1) Introduction

Clipboard Plugin helps save tons of time creating a website. Freely Copy/Paste or Move content along with their settings in one page or even across domains. No need to leave the current backend editor.

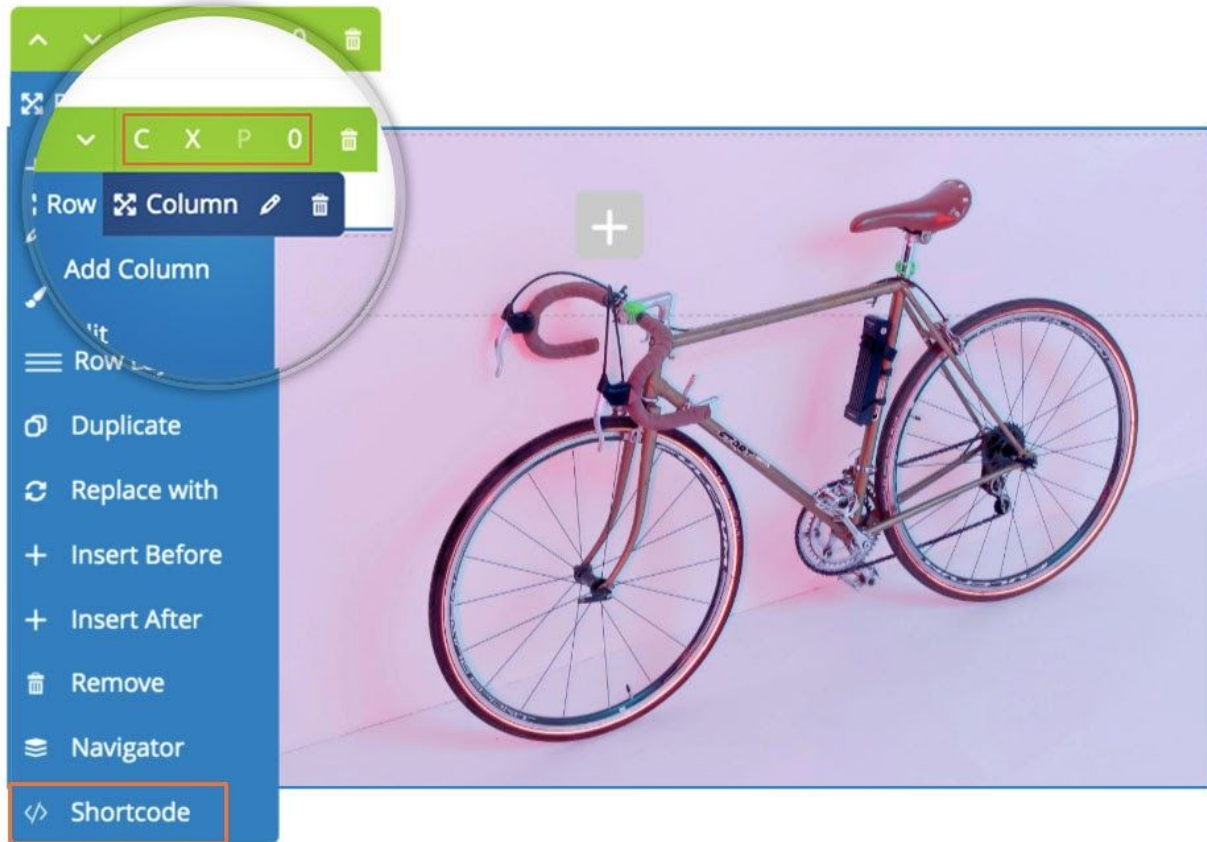

- Copy/Cut Content Individually
- Copy/Cut the desired sections in bulk
- Cut Command Helps Move Content Around
- Paste Copied Content Anywhere of The Same Page
- Copy Content Across Pages Using Shortcode
- Works Well With all Magezon Builder Extensions

Clipboard is a plugin of [Magezon Page Builder](#) extension. Please pre-install Magezon Page Builder. After that, install Clipboard plugin and it will be integrated with existing Magezon Page Builder & All other [Builder Extensions](#) on your website.

II) Where to find the Plugin

After the plugin is installed, the function **Copy, Cut, Paste, Action Counter** and **Short Code** will be displayed in the drop-down.

Hover the cursor on any element and you will see:

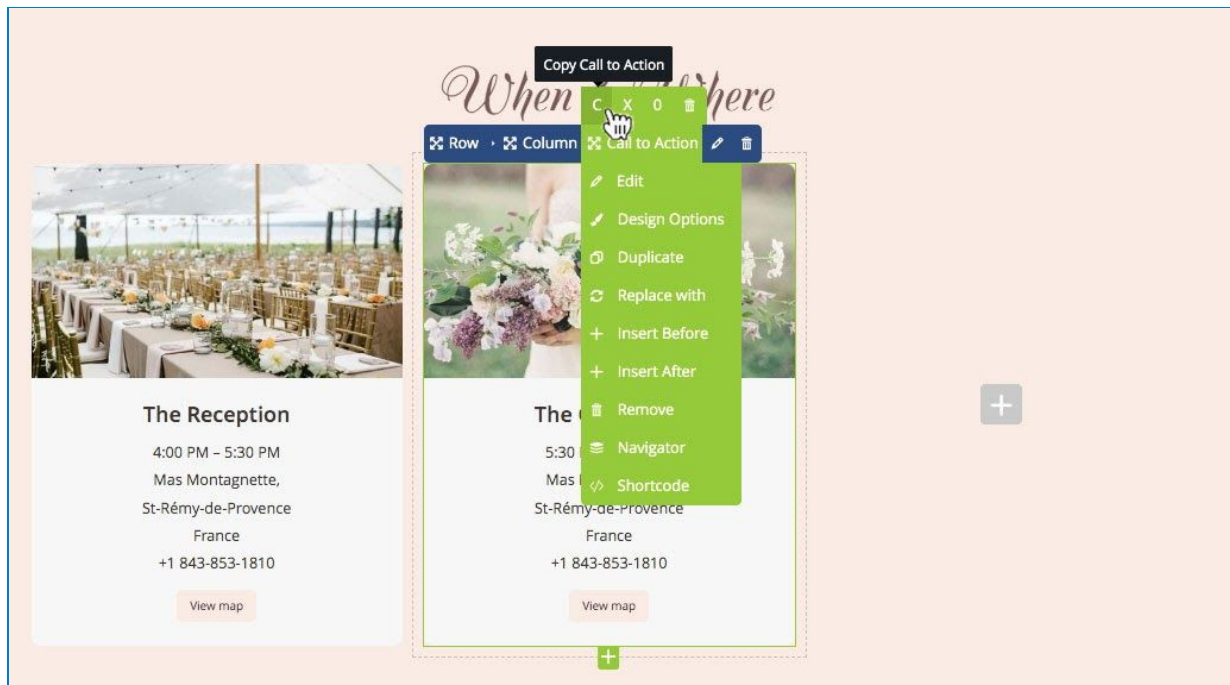

III) How to use

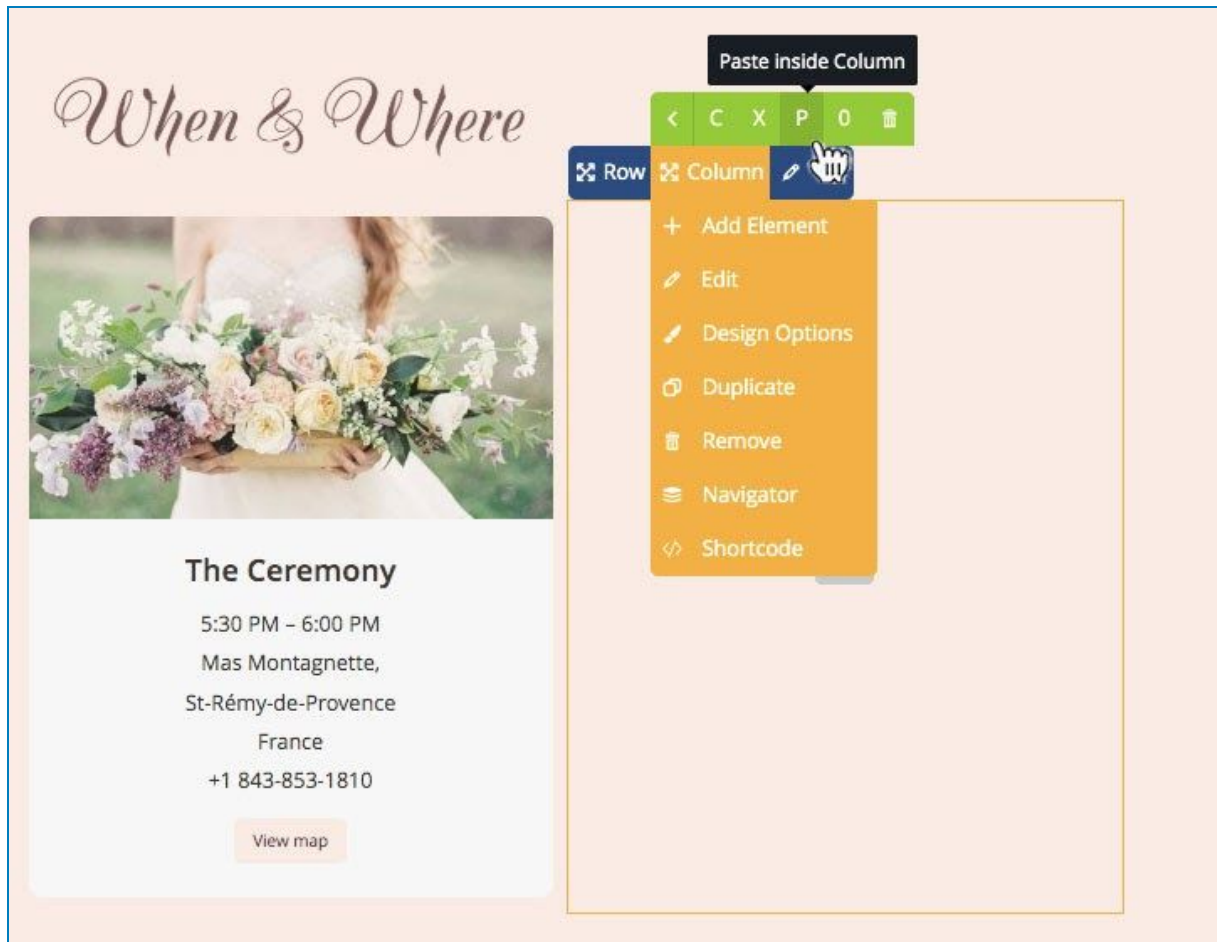

1. Copy/Cut/Paste content inside a page

1.1 Copy single content

For example, you want to duplicate a column like below. Hover the cursor on it to see the drop-down. Click the **C** button for the Copy function.

Then, move to the desired place (The column next to it, for instance). Hover the cursor onto the column then hit **P** to Paste it.

When done, you will have 2 columns with exactly the same appearance.

When & Where

The Reception
4:00 PM - 5:30 PM
Mas Montagnette,
St-Rémy-de-Provence
France

1.2 Copy content in bulk

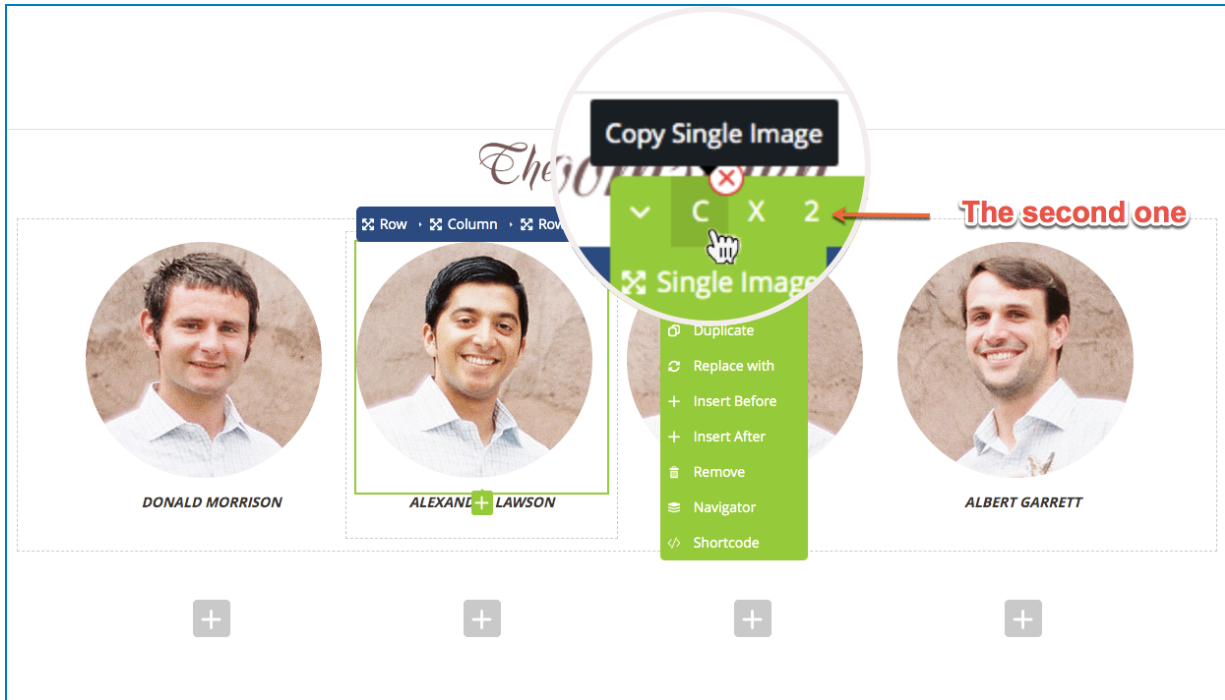

To copy a stack of content elements, click Copy to add multiple rows, columns or elements to the Clipboard. Do this action over again to copy as much content as you want.

The **Action Counter** will count whenever you use Copy function with an element.

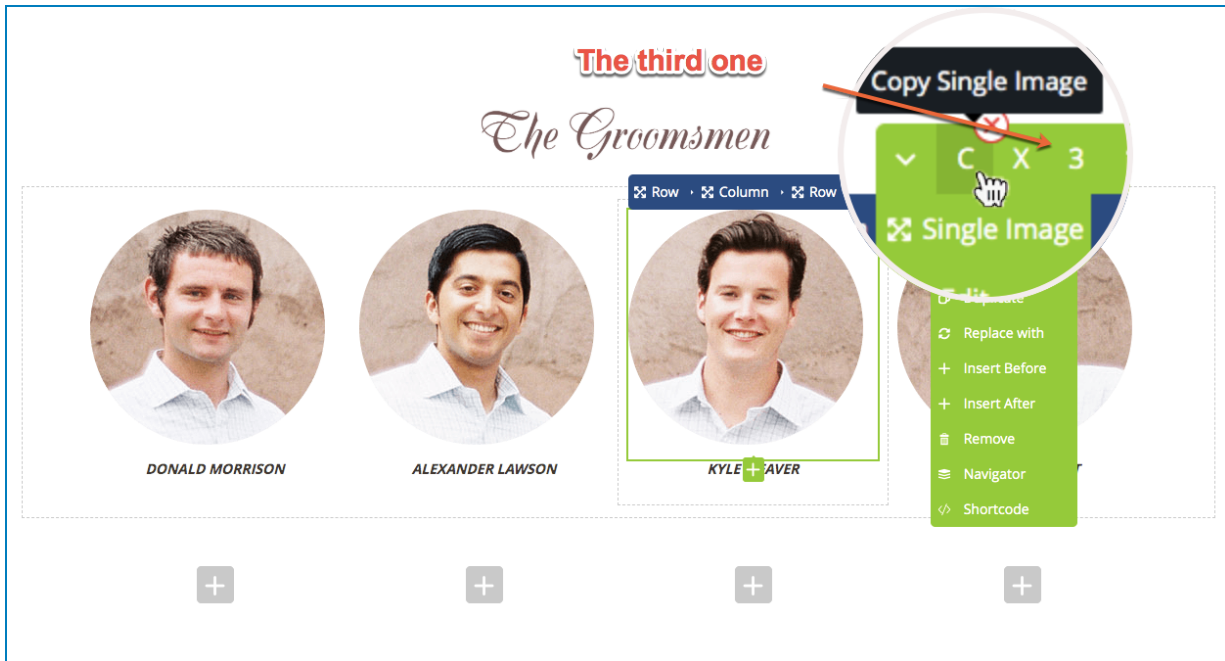

The first Single Image

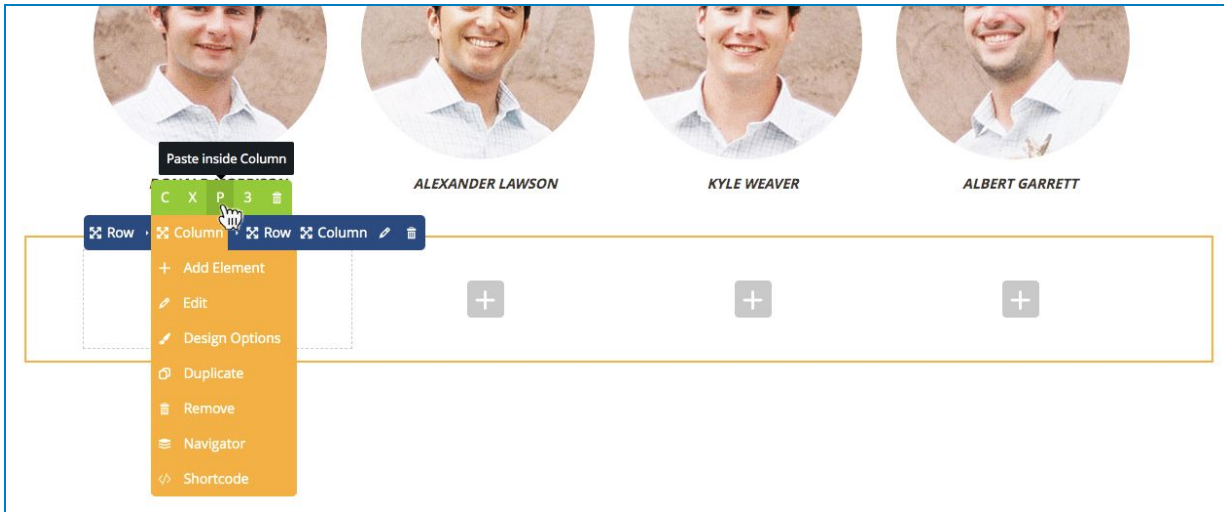

The second one

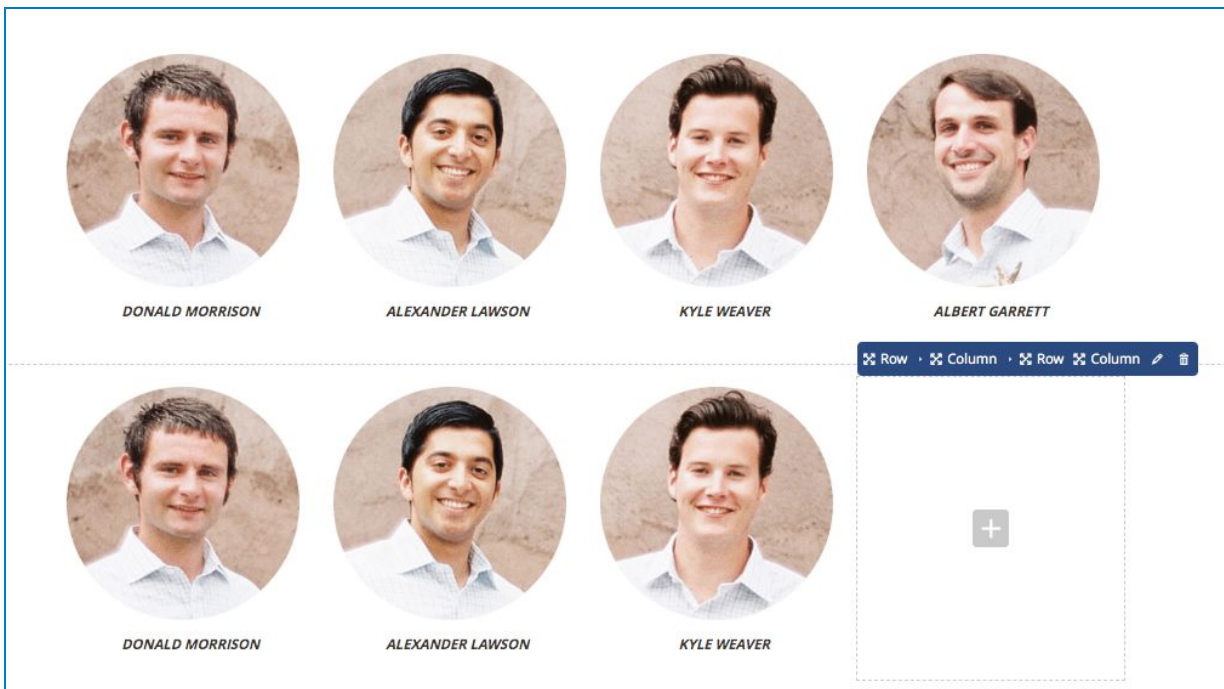

The third one

Then, Paste the content inside Clipboard to the following row or wherever you want

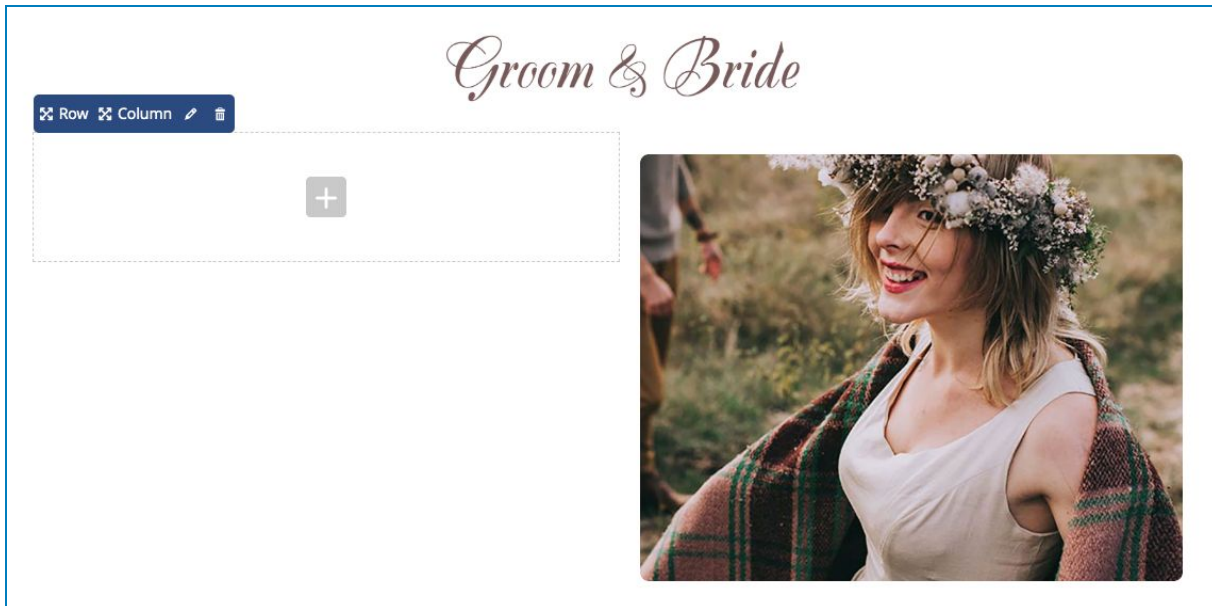

The result after finish:

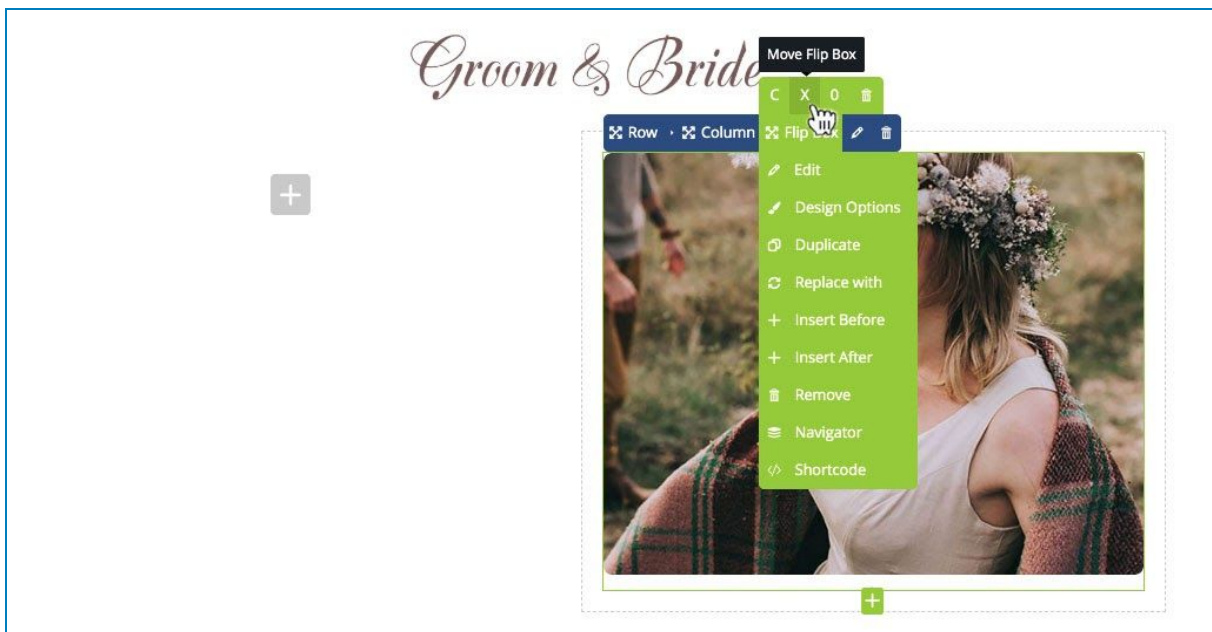

1.3 Move single content

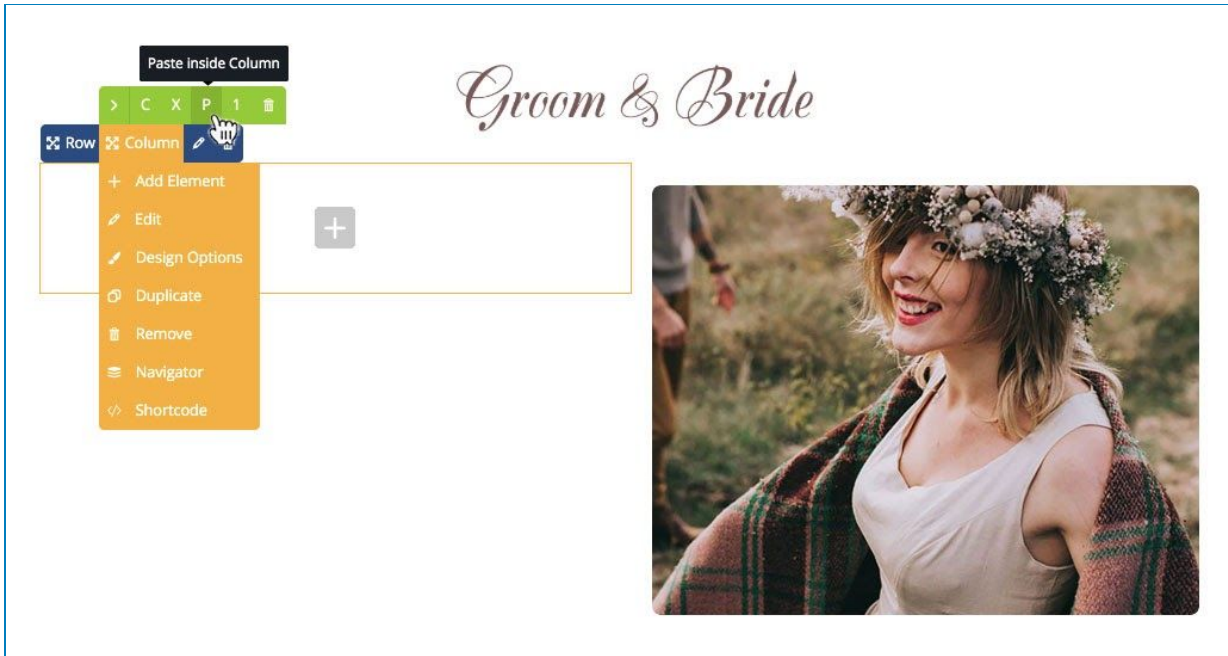

You wanna move an element from this place to another, use the Cut/Paste function.
Try moving the bride image (Flipbox Element) to the left column.

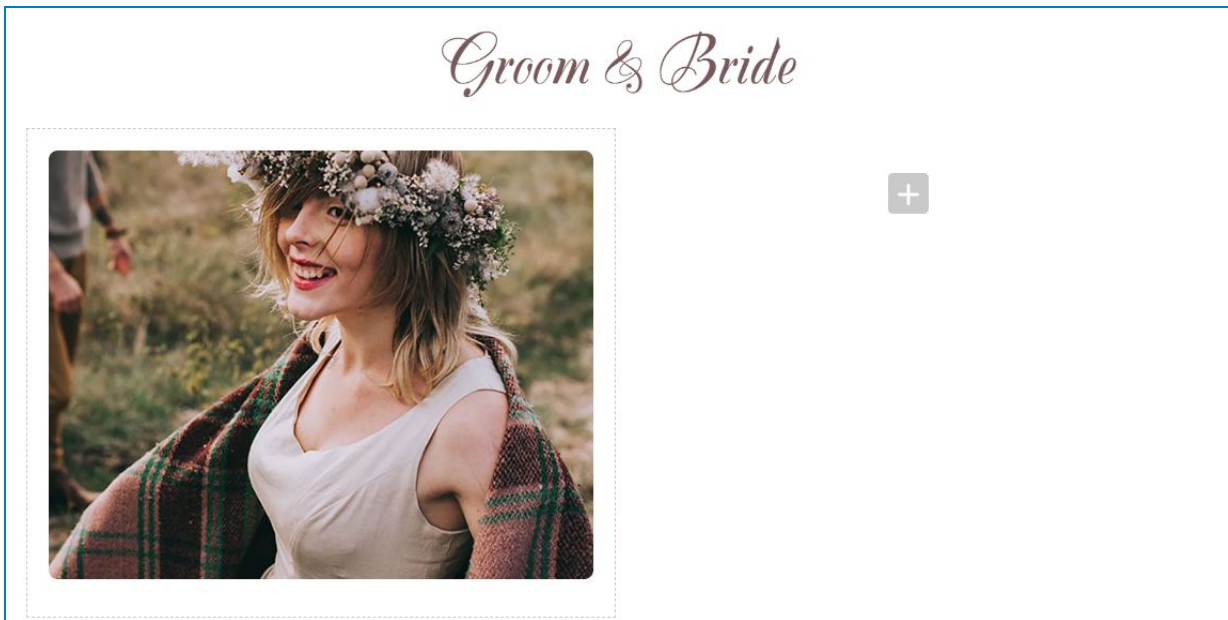

Hover the cursor onto the Flipbox, click **Cut**

Paste it into the left column

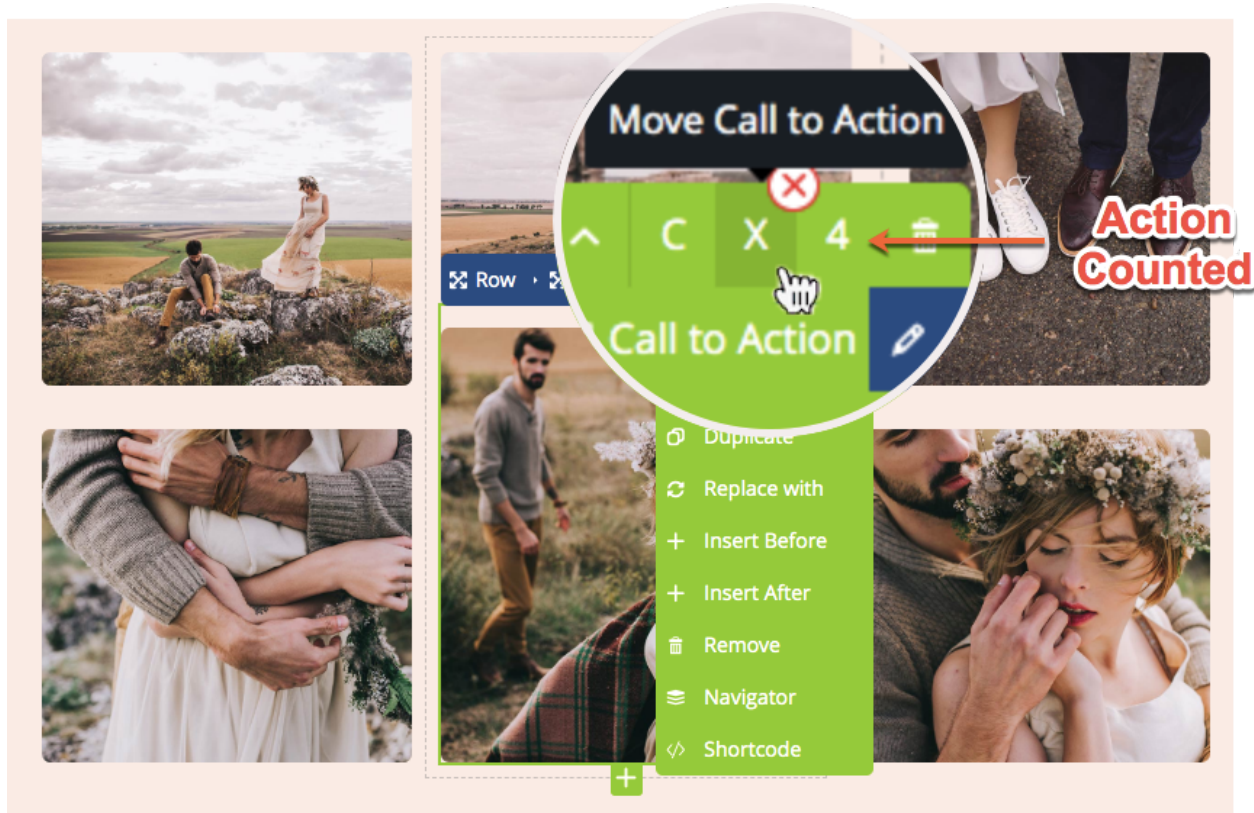

Then the result be like:

1.4 Move content in bulk

Just the same as what you do to *Copy content in bulk*. However, instead of clicking on **C** (Copy function), you need to click on **X** (Cut function).

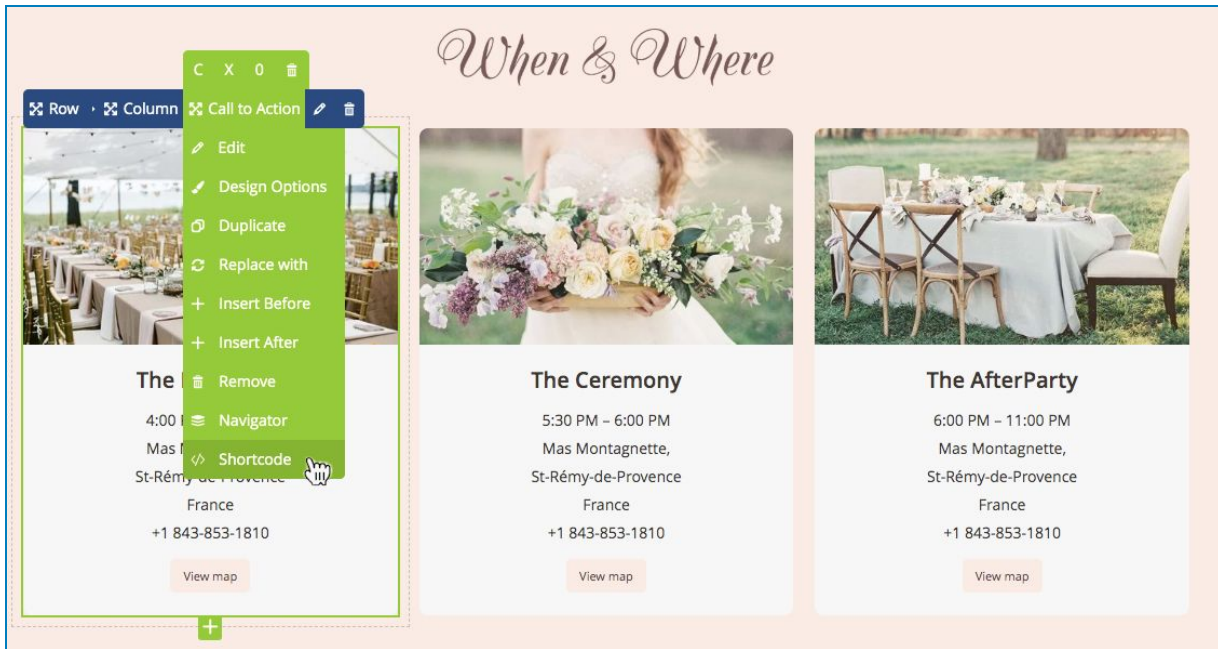

2. Copy/Paste between pages or domains

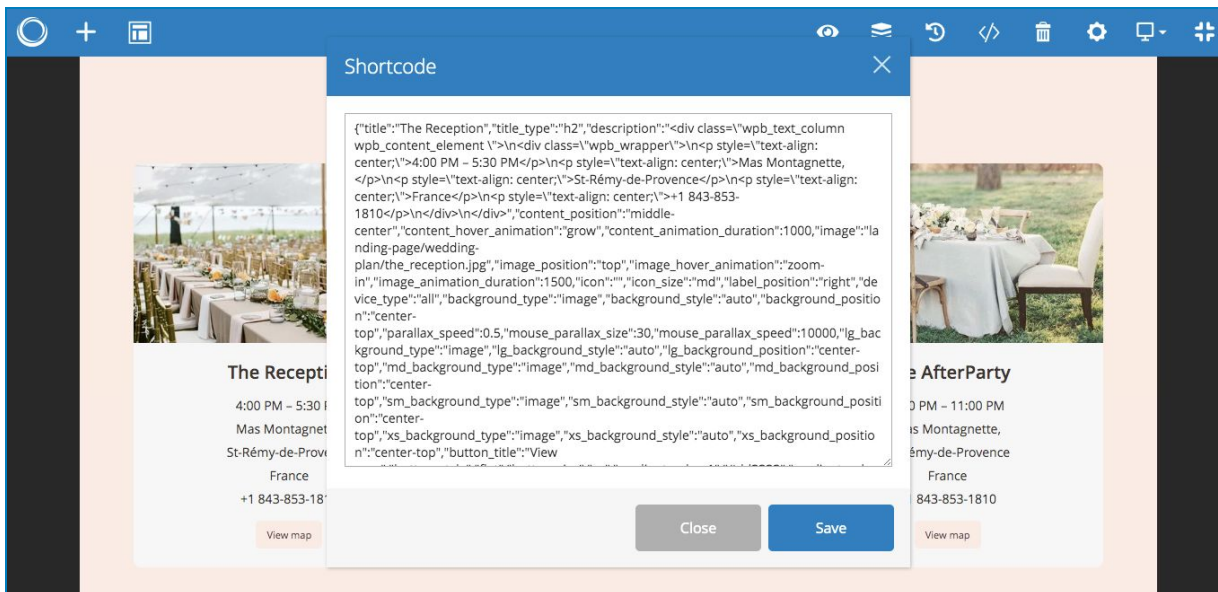

It's time to use our last function of the plugin: Shortcode.

Try copying some content from the **Wedding Plan** demo page to the **Veggy Farm** page.

Step 1: Hover onto the desired element, click Shortcode

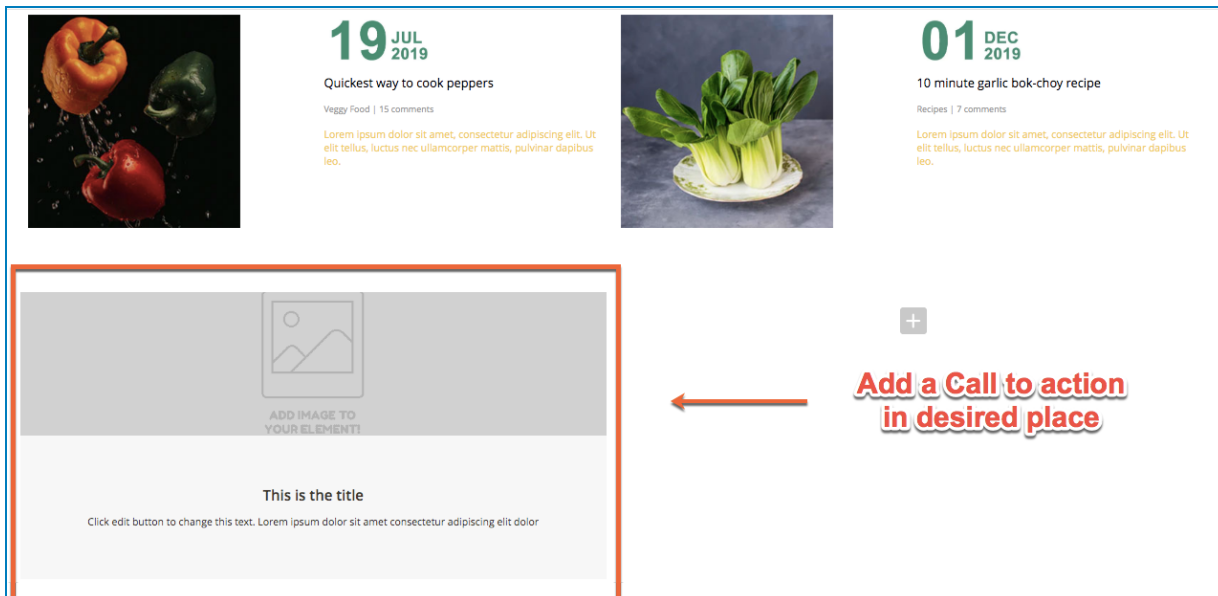

Step 2: You will see a pop-up containing the element's code

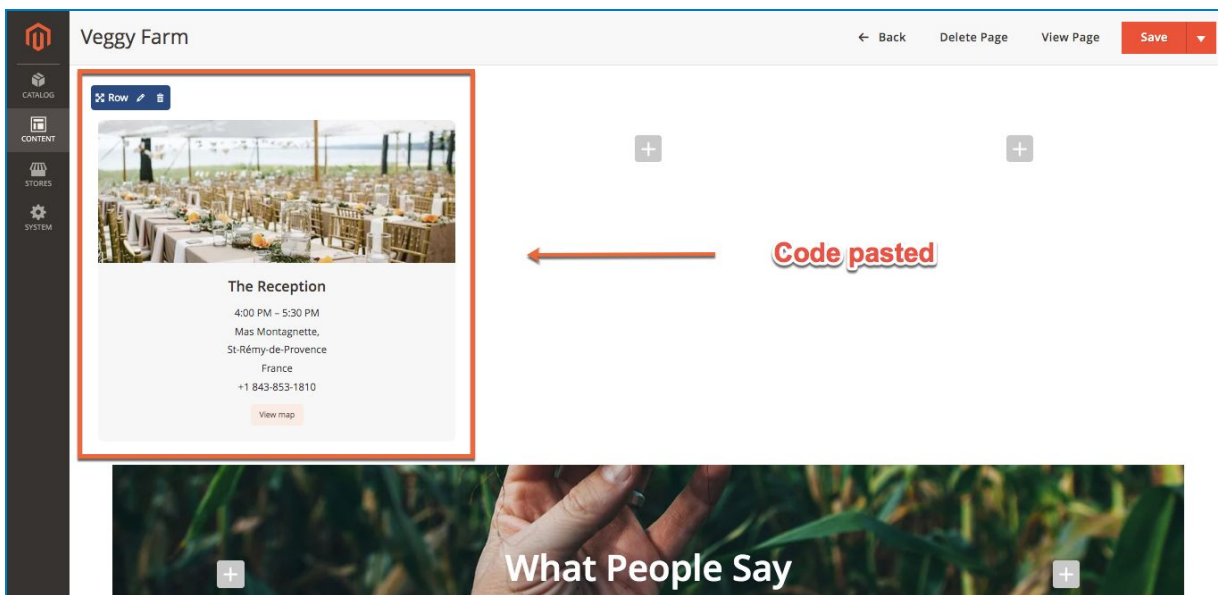

Select all the code inside and copy

Step 3: Move to the Veggy Farm page, add a **Call to Action (CTA)** element in your desired place

Step 4: Open the Shortcode box of the new CTA created, paste the code inside. The result will look like this

Note: Before pasting code to the new page, be sure you've created the SIMILAR ELEMENT. The code only works with the same type of element.

IV) Support

If you have any questions or need any support, feel free to contact us. We will get back to you within 24 hours since you submit your support request.
