## I) Introduction

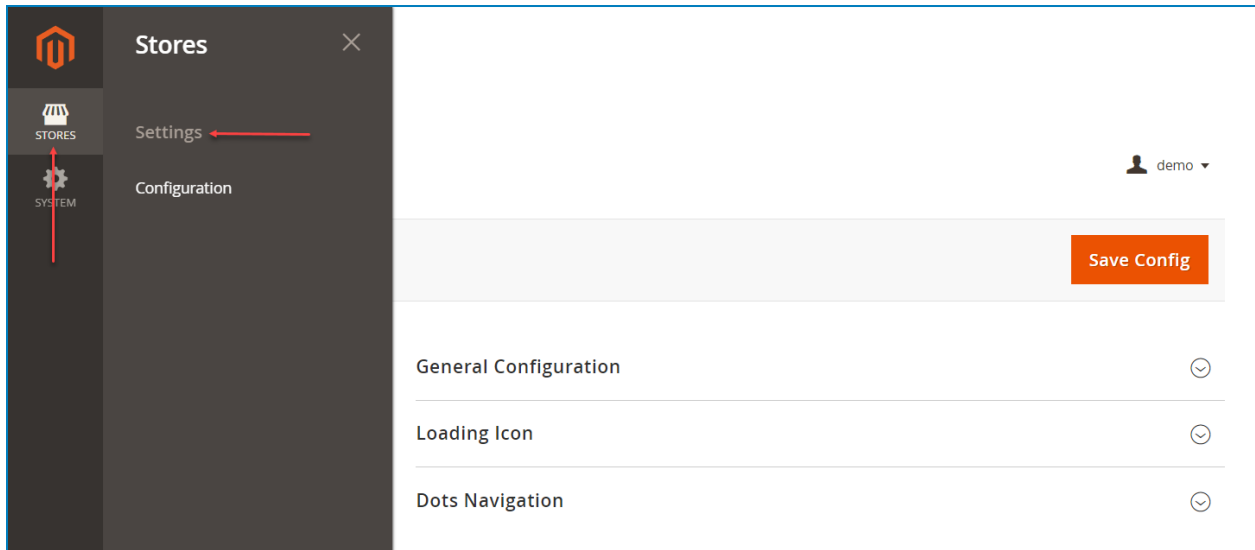

**Magento 2 Infinite Scroll** extension lets customers explore more products when they scroll down on the catalog page without reloading the entire page. It brings a more seamless and efficient browsing experience to your customers.

- Auto loading of the pages with AJAX
- Apply to Category page, Search Result page, and Advanced Search Result page
- 4 scroll modes
- Customize “Load More” button text
- Set message on the last loaded page
- Define the delay time for scrolling down
- Customize loading icon
- Fullpage scroll with dot indicators
- SEO friendly functionality
- Work well on all devices
- Compatible with Scroll To Top and Lazy Load Extension

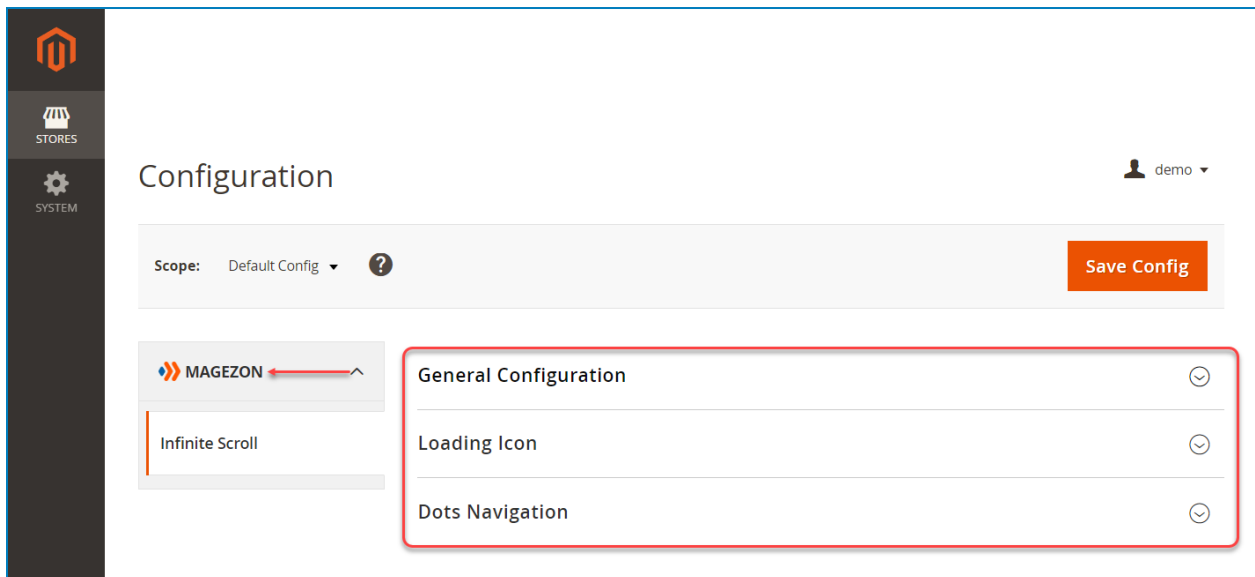

## II) Where to Find Extension

### 1. Infinite Scroll Extension in the Backend

After installing the extension, navigate to **Stores > Settings > Configuration**:

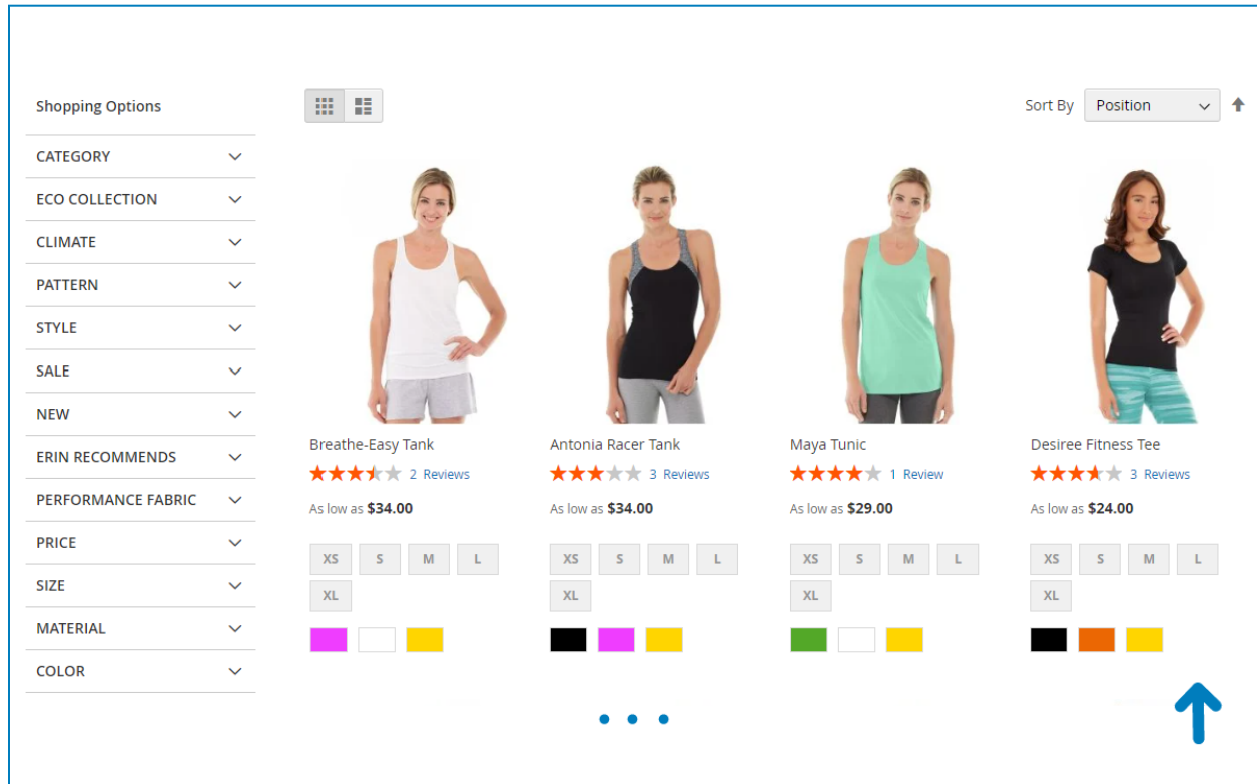

In the left panel, span **MAGEZON** and click **Infinite Scroll**. In the right section, there are 3 tabs: General Configuration, Loading Icon, and Dots Navigation.

## 2. Infinite Scroll Extension in the Frontend

In the frontend, the infinite scroll will be applied on the **Category** page, **Search Result** page, and **Advanced Search Result** page.

## III) Configuration

**Note:** When you want to adjust any option, you have to uncheck **Use system value**.

### 1. General Configuration

This section contains general settings for the extension:

#### General Configuration ⌵

Enable Infinite Scroll <small>[store view]</small>	Yes	<input checked="" type="checkbox"/> Use system value
Enable For Category Page <small>[store view]</small>	Yes	<input checked="" type="checkbox"/> Use system value
Enable For Search Result Page <small>[store view]</small>	Yes	<input checked="" type="checkbox"/> Use system value
Enable For Advanced Search Result Page <small>[store view]</small>	Yes	<input checked="" type="checkbox"/> Use system value
Scroll Mode <small>[store view]</small>	Automatic up to X pages, then manual	<input checked="" type="checkbox"/> Use system value
Page Limit (X value) <small>[store view]</small>	2	<input checked="" type="checkbox"/> Use system value
Previous Button Text <small>[store view]</small>	Load more items...	<input checked="" type="checkbox"/> Use system value
Next Button Text <small>[store view]</small>	Load more items...	<input checked="" type="checkbox"/> Use system value
Message on Last Loaded Page <small>[store view]</small>	No more products in this category	<input checked="" type="checkbox"/> Use system value
AJAX Request Timeout <small>[store view]</small>	10000	<input checked="" type="checkbox"/> Use system value

In milliseconds, by default 10000 (= 10 seconds)

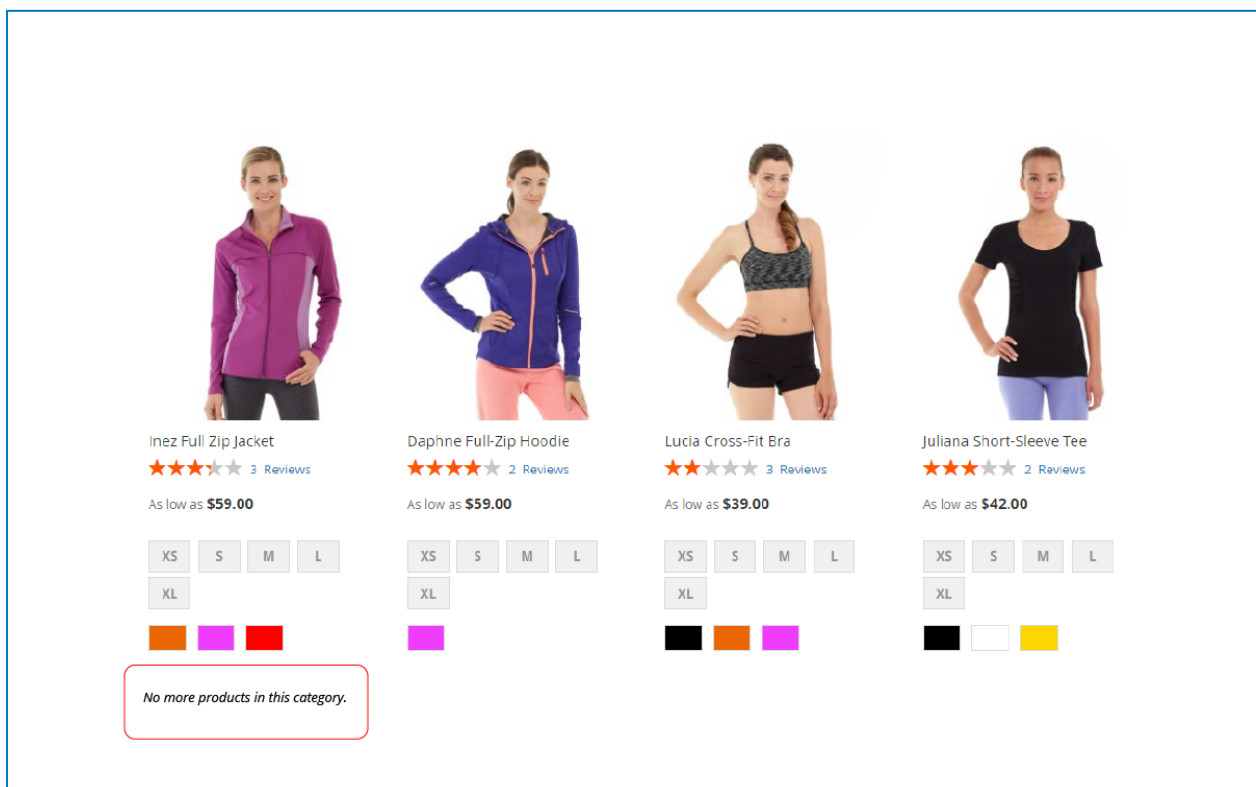

- **Enable Infinite Scroll:** select Yes/No to enable/disable the extension on your website.
- **Enable For Category Page:** select Yes/No to enable/disable the extension on the Category page.

- **Enable For Search Result Page:** select Yes/No to enable/disable the extension on the Search Result page.
- **Enable For Advanced Search Result Page:** select Yes/No to enable/disable the extension on the Advanced Search Result page.
- **Scroll Mode:** select one of the scroll modes to show products on the category page, search result page, and advanced search page.
  - ❖ **Automatic:** automatically load products on page scroll. You can see the loading type via [this video](#).
  - ❖ **Automatic up to X pages, then manual:** firstly, load products automatically until the defined page and then load the products on button click. For example: When you set X to 2, the page will be loaded automatically until page 2 then your customers will need to click the next button every time to load the other next page. You can see the example in [this video](#).
  - ❖ **Automatic each X pages:** load products automatically until X pages and then load the products on button click. This process continues again and again. For example: When you set X to 2, the page will be loaded automatically with 2 pages then your customers need to click the next button once. This process repeats until the end of the product list. You can see the example in [this video](#).
  - ❖ **Manual:** load the products when pressing the next and previous buttons. You can see the loading type via [this video](#).
- **Previous Button Text:** enter text for the button users are required to click to load previous products.
- **Next Button Text:** enter text for the button users are required to click to load the next products.

- **Page Limit (X value):** define the number of automatically loaded pages.

**Note:** This field will appear when you choose these **Scroll Mode:** Automatic up to X pages, then manual and Automatic each X pages.

- **Message on Last Loaded Page:** the message will appear when the customers scroll to the end of the last page.

- **AJAX Request Timeout:** time to auto-load one page in milliseconds; the default value is 10000 (= 10 seconds). For example, when you set the delay time to 10s, if products are still not loaded after 10s then a notification "Something went wrong" will appear. Customers can press F5 to continue reloading the page.

## 2. Loading Icon

This section allows you to customize the loading icon:

- **Loading Icon Type:** select the loading icon type. You can choose between CSS and Image.

If you choose **CSS**, then you need to set the below options:

- **Loading Icon:** choose an existing icon.
- **Loading Icon Color:** pick your desired loading icon color by color code.

On the other hand, choose **Image** and these options will appear:

**Loading Icon** ⌵

**Loading Icon Type** [store view]  ▼  Use system value

**Use Custom Loading Image** [store view]  ▼  Use system value

**Loading Image** [store view]    Use system value  
Allowed .gif file only

- **Use Custom Loading Image:** select Yes to upload a custom loading icon. Select No to use a default loading icon.
- **Loading Image:** upload your desired loading icon from your device. Only .gif is allowed.

The image displays a grid of four clothing items, each with a product image, name, price, and size/color options. Below the grid, a red box highlights three blue dots, with an arrow pointing to the text "Loading icon".

Product Name	Price	Reviews	Available Sizes	Available Colors
Juno Jacket	As low as \$77.00	3 Reviews	XS, S, M, L, XL	Blue, Green, Pink
Eos V-Neck Hoodie	As low as \$54.00		XS, S, M, L, XL	Blue, Green, Orange
Leah Yoga Top	As low as \$39.00		XS, S, M, L, XL	Orange, Pink, White
Radiant Tee	As low as \$22.00	3 Reviews	XS, S, M, L, XL	Blue, Orange, Pink

- **Active Dot Border Color:** choose the active dot border color.
- **Active Dot Text Color:** choose the active dot text color.

**Note:** Customers can scroll through their desired page by entering the page number in the box below the scroll dots.

## IV) Back To Top Button

When you scroll to the bottom and want to go back to the top immediately, a back to top button is essential. In this extension, we don't integrate the back to top button. But don't worry because we provide it for free as a separate extension. You just need to click on [this link](#) to install and customize it for your Magento 2 store within a few minutes.

## V) Support

If you have any questions or need any support, feel free to contact us via the following ways. We will get back to you within 24 hours after you submit your support request.

- Submit [contact form](#).
- Email us at [support@magezon.com](mailto:support@magezon.com).
- Submit a [ticket](#).
- Contact us through [Skype](#): support@magezon.com.
- Contact us via live chat on our [website](#).
