I) Introduction

This document is the User Guide for Magento 2 Magezon Page Builder. It describes the extension functionality and provides some tips for a quick start.

**Magento 2 Magezon Page Builder** is a better and easier way you can do to create your e-Commerce websites. A much less complicated way that couldn’t be imagined before.

In this guide, we’ll give you an overview of Magezon page builder’s specific elements as the core ones are described in this detailed instruction.
II) Element list

To go on our builder interface, click on the backend demo then choose the page or block you want to edit.
- Home Page
- Static Block
- Product Description
- Category Description
The Element grid will appear after clicking on the plus button of the builder. Our Element Grid will look like this with 9 core elements and 42 additional ones which will be listed as following.
III, Product

1 Product Slider
1.1 Condition Tab

We choose Home Page builder as default builder and will talk about the additional elements in this page.

First, it comes to the Condition Tab of Product Slider
Set the product source and the order.
This case we choose the Latest Product **Source**

Choose Alphabetically **Order By**
1.2 Carousel Options Tab
Set the configure of the Carousel Options Tab like this.
There’s several On - Off buttons (Loop, Center, Right to Left, Auto Height, Mouse Drag, Touch Drag, Pull Drag, Number items per Column) that can be easily set and see right from the back and. Don’t forget to set the Colors of Text Color and Background Color when they are in Normal, Hover or Active status.
Then, hit the blue Save button and the orange Save button on the top right of the builder.
1.3 Product Options
Decide which information of the product you would like to present in the front by turning on the buttons (Name, Price, Image, Review, Add To Cart, Short Description, Wishlist Link, Compare Link)
And, this is the result on the store front
2. Product List
2.1 General Tab

In the general Tab, fill in the **Widget Title** and **Widget Description**. Set the **Title Alignment** and **Title Tag** to fit your design. Decide whether to **Show Line** or not.

![Product List Settings](image)

**Widget Title**
