## I) Introduction

**Configurable Product Matrix Extension for Magento 2** allows customers to add multiple configurable product variants to their carts at once via a visual option matrix. This will help improve user experience and boost your conversion rates.

- Enable the matrix view for all or specific configurable products
- Add more than one product variant to the cart at once
- Display for specific customer groups
- Display old price, stock status, and stock quantity in the matrix table
- Fully responsive for all devices
- Compatible with [Ajax Cart](#) extension

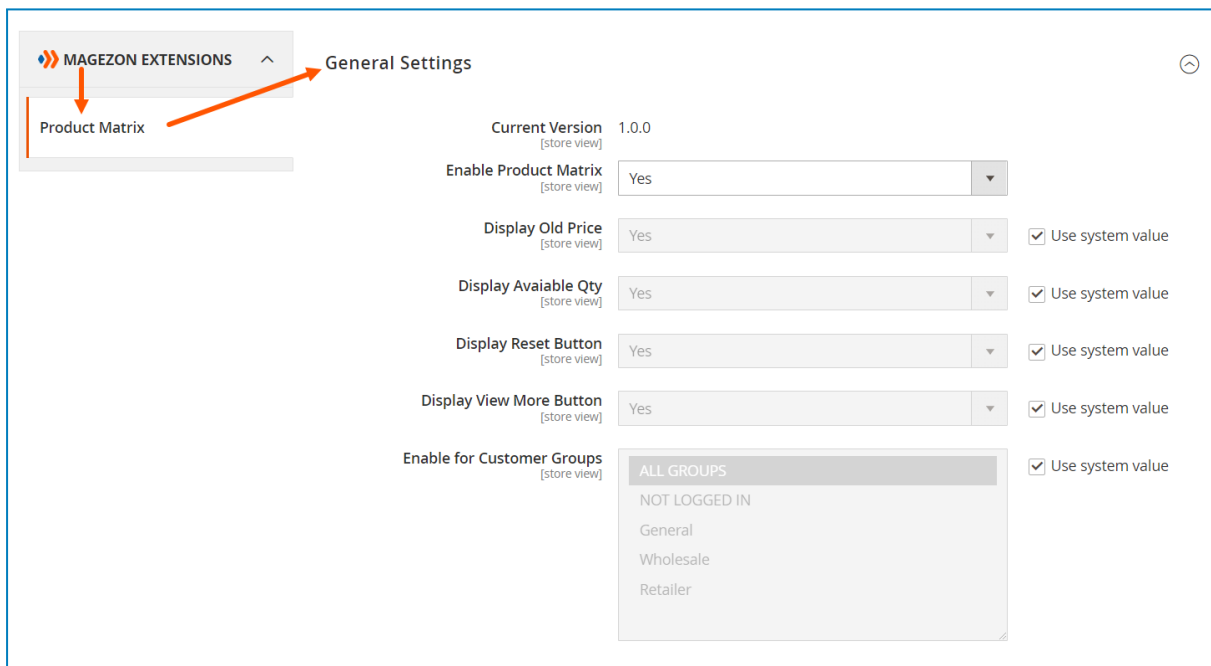

## II) Configuration

After installing the extension, navigate to **Stores > Settings > Configuration:**

In the left admin panel, span **MAGEZON EXTENSIONS** and click **Product Matrix**.

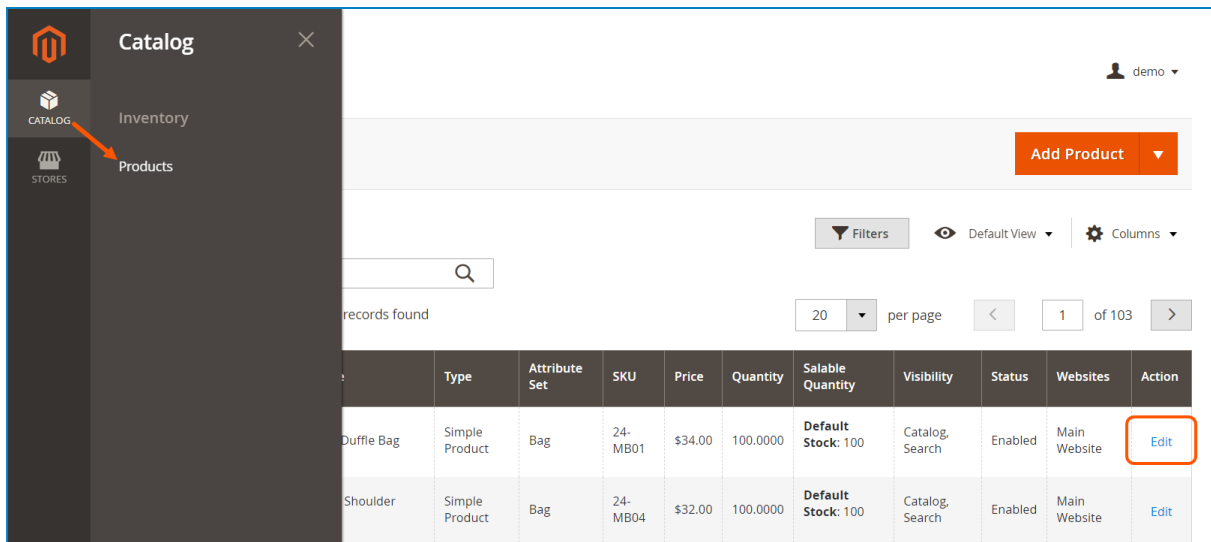

You will see **General Settings** in the right section:

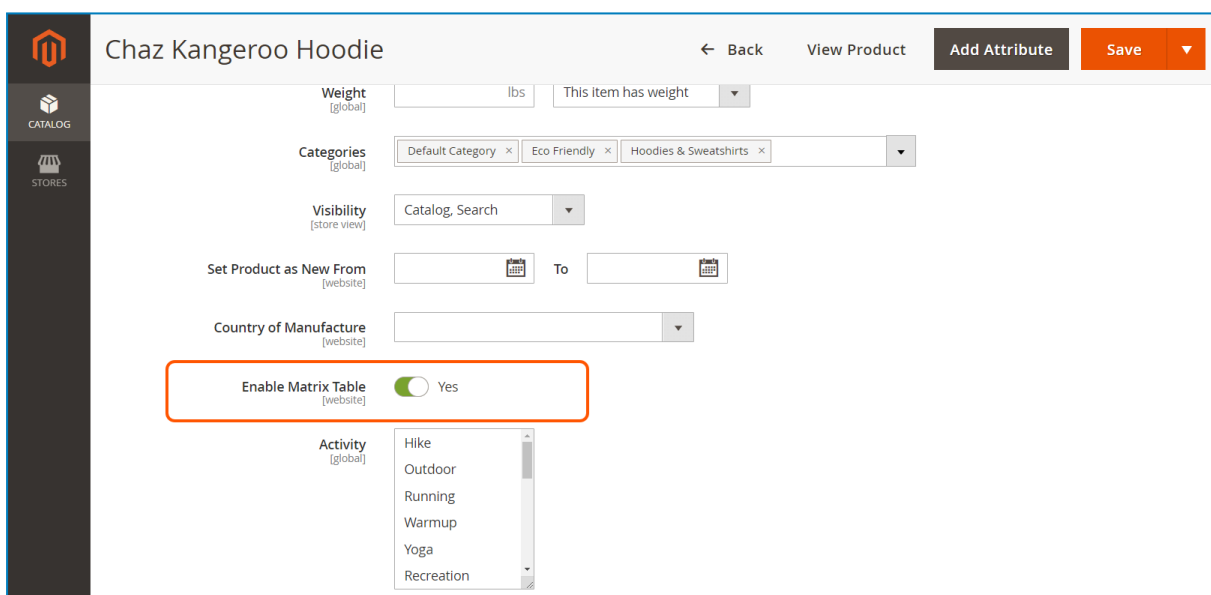

- **Current Version:** Let you know the current version of the extension.
- **Enable Product Matrix:** Choose Yes to enable the extension and the matrix will be applied to all configurable products. Choose No to disable the extension.
- **Display Old Price:** Choose Yes/No to display/hide the special price in the matrix table.
- **Display Available Qty:** Choose Yes/No to display/hide the stock status and available quantity in the matrix table.
- **Display Reset Button:** Choose Yes/No to enable/disable the Reset button.
- **Display View More Button:** This button appears only when the matrix table has a horizontal scroll bar. If customers click the View More button, they can see the entire content of the table without having to scroll and vice versa.
- **Enable for Customer Groups:** Choose the customer groups to show the matrix.

## III) Enable/Disable Matrix Per Product

To enable/disable the matrix for a specific product, navigate to **Catalog > Inventory > Products**. Then choose a product and click **Edit**.

On the product edit page, find the **Enable Matrix Table** button. By default, this button is enabled after completing the [configuration](#) step. If turned off, the matrix will not be applied to this product.

Let's see the matrix table looks on a specific configurable product page.
