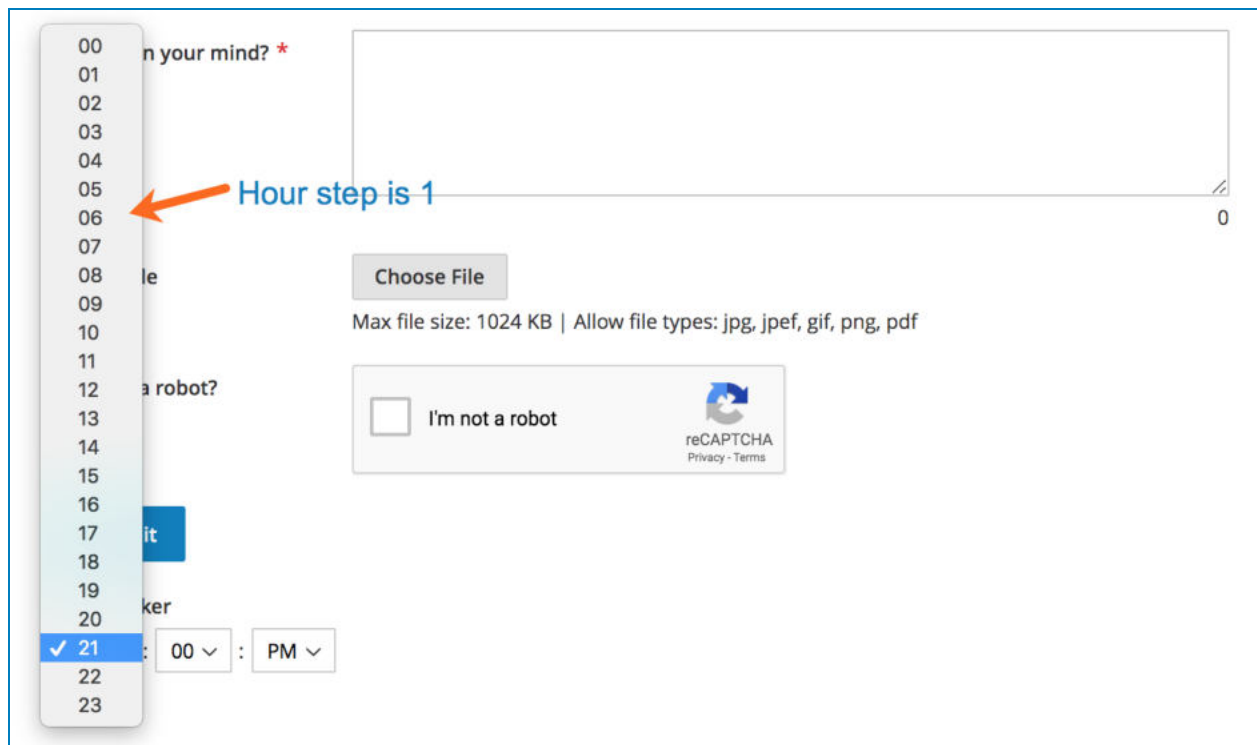

The screenshot shows the 'Time Picker' configuration window with the 'Validation' tab selected. The window has a blue header with the title 'Time Picker' and a close button. Below the header are five tabs: 'General', 'Appearance', 'Validation', 'Advanced', and 'Design Options'. The 'Validation' tab is active and contains six dropdown menus arranged in a 2x3 grid:

Min Hour	Max Hour	Hour Step
00	23	1
Min Minute	Max Minute	Minute Step
00	59	10

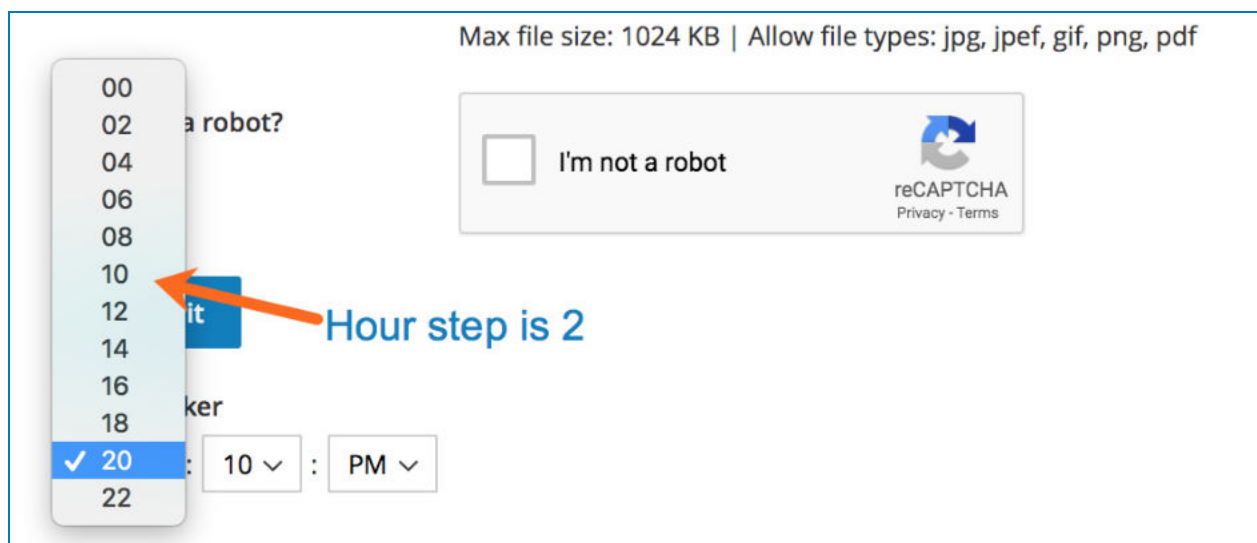

a. **Validation** tab

- Choose **Min Hour**, **Max Hour**, **Min Minute** and **Max Minute** for the time picker.
- Choose **Hour Step** and **Minute Step**.

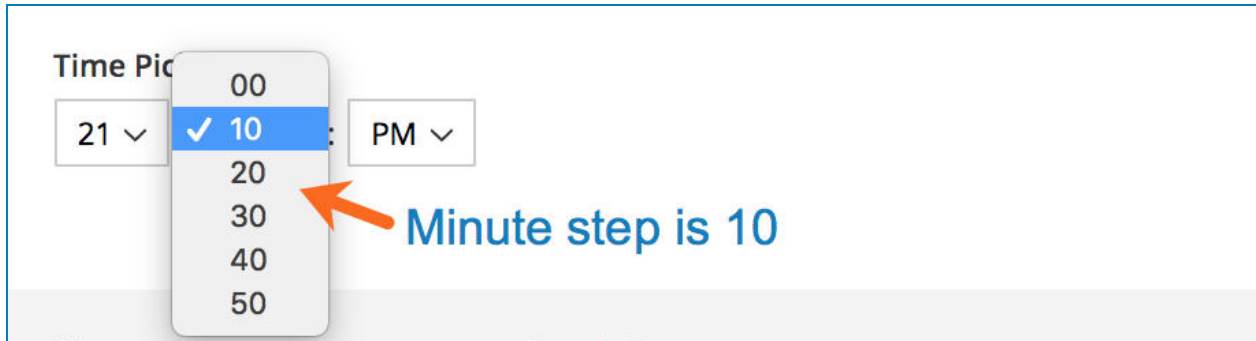

For example, if we choose 1 for Hour Step, it will be like this on frontend:

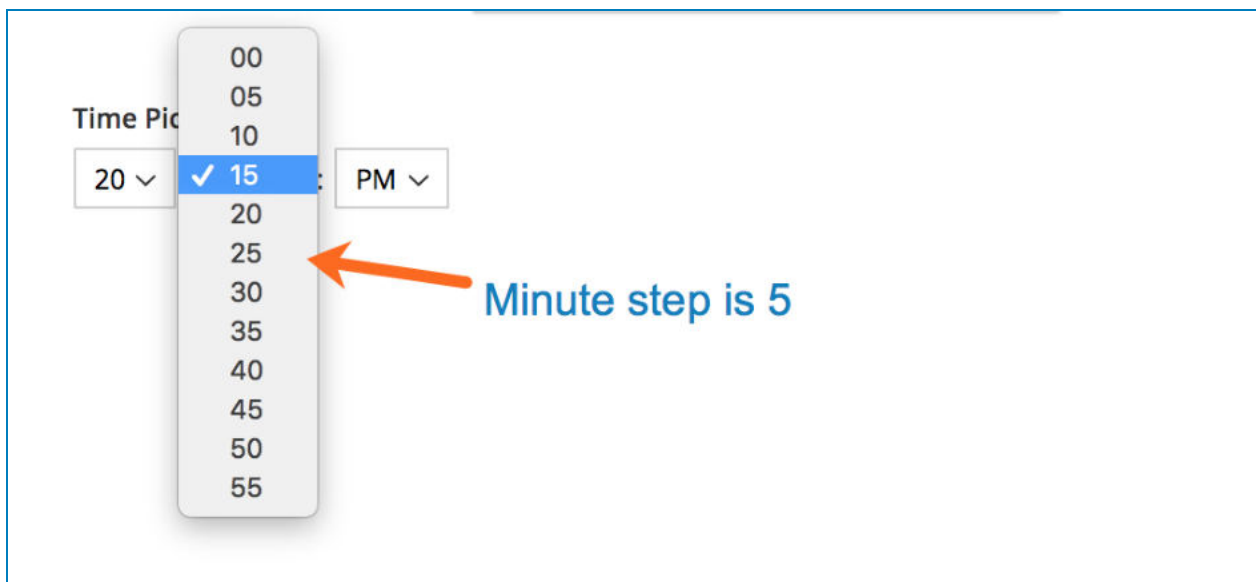

If we choose 2 for Hour Step, it will be like this:

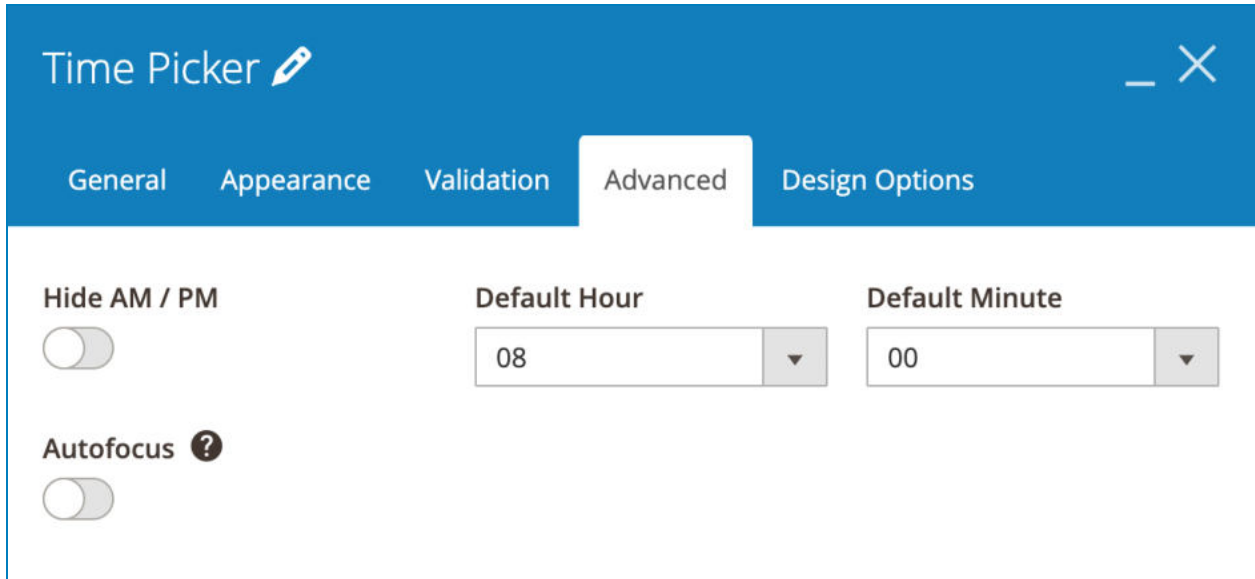

If we choose 10 for Minute Step, it will be like this on frontend:

If we choose 5 for Minute Step, it will be like this on frontend:

b. **Advanced** tab

- You can **hide AM / PM** selector.

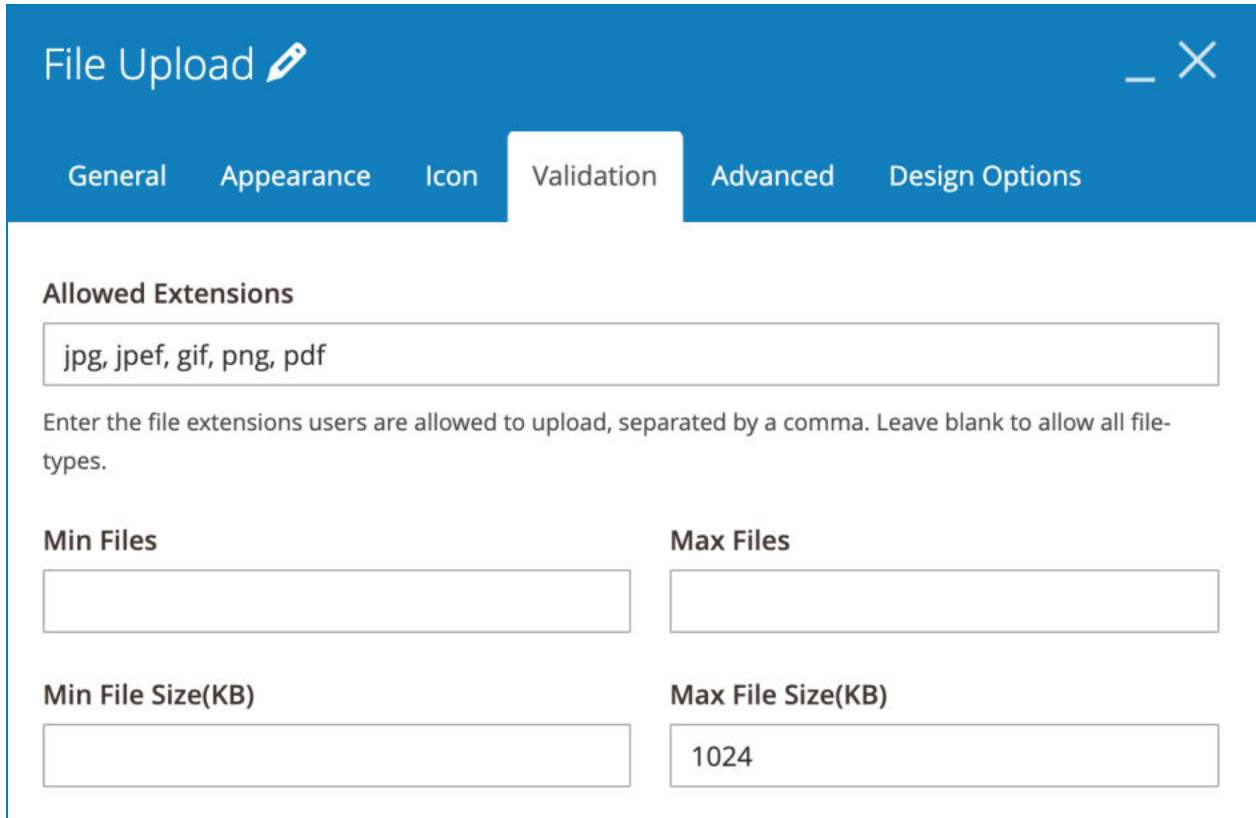

- Choose **Default Hour** and **Default Minute** that are auto selected in time picker on page load.

4.2.7 File Upload

File upload element allows users to upload files along with their form submissions.

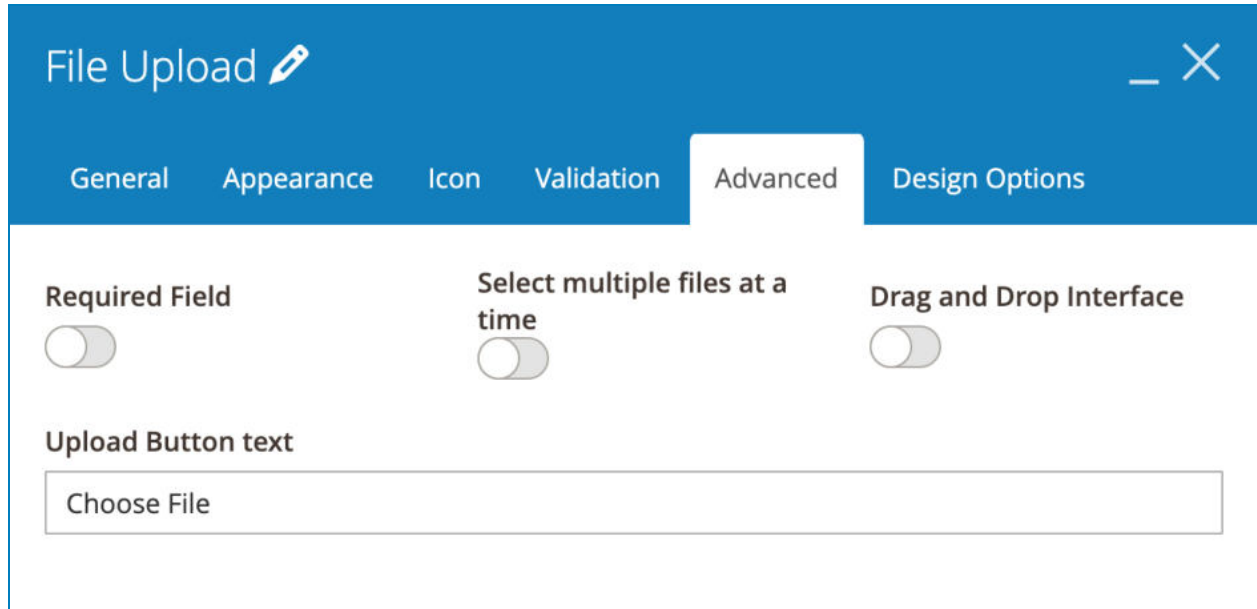

a. **Validation** tab

The screenshot shows the 'File Upload' configuration window with the 'Validation' tab selected. The 'Allowed Extensions' field contains 'jpg, jpeg, gif, png, pdf'. Below this, there are four input fields for file constraints: 'Min Files' (empty), 'Max Files' (empty), 'Min File Size(KB)' (empty), and 'Max File Size(KB)' (1024).

- **Allowed Extensions:** enter file types that users are allowed to upload.
- Limit file quantity in **Min/Max Files** fields.
- Limit file size in **Min/Max File Size** fields.

b. **Advanced** tab

- **Select multiple files at a time:** if enabled, users can select and upload multiple files at one time.
- **Drag and Drop Interface:** allow users to drag & drop files into the form field. If you don't enable this interface, you can enter **Upload Button text**. If you enable this interface, you can customize **Drag and Drop Description**.

Max file size: 1024 KB | Allow file types: jpg, jpeg, gif, png, pdf

4.2.8 Number

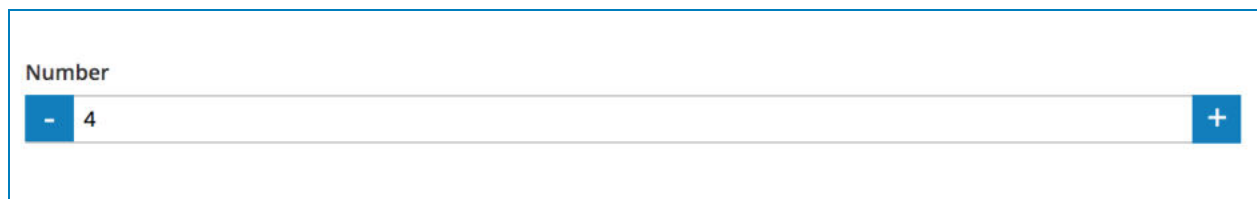

Number element is used for numeric value input.

a. **Validation** tab

The screenshot shows a configuration window for a 'Number' element. The window has a blue header with the title 'Number' and a pencil icon. Below the header are five tabs: 'General', 'Appearance', 'Validation', 'Advanced', and 'Design Options'. The 'Validation' tab is selected. Under this tab, there are three input fields: 'Min' with the value '1', 'Max' with the value '10', and 'Step' with the value '1'.

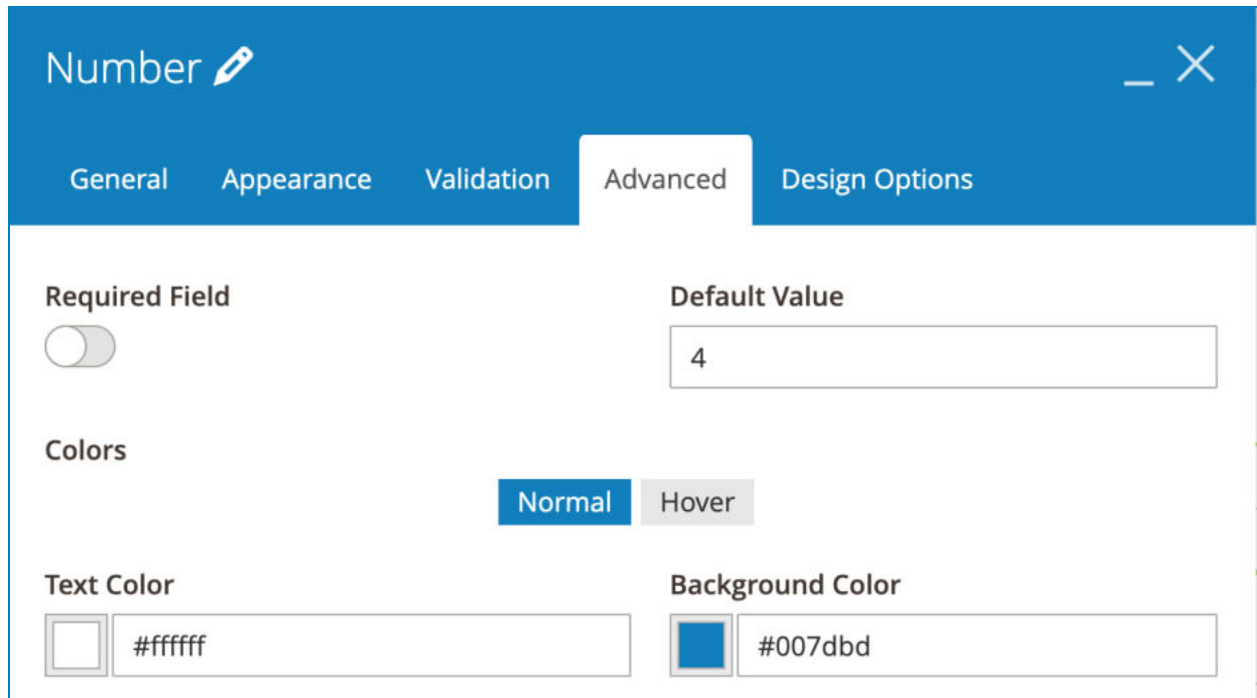

- Decide **Min** and **Max** number that users can enter. They can't enter the number that is greater than **Max** number and smaller than **Min** number.
- **Step**: First, please look at Number element on frontend:

The screenshot shows a frontend view of a 'Number' input field. The field is labeled 'Number' and contains the value '4'. There are blue buttons with minus and plus signs on either side of the input field.

For example, if you set **Step** to 1, 1 will be added to the current number when you click the plus icon (the number then is 5) or subtracted from the current number when you click minus icon (the number then is 3). Similarly, if you set **Step** to 3, the number then is 7 when you click plus icon or 1 when you click minus icon.

b. **Advanced** tab

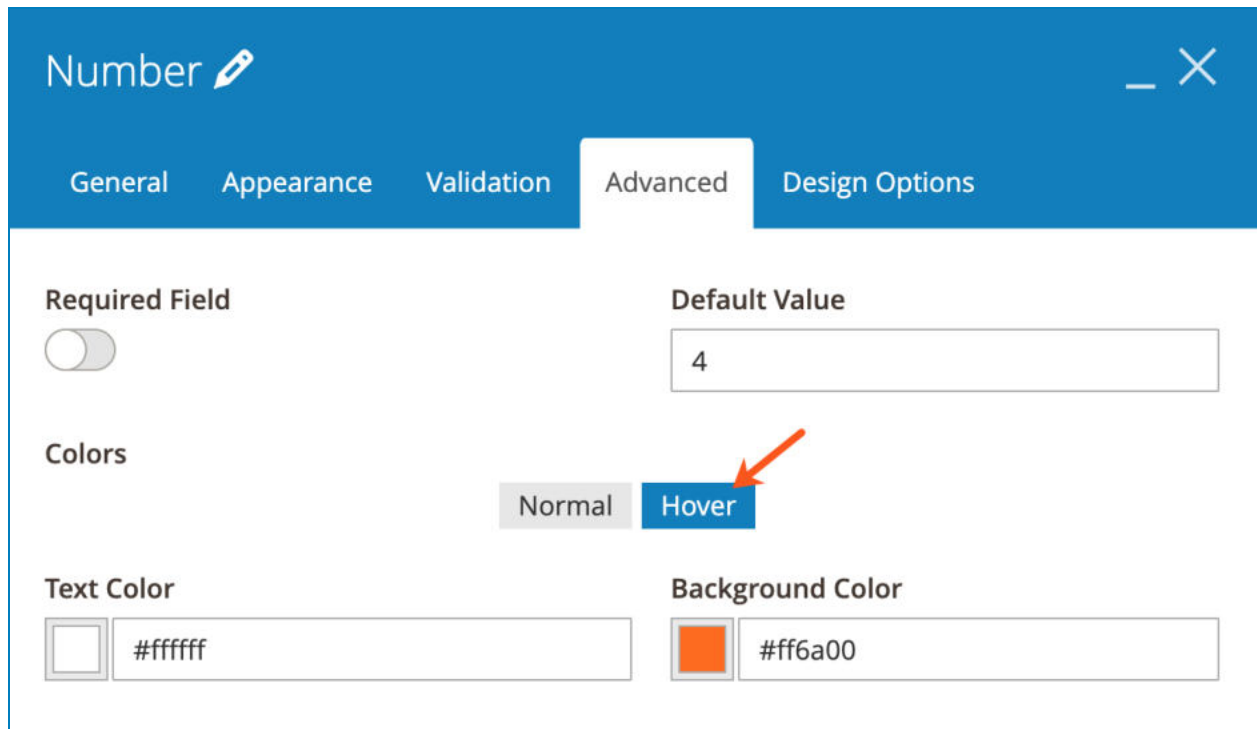

- **Default Value:** the number that is auto filled on page load.
- **Text Color:** color for minus/plus icon.
- **Background Color:** color for background of minus/plus icon.

>> Frontend:

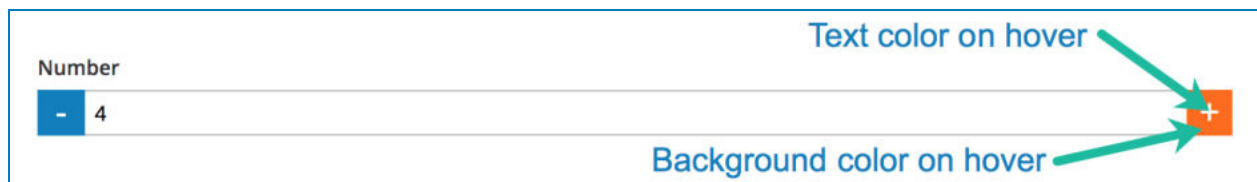

- If you open the **Hover** tab, you can set **Text Color** and **Background Color** on hover.

The screenshot shows the configuration panel for a 'Number' form field. The 'Advanced' tab is selected, and the 'Hover' sub-tab is active, indicated by an orange arrow. The 'Required Field' toggle is off. The 'Default Value' is set to '4'. Under 'Colors', the 'Text Color' is set to '#ffffff' and the 'Background Color' is set to '#ff6a00'.

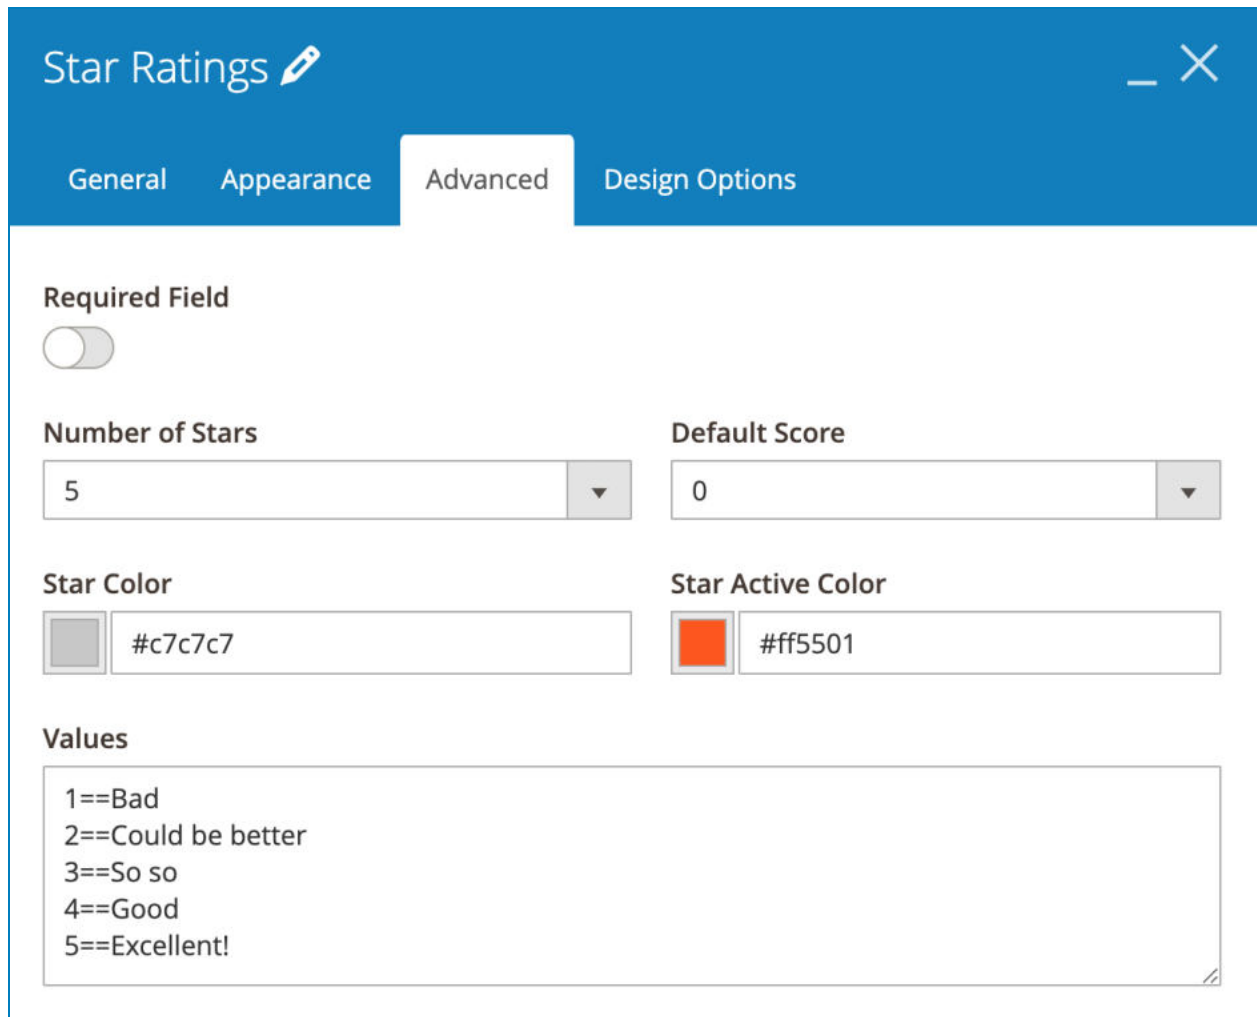

>> Frontend:

The screenshot shows the frontend rendering of the 'Number' form field. The field contains the value '4'. A blue minus sign is on the left and a red plus sign is on the right. Two green arrows point to the plus sign: one labeled 'Text color on hover' and another labeled 'Background color on hover'.

4.2.9 Star Ratings

Stars Ratings element allows users to rate your products or services based on stars.

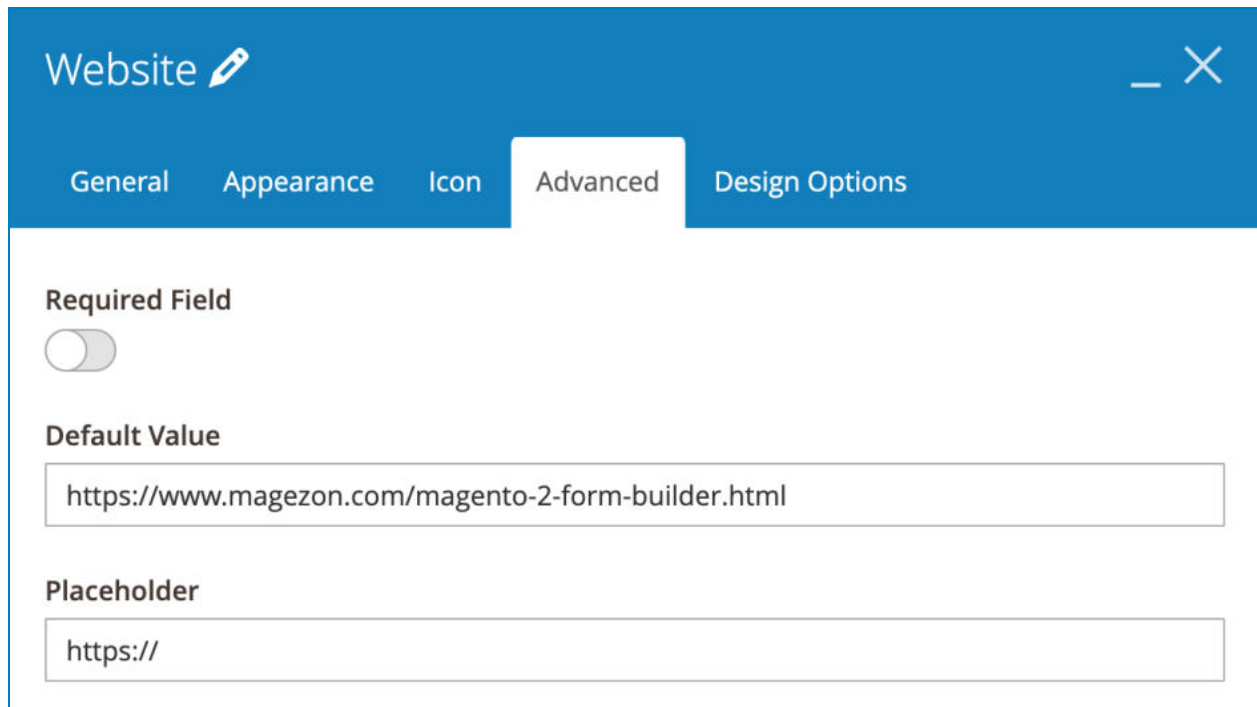

- Choose the number of stars in the **Number of Stars** field.
- **Default Score:** the number of stars that are auto selected on page load. For example, if you set Default Score to 5, then 5 stars are auto selected on page load.
- **Star Color:** color of stars when not selected.
- **Star Active Color:** color of stars when selected.

- Set values for each rated star number in the **Values** field. For example: “1==Bad” means if your customers rate 1 star, they find that your products or services are bad. What included in the email notifications will be “Bad”, not the number of stars that customers have chosen.

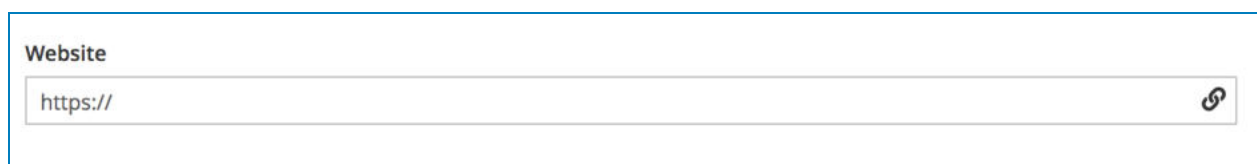

4.2.10 Website

Use this element so that your customers can attach a website link into the form.

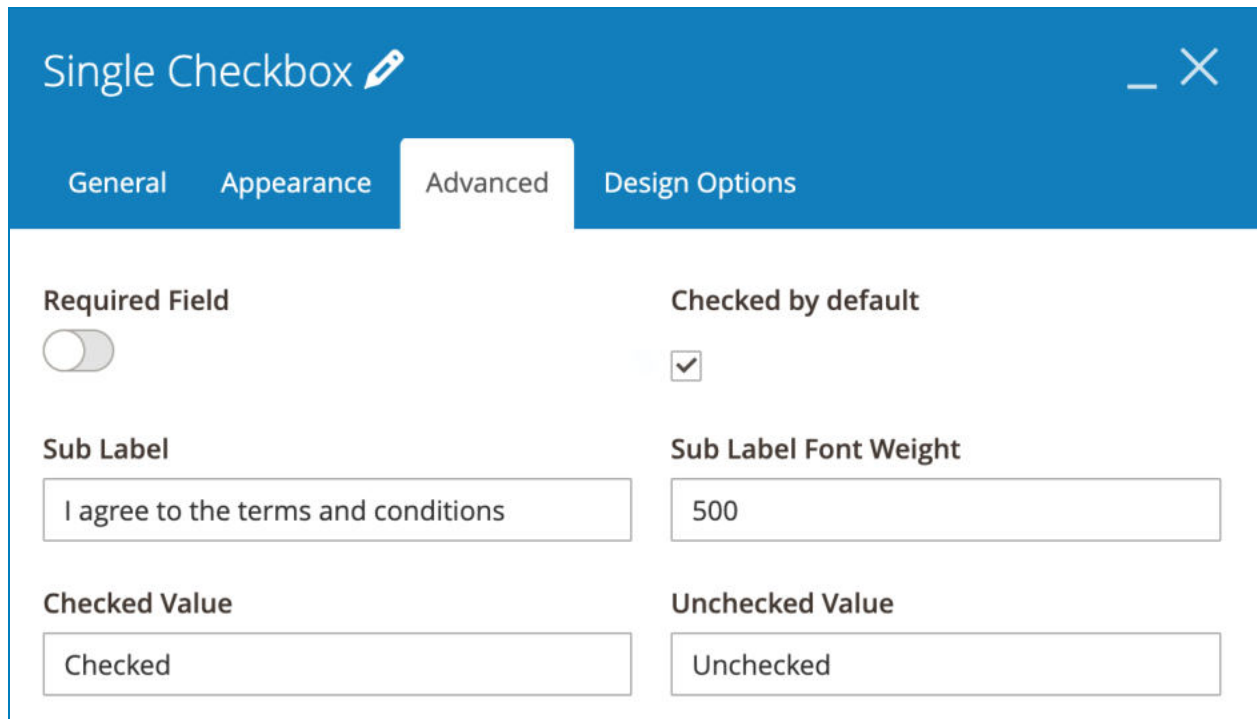

- **Default Value:** enter the link that will be auto filled in this form field on page load.

>> Website element on frontend:

4.2.11 Single Checkbox

Single Checkbox element is used to add a checkbox.

- **Checked by default:** if yes, the checkbox is ticked by default on page load.
- **Sub Label:** enter sub label that is placed on the right of the checkbox:

- Enter **Sub Label Font Weight**.
- **Checked Value / Unchecked Value**: enter the values for ticked/unticked checkbox that will be displayed in email notifications.

For example, as you can see in the above image, we fill **Checked Value** with Checked, **Unchecked Value** with Unchecked.

So if customers tick the checkbox, then in email notifications, the value for this form field will be Checked. If customers untick the checkbox, then in email notifications, the value for this form field will be Unchecked.

Hello,

You have received new form submission for the form Contact Form. Here are the details:

4.2.12 Submit

After customers finish filling the form, they will click this button to submit.

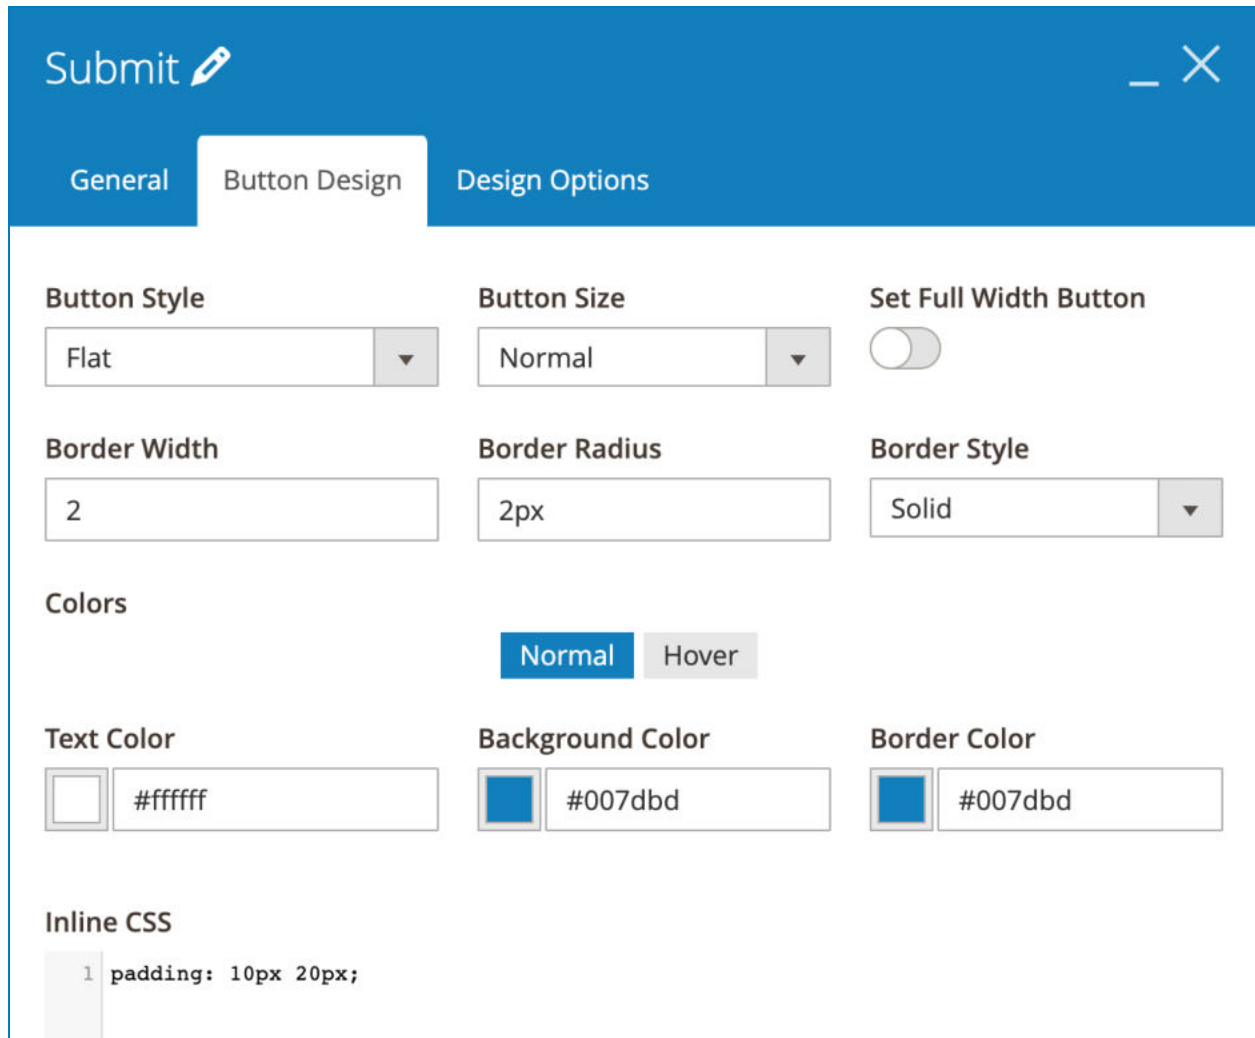

a. **General** tab

The screenshot shows the configuration interface for a 'Submit' button. The interface has a blue header with the title 'Submit' and a pencil icon. Below the header are three tabs: 'General', 'Button Design', and 'Design Options'. The 'General' tab is active. Under the 'Text' section, there is a text input field containing the word 'Submit'. Below that is the 'Add Icon' section, which includes a toggle switch that is currently turned on. Underneath the toggle are three sections: 'Icon', 'Icon Library', and 'Icon Position'. The 'Icon' section has a dropdown menu showing a right-pointing arrow icon with a red 'x' above it, and an upward-pointing arrow icon. The 'Icon Library' section has a dropdown menu showing 'Awesome 5'. The 'Icon Position' section has a dropdown menu showing 'Left'.

- **Text:** enter button text.
- **Add Icon:** turn on this button to add an icon inside the button. You can choose **Icon Library** including Awesome 5 and Open Iconic. Then choose the icon from the selected library in **Icon** drop-down. Set **Icon Position** to be on the Left or Right of the button text.

b. **Button Design** tab

- Choose **Border Width**, **Border Radius** and **Border Style** for the button.

- Set button **Text Color**, **Background Color** and **Border Color** when normal or on hover.
- **Inline CSS** is used to add custom CSS.

>> Submit element on frontend:

The screenshot shows a reCAPTCHA form. On the left, the text "Are you a robot?" is displayed. Below it is a blue "Submit" button, which is pointed to by an orange arrow. To the right of the text is a reCAPTCHA widget containing a checkbox labeled "I'm not a robot" and the reCAPTCHA logo with the text "reCAPTCHA Privacy - Terms".

4.3 Multiple Choice Elements

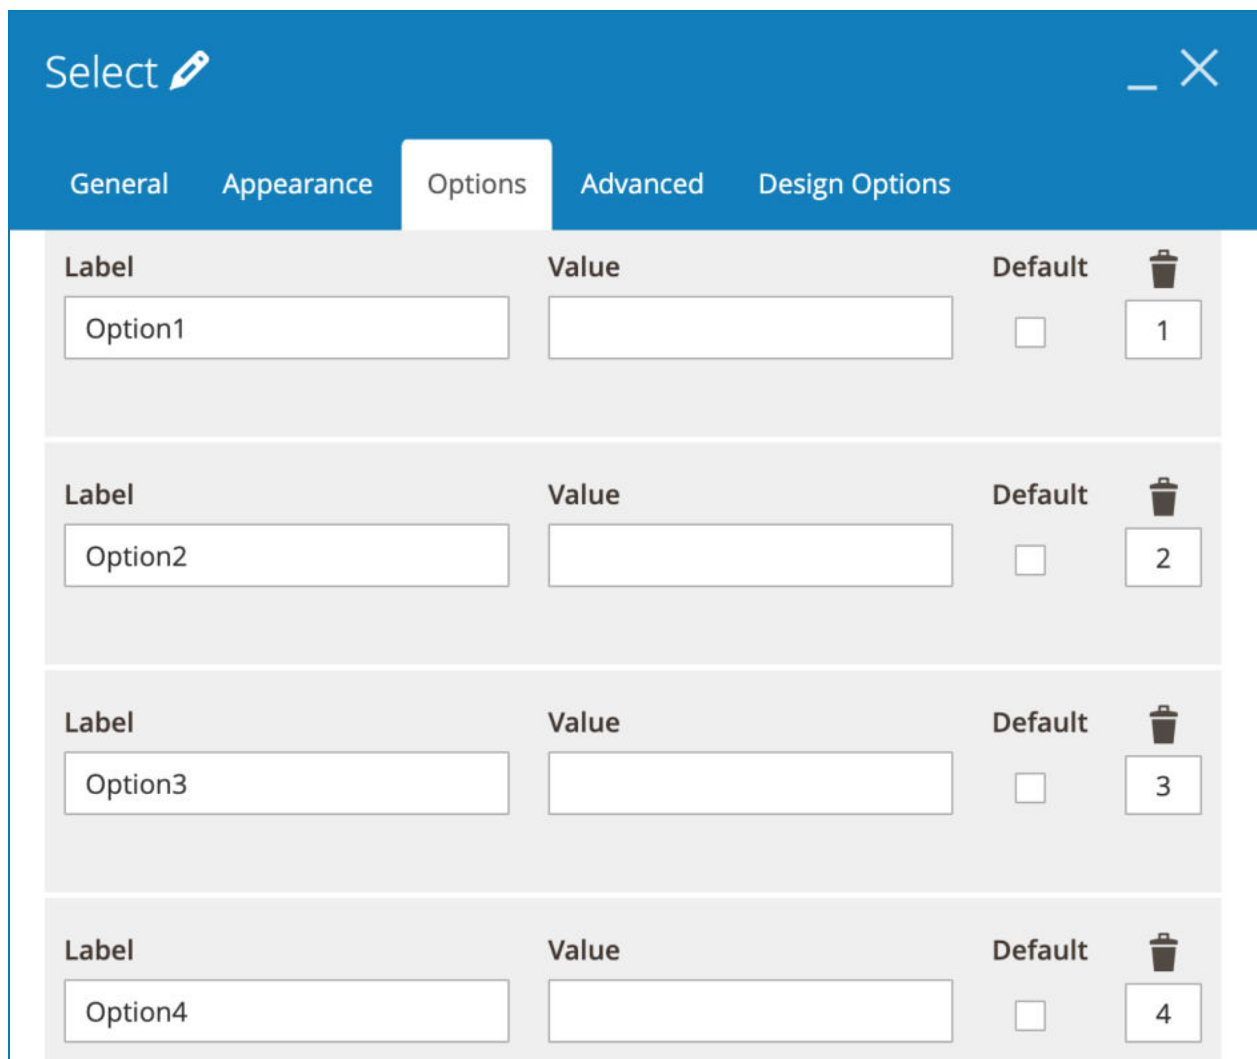

This type of element enables you to add multiple choice form fields.

4.3.1 Select

This element displays a drop-down list that contains options for customers to choose.

Customers can select 1 option only.

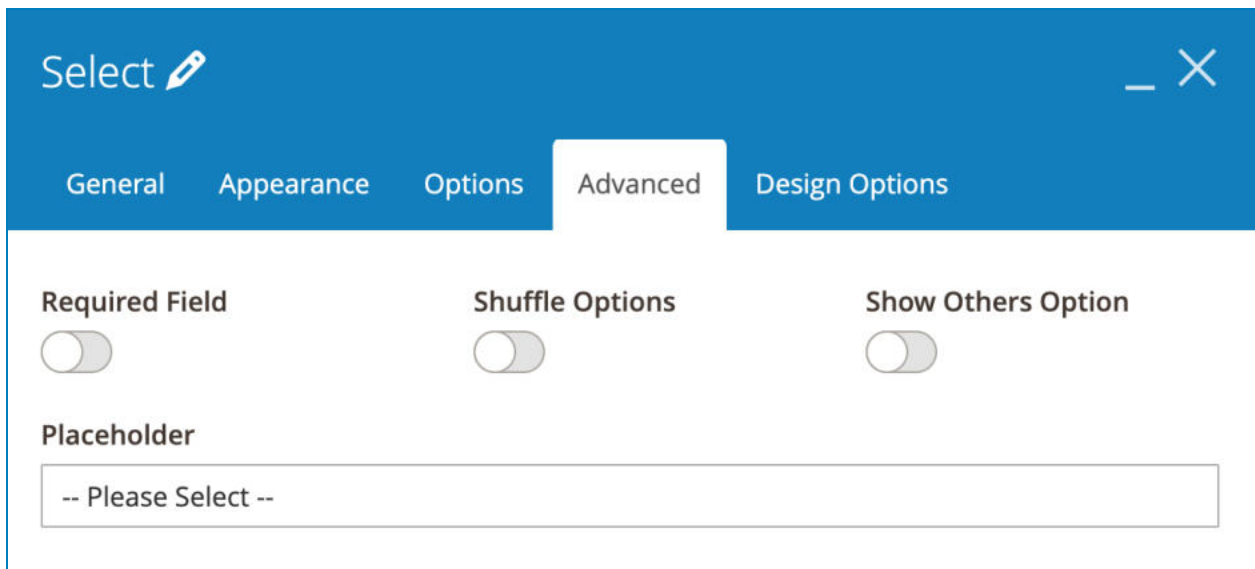

a. **Options** tab

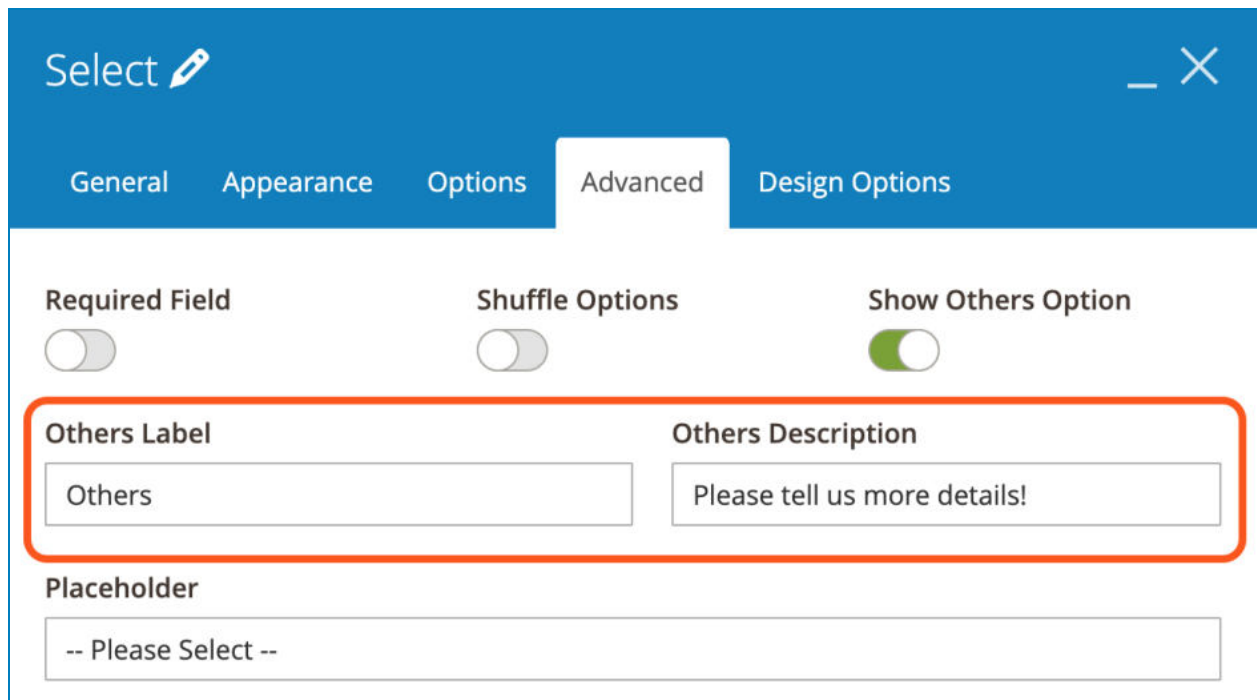

Label	Value	Default	
Option1		<input type="checkbox"/>	1
Option2		<input type="checkbox"/>	2
Option3		<input type="checkbox"/>	3
Option4		<input type="checkbox"/>	4

- **Label:** enter option name.
- **Value:** enter a value for each option that is used for conditional logic, calculation, etc. and it's usually a short value.
- **Default:** tick the option that is auto selected on page load.
- Delete options by clicking the recycle bin icon.
- Set position for options in the box under the recycle bin icon.
- Add another option by clicking the **Add** button.

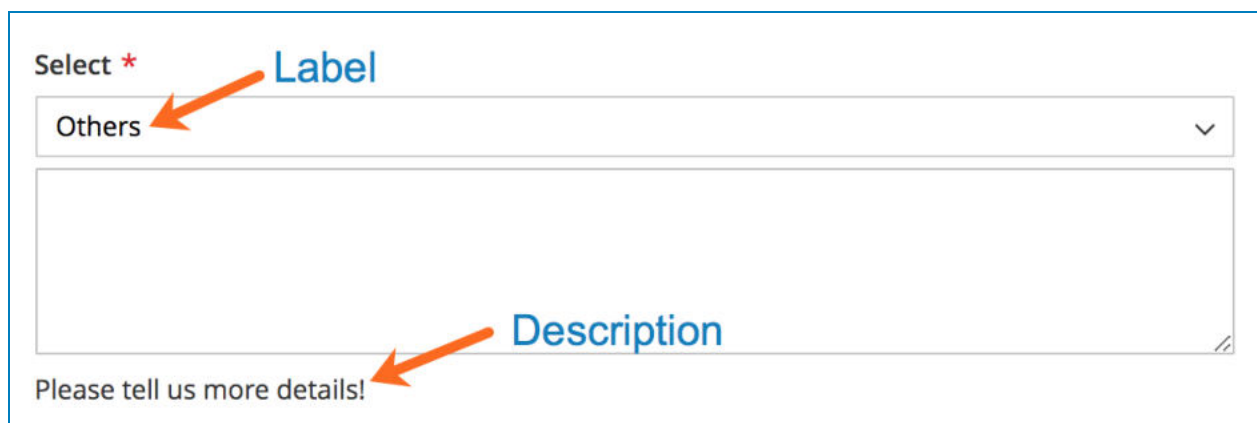

b. **Advanced** tab

- **Shuffle Options:** arrange options in a random order on every page load.
- **Show Other Options:** allow adding another option that comes with an input field. If you enable this, you can enter **Others Label** and **Others Description**.

On the frontend, if users select this option, an input field will show up so that they can fill with other information.

4.3.4 Radio List

With Radio List element, each option comes with a radio button and you can choose one option only.

a. **Options** tab

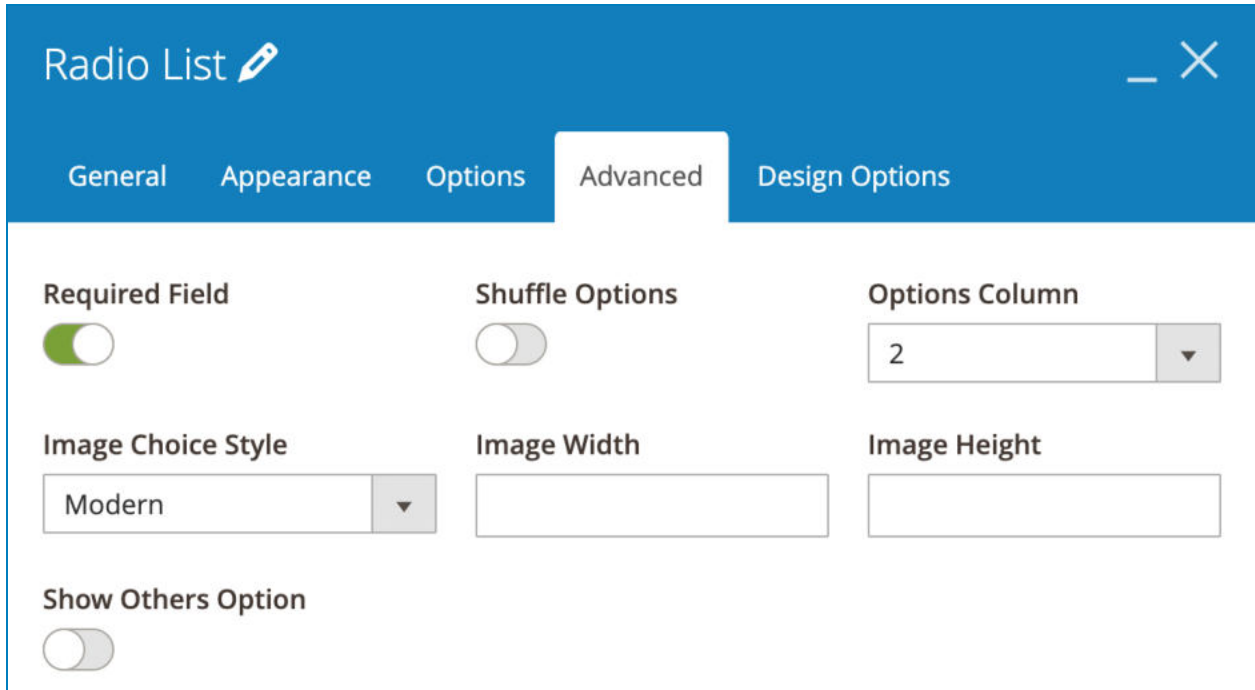

The screenshot shows the configuration interface for a Radio List element. The interface has a blue header with the title "Radio List" and a close button. Below the header are five tabs: "General", "Appearance", "Options" (which is selected), "Advanced", and "Design Options". The main area contains three rows of configuration options, each representing a radio button option. Each row has the following fields: "Label", "Value", "Classes", "Image", "Default", and a trash icon. The "Default" field contains a radio button and a number in a box.

Label	Value	Classes	Image	Default	Trash
Paris				<input type="checkbox"/>	1
Amsterdam				<input type="checkbox"/>	2
Vietnam				<input type="checkbox"/>	3

- Enter option name in **Label** field.
- **Value**: enter a value for each option that is used for conditional logic, calculation, etc. and it's usually a short value.
- **Classes**: this is for developers to add advanced customizations to each option such as color, size, etc.
- **Image**: Upload image for the option.
- **Default**: choose the options that are auto selected on page load.
- **Position**: set position for options.
- Delete options by clicking the recycle bin icon.
- Add another option by clicking the **Add** button.

4.3.5 Choice Matrix

The Choice Matrix requires customers to evaluate one or more row items using a set of column options.

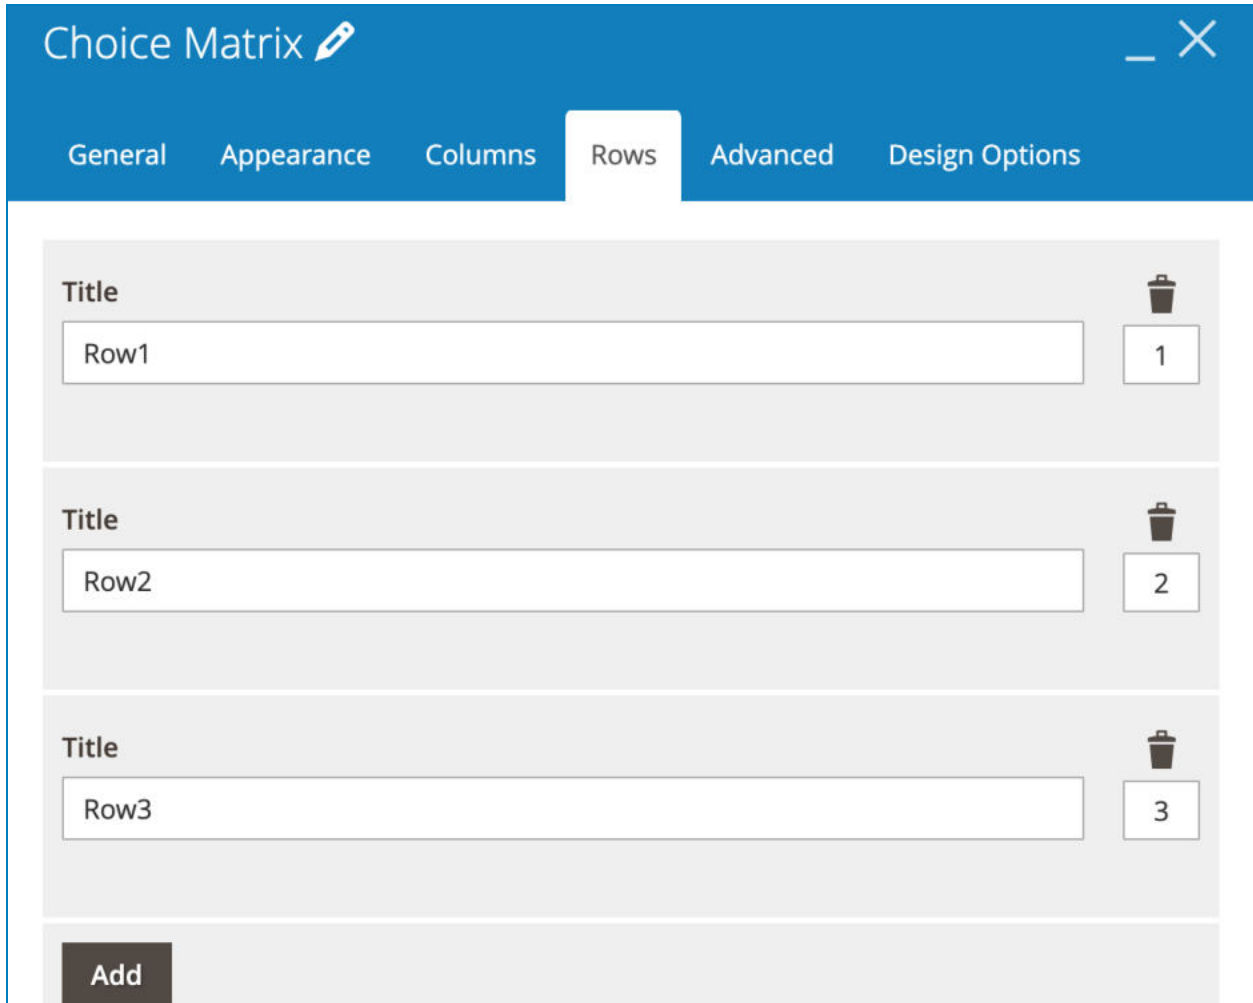

a. **Column** tab

The screenshot shows the 'Choice Matrix' configuration window with the 'Columns' tab selected. The window has a blue header with the title 'Choice Matrix' and a close button. Below the header are several tabs: 'General', 'Appearance', 'Columns', 'Rows', 'Advanced', and 'Design Options'. The 'Columns' tab is active, displaying a list of three columns. Each column has a 'Title' label, a text input field, a trash bin icon, and a position box. The first column is titled 'Column1' and is in position 1. The second column is titled 'Column2' and is in position 2. The third column is titled 'Column3' and is in position 3. At the bottom left of the column list is an 'Add' button.

- Enter **Title** for each column.
- Delete columns using the recycle bin icon.
- Choose position for each column in the box under the recycle bin icon.
- Add another column with the **Add** button.

b. **Rows** tab

The screenshot shows the 'Choice Matrix' interface with the 'Rows' tab selected. The interface has a blue header with the title 'Choice Matrix' and a pencil icon. Below the header are several tabs: 'General', 'Appearance', 'Columns', 'Rows' (selected), 'Advanced', and 'Design Options'. The main content area is light gray and contains three rows. Each row has a 'Title' label, a text input field, a trash icon, and a position box. The first row has 'Row1' in the input field and '1' in the position box. The second row has 'Row2' in the input field and '2' in the position box. The third row has 'Row3' in the input field and '3' in the position box. At the bottom left of the main content area is a dark gray 'Add' button.

- Enter **Title** for each row.
- Delete rows using the recycle bin icon.
- Choose position for each row in the box under the recycle bin icon.
- Add another row with the **Add** button.

4.3.6 Single Slider

With this element, you can add a slider that lets users select from a range of values by moving a thumb control along a track.

- **Do not accept minimum value:** if enabled, users can't choose the min value of the slider.
- Enter **Min** and **Max** values of the slider.
- **Step:** the number that is added to or subtracted from the current number each time you slide the thumb control.
- **Skin:** choose style for the slider from 5 options: Flat UI, Modern, HTML5, Nice White, Simple Dark.

- Flat UI:

- Modern:

- HTML5:

- Nice White:

- Simple Dark:

- **Slider Color:** color of the slider.
- Add **Prefix** and **Postfix** to the number.
- **Default:** the value that is auto selected on page load.

4.4 Layout Elements

Layout elements are used to lay out your forms.

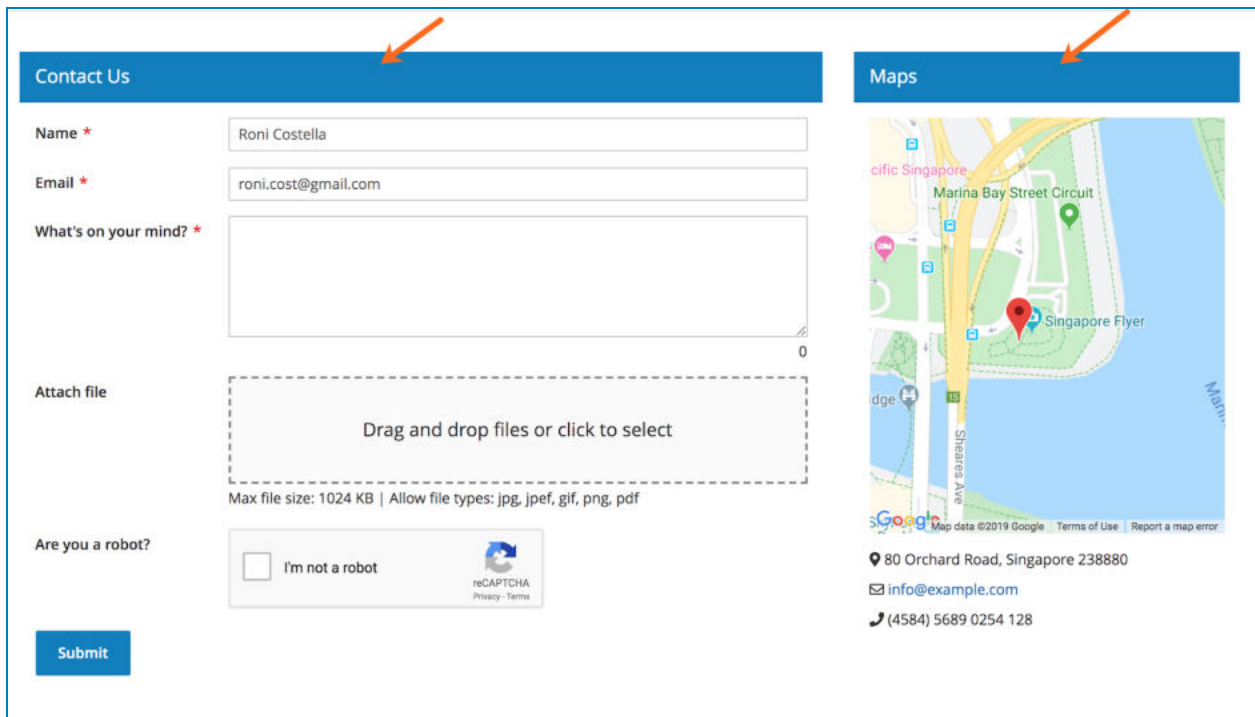

4.4.1 Field Set

Field Set element allows you to group multiple form fields together.

- Enter **Title** for the field set.
- Choose **Title Alignment** including Left, Center and Right.
- Choose the heading type for the title in **Title Tag**.
- Choose title color in **Heading Color** and title background color in **Heading Background Color**.

- Set space between the title and the border around the heading box.

>> Field Set element on frontend:

4.4.2 Pages

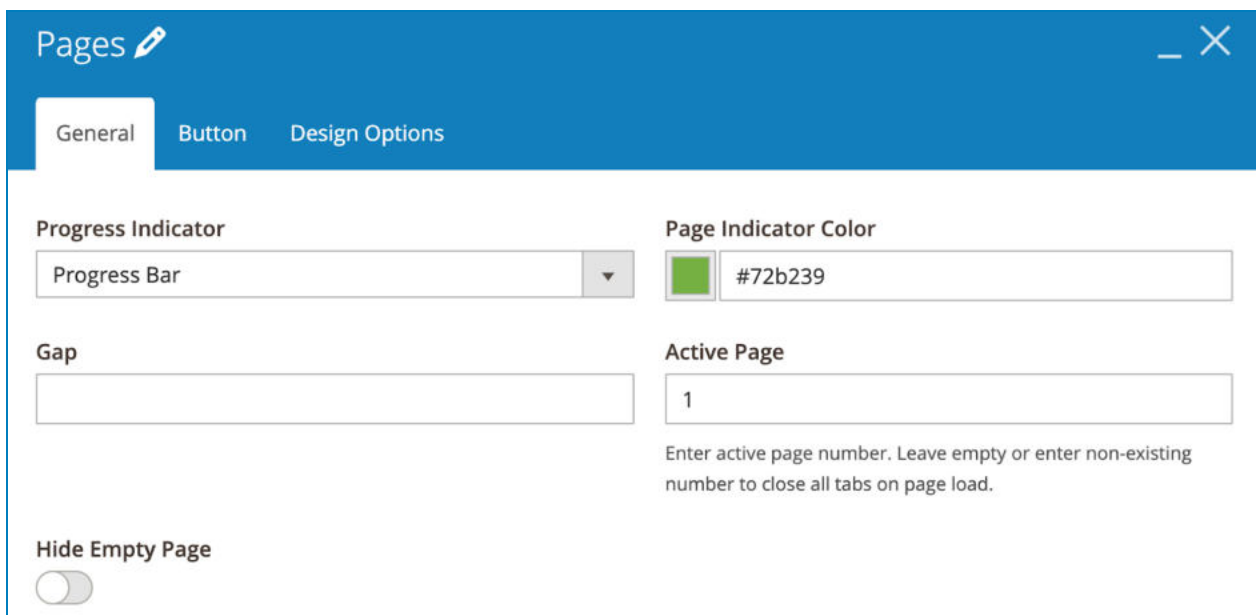

This element allows you to create multi-page forms.

a. Customize general settings for multi-page form

After adding this element to the form, hover over it, then move the mouse to **Pages** in the bar and click **Edit** to open general settings for the multi-page form.

The settings look like this:

- **Progress Indicator:** choose from 4 types for title bar including: Progress Bar, Circles, Connector and Tabs.

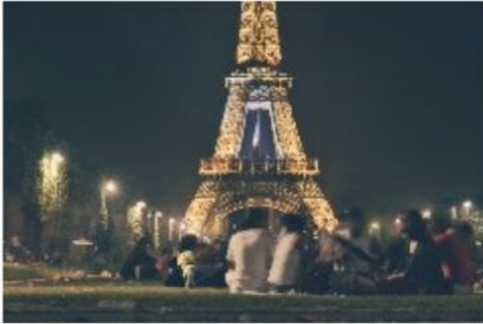

- Progress Bar

BOOK YOUR TOUR!

SELECT YOUR TOUR - Step 1 of 3 

Choose your destination *

 Paris

 Amsterdam

- Circles

BOOK YOUR TOUR!

Amsterdam

- Connector

BOOK YOUR TOUR!

SELECT YOUR TOUR

PERSONAL DATA

TOUR OPTIONS

Choose your destination *

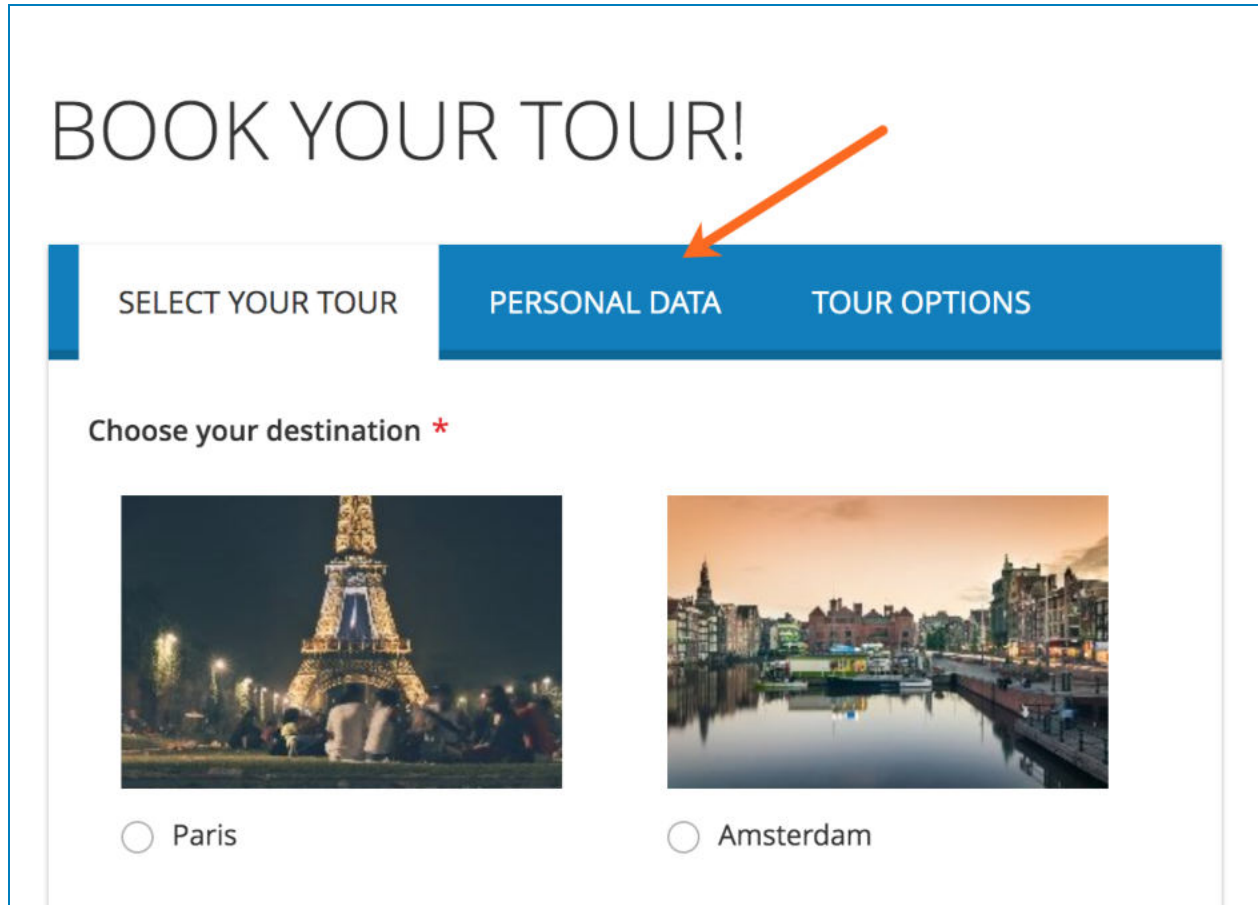

Paris

Amsterdam

- Tabs

- **Gap:** space (px) between title bar and the main content.
- **Active Tab:** enter ordinal number of the page that you want to be opened on page load.
- If you choose Progress Bar, Circles or Connector, you can choose color for the bar in **Page Indicator Color.**
- If you choose Tabs, you can customize these options:

Pages 

General Tab Item Button Design Options

Progress Indicator

Tabs

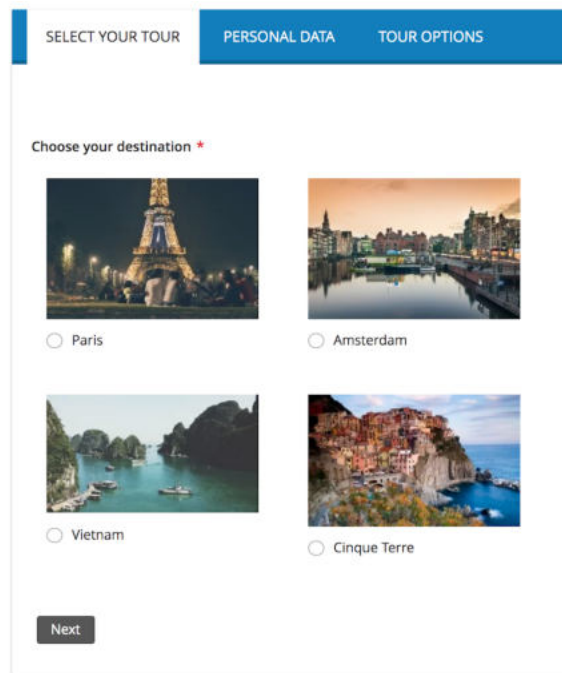

Enable Box Shadow

Heading Background Color  #007dbd

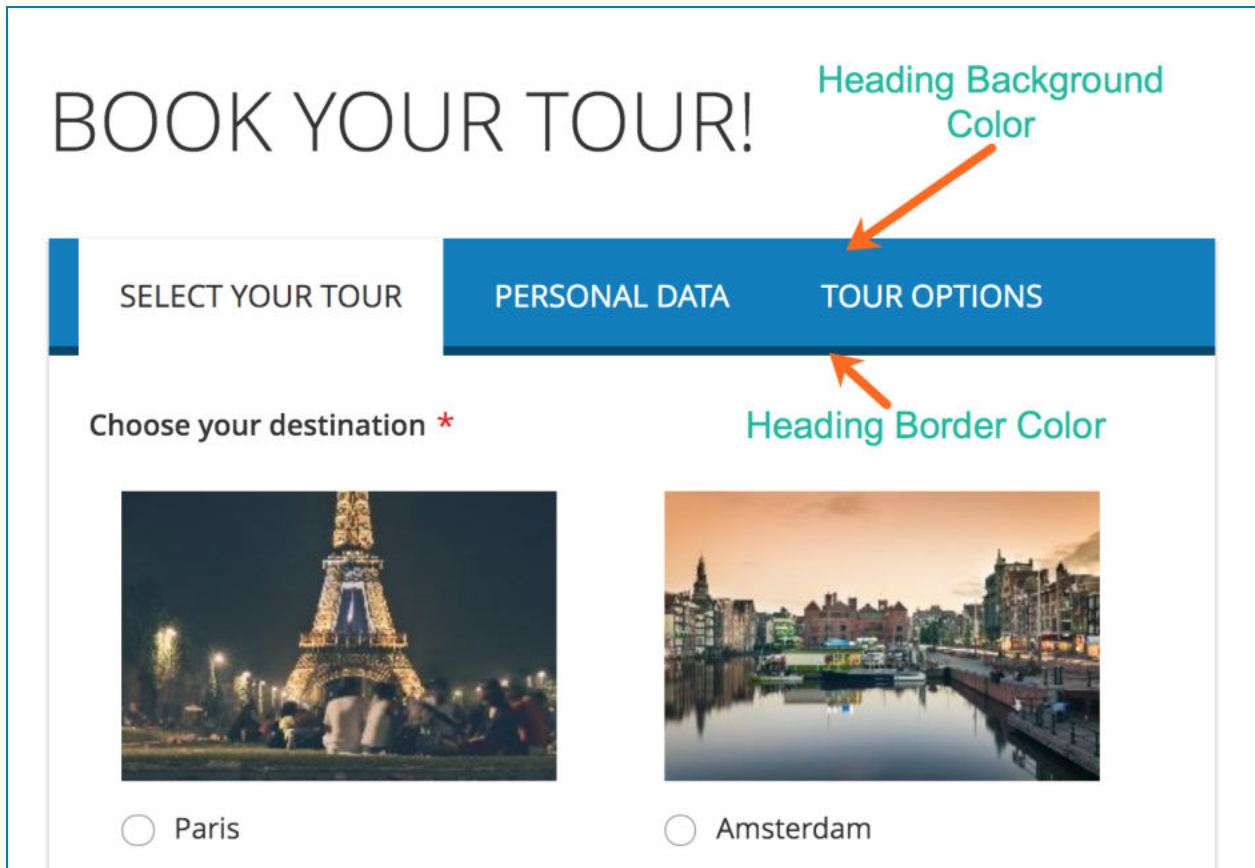

Heading Border Color  #00486c

Gap Active Page

- **Enable Box Shadow:** if enabled, there will be a shadow around the element like this:

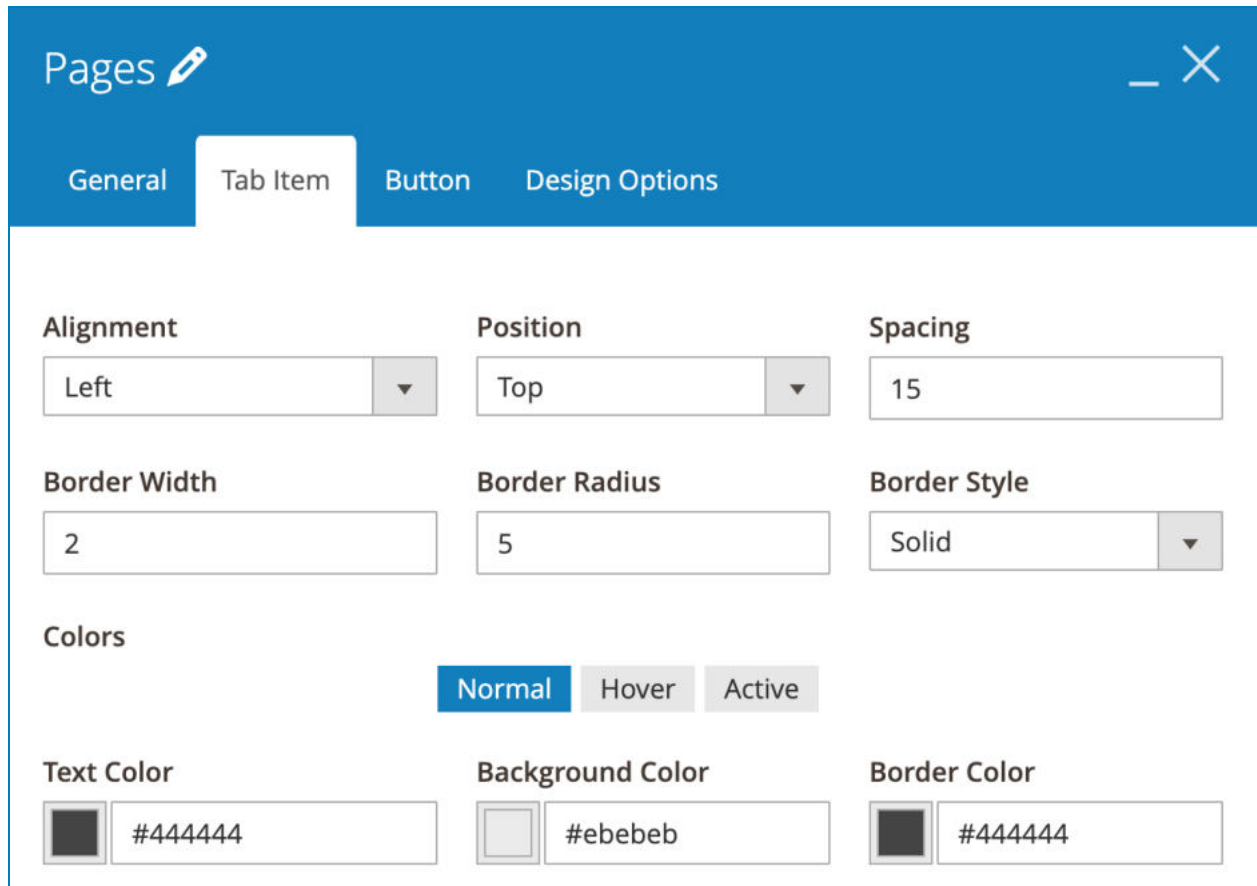

- **Heading Background Color:** choose color for title bar background.
- **Heading Border Color:** choose color for the line that separates title bar and the main content.

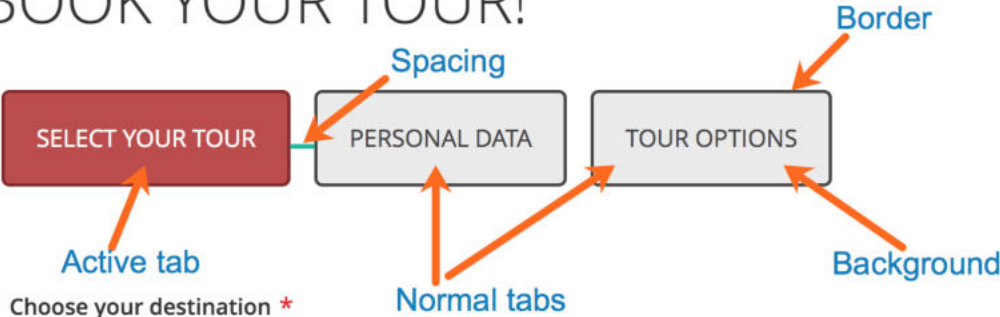

The image shows a form titled "BOOK YOUR TOUR!". Below the title is a navigation bar with three tabs: "SELECT YOUR TOUR", "PERSONAL DATA", and "TOUR OPTIONS". The "TOUR OPTIONS" tab is highlighted in blue. Below the navigation bar, the text "Choose your destination *" is followed by two radio button options: "Paris" (with a photo of the Eiffel Tower) and "Amsterdam" (with a photo of a canal in Amsterdam). Two orange arrows point to the blue navigation bar: one from the text "Heading Background Color" and another from the text "Heading Border Color".

Tab Item section also appears when you choose Tabs type.

- **Alignment:** set alignment of title tabs to Left, Center or Right.
- **Position:** set title tabs to be at the Top or Bottom.
- Set **Spacing** between title tabs.
- Set **Border Width**, **Border Radius** and **Border Style** for the border of title tabs.
- Set **Text Color**, **Background Color** and **Border Color** for title tabs when they are normal, on hover or active.

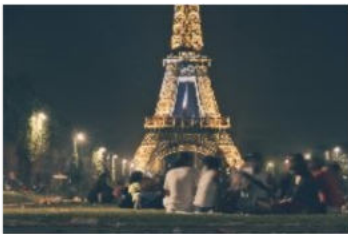

BOOK YOUR TOUR!

SELECT YOUR TOUR PERSONAL DATA TOUR OPTIONS

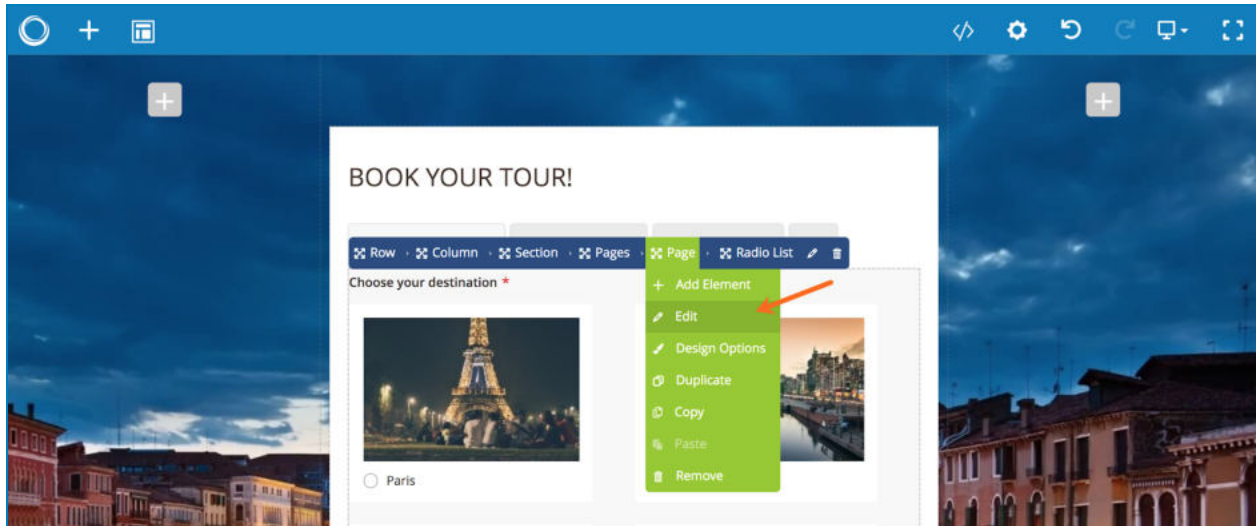

Choose your destination *

Paris Amsterdam

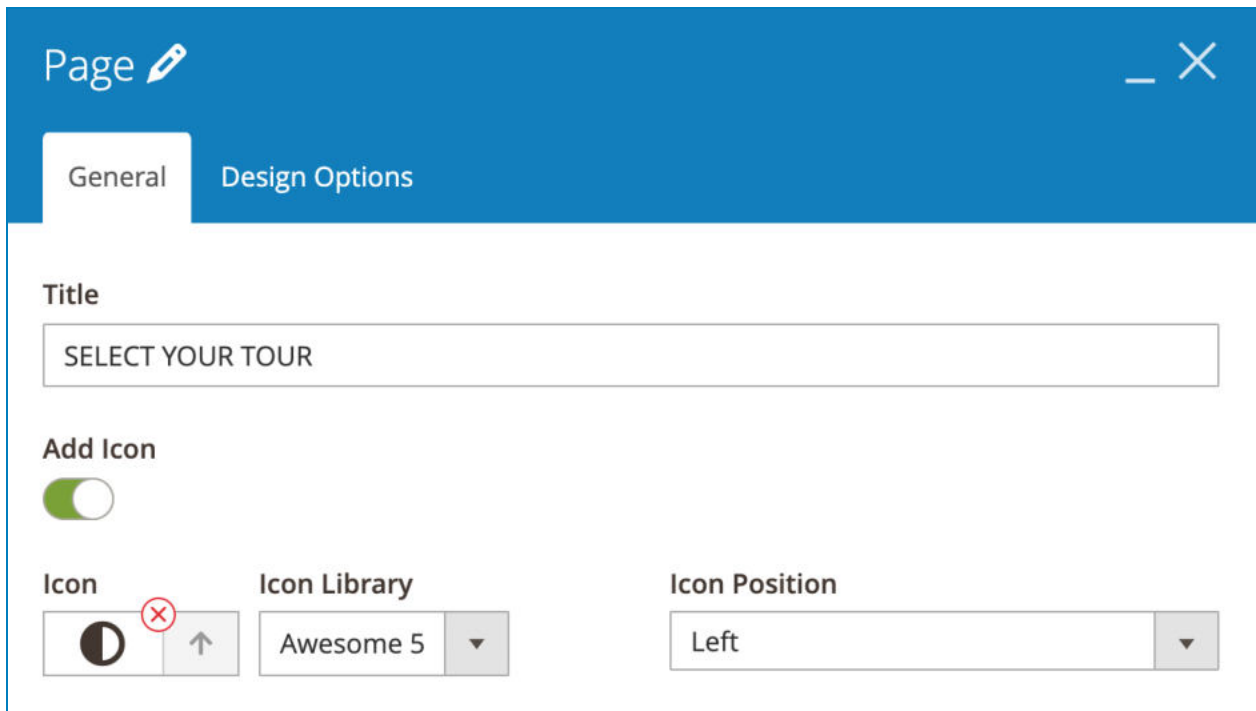

b. Customize each page

Make sure that you open the page you want to customize. Then hover over the element, move the mouse to **Page** on the bar and click **Edit** to open settings for the page.

The settings look like this:

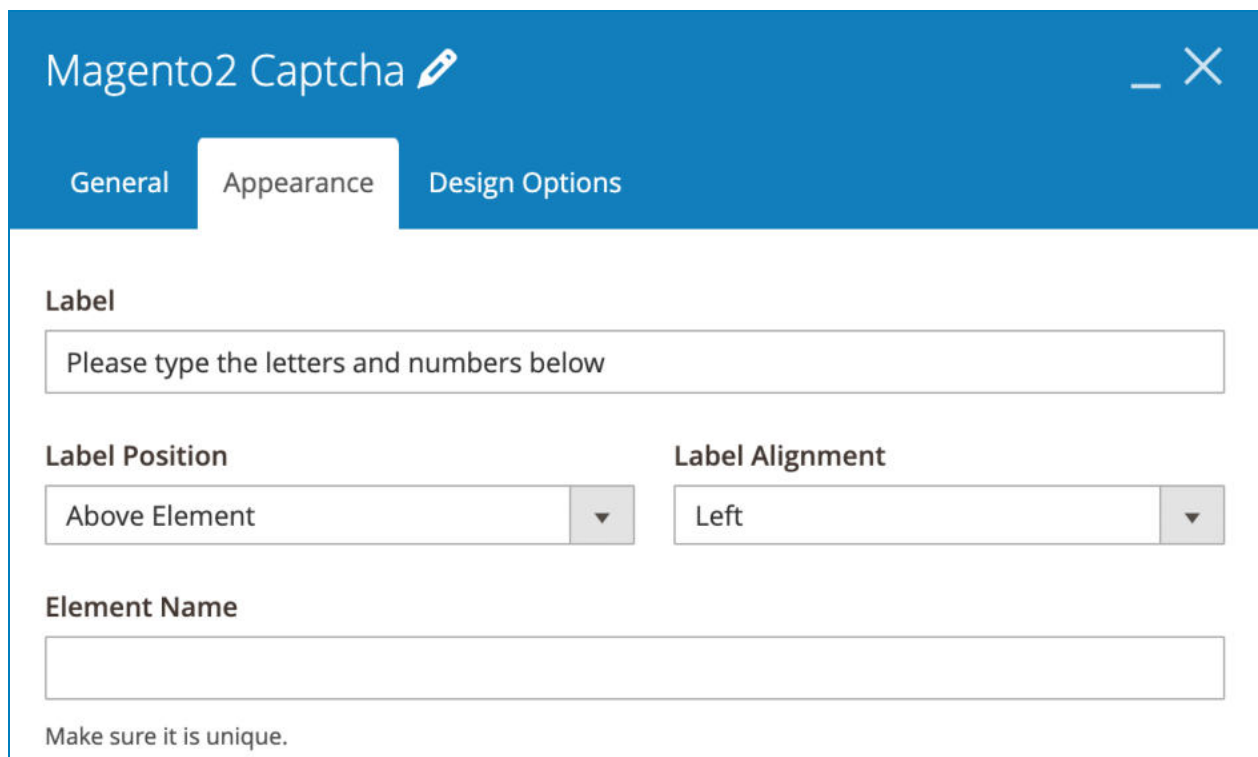

- Enter **Title** for the page.
- You can also **Add Icon** next to the title.
- Choose **Icon** from **Icon Library** (Awesome 5 and Open Iconic). Set **Icon Position** to be on the Left or Right of the title.

4.5 Security & Other Elements

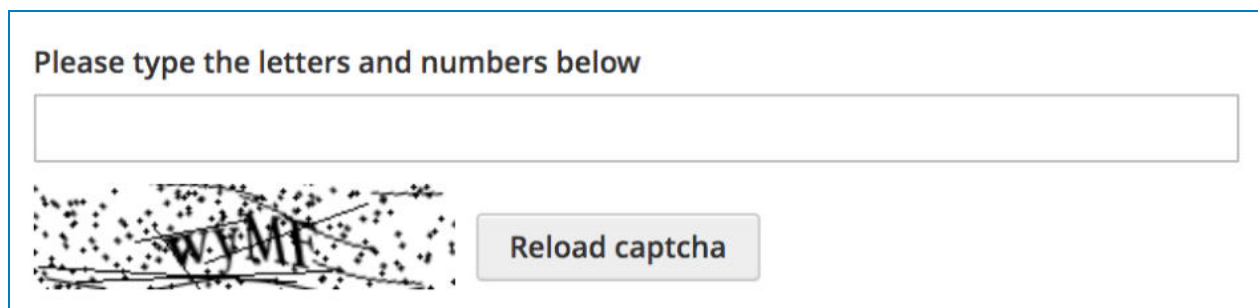

This kind of element includes those for security and other elements.

4.5.1 Magento 2 Captcha

This element allows you to add Magento 2 Captcha.

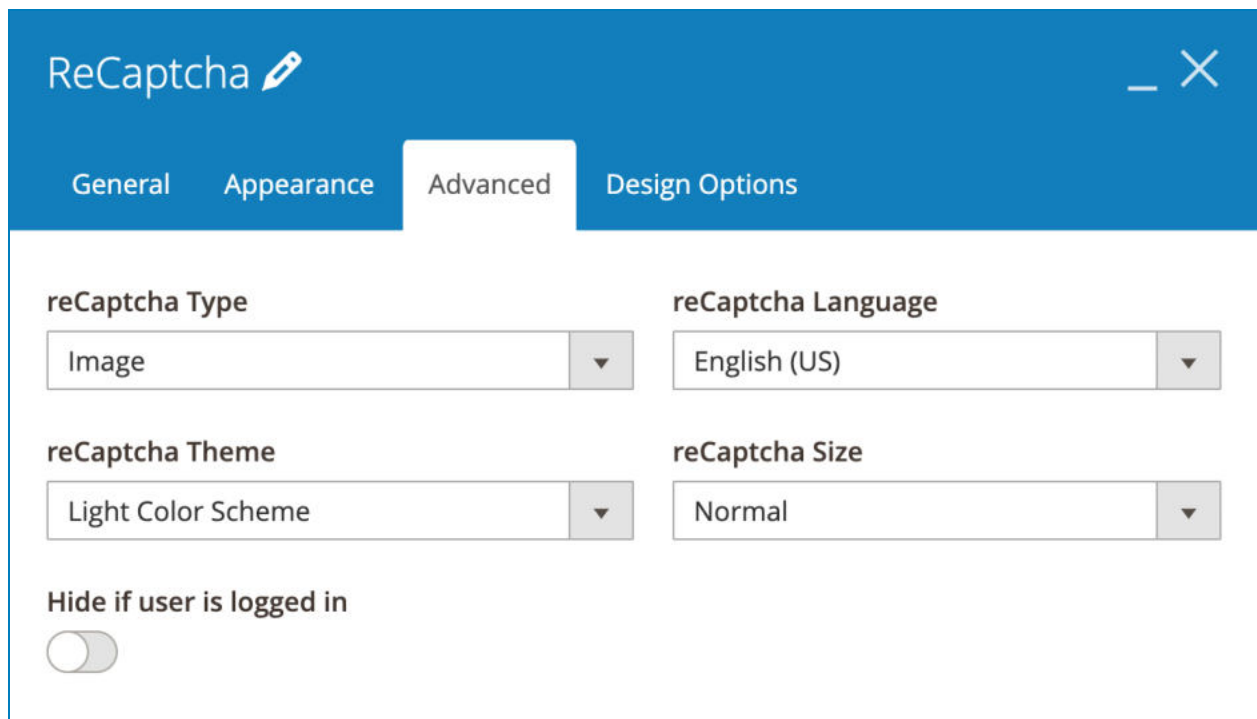

>> Magento 2 Captcha element on frontend:

4.5.2 ReCaptcha

This element lets you add Google reCaptcha to a form. To activate this element so that it works on the frontend, make sure that you enter the site key and secret key (for reCaptcha v2 [here](#) and reCaptcha v3 [here](#)).

ReCaptcha 

General Appearance **Advanced** Design Options

reCaptcha Type: Image

reCaptcha Language: English (US)

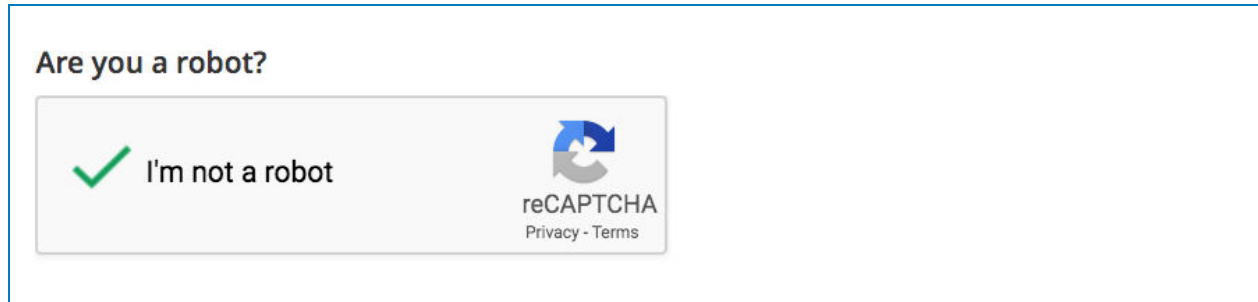

reCaptcha Theme: Light Color Scheme

reCaptcha Size: Normal

Hide if user is logged in

- **reCaptcha Type:** choose from Image or Audio.
- **reCaptcha Language:** choose display language for the Captcha.
- **reCaptcha Theme:** include Light/Dark color scheme.
- **reCaptcha Size:** choose from Normal or Compact.
- Turn on **Hide if user is logged in** if you want to hide reCaptcha from logged in customers.

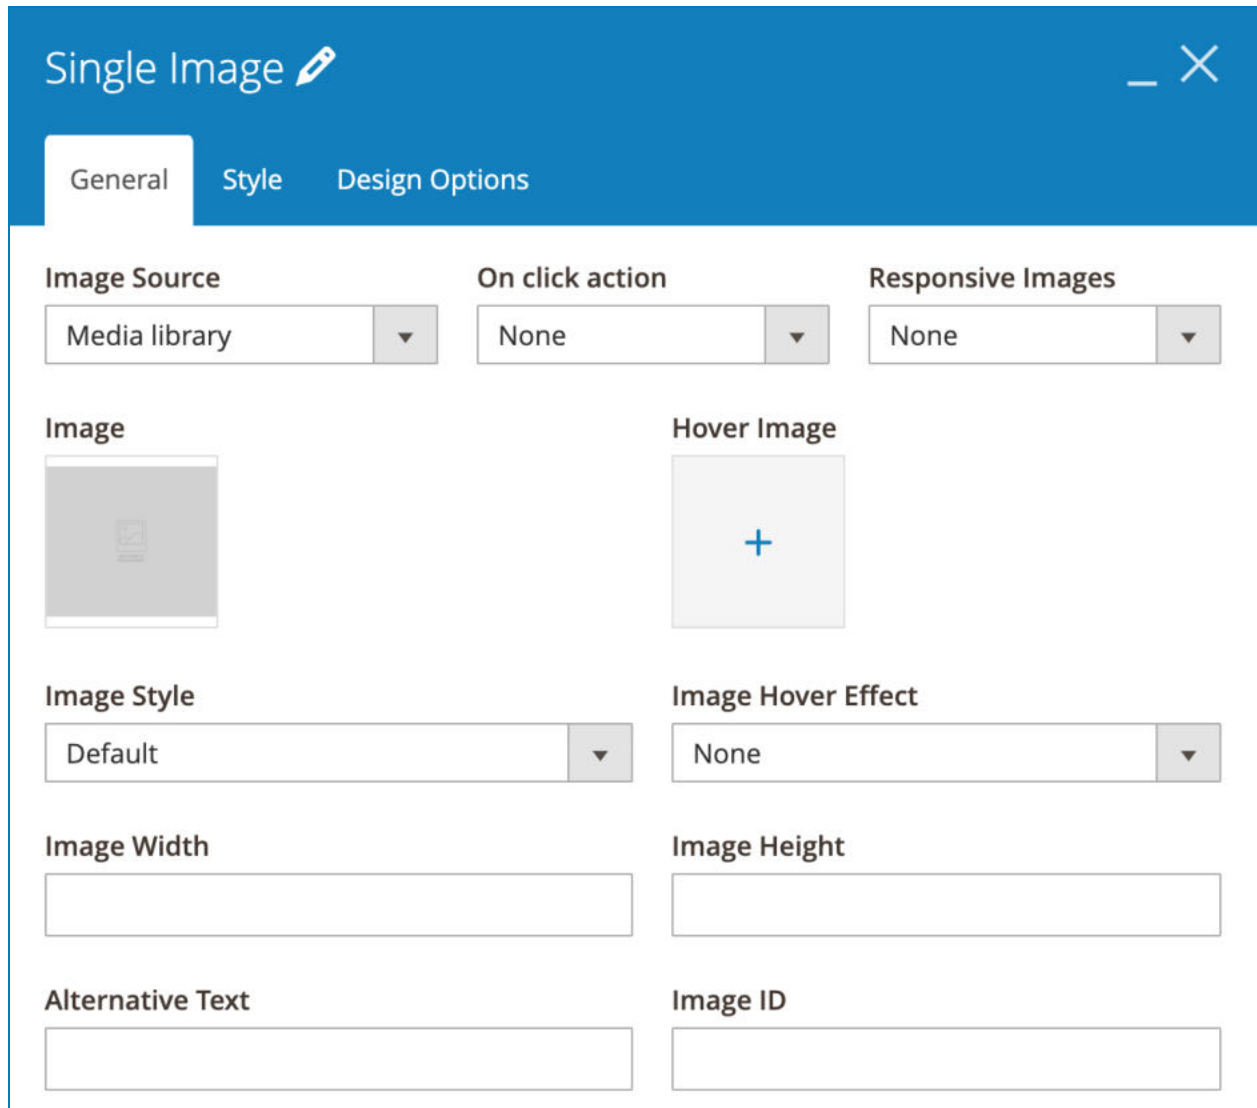

>> ReCaptcha element on frontend:

4.5.3 Single Image

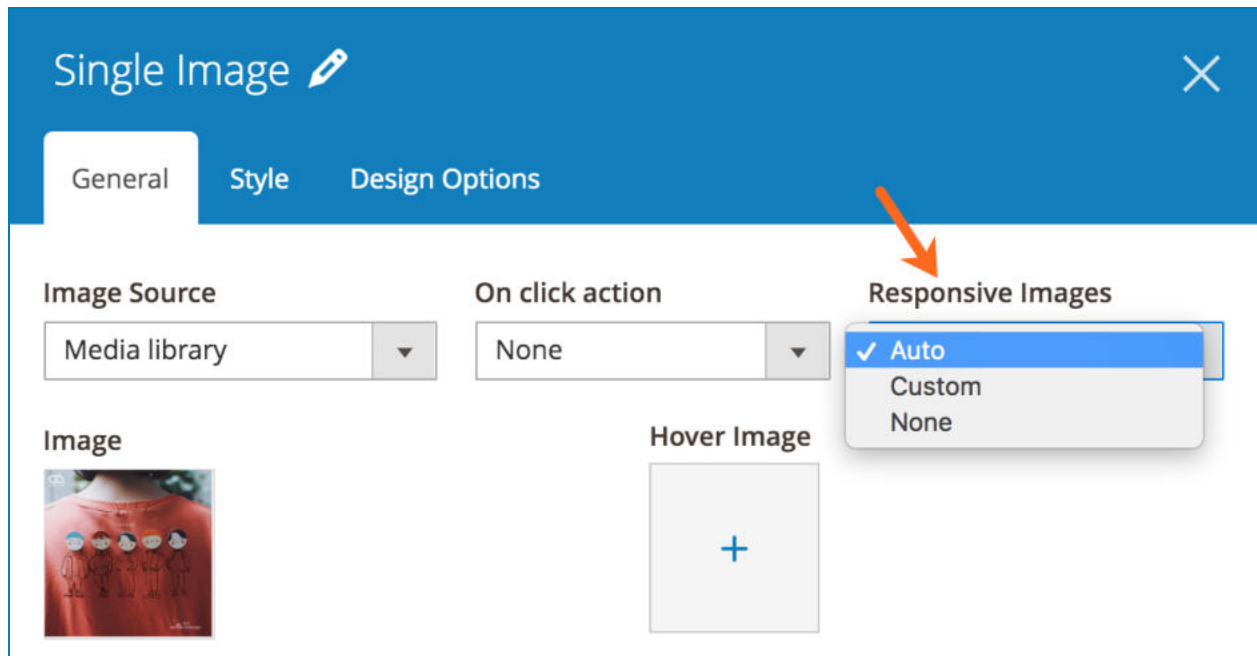

Single Image element allows you to insert an image into your forms.

a. **General** tab

- **Image Source:** you can upload an image from either Media library or External link.

- If you choose Media library, please upload your image in **Image**. In **Responsive Images**, you'll find options that allow adapting the image to different screen sizes.

If you choose Auto, then the image will be auto adapted to different screen sizes.

If you choose Custom, you can upload different images for Tablet, Landscape Phone and Portrait Phone as well.

Image Source: Media library (dropdown)

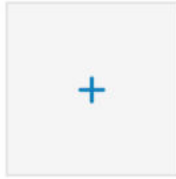

On click action: None (dropdown)

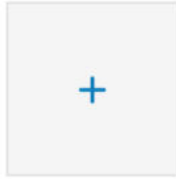

Responsive Images: Custom (dropdown)

<p>Description</p> <input style="width: 95%; border: 1px solid #ccc; min-height: 30px;" type="text" value="Use this form to contact us!"/>	

- **Content Position:** choose position for image content (image content includes **Title** and **Description**).
- **Content Alignment:** choose alignment for image content.
- **Display Content on Hover:** show image content when hovering over the image.

For example, if you set **Content Position** as Below Image and **Content Alignment** as Center, it will be like this on frontend:

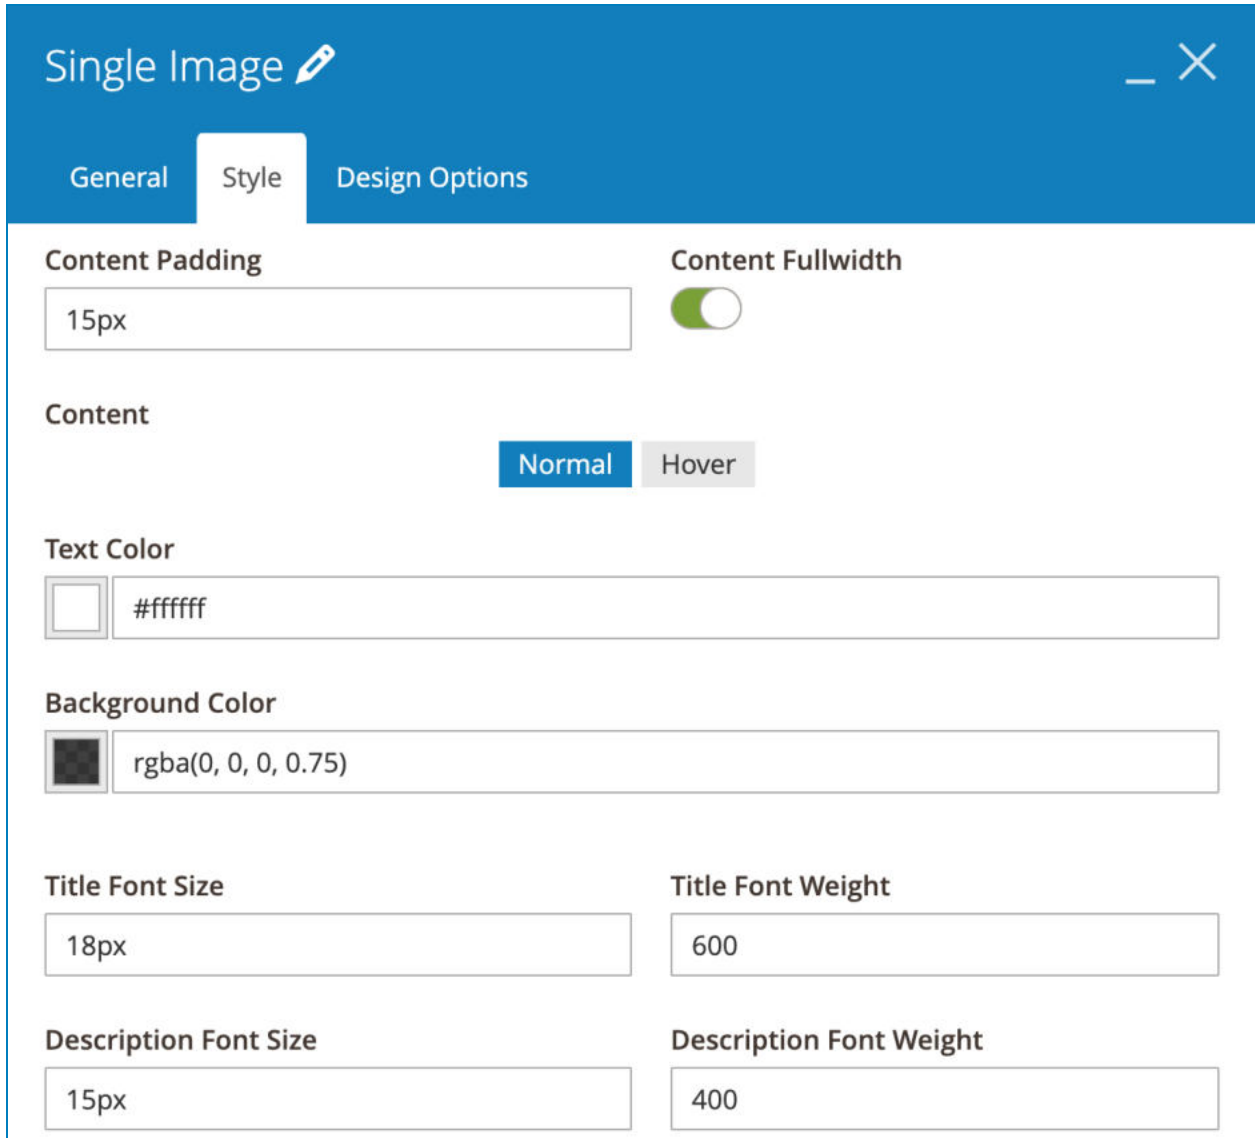

Contact

Use this form to contact us!

b. **Style** tab

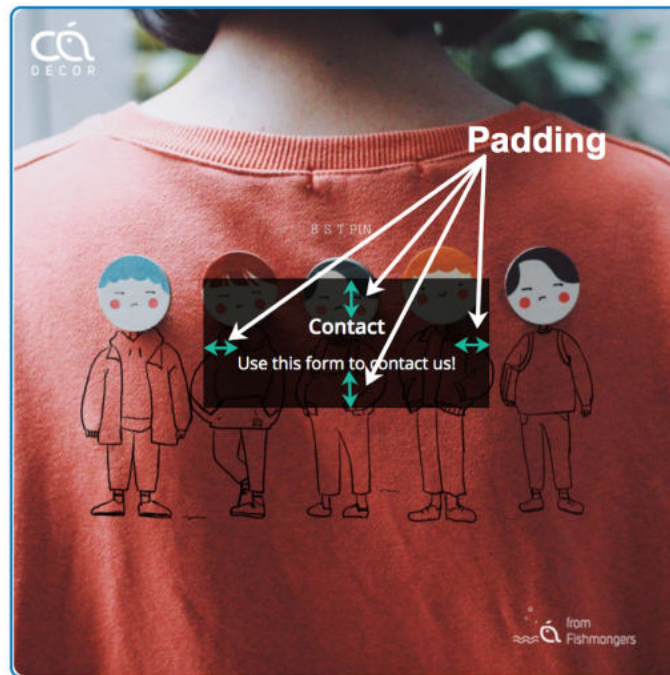

This tab allows you to customize image style.

The screenshot shows the 'Single Image' configuration window with the 'Style' tab selected. The window has three tabs: 'General', 'Style', and 'Design Options'. The 'Style' tab contains the following settings:

- Content Padding:** A text input field containing '15px'.
- Content Fullwidth:** A toggle switch that is currently turned on (green).
- Content:** Two buttons labeled 'Normal' (active) and 'Hover'.
- Text Color:** A color picker showing a white color with the hex code '#ffffff'.
- Background Color:** A color picker showing a dark gray color with the rgba code 'rgba(0, 0, 0, 0.75)'. There is a small black square icon to the left of the input field.
- Title Font Size:** A text input field containing '18px'.
- Title Font Weight:** A text input field containing '600'.
- Description Font Size:** A text input field containing '15px'.
- Description Font Weight:** A text input field containing '400'.

- **Content Padding:** specify space (px) between image content (title and description) and the border that surrounds the content container.

- **Content Fullwidth**: set the content to cover the full width of the image.
 - When **Content Fullwidth** is disabled:

- When **Content Fullwidth** is enabled:

- Decide **Text Color** and **Background Color** for the content when normal or on hover.
- Specify **Title Font Size**, **Title Font Weight**, **Description Font Size** and **Description Font Weight**.

- Set **Border Radius**, **Border Width**, **Border Style** and **Border Color** for the image.
- **Overlay Color**: choose color that overlays the whole image.
- **Hover Overlay Color**: choose color that overlays the whole image on hover (please note that you must choose **Overlay Color** so that this one can work).

4.5.4 Subscribe

- By ticking the checkbox of Subscribe element, your customers agree to receive newsletters from your website.

- **Checked by default:** allow the checkbox to be checked by default on page load.
- **Sub Label:** enter additional information that is placed on the right of the checkbox.
- **Add field value to the Newsletter List:** when filling the form, if your customers tick the subscribe checkbox to agree to receive newsletters from your website, then the newsletters will be sent to them through the values filled in the form fields you have chosen. You can add multiple fields but remember that these fields must use the [Email](#) element.

- **Send Success Email:** send an email to notify customers of their successful subscription.

- **Need to Confirm:** send an email to customers for confirmation.

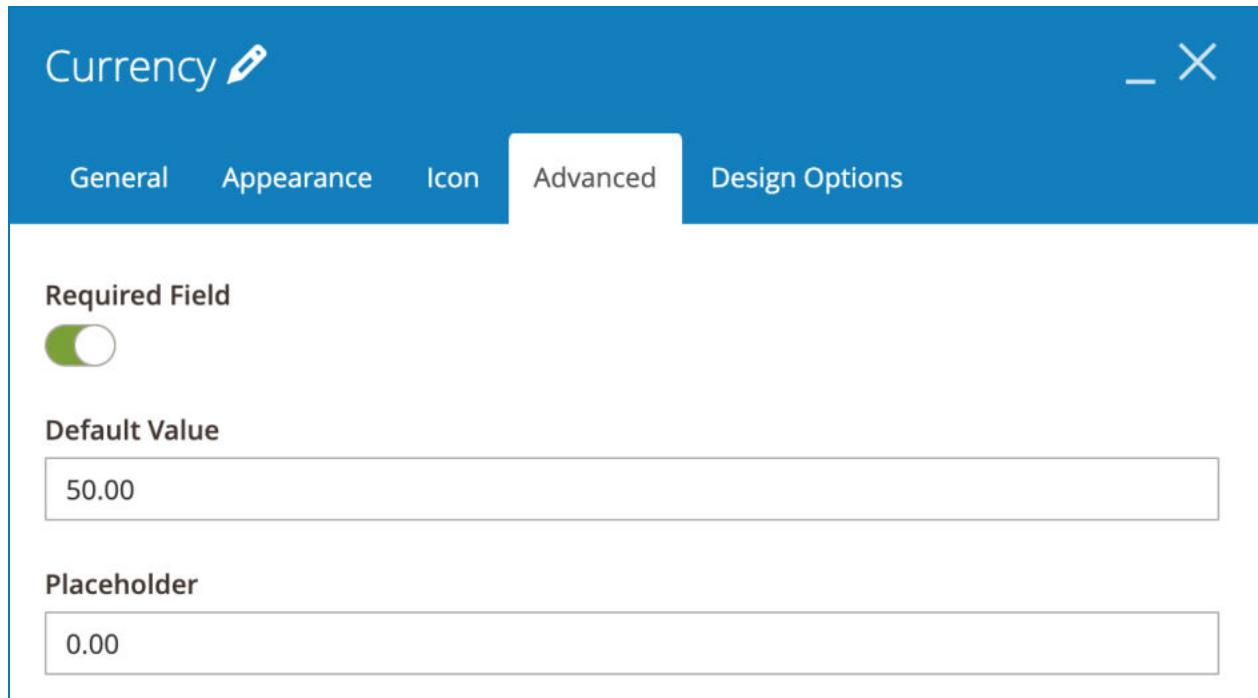

>> Subscribe element on frontend:

Subscribe

Subscribe to our newsletters and get \$10 off for the next order

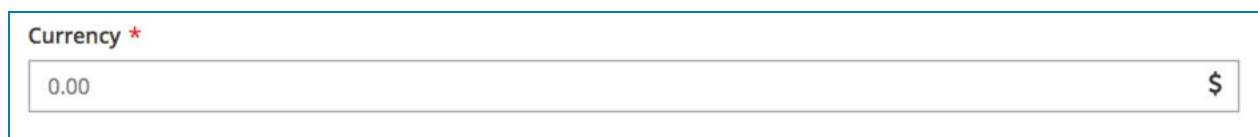

4.5.5 Currency

Currency element is used for currency input.

Set **Default Value** that is auto filled in the **Currency** form field on page load.

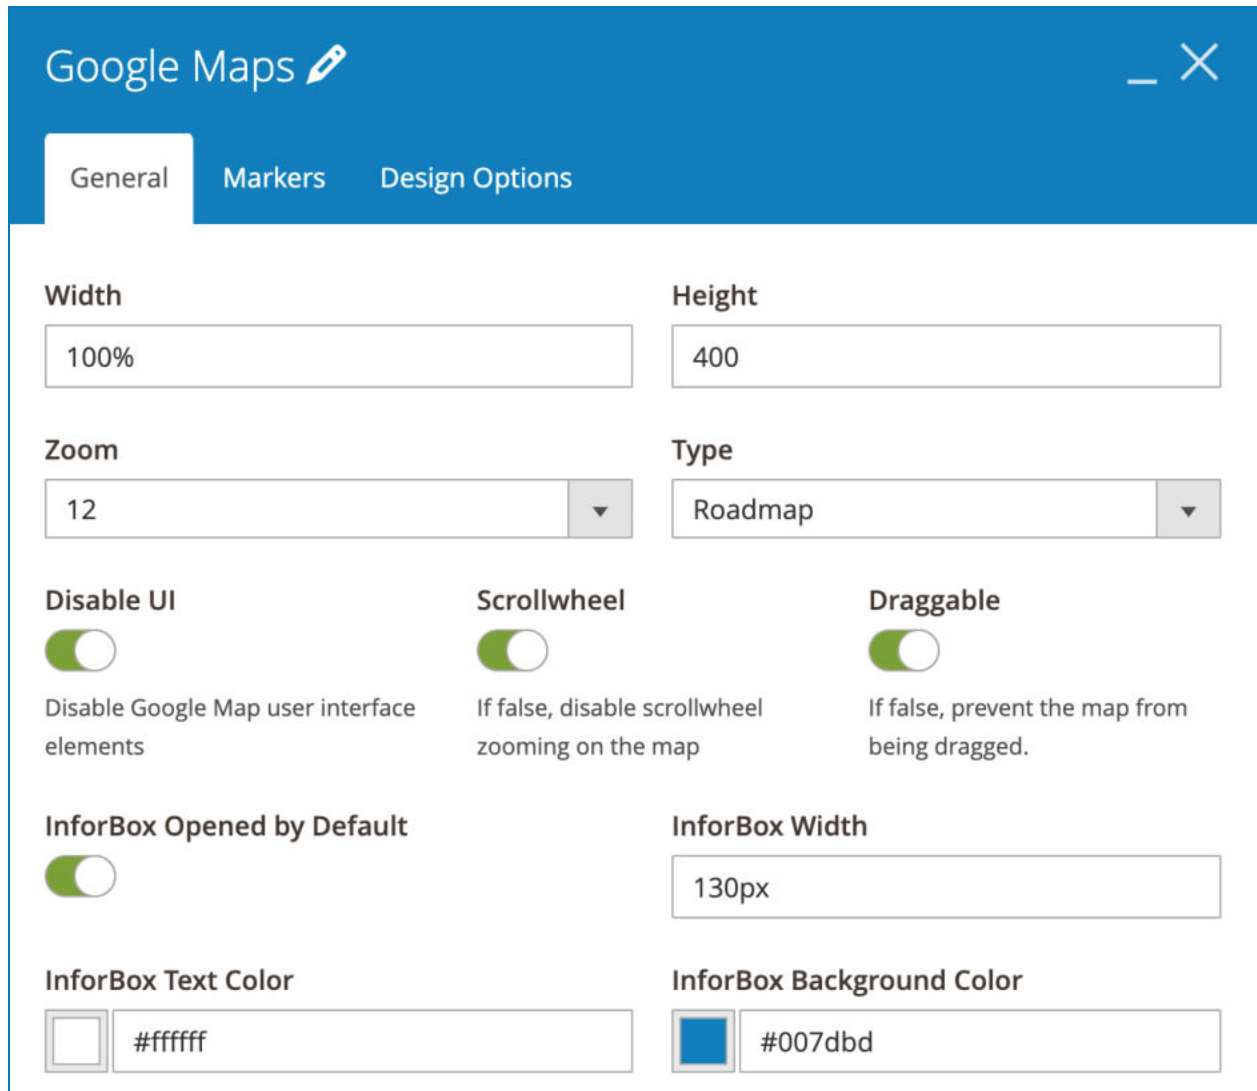

>> Currency element on frontend:

4.5.6 Google Maps

Allow you to insert Google Maps into a form for showing locations.

a. **General** tab

Google Maps 

General Markers Design Options

Width: 100%

Height: 400

Zoom: 12

Type: Roadmap

Disable UI Disable Google Map user interface elements

Scrollwheel If false, disable scrollwheel zooming on the map

Draggable If false, prevent the map from being dragged.

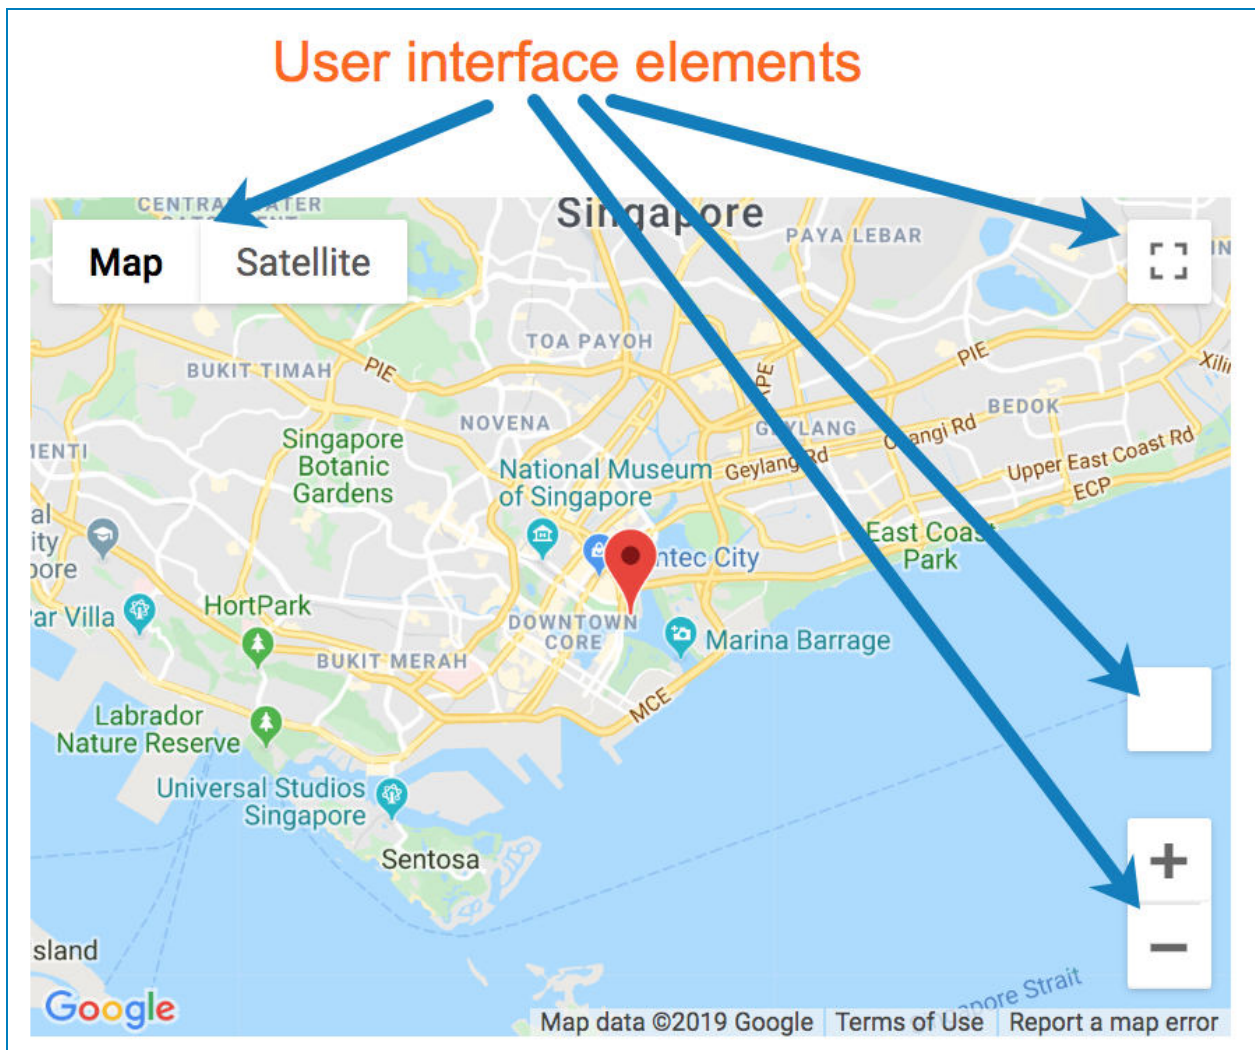

InforBox Opened by Default

InforBox Width: 130px

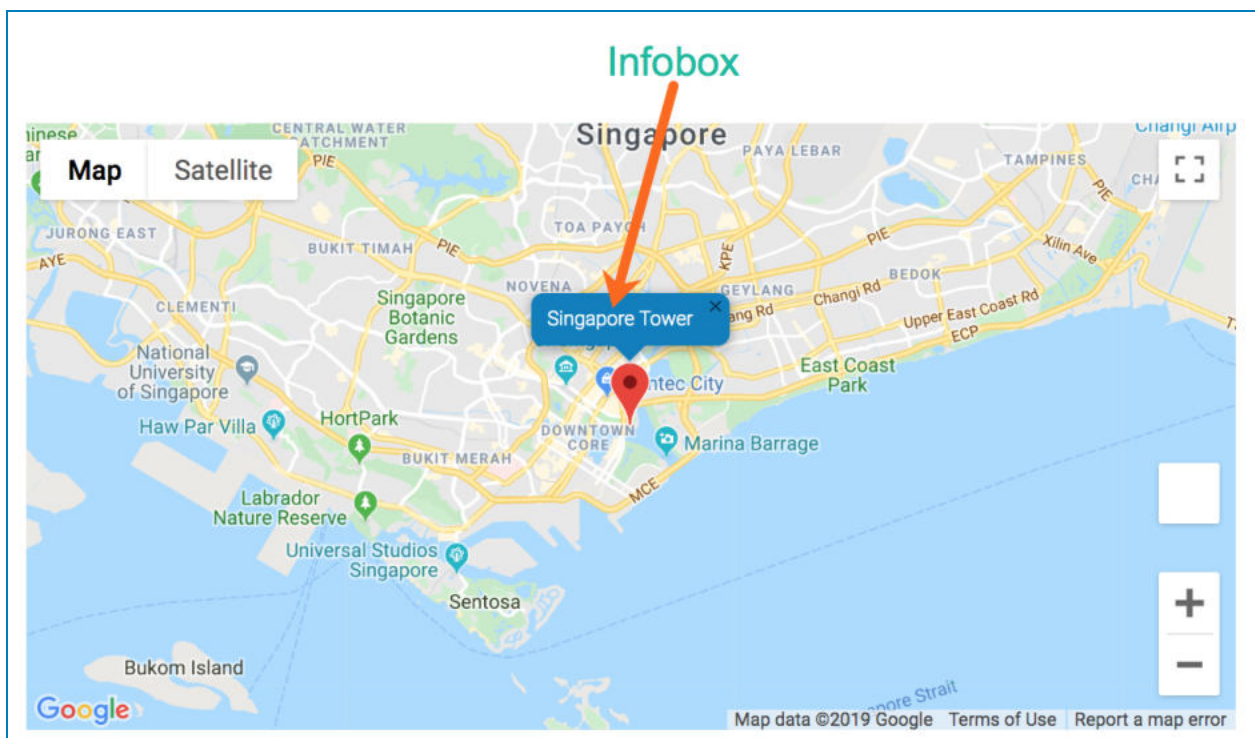

InforBox Text Color: #ffffff

InforBox Background Color: #007dbd

- **Width** and **Height** fields specify the width and height of Google Maps.
- **Zoom** field specifies the zoom level for the map.
- **Type** field specifies the map type you want to display. There are 4 types including: Roadmap, Satellite, Hybrid and Terrain.
- **Disable UI**: turn on the button to disable Google Maps user interface elements.

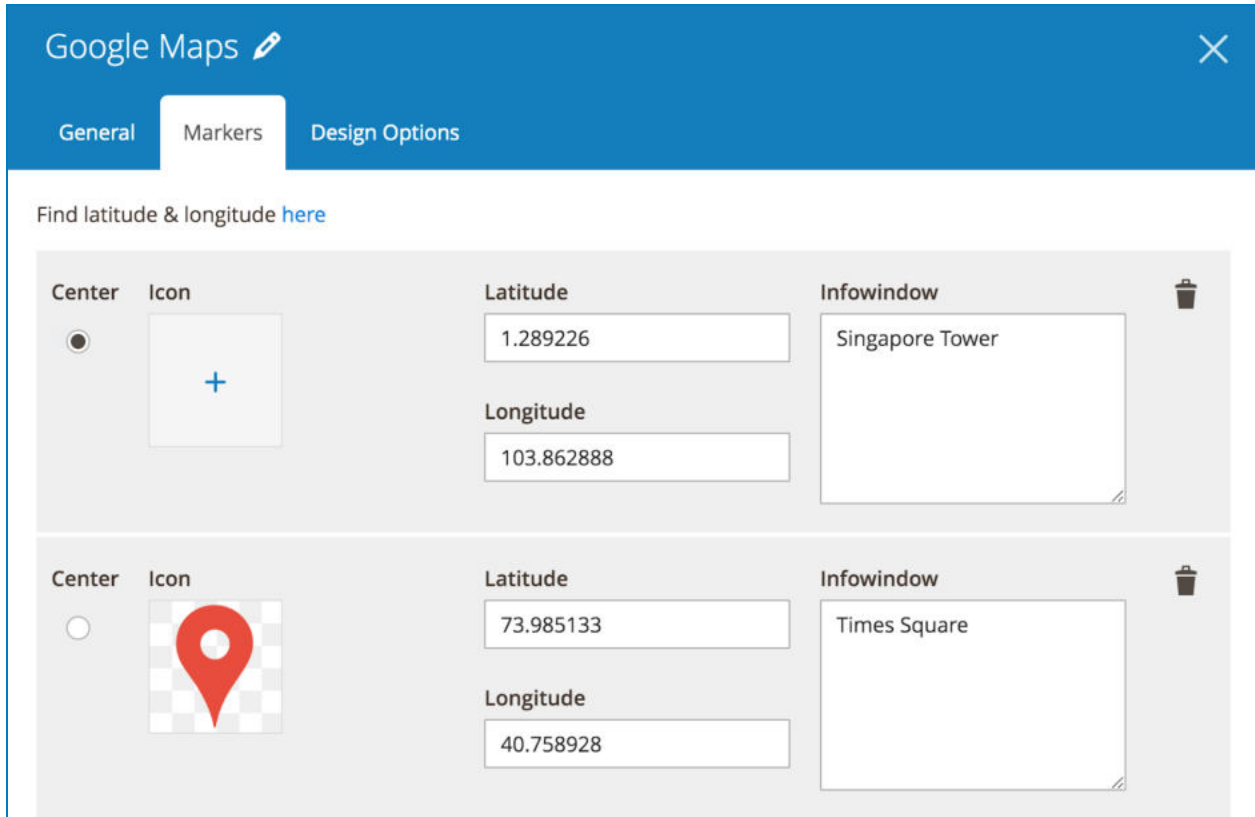

- **Scrollwheel:** if yes, you can zoom the map with the mouse scroll wheel.
- **Draggable:** if yes, the map can be dragged.
- **InfoBox Opened by Default:** open the infobox by default on page load.
- Specify **InfoBox Width**, **InfoBox Text Color** and **InfoBox Background Color**.

b. **Markers** tab

This tab allows you to show various locations of your company on Google Maps.

Google Maps 

General Markers Design Options

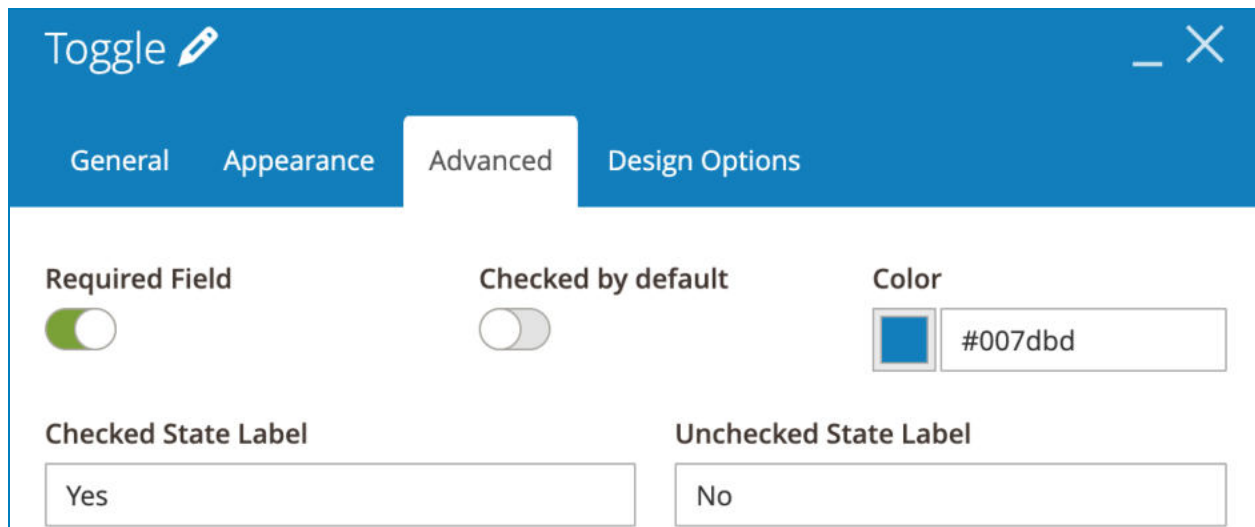

Find latitude & longitude [here](#)

Center	Icon	Latitude	Longitude	Infowindow
<input checked="" type="radio"/>		1.289226	103.862888	Singapore Tower
<input type="radio"/>		73.985133	40.758928	Times Square

- **Center:** choose which location is the main location and it will be displayed as the center on Google Maps.
- **Icon:** upload an image used as the icon for each location.
- Add some information for each location in the **Infowindow** field that will appear in the infobox of that location.
- Delete location using recycle bin icon.
- Add another location using the **Add** button.

4.5.7 Toggle

Toggle is a button that is pressed to turn a feature on and off.

- **Checked by default:** turn on the toggle by default on page load.
- Choose **Color** for the toggle when it's turned on.
- **Checked State Label / Unchecked State Label:** enter the values for on/off toggle that will be displayed in email notifications.

For example, as you can see in the above image, we fill the **Checked State Label** with Yes, **Unchecked State Label** with No.

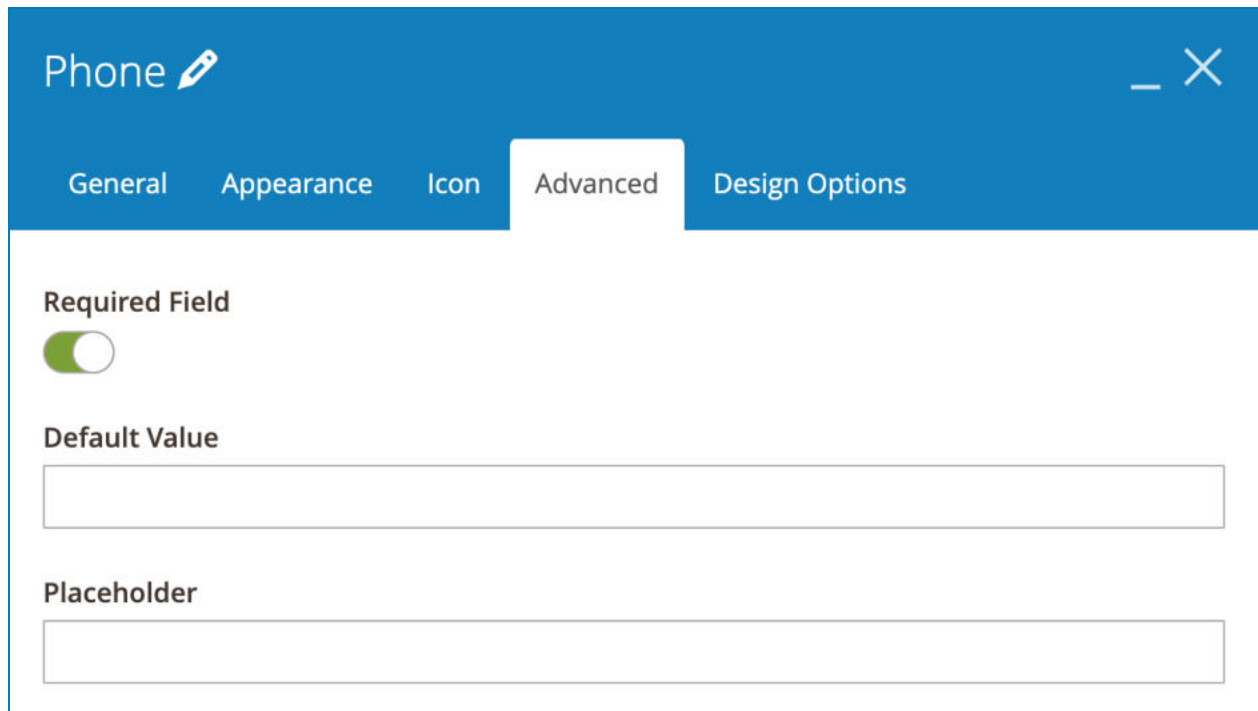

So if customers turn the toggle on, then in email notifications, the value for this form field will be Yes. If customers turn the toggle off, then in email notifications, the value for this form field will be No.

>> Toggle element on frontend:

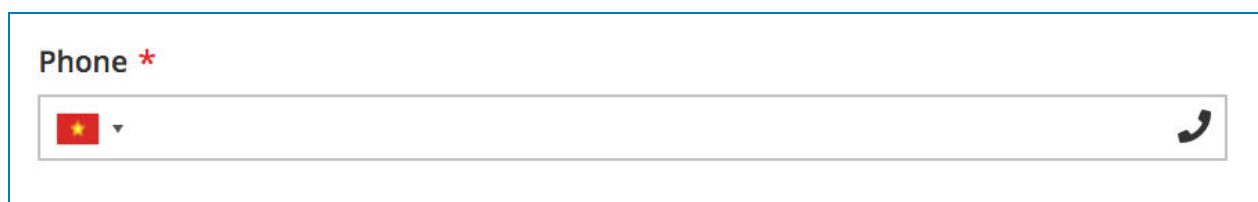

4.5.8 Phone

Phone element allows customers to enter their phone numbers.

Enter **Default Value** that is auto filled in the Phone field on page load.

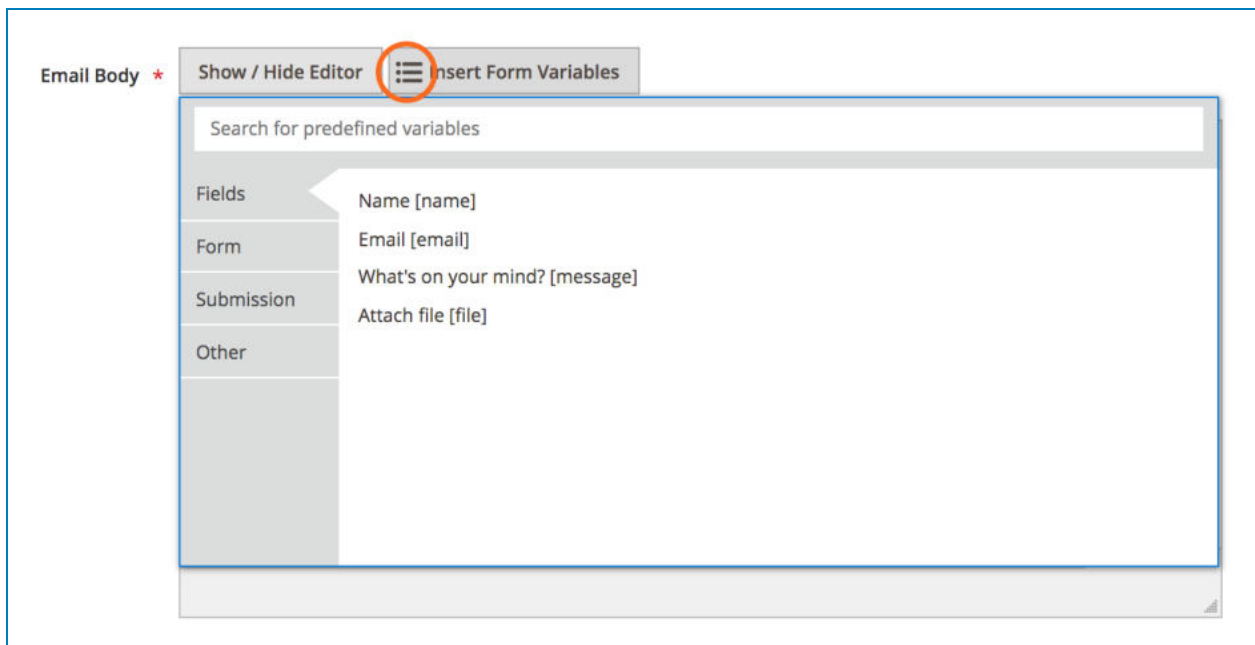

>> Phone element on frontend:

5) Variables

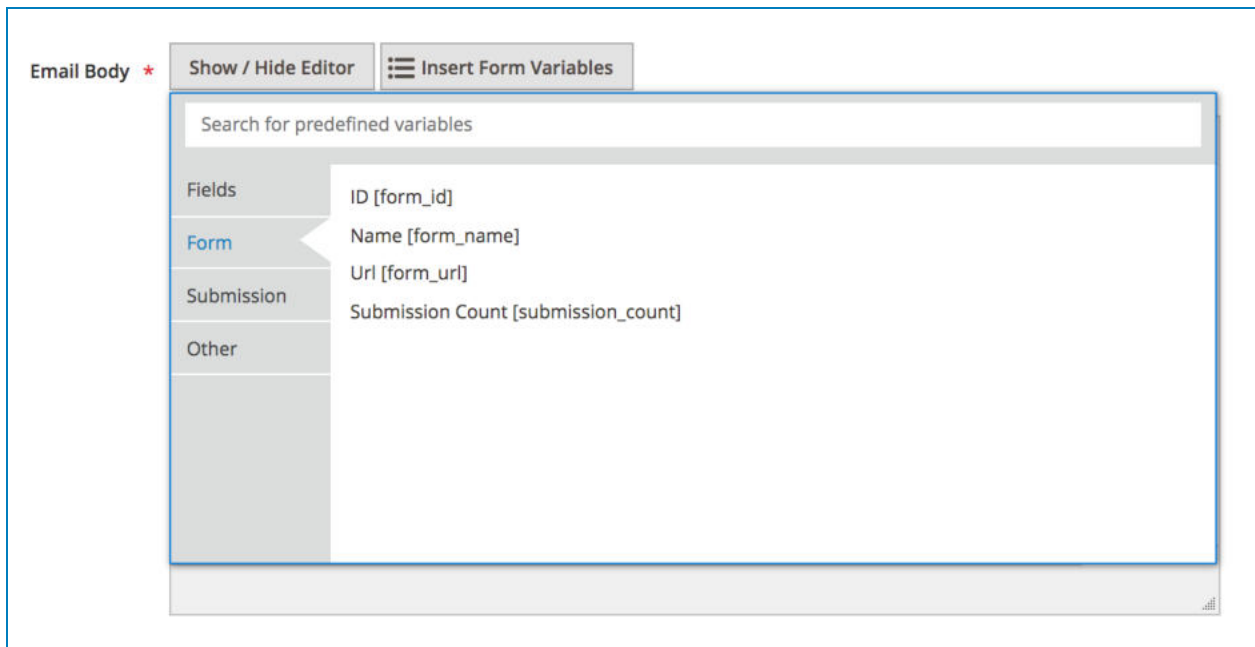

You can insert variables in email notifications and success messages for dynamic content. Then in the email notifications and success messages that are sent and displayed to admins and customers, these variables will be replaced with relevant submitted data.

When customizing email notifications and success message, if you see the icon in orange circles (below image), click it and a drop-down menu containing variables will show up:

As you can see in the above image, there are 4 types of variables:

- **Fields:** This kind of variable is auto created for each field in the form. For example, your contact form has the **Email** field, so the variable for this form field is [email] (see the above image). The variables of this kind will be different from form to form depending on the fields of each form.
- **Form:** include variables for form ID, name, URL and submission count. These variables are the same for every form.

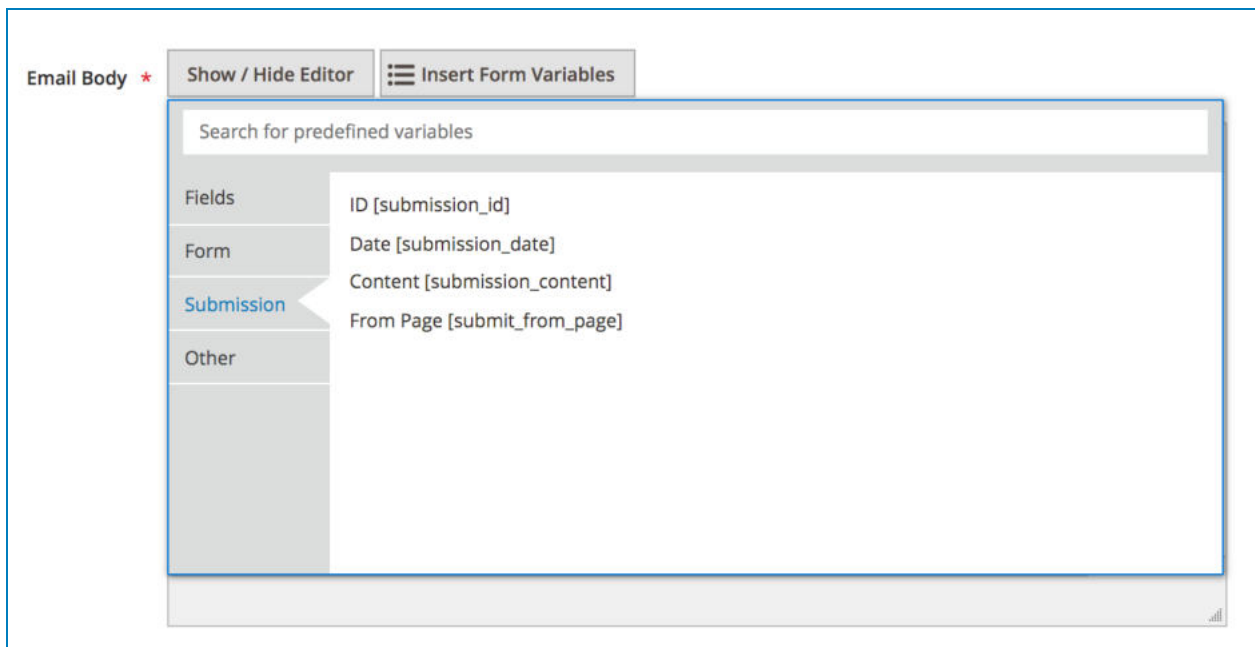

Email Body * Show / Hide Editor Insert Form Variables

Search for predefined variables

Fields	ID [form_id]
Form	Name [form_name]
	Url [form_url]
Submission	Submission Count [submission_count]
Other	

- **Submission:** include variables related to form submission. These variables are the same for every form.

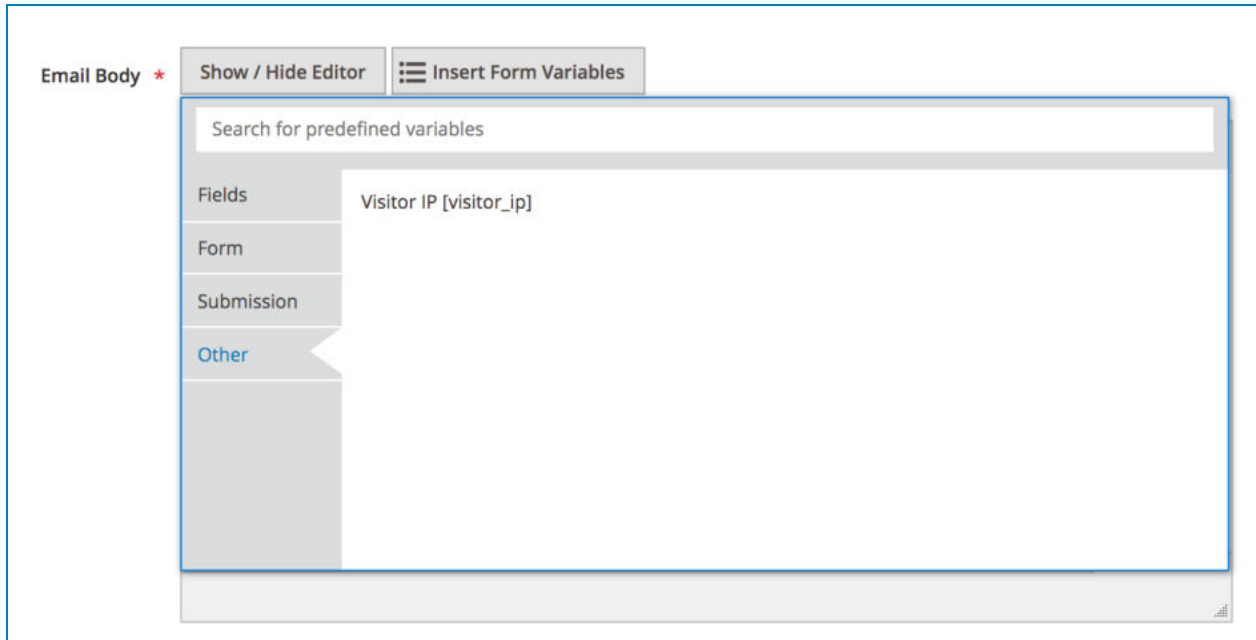

Email Body * Show / Hide Editor Insert Form Variables

Search for predefined variables

Fields	ID [submission_id]
Form	Date [submission_date]
	Content [submission_content]
Submission	From Page [submit_from_page]
Other	

- **Other:** include variable for visitor IP.

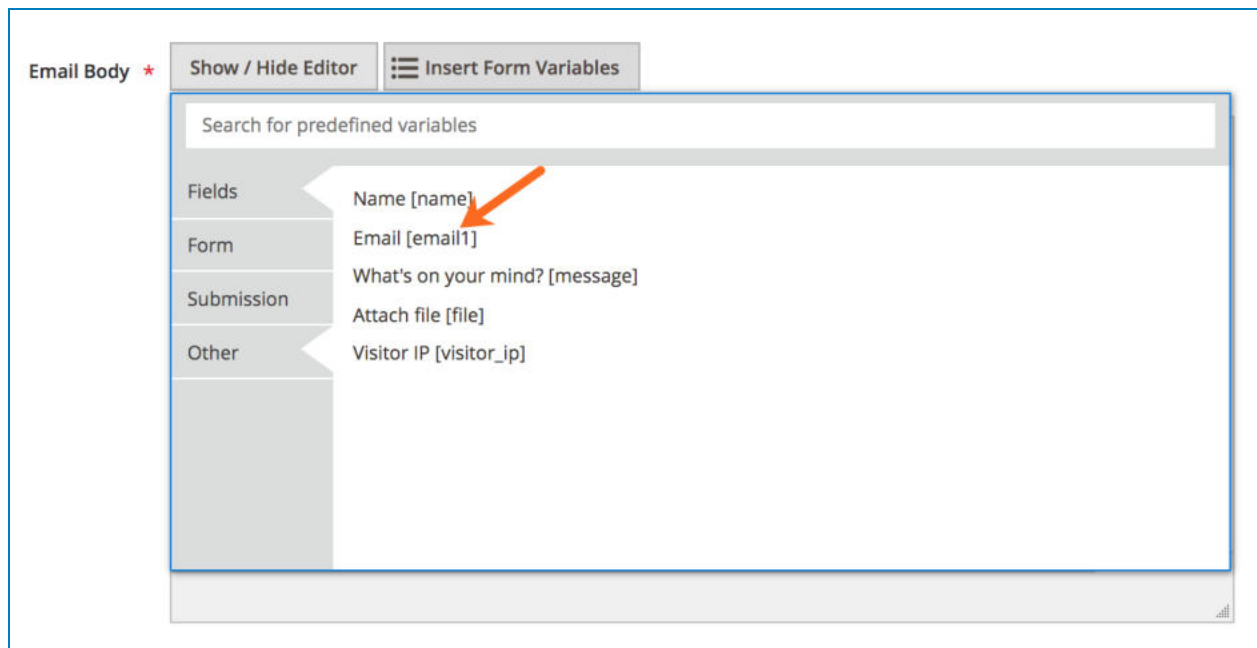

NOTE: You can also change variable names for form fields in case you don't want to use default ones. To do this, open settings of an element. In the **Appearance** tab, find the **Element Name** field and change the text as you want.

Email

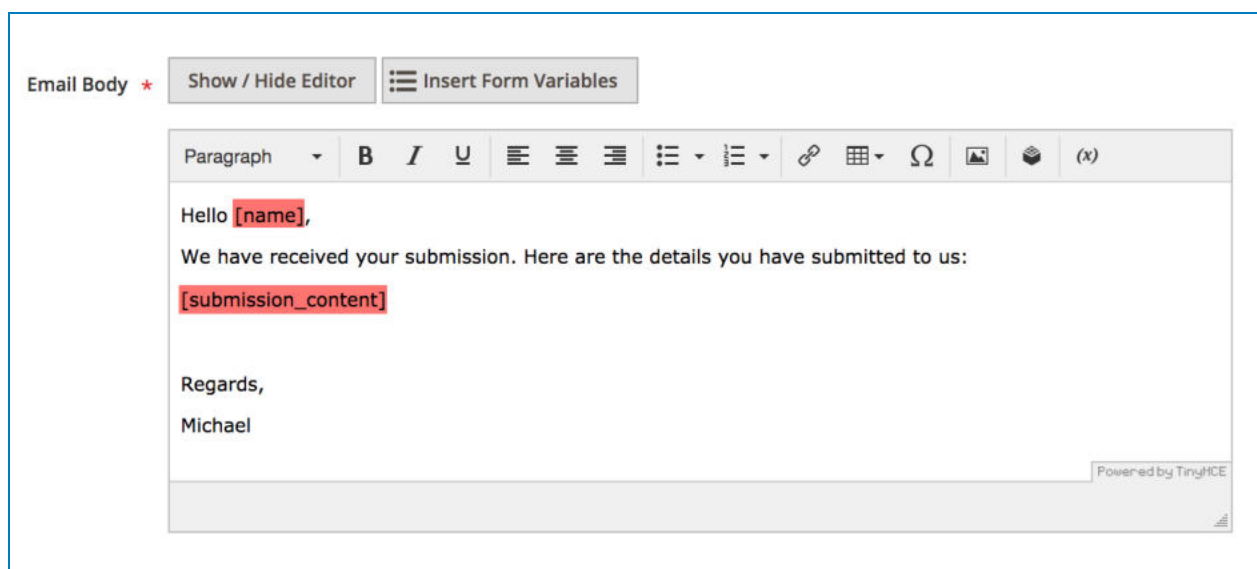

General **Appearance** Icon Advanced Design Options

Label <input type="text" value="Email"/>	Email Label <input type="text"/>
Label Position <input type="text" value="Left of Element"/> ▼	Label Alignment <input type="text" value="Left"/> ▼
Label Width(percent) <input type="text" value="25"/>	Control Width <input type="text"/> <small>Enter "auto" to display default control width</small>
Element Name  <input type="text" value="email1"/> <small>Make sure it is unique.</small>	Exclude from Email <input type="checkbox"/>

And the variable in the drop-down list will be auto updated with your change.

Let's look at this example. Here is the email body for customers with variables:

Here is the email body that customers will receive:

Hello **Roni**, ← `[name]`

We have received your submission. Here are the details you have submitted to us:

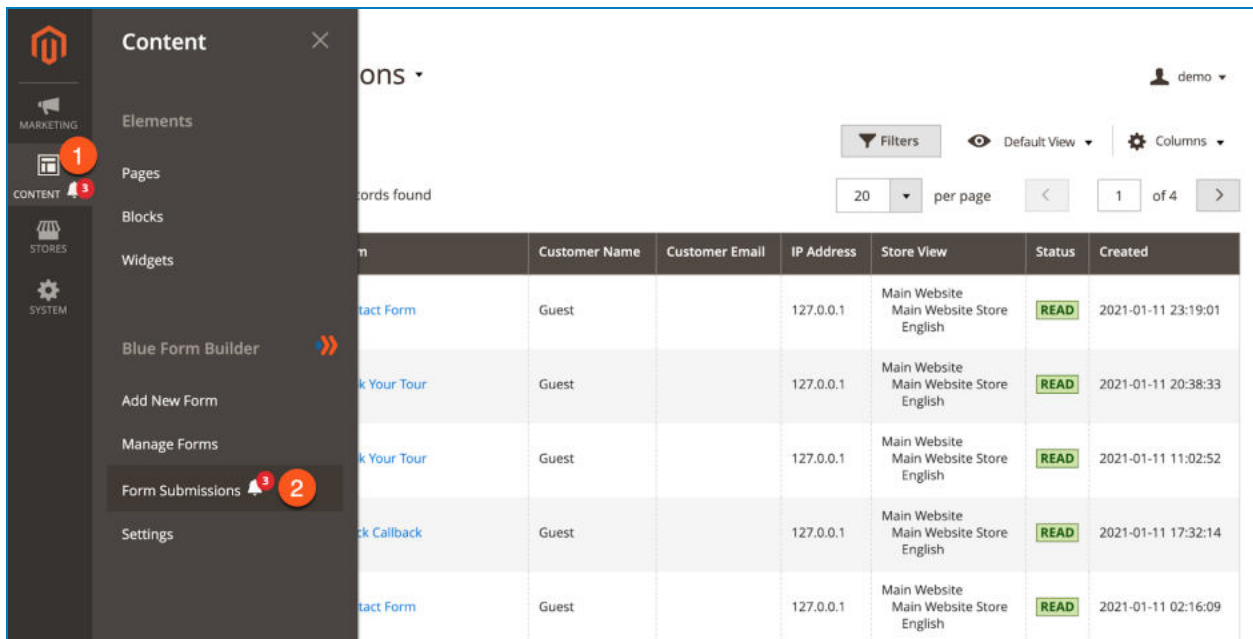

Name	Roni
Email	roni.cost@gmail.com
What's on your mind?	Need support on installation issues. Find details in attached image.
Attach file	installation-issue.png (233.40 KB)

Regards,
Michael

- There is a grid containing all existing landing pages:

- **ID**: identifier of the submission.
- **Action**: view the submission in detail.
- **Form**: the form that the submission belongs to. Click on the form name and you will be redirected to the [form edit page](#).
- **Customer Name / Customer Email**: name and email address (that customers registered on your site) of customers who submit the form. With not logged in customers, Customer Name will be Guest and Customer Email will be empty.
- **IP Address**: show IP address of the device that a customer uses to submit a form.
- **Store View**: stores from which the submission is created.
- **Status**: whether the submission is read or unread.
- **Created** time: when the submission is created.

- **More Informations:** including form name, store view, submitted date, IP address etc.

Submission Data	Customer Notification	Admin Notification	More Informations	Advanced
			Form Contact Form	
			Referer http://blueformbuilder.m2.magezon.com/form/contact-form	
			Store View English	
			Created At 11-21-2019 04:11:52	
			IP Address 172.68.144.59	
			User Agent Mozilla/5.0 (Macintosh; Intel Mac OS X 10_13_6) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/78.0.3904.108 Safari/537.36	

- **Advanced:** this tab contains extended features of Blue Form Builder. Currently, you can find these following features in this tab:

The screenshot shows a configuration interface with five tabs: Submission Data, Customer Notification, Admin Notification, More Informations, and Advanced. The Advanced tab is selected. It contains two settings:

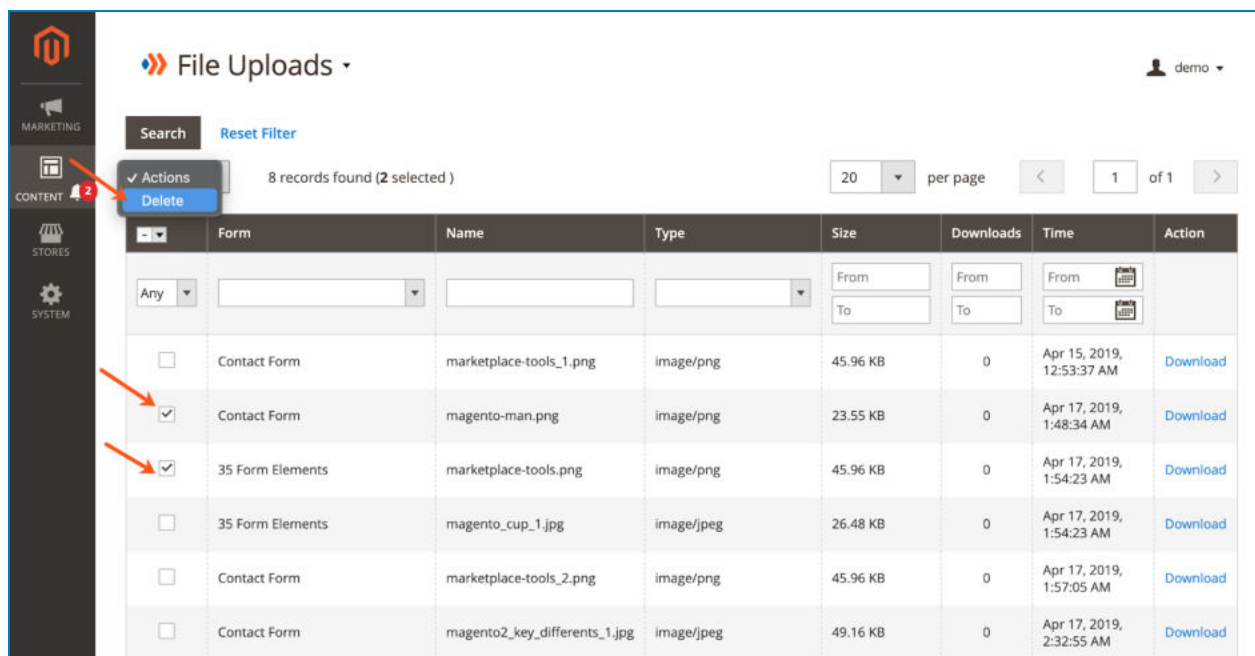

- Trackback Page:** A dropdown menu currently set to "Yes".
- Trackback Link:** A text field containing the URL <http://blueformbuilder.m2.magezon.com/submission-confirmed/MC4xOTQ4MDkwMCAxNTc0MzA5NTEy>.

- **Trackback Link:** comes with a link by clicking on which, the submission can be viewed online on the frontend. This link is created after the form is submitted and users can view this link in the [success message](#) (see [track_link]).
- **Trackback Page:** allow you to enable/disable the submission page on frontend.

In the future, if we develop other plugins for Blue Form Builder, then some other options will be included in this tab.

V) File Uploads

Where you can view all uploaded files of customers in a grid:

File Uploads - demo

Search Reset Filter

8 records found (2 selected) 20 per page 1 of 1

	Form	Name	Type	Size	Downloads	Time	Action
<input type="checkbox"/>	Contact Form	marketplace-tools_1.png	image/png	45.96 KB	0	Apr 15, 2019, 12:53:37 AM	Download
<input checked="" type="checkbox"/>	Contact Form	magento-man.png	image/png	23.55 KB	0	Apr 17, 2019, 1:48:34 AM	Download
<input checked="" type="checkbox"/>	35 Form Elements	marketplace-tools.png	image/png	45.96 KB	0	Apr 17, 2019, 1:54:23 AM	Download
<input type="checkbox"/>	35 Form Elements	magento_cup_1.jpg	image/jpeg	26.48 KB	0	Apr 17, 2019, 1:54:23 AM	Download
<input type="checkbox"/>	Contact Form	marketplace-tools_2.png	image/png	45.96 KB	0	Apr 17, 2019, 1:57:05 AM	Download
<input type="checkbox"/>	Contact Form	magento2_key_differents_1.jpg	image/jpeg	49.16 KB	0	Apr 17, 2019, 2:32:55 AM	Download

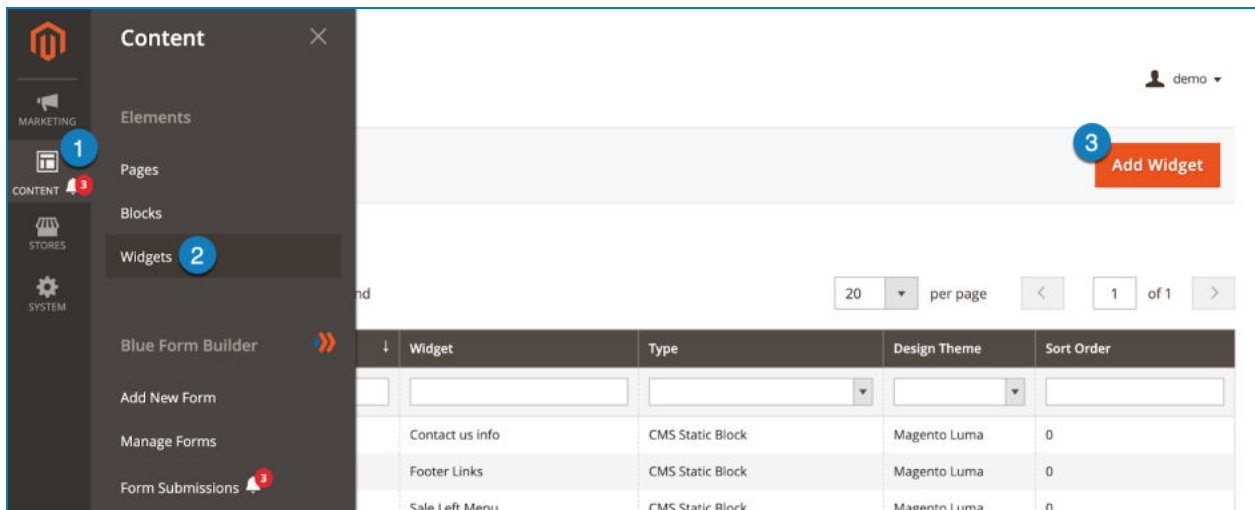

- The grid contains such information as:

- **Form:** form through which the file is uploaded.
- **Name:** file name.
- **Type:** type of the uploaded file.
- **Size:** uploaded file size.
- **Downloads:** number of file downloads.
- **Time:** when the file is uploaded.
- **Action:** download the file.

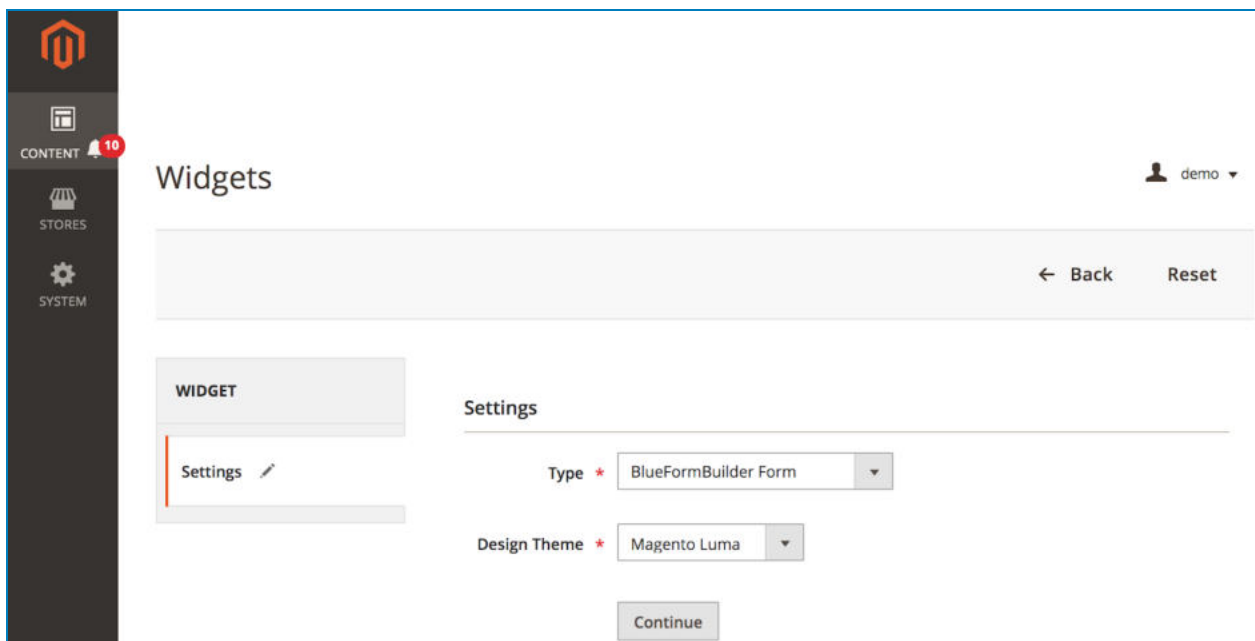

- Tick the checkboxes of corresponding uploaded files, then click Actions dropdown above the grid to delete these files.

VI) Form Widgets

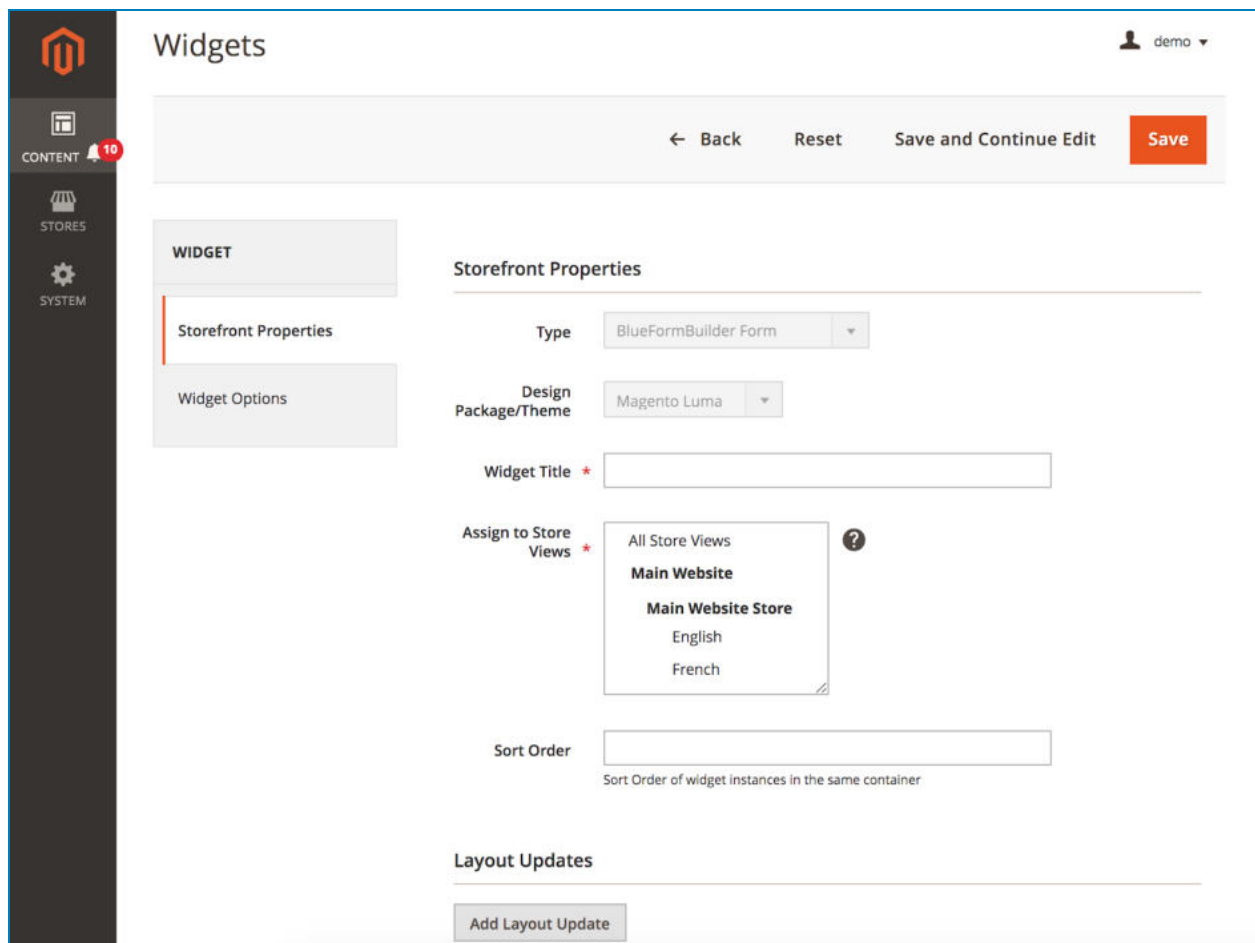

You can use form widget to embed form anywhere on your website. To add a new widget, first go to **Content > Elements > Widgets**. On the upper right corner, click **Add Widget** button:

Then you will go to this page:

- In **Type** field, select “BlueFormBuilder Form”.
- In **Design Theme**, choose the current theme of your website.
- Click **Continue** to continue. You will then go to the page with a panel on the left containing 2 sections: **Storefront Properties** and **Widget Options**.

a. Storefront Properties

Storefront Properties

Type

Design Package/Theme

Widget Title *

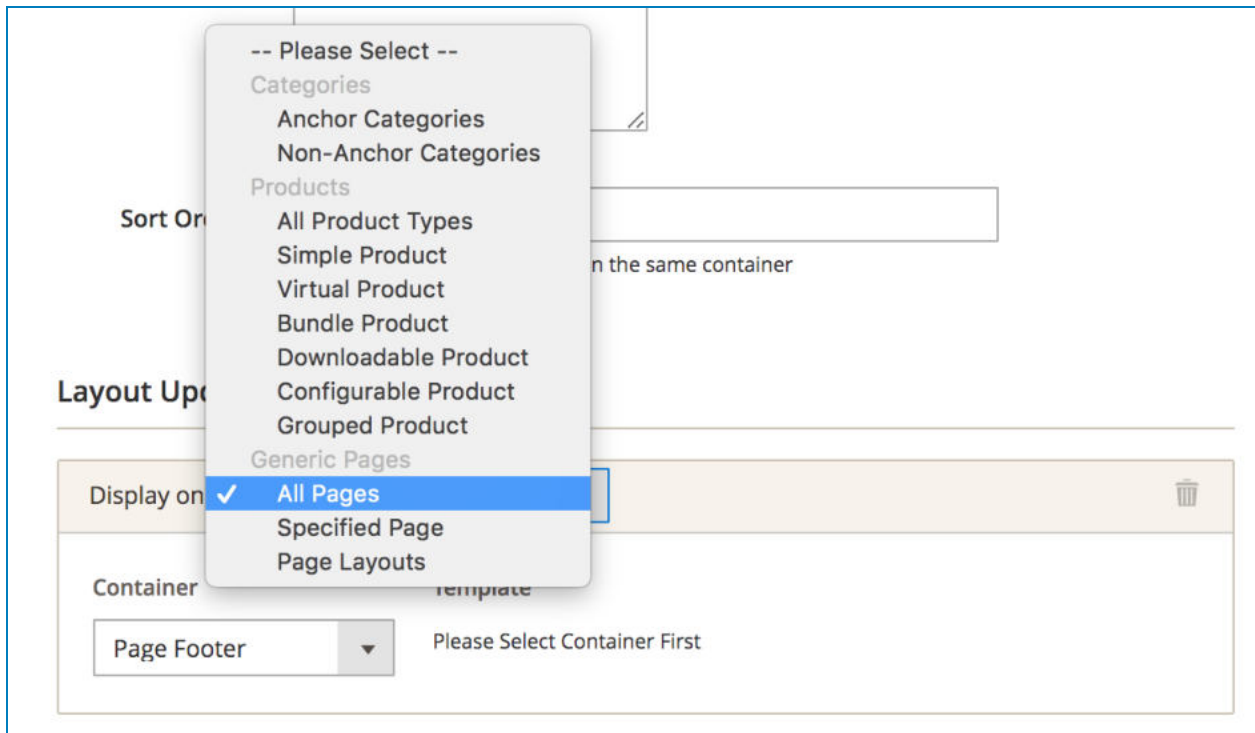

Assign to Store Views *

All Store Views ?
 Main Website
 Main Website Store
 English
 French

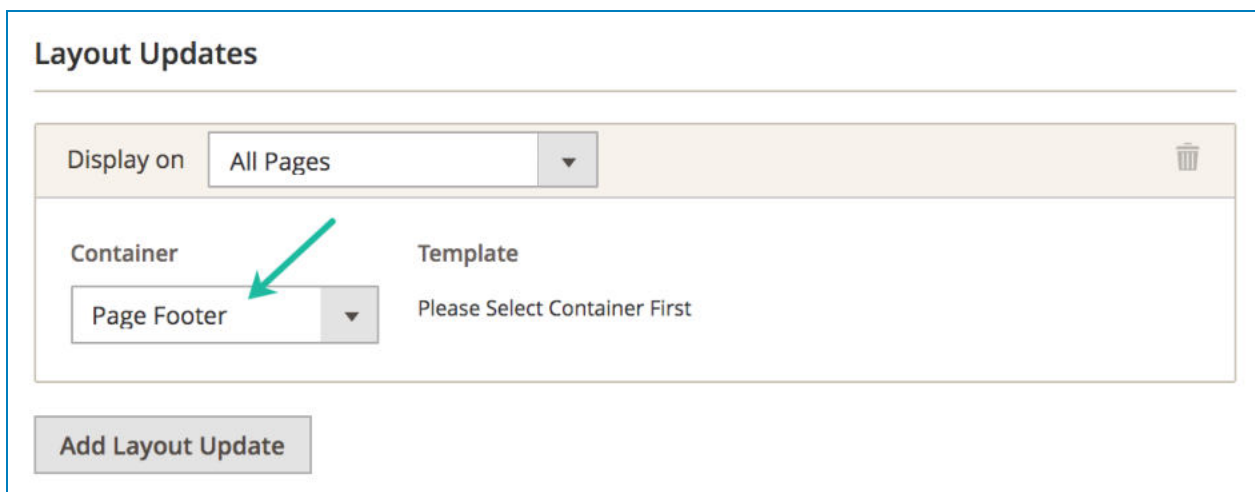

Sort Order
Sort Order of widget instances in the same container

- **Widget Title:** enter widget title.
- **Assign to Store Views:** choose store views to add widget.
- **Sort Order:** enter a number here to set priority level for the widget. This is useful in case you add more than 1 widget in the same position, then the widget with a smaller number will be prioritized to come first.
- **Layout Updates:** allow you to choose where to add widget by clicking **Add Layout Update** button.

Choose where to add widget from a drop-down list in **Display on** field.

Then in **Container**, you can choose the exact position to add the widget.

b. Widget Options

Where you choose and customize the form to which you want to apply the widget.

- Click **Select Form** to select your wanted form.
- **Display Type**: choose the form type with 4 options: inline form, popup form, slide in form and link form.
- **Width**: specify the form width.
- **Button Text**: the text inside the button (for popup form and slide in form) or the link text (for link form).
- **Button Align** (only appear when you choose popup or slide in form): specify position of the button (5 options including Inline, Left, Bottom Left, Right, Bottom Right).
- **Show Popup Automatically**: If you turn on this button, the form will automatically pop up when customers open the page containing the form.
- **Show after X seconds**: after how many seconds the form will auto pop up.
- **Cookie lifetime in X seconds**: after how many seconds the form pops up again.
- **Custom Class**: this is for those who know coding to customize the form with advanced features.
- **Button Color**: color of the text inside the button (for popup and slide in form) / color of the link text (you have to enter color code here).
- **Button Color on Hover**: color of the text inside the button (for popup and slide in form) / color of the link text when users hover the mouse over (you have to enter color code here).
- **Background Color on Hover**: color of the button background (for popup and slide in form) / color of link text background (you have to enter color code here).
- **Background Color on Hover**: color of the button background (for popup and slide in form) / color of link text background when users hover the mouse over (you have to enter color code here).
- **Button Font Size(px)**: font size of the text inside the button (for popup and slide in form) / font size of the link text.

>> 4 form types:

- Inline form

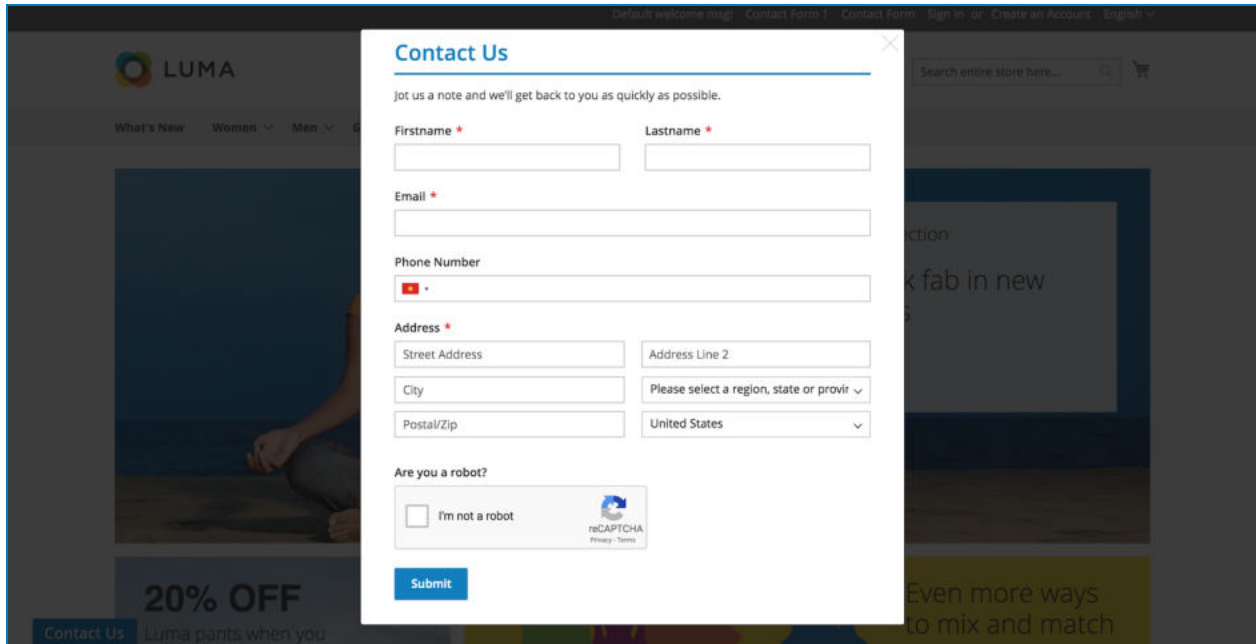

The screenshot shows a contact form within a web application. At the top left, there are navigation links: "About us", "Customer Service", "Search Terms", "Privacy and Cookie Policy", "Orders and Returns", "Advanced Search", and "Contact Us". At the top right, there is an email subscription field with the placeholder text "Enter your email address". The main form is titled "Contact Us" and contains the following fields:

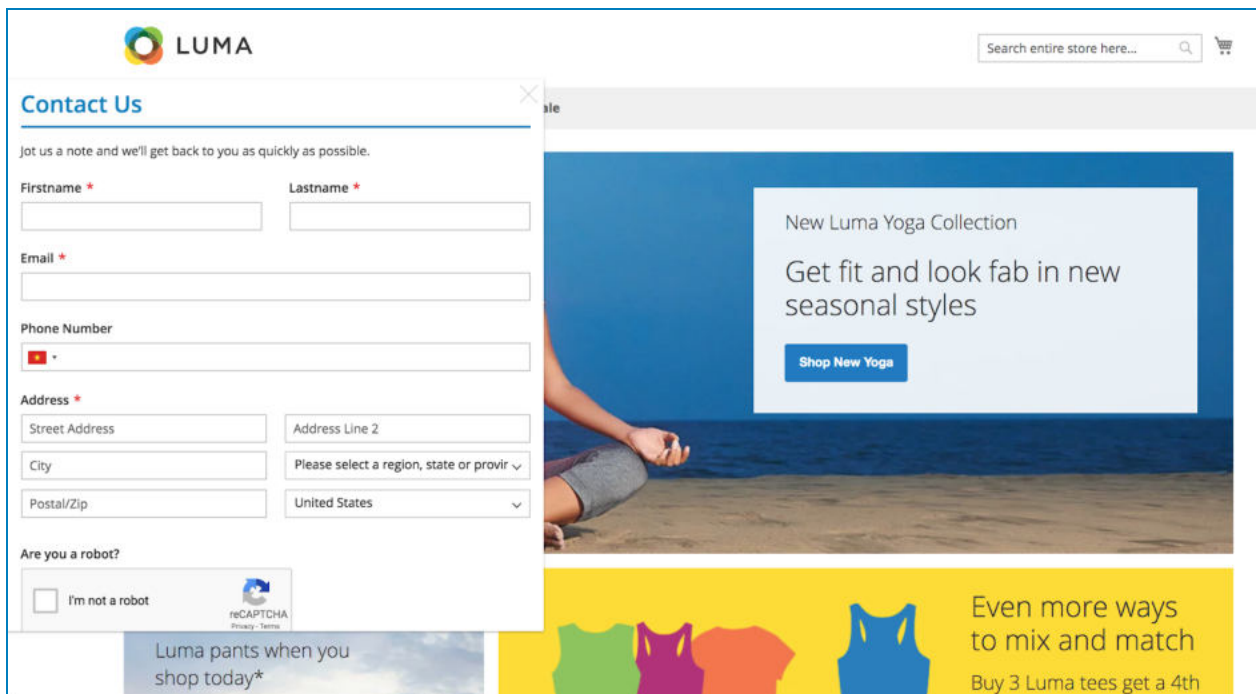

- Firstname *
- Lastname *
- Email *
- Phone Number (with a country code dropdown menu)
- Address * (with sub-fields for Street Address, Address Line 2, City, Postal/Zip, and a region/state/province dropdown menu)

At the bottom of the form, there is a reCAPTCHA widget with the text "Are you a robot?" and a checkbox labeled "I'm not a robot". A blue "Submit" button is located at the bottom right of the form.
