I) Introduction

This document is the User Guide for Size Chart Extension. It provides extension functionality and introduces some tips for a quick start.

Size Chart extension for Magento 2 is a powerful tool that allows shop owners to create a useful website and enrich customers' purchasing as well as restrict returns. It offers a function to add a size chart to their eCommerce website which helps clients can easily calculate their size and quickly choose the fit products. As a result, your online store can increase purchasing.

- Create and add multiple metrics to the chart
- Enable to locate the display position of the size chart
- Flexible to add additional information on every product
- Flexible convert parameters
- User- friendly with informative chart
- Allow admin to config all the feature function
- Allow customers to calculate their size quickly
- Easy to use and install
- Easy to custom size chart color and button type
- Fully responsive design

II) Where to Find Extension

After downloading and installing the extension, from the backend navigate **Catalog > Size Chart > Profiles** where you can find all created size charts and create a new one:

	Name	Description	Display Type	Priority	Created Date	Update Date	Is Active	Action
	Profile 1		Display below Options	0	2020-09-15 09:56:06	2020-09-17 06:34:56	ENABLED	Select
	Profile 2		Display below "Add To Cart"	0	2020-09-15 09:58:10	2020-09-17 06:36:06	ENABLED	Select
<input type="checkbox"/>	3	International	Profile 3		2020-09-16 01:59:01	2020-09-17 06:47:23	ENABLED	Select
<input type="checkbox"/>	4	International	Profile 4		2020-09-16 02:10:18	2020-09-17 06:47:21	ENABLED	Select
<input type="checkbox"/>	5	International	Profile 5		2020-09-16 02:13:11	2020-09-17 06:47:18	ENABLED	Select
<input type="checkbox"/>	6	International	Profile 6		2020-09-16 06:49:45	2020-09-17 06:47:16	ENABLED	Select
<input type="checkbox"/>	7	None	Profile 7		2020-09-16 08:03:54	2020-09-18 03:17:34	ENABLED	Select

III) How to Use

To create a useful size chart, below are the guidelines for you to control it.

We already created some Size Charts which are listed below with detailed information such as name, displayed type, etc. Click **“Add Size Chart”** to add a new size chart.

1. Profiles

1.1 Size chart information

To set all parameters of the size chart, you will need to fill in all these required fields in the “**Size Chart Information**” tab.

Click on “**Is Active**” to activate the size chart on the product page first. Then, configure all the settings for the Size Chart in this tab.

- **Size Chart Name:** Enter the name of the Size Chart for your product.
- **Size Description (Optional):** Enter brief information about the chart.
- **Display Type:** 3 options to locate the size chart includes: Display in below Options, Display below “Add To Card”, Display as tab.
- **Size Standard:** Choose your product size standard for your product which is set on the “**Size Standard**” tab. The size which is shown on the screen, can calculate the exact customer’s clothing size.

SIZE CHART

Measure yourself and find the suitable size!

BUST
Measure at the fullest point of chest

WAIST
Measure around your smallest part of your torso (between your bust and naval).

HIP
Measure around the fullest part of your rear (just above your upper thigh).

p POWERED BY TINY

1.2 Conditions

You are able to apply a rule to set conditions to display the size chart on your product page by using various product attributes such as SKU, Quantity, etc.

- **Preview product:** Show the products which meet the rules in **Conditions**. Thus, you can check whether your products are right or not.

For example: If you choose SKU as a condition, you will have to enter the product SKU like below.

The preview will be displayed like the following images:

SIZE CHART GENERAL

Size Chart Information

Conditions

Conditions

Apply the rule only if the following conditions are met (leave blank for all products).

If ALL of these conditions are TRUE :

- SKU is MJ01

2. Standard

In this section, you will make your size standard with specific values that can be matched with the **products**. Therefore, customers can be calculated exactly their size.

We already created a **Size Standard** named “International”, you can also add a new standard for each product by clicking on “**Add Size Standard**”.

1 records found

<input type="checkbox"/>	ID	Name	Created	Modified	Action
<input type="checkbox"/>	1	International	2020-08-12 06:29:55	2020-08-12 06:29:55	Select

- **Size Standard Name:** Name the standard size (eg: International, Women standard, Men' Suit standard, etc.).
- **Size Unit:** Select the units of measurement (centimeters/ inches/ feet).
- **Weight Unit:** Select the units of measurement (kilograms/ pounds).
- **Size Standard Form:**
 - **Standard Value:** Set the size product with its value (eg: S, M, L, etc.).
 - **Metrics (from-to):** Enter the number or value for each size that will be calculated on the display size chart.
 - **“Add”:** Add more value to the chart.

Size Standard Name *

Size Unit *

Weight Unit *

Standard Values *	Weight, Width from (kg,...) *	Weight, Width to (kg,...) *	Height from (cm,...) *	Height to (cm...) *	
<input type="text" value="S"/>	<input type="text" value="50"/>	<input type="text" value="55"/>	<input type="text" value="160"/>	<input type="text" value="165"/>	🗑️
<input type="text" value="M"/>	<input type="text" value="55"/>	<input type="text" value="62"/>	<input type="text" value="165"/>	<input type="text" value="168"/>	🗑️
<input type="text" value="L"/>	<input type="text" value="62"/>	<input type="text" value="72"/>	<input type="text" value="168"/>	<input type="text" value="175"/>	🗑️
<input type="text" value="XL"/>	<input type="text" value="72"/>	<input type="text" value="77"/>	<input type="text" value="175"/>	<input type="text" value="180"/>	🗑️
<input type="text" value="XXL"/>	<input type="text" value="77"/>	<input type="text" value="85"/>	<input type="text" value="180"/>	<input type="text" value="185"/>	🗑️
<input type="text" value="XXXL"/>	<input type="text" value="85"/>	<input type="text" value="95"/>	<input type="text" value="185"/>	<input type="text" value="190"/>	🗑️

And, the following is an example of the Size Chart which is in “**Display below Options**” type on the product page. When customers enter their weight and height on the boxes then click “**Show Result**”, the machine will automatically calculate their size. On the frontend, we created some buttons with units of measure for each option that can allow flexible conversion, so clients can choose the suitable one.

The result is calculated depending on the value that you set on the “**Size Standard**” tab.

Size chart

Suit size	Weight	Height	*Choose your units of measure	
XS	40 - 45	150 - 155	Weight : <input checked="" type="radio"/> kg <input type="radio"/> pound	
S	46 - 50	156 - 160	Height : <input checked="" type="radio"/> cm <input type="radio"/> feet	
M	51 - 55	161 - 165	<input type="radio"/> inches	
L	56 - 65	165 - 170	Weight (kg) Height (cm)	
XL	66 - 75	171 - 175	<input type="text"/> <input type="text"/>	
XXL	76 - 90	176 - 190	Size for you: ...	

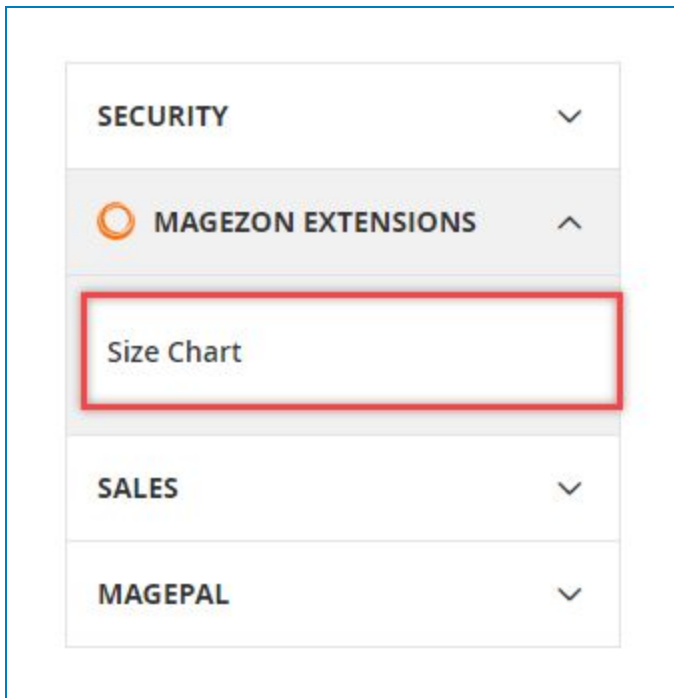

Show Result

Ok

3. Size Chart Configuration

To manage the size chart button color, button text, or other settings to create a stunning size chart button, navigate to **Stores > Settings > Configuration**.

On the Configuration window, select “Size Chart” in “Magezon Extensions” tab:

- To enable this module, select “**Yes**” on the **General** tab.
- **Size Advisor:** Enter size name and the metrics that apply in the chart (eg: weight, height).

The screenshot shows the configuration interface for the 'Size Chart' module. It is divided into two main sections: 'General' and 'Advisor'. In the 'General' section, the 'Current Version' is 1.0.0, and the 'Enabled' status is set to 'Yes'. In the 'Advisor' section, the 'Size Name' is 'Suit size', 'Metric 1' is 'Weight', and 'Metric 2' is 'Height'. A 'Save Config' button is located in the top right corner.

Section	Field	Value
General	Current Version	1.0.0
	Enabled	Yes
Advisor	Size Name	Suit size
	Metric 1	Weight
	Metric 2	Height

Here is the result on the frontend:

- **Standard Table:** Customize your size chart color.
 - **Size Name Background:** Set background color for headings of the chart.
 - **Table Background 1:** Set background color for rows of the table.
 - **Table Background 2:** Set background color for rows of the table.
 - **Text Color:** Set color for text in headings.
 - **Value Color:** Set color for values inside chart.

Standard Table ⌵

Size Name Background [store view]

Table Background 1 [store view]

Table Background 2 [store view]

Text Color [store view]

Value Color [store view]

The color of Size Chart will be shown on the frontend like this:

The image shows a size chart with a table and a form. The table has three columns: Suit size, Weight, and Height. The rows represent sizes from XS to XXL. The table background is light blue, and the header row has a darker blue background. Red arrows point to various elements: 'Size Name Background' points to the 'Suit size' header, 'Text Color' points to the 'Height' header, 'Table Background' points to the table body, and 'Value Color' points to the height values in the last row. To the right of the table is a form with the following elements:

- *Choose your units of measure
- Weight : kg pound
- Height : cm feet inches
- Weight (kg)
- Height (cm)
- Size for you: ...
- Show Result button

Suit size	Weight	Height
XS	40 - 45	150 - 155
S	46 - 50	156 - 160
M	51 - 55	161 - 165
L	56 - 65	165 - 170
XL	66 - 75	171 - 175
XXL	76 - 90	176 - 190

- **Button Settings:**

- **Title:** Enter the size chart button name.
- **Font Size:** Enter font size of the title.
- **Font Weight:** Enter font weight of the title.
- **Type:** Select display type of the button. There are 6 types: Default, Modern Button, Flat Button, 3D Button, Gradient Button, Outline Button.
- **Text Color:** Set the color for the text in the button.
- **Text Color Hover:** Set the color for text in the button when hovering.
- **Background Color:** Set the background color for the button.
- **Background Color hover:** Set the background color for the button when hovering.
- **Box Shadow (For 3D Button only):** Set the shadow's color for the button.
- **Box Shadow Hover (For 3D Button only):** Set the hover color of the shadow for the button.
- **Background Color Left (For Gradient Button only):** Set the background color for the button.
- **Background Color Right (For Gradient Button only):** Set the background color for the button.
- **Border Size (For Outline Button only):** Enter the border size of the button.
- **Border Style (For Outline Button only):** Select border style for the button.
- **Border Color (For Outline Button only):** Set the border color for the button

- **Border Radius:** Set the radius for the button border.
- **Enable Custom Icon:** Select “**Yes**” if you want to show the icon on the button.
- **Upload Icon:** Upload the icon which is shown along with the text in the size chart button.

*** Note: Depending on the **Font Size**, the size of the Button will be shown differently on the product page.
